Clay, Daniel C. & Schwarzweller, Harry K. (Dept Sociology Michigan State U, East Lansing 48824), **Introduction: Researching Household Strategies,** *Research in Rural Sociology and Development*, 1991, 5, 1-10.

¶ The introductory comments to this special volume (see related abstracts in this section of SA 41:2) builds on a 1981 symposium on the changing form & function of households & highlights current concerns & directions in research on household strategies in rural contexts. Problems in the earlier research literature are identified. The spatial criterion (residence) & how physical & material factors affect the formation of households, taking into account the role of kinship, are discussed. It is argued that, integrated on the basis of shared economic circumstances, households can be regarded as conceptually detached from notions of filial responsibility. In fact, however, most households are organized along kinship lines, posing a considerable challenge for researchers. 21 References. S. Millett

Davidson, Andrew P. (Dept Sociology & Social Work Northern Michigan U, Marquette 49855), **Rethinking Household Livelihood Strategies,** *Research in Rural Sociology and Development*, 1991, 5, 11-28.

¶ Drawing on fieldwork in the Nuba mountains region of western Sudan, an analysis of household livelihood strategies emphasizes the importance of context & reevaluates the concept "household" in terms of structured sets of social relations. These must be analyzed via the identification of household activities & organizational forms, as well as larger structural forces impinging on each household. When households are situated according to the collective class location of their members, against a backdrop of gender, kinship, & age relations, it is possible to ascertain why certain households come to be associated with particular livelihood strategies. It is argued that the household filters the opportunities & constraints presented by the wider society, but always in conjunction with the needs & power of its respective members. 34 References. S. Millett

Folk, Karen Fox, Nickols, Sharon Y. & Peck, Claudia J. (Division of Family & Consumer Economics U Illinois, Urbana-Champaign 61801), **Social-Psychological Factors Related to Work Status of Rural Women,** *Lifestyles*, 1989, 10, 4, winter, 325-343.

¶ Interview data are used to examine sex-role attitudes, perceived needs, & work status in a sample of 400 rural women, ages 16-64. Findings reveal that a combination of social-psychological, human capital, & economic factors best discriminates between employed workers & homemakers-unpaid workers. Employed rural women have more education, lower household income net of own earnings, greater psychological needs, & more approving husbands' attitudes than rural homemakers & unpaid workers. Unpaid workers are not significantly different from full-time homemakers in sex-role attitudes, needs, age, religion, education, household income, & husbands' attitudes. These findings document the importance of social-psychological as well as economic factors in relation to rural women's work roles. 2 Tables, 2 Figures, 50 References. Freund, Bill (Dept Economic History U Natal, Durban 4001 South Africa), **The Rise and Decline of an Indian Peasantry in Natal,** *The Journal of Peasant Studies*, 1991, 18, 2, Jan, 263-287.

¶ A description of the rise & fall of a free peasantry of Indian immigrants in Natal, South Africa, 1860-1970, based on secondary data & government reports. This peasantry consisted of market gardeners & sugar cane farmers, who exhibited intense market commitment & family labor exploitation. These farmers grew as a group after 1860 & flourished 1900-1920. After 1920, their numbers declined, due to apartheid policy & competition from large-scale white farmers who began transporting produce by rail to Durban. The Indian farmers were not included in government farm support policies until after 1960. Lessons for postapartheid land reform policy are considered. 2 Maps, 37 References. Griswold, Wendy (Dept Sociology U Chicago, IL 60637 (e-mail: wendy@clio.spc.uchicago.edu)), **The Writing on the Mud Wall: Nigerian Novels and the Imaginary Village,** *American Sociological Review*, 1992, 57, 6, Dec, 709-724.

¶ Characteristics of the Nigerian village novel & the literary system underlying this genre are described, showing how a common picture of African rural life before & after the colonial encounter has been shaped by the exigencies of literary production. Interviews with 50 Nigerian novelists & several British & Nigerian publishers, along with a survey administered to 100+ Nigerian novelists, produced the data. Benedict Anderson's notion of "imagining" the community (*Imagined Communities. Reflections on the Origin and Spread of Nationalism*, revised edition, London, England: Verso, 1991 [1983]) is drawn on to put forth three hypotheses: the traditional African village is as imaginary as any other community; it is & was imagined through a fictional genre–the village novel–forged by outsiders; & this fiction transforms history into myth in ways that are politically & socially problematic. The case of the village novel illustrates the impact of global cultural production systems on aesthetic creation. 2 Tables, 1 Figure, 46 References. Adapted from the source document.

Gutman, Graciela E. (24 rue D'Aubigny, F-91140 Villebon-Yvette France), **Relaciones agroindustriales y cambio tecnológico en producciones alimentarias en la Argentina** (Agroindustrial Relations and Technological Change in Food Production in Argentina),

Desarrollo Económico, 1991, 30, 120, Jan-Mar, 495-522. (SPA)
The relationship of food production to the process of technological ange in the agroindustry is analyzed, using data on recent production namics & three important agroindustrial subsystems in Argentina airy, oil-producing grains, & citrus fruits). Technological change has splaced natural resources as the principal means of gaining a long-term mpetitive advantage in agriculture. This shift has brought with it the ternalization of many functions previously assumed by the self-fficient rural producer, the differentiation & hierarchization of rural tivity, a rise in new intersectorial articulations, & a growing export ori-ntation. In the process, the rural producer has become more productive, it remains a passive slave to technological change. 6 Tables, 31 Refer-ces. Adapted from the source document.

Hernandez Pedraza, Gladys C., El sector agrícola en China (The Agricultural Sector in China), *Economía y Desarrollo*, 1990, 20, 3(116), May-June, 96-109. (SPA)
In 1978, economic reforms in the People's Republic of China were med at decentralizing levels of decision making & attracting foreign apital. These changes affected planning, production, & consumption stems. Statistical data indicate that stable economic progress was ade until about 1984, when an imbalanced distribution of national in-ome resulted in a gap between the supply & demand for products. In the gricultural sector, in particular, the 1978 reforms meant conversion to system of family agriculture, an increase in prices for agricultural prod-cts, & a new system of commercialization. However, in 1984, agricul-ural exports began to slip due to problems with the price-fixing system, gricultural contracts, state investment in the sector, the commercializa-ion of products, land tenancy, & emigration of the rural population. In griculture & other sectors, a reform is needed that more properly con-ects the objective conditions for development (the immense population & the insufficiency of cultivatable land) with the methods selected for levelopment. It is concluded that substantial changes are necessary in China's economic policies if the forces of production are to be revitalized. 3 Tables. M. Pflum

Lobao, Linda M. & Meyer, Katherine (Dept Agricultural Economics & Rural Sociology Ohio State U, Columbus 43210-1099), **Consumption Patterns, Hardship, and Stress among Farm Households**, *Research in Rural Sociology and Development*, 1991, 5, 191-209.
¶ An examination of household adaptations to farm crisis & change & the social-psychological costs such adaptations have for women & men. From the social-psychological, gender, & political economy literatures, the correlates of stress among farm women & men are identified: objective, situational conditions (farm structure, social-demographic characteristics, & characteristics of the household), as well as factors mediating these conditions--household adaptive strategies, perceived hardship, & social support. Data obtained via telephone interview & mail questionnaire from 485 of their wives in 1988 reveal that stress arises when households reduce consumption to meet adverse financial demands & when farmers perceive hardship in the attempt to do so. Women report making a greater number of household adjustments & greater economic hardship than men; however, when these latter variables are controlled, there are no significant gender differences in stress levels. 2 Tables, 36 References. Mansurnoor, Iik Arifin (Dept History U Brunei Darussalam, Bandar Seri Begawan 3186), **Local Initiative and Government Plans: *Ulama* and Rural Development in Madura, Indonesia**, *SOJOURN*, 1992, 7, 1, Feb, 69-94.
¶ Conflicts between Indonesia's central government planners & local communities are explored in an attempt to explain why national programs often encounter implementation problems at the local level. In Madura, *Ulama* (Muslim religious leaders & scholars) rely on complex hierarchical social networks according to which they mediate between the local & outside worlds. Their role as opinion leaders is crucial to understanding how various positions are adopted at the local & supralocal levels; it is by controlling information that the *Ulama* can determine local understandings of & responses to governmental programs. Implications for planning in other developing countries are assessed. 21 References. Adapted from the source document.

Mazur, Robert E. (Iowa State U Science & Technology, Ames 50011), **Rural Household Strategies in Mali and Zimbabwe: Labor Allocation and Migration**, *Research in Rural Sociology and Development*, 1991, 5, 87-111.
¶ Data from structured agroeconomic & demographic surveys undertaken in villages in Mali in 1979 (N = 151 respondents [Rs]) & Zimbabwe in 1984 (N = 174 Rs) are drawn on to investigate the influence of 4 sets of factors on patterns of labor allocation & migration: institutionalized policies & their legacy, household socioeconomic status, household demographic composition, & individual social/demographic characteristics. Results reveal that local nonagricultural income-earning activities can partially substitute for migration, but that agricultural labor does not. Household size is positively associated with migration. In both countries, rural socioeconomic differentiation was either introduced or exacerbated by colonial policies, & persists today. Access to moderate amounts of land diminishes the tendency toward migration, while near landlessness or having large landholdings increases it. Similar findings concern differences in cultivation & traction technology: in both cases, the poorest & richest farming households are pushed & pulled, respectively, to nonagricultural economic activities & migration. In contrast, small-scale "middle peasant" farmers are relatively successful in producing food & cash crops, individually & through labor exchange, though this is contingent on at least modest landholdings, inputs, & technology. 6 Tables, 51 References. Parker, Eugene (Dept Geography U Maryland, College Park 20742), **Forest Islands and Kayapó Resource Management in Amazonia: A Reappraisal of the *Apêtê***, *American Anthropologist*, 1992, 94, 2, June, 406-428.
Reply, 441-443.
¶ Darrell Addison Posey's ("Keepers of the Forest," *Garden*, 1982, 6, 18-24) concept of *apêtê* & its importance for Gorotire Kayapo natural resource management practices in Brazil is reexamined through plant collection at three independent sites, two of them previously studied by Posey. The original concept of *apêtê* suggested that the Gorotire Kayapo transplanted plant species & managed ecotones to create & maintain forest islands as food depots & sources of ecological diversity. No empirical evidence was found to support these claims. *Apêtê* sites did not display greater ecological diversity than natural forest island sites, & the vast majority of plants found were not transplanted, but were common to the research site or the surrounding area. The concept of transplanting was also repudiated by conversations with villagers in the area. In **Reply to Parker**, Posey clarifies misconceptions of his research methodology, questions Parker's own field conditions, data, analyses, & lack of historical context, & suggests that the study is based on invalid ethnobiological concepts & distortion of published research. 6 Tables, 6 Figures, 28 References. Pfeffer, Max J. (Dept Human Ecology Rutgers U, New Brunswick NJ 08903), **Labor and Production Barriers to the Reduction of Agricultural Chemical Inputs,** UM *Rural Sociology,* 1992, 57, 3, fall, 347-362.

¶ Concerns about labor availability are important constraints on the innovativeness & flexibility needed by today's farmers to find alternatives to the use of chemicals in farming. Barriers to the reduction of chemical inputs are explored here, drawing on data obtained during 1991 telephone interviews with 314 farmers in 6 NJ counties. Results reveal that farmers do not perceive labor problems to be as great an impediment as basic production problems, even though additional labor is hard to find. Whether farmers hire workers affects the relationship between perceived labor & production barriers. It is suggested that farm practices be adopted that make the best possible use of available family workers; in lieu of this, family-labor farms would benefit from information that links them to sources of farmworkers. 2 Tables, 1 Appendix, 28 References. Adapted from the source document.

Ramiyar, Ganesh P. & Goode, Frank M. (Pennsylvania State U, University Park 16802), **Technology Adoption on Small Farms,** UM *World Development,* 1992, 20, 2, Feb, 275-282.

¶ Data obtained in a field survey are used to investigate the interrelationships among technological practices adopted by 200 maize-growing farmers in Swaziland. Practices considered include: per hectare application of high-yielding variety seed, basal & topdress fertilizer, insecticides, tractor plowing, plant populations, & average planting date. Results of factor analysis show that three distinct technological packages summarize the above practices. Technology adoption requires simultaneous decisions by farmers regarding the use of practices within a package. Findings imply that understanding interrelationships among practices is important for successful technology planning in developing countries. 3 Tables, 17 References. Schroeder, Richard & Watts, Michael (Geography Dept U California, Berkeley 94720), **Struggling over Strategies, Fighting over Food: Adjusting to Food Commercialization among Mandinka Peasants,** *Research in Rural Sociology and Development,* 1991, 5, 45-72.

¶ Evidence that challenges some previous assertions of African household studies is presented by drawing attention to rapid food commercialization among Mandinka peasants in Gambia. Staple foodstuffs, historically the domain of women, are being rapidly commoditized, a market intensification that may afford new income-earning opportunities for women; both processes necessitate household adjustments that involve competition, conflict, & bargaining. Case materials demonstrate that there may be multiple resolutions to the contradictions offered in the course of agrarian transformation. Central themes involve questions about patriarchy & property. The solitary household as a unit of analysis is rejected in favor of a more dynamic model of gender relations which recognizes that the household is of variable structure, both an outcome & channel of broader social processes, & the site of separable, often competing interests, rights, & responsibilities. 1 Table, 2 Maps, 62 References. S. Millett

Schulman, Michael D. & Cotten, Sheila R. (North Carolina State U, Raleigh 27695), **Saving the Farm: Strategies for Success or Distress,** *Research in Rural Sociology and Development,* 1991, 5, 241-258.

¶ The survival strategies of a statewide sample of 25 farm families in NC are examined using data obtained via telephone interviews, 1987/88. Changes in household labor allocation & finances are evaluated with respect to age, education, level of economic hardship, gross farm income, & whether adaptations have enabled families to remain in farming. Results indicate that, to compensate for their increased financial vulnerability & economic hardships following the 1980s farm crisis, families adopted survival strategies aimed at cutting back expenditures, reducing liabilities, & improving income. It is argued that public policies aimed at addressing the consequences of farm crises tend to concentrate on the financial viability of farming operations & neglect household-level economic hardships. Implications for policies directed at assisting farm operators to remain in agriculture during periods of economic decline are discussed. 3 Tables, 50 References. S. Millett

Connolly, Priscilla, Cruz, María Soledad & Huarte, María Concepción (Dept Sociología U Autónoma Metropolitana Azcapotzalco, 02000 Mexico DF), **Sociología urbana en Azcapotzalco** (Urban Sociology at Azcapotzalco), *Sociológica*, 1991, 6, 15, Jan-Apr, 281-319. (SPA)

¶ An overview is offered of urban sociology research conducted by the Dept of Sociology at the U Autómona Metropolitana Azcapotzalco, Mexico, 1974-present. In the initial phase, the foundation of the program 1974-1978, which was motivated by the university administration's concerns regarding urban problems, the research focus was predominately Marxist, exploring structuralist solutions to social problems. Between 1978 & 1982, the program was integrated, administratively, into the Dept of Sociology, but retained its autonomy due to its emphasis on empirical research & a separate professional orientation, supported by high salaries earned by graduates both in universities & in public organizations. After 1983, salaries for urban sociologists fell, & job opportunities decreased. This & other national & international phenomena have resulted in transformations in theoretical & research focus that are continuing in the 1990s. A list of theses published in this program since 1974 is provided. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Eggers, Mitchell L. & Massey, Douglas S. (Population Research Center U Chicago, IL 60637), **A Longitudinal Analysis of Urban Poverty: Blacks in U.S. Metropolitan Areas between 1970 and 1980**, *Social Science Research*, 1992, 21, 2, June, 175-203.

¶ A previous cross-sectional analysis (see SA 40:1/92Y4816) of the structural causes of poverty among black urban populations supported Charles Murray's theory that generous public aid programs have altered the poor's economic incentives to work & have contributed to unmarried black women having children (*Losing Ground: American Social Policy 1950-1980*, New York: Basic Books, 1984). The analysis was, however, also consistent with William Julius Wilson's competing claims about the localization of poverty, which cited declining manufacturing jobs, suburbanization of employment, & an increase in low-wage service jobs as causes of higher unemployment among the black urban poor, fewer marriageable black men, & higher out-of-wedlock childbearing among blacks (*The Truly Disadvantaged: The Inner City, the Underclass, and Public Policy*, Chicago: U of Chicago Press, 1987). To further test these two theories, a longitudinal analysis is conducted with 1970 & 1980 census data focusing on non-Hispanic blacks in 59 larger SMSAs. A path analysis–including indices constructed with the 7 endogenous variables–does not support Murray's claims, since changes in male employment levels were positively associated with changes in the generosity of public aid benefits. The localization trends argued for by Wilson are strongly supported. The strong relationship between welfare benefit levels & the prevalence of female-headed households in cross-sectional analysis disappears in this longitudinal analysis; this discrepancy may be explained by selective patterns of migration into high-benefit states. 5 Tables, 2 Figures, 42 References. Jang, Sung Joon & Alba, Richard D. (Dept Sociology Ohio State U, Columbus 43210), **Urbanism and Nontraditional Opinion: A Test of Fischer's Subcultural Theory**, UM *Social Science Quarterly*, 1992, 73, 3, Sept, 596-609.
Comment, 610-612, **Reply**, 613-614.

¶ The relationship between urbanism & nontraditionalism predicted in Claude S. Fischer's theory of subcultural urbanism ("Urbanism as a Way of Life: A Review and an Agenda," *Sociological Method & Research* 1972, 1, 187-242) is empirically studied using data from the 1986 US General Social Survey (GSS) of 1,309 respondents. A positive urbanism-nontraditionalism relationship is generally confirmed. However, places of intermediate urbanism, particularly the suburbs, display the highest levels of nontraditionalism; this frequently nonlinear pattern is not predicted by Fischer's theory. Fischer's characterization of suburbs as relatively conventional is questioned. In **Urbanism and Nontraditional Opinion: Another Look at the Data**, Thomas C. Wilson (Gannon U, Erie, Pa) offers an alternative interpretation of the GSS findings, suggesting that population size is positively correlated with greater nontraditionalism. Wilson also equates the urban character of suburbs & central cities. It is concluded that Fischer's subcultural theory is validated by the data. In **Reply to Wilson: Type of Place Matters Too**, Alba (State U of New York, Albany) & Jang suggest that Wilson overemphasized the role of the size variable; they also comment on Wilson's definition of size, & reiterate the claim that the urbanism-tolerance relationship in the US is changing due to changes in population distribution. 2 Tables, 27 References. Klak, Thomas H. & Hey, Jeanne K. (Ohio State U, Columbus 43210), **Gender and State Bias in Jamaican Housing Programs**, UM *World Development*, 1992, 20, 2, Feb, 213-227.

¶ Women head over 40% of Jamaican households & have grave housing needs. Here, women's access to Jamaica's National Housing Trust (NHT), created to finance housing for those most in need, is examined,

revealing two gender biases: (1) The stronger gender bias is created by economic obstacles, cultural prejudices, & institutional rules that prevent many women, especially poorer ones, from becoming eligible for housing loans. (2) Among eligible loan recipients, who are primarily more secure formal sector employees, women have a higher probability of obtaining a loan. In general, while most NHT loans go to state employees, men in both the public & private sectors capture a disproportionate share of NHT loans. 4 Tables, 59 References. Pries, Ludger (Colegio México, 10740 Mexico DF), **Abhängige und selbständige Erwerbsarbeit in Lateinamerika. Eine empirische Überprüfung des Konzeptes vom 'Informellen Urbanen Sektor'** (Wage Labor and Self-Employment in Latin America: An Empirical Test of the 'Urban Informal Sector' Model), *Kölner Zeitschrift für Soziologie und Sozialpsychologie*, 1992, 44, 4, Dec, 655-676. (GER)

¶ To investigate the dual-hierarchical model of the formal & informal sectors of labor in developing countries, open-answer questionnaire data were obtained in 1990/91 from workers (N = 208 self-employed, 292 wage earners) in Puebla, Mexico. Various aspects of the inferior status of the urban self-employed workers are considered. An analysis of education levels, income, work hours, & job stability shows no evidence that self-employed workers are in a worse position than wage earners. Career paths do not reveal the change from wage-earner to self-employment as being more or less voluntary than the reverse. There is a strong tendency for the self-employed to retain this status. The traditional model of the urban informal sector, however, is insufficient to account for all current trends among the self-employed of semi-industrialized countries. 1 Table, 7 Graphs, 46 References. Ray, Dennis M. (School Accountancy & Business Nanyang Technological U, Singapore 2263), **Perspectives on Urban Economic Development,** *Entrepreneurship, Innovation, and Change*, 1992, 1, 1, Mar, 27-56.

¶ Alternative meanings of economic development (ED) in an urban or community context are explored in an attempt to link the vast body of literature on community development in North America to concepts & perspectives about ED in developing countries. Five strategies of community-based ED are identified & evaluated, focusing on the growing internationalization of development policy. ED is also considered in terms of four overlapping historical phases, & it is concluded that an appropriate ED policy must reflect the conditions existing at each phase. 1 Figure, 53 References. Santos, Boaventura de Sousa (U Coimbra, P-3000 Portugal), **Law, State and Urban Struggles in Recife, Brazil,** *Social & Legal Studies*, 1992, 1, 2, June, 235-255.

¶ In an extension of a previous study (eg, see Santos, B. de Sousa, "The Law of the Oppressed: The Construction and Reproduction of Legality in Pasargada Law," *Law & Society Review*, 1977, 12, 5-126) on informal legal & juridical practices in Recife, one of the largest squatter settlements in Rio de Janeiro, Brazil, the use of state legality to defend sociopolitical rights to adequate housing is examined, focusing on the collective dimension & interclass nature of conflicts. Data obtained during 1979 field research are drawn on to analyze the mircrophysics of three urban conflicts, in which the urban subordinate classes relied on the Catholic church, which fashioned legal & political defenses in a three-phrase process, including a defense of the status quo, a social reconstruction of the conflict in favor of the residents, & a "seizing of the law." These urban struggles are located in the world-system context, leading to the observation that social practices of the dominant classes have always involved legal & illegal elements, which the subordinate classes try to redistribute to their benefit. 54 References. Vaiou, Dina (Dept Urban & Regional Planning National Technical U, Athens GR-10682 Greece), **Gender Divisions in Urban Space: Beyond the Rigidity of Dualist Classifications,** *Antipode*, 1992, 24, 4, Oct, 247-262.

¶ Dichotomies in urban research–eg, private vs public space, home life vs politics, domestic labor vs paid employment, reproduction vs production–have caused the absence of gender considerations from urban development analyses. Almost exclusive focus has been placed on issues associated with men & masculinity, due to an emphasis on & valuation of the adult male's activities & experiences of urban development & a corresponding devaluation of those of women–thereby reproducing gender hierarchies & ways of thinking about them. A historically & geographically specific context of urban development is presented–the municipality of Helioupolis in the Greater Athens area (Greece)–to explain how: the boundaries of divisions & dichotomies are transcended in women's everyday lives; how women (& men) are not exclusively identified with either part of dichotomies; & how dichotomies are often intensified, at times by the perceptions & practices of women themselves. 33 References. Vogel, Joachim (Statistics Sweden Welfare Analysis Program, S-11581 Stockholm), **Urban Segregation in Sweden Housing Policy, Housing Markets, and the Spacial Distribution of Households in Metropolitan Areas,** *Social Indicators Research*, 1992, 27, 2, Sept, 139-155.

¶ Segregation in metropolitan areas of Sweden is examined through analysis of data from 1980 & 1985 population & housing censuses, 1978-1988 annual living conditions surveys, 1975-1987 surveys of household income, a 1987 survey of household expenses, & 1979-1988 election statistics. Though Sweden's 1 million-dwelling housing construction program in the 1960s & 1970s resulted in rapid urban expansion, most new residences were rental housing located in high density, peripheral regions of urban areas. Later rebuilding in the central city core resulted in the construction of larger & totally modern dwellings, increasing rents, & price appreciation, & caused the replacement of the older, inner-city, working-class population with wealthy families with middle-class back grounds. Workers, the poor, & social welfare recipients became concentrated in the peripheries. In recent years, this segregation trend has continued & has been accompanied by declining political participation. 2 Tables, 2 Diagrams, 3 References. ——, Classics in Human Geography Revisited, *Progress in Human Geography*, 1992, 16, 1, Mar, 71-73.

Response, 73-74.

¶ A review essay on a book by David Harvey, *Social Justice and the City* (London: Edward Arnold, 1973 [see listing in IRPS No. 67]) In **Commentary 1**, Peter J. Taylor (U of Newcastle upon Tyne, England) points to how the book, following initial publication, must have impressed some as facing an unpromising future. However, Harvey's viewpoint, evolving since the early 1970s, has proven successful over the years, stemming in part from his powerful Marxist autocritique. The book's appeal to liberal, non-Marxists lies in its agenda identifying basic arguments in human geography, which includes original thought exploring theory, space, social justice, urbanism, & knowledge. In **Commentary 2**, Dick Peet (Clark U, Worcester, Mass) highlights Harvey's earlier role in developing the philosophical investigation of space, as a complement to the quantitative revolution in geography of the 1960s. However, the reviewed work stands in sharp contrast to his earlier scientific work, recording the growing intellectual & political realizations that caused him to reject the prevailing social order, valorize the

links between urbanism & social philosophy, & ultimately, interface with critical social theory. In Author's Response, Harvey acknowledges difficulties he encountered in getting published. While his incorporation of oppositional discourses in the same text, today typical of postmodernist argumentation, was unique at the time, he questions the efficacy of the radical practice of geography. 2 References. Ávila, Raúl (Colegio México, 10740 Mexico DF), **Sobre semántica social: Conceptos y estratos en el español de México** (Social Semantics: Concepts and Strata in Mexican Spanish), *Estudios Sociológicos,* 1991, 9, 26, May-Aug, 279-314. (SPA)

¶ An attempt to characterize quantitatively & qualitatively referential & semantic differences in two social strata of speakers of Mexican Spanish: blue-collar workers & low-income farm laborers; & the higher stratum of teachers, politicians, intellectuals, & white-collar workers. Analysis of unstructured interview data collected across Mexico (N not specified) reveals that the lower stratum used a high % of words that refer to concrete objects, while the higher stratum used more abstract referents. Also compared was the frequency of use of sets of words associated with various semantic fields: (1) the human being–values & psychological attributes, the body, & its necessities; (2) society–institutions & their functions, culture & education, interpersonal relationships, & entertainment; (3) occupation–services; (4) surroundings–natural & manmade settings; (5) temporal references; & (6) objects–natural & manmade. The most frequent words in the lower stratum were related to food, & the least frequent to culture & education. In the higher stratum, the opposite situation was found. It is concluded that the referential differences between the two strata, though striking, are not necessarily universal in scope: they exist primarily in societies like Mexico, in which there are wide socioeconomic differences. Education could narrow these differences. 1 Appendix, 36 References. Modified AA

Bamiro, Edmund O. (Dept English U Maiduguri, Nigeria), **The Social and Functional Power of Nigerian English,** *World Englishes,* 1991, 10, 3, winter, 275-286.

¶ Nigerian Pidgin English (NPE) as it is used in the novels of Wole Soyinka (eg, *The Interpreters,* London: Heinemann, 1966) & Chinua Achebe (eg, *Anthills of the Savannah,* London: Doubleday, 1987) is examined within the parameters of sociolinguistics & social psychology. It is shown that NPE is an indicator of social tensions in Nigeria. NPE becomes a symbol of the solidarity of the dominated & of their contempt for the dominant group. Analysis reveals the dynamics of exploitation & the role played by codes of the lingua franca. 24 References. Adapted from the source document.

Béal, Christine (La Trobe U, Bundoora Victoria 3083 Australia), **'It's All in the Asking': A Perspective on Problems of Cross-Cultural Communication between Native Speakers of French and Native Speakers of Australian English in the Workplace,** *Australian Review of Applied Linguistics,* 1990, supplement 7, 16-32.

¶ Cross-cultural encounters in the workplace often lead to negative stereotyping because of different social & linguistic rules of interaction. Based on data taped in on-the-job contexts, cross-cultural communication between native French speakers living in Australia & Australian English speakers (N unspecified) are examined, with focus on exchanges of requests. Three major causes of communication conflict are clarified: (1) differences in politeness strategies, (2) differences in the assessment of what counts as a "face-threatening act," & (3) oppositions between "face" wants & other wants. 12 References. Adapted from the source document.

Bull, Tove (School Languages & Literature U Tromsø, N-9000 Norway), **Women and Men Speaking: The Roles Played by Women and Men in the Process of Language Shift,** *Working Papers on Language, Gender and Sexism,* 1991, 1, 1, Apr, 11-24.

¶ An analysis of linguistic data collected from persons age 60+ in a small, bilingual, northern Norwegian village. The original population of the area was Sami (ie, Lappish), but during the last century a process of language shift from Sami to Norwegian has taken place, partly due to a strict official policy of Norwegianization. Consequently, children growing up in the area today are mostly monolingual. The role of females is analyzed in light of the contradictory traditional hypotheses about females being conservative (high maintenance rate) yet socially mobile (high rate of language shift). It is concluded that context should always be considered in interpretive accounts of gender & language use. Findings show that even though males seemed to have a higher Norwegian competence than females, due to the devision of labor between the sexes, females were the leading group in carrying out the language shift. But at the same time, they also maintained the highest degree of what may be considered Sami substratum elements in their Norwegian speech. This is still the case & seems rather paradoxical. A tentative explanation for these puzzling & contradictory findings is proposed. 8 Tables, 10 References. AA

Clayton, Susan (U Paris VII, F-75221 Cedex 05 France), **A Word Defined Speaks a Mind: Social Images of Male Homosexuality in Dictionaries,** *Franco-British Studies,* 1991, 12, autumn, 55-75.

¶ In a comparative survey of terms used to define male homosexuality in French & English dictionaries over the last 100 years, both societies' received ideas & judgments are measured. Although both share the same cognitive outlook, the effect of England's stricter statutes on homosexual acts is visible in the emotionally charged wording & the lack of sufficient information for purposes of clarity. The objectives of clarity of the dictionary were not often met in this area of vocabulary. The overlapping of sexual morality & ideas about sickness is examined. Guidelines for the coining of words free of negative connotations are provided. 20 References. M. Perdoux

Cordella, Marisa (Dept Romance Languages Monash U, Clayton Victoria 3168 Australia), **Apologizing in Chilean Spanish and Australian English: A Cross-Cultural Perspective,** *Australian Review of Applied Linguistics,* 1990, supplement 7, 66-92.

¶ Investigated here are strategies & semantic formulas used by Chilean Spanish speakers & Australian English native speakers (N = 22 & 20, respectively, ages 17-30) in the act of apologizing in a role play between an "employee" & a "boss." Analysis reveals that Chilean & Australian cultural values affected the act of apologizing. Chileans did not use the strategy "explicit expression of apology" as often as Australians, & they seemed to provide more explanations than Australians during the apology. Gender also influenced speakers of both languages. 10 Tables, 4 Figures, 2 Appendixes, 43 References. Adapted from the source document.

93Z7931

Corson, David J. (Ontario Instit Studies Education, 252 Bloor St West Toronto M5S 1V6), **Social Justice and Minority Language Policy,** UM *Educational Theory,* 1992, 42, 2, spring, 181-200.

¶ In discussing social justice & language policy, considerable room must be left for a collectivist account of social justice, if policymakers are to give sufficient recognition to language's essential role in allowing & promoting communicative interaction between social groups. After presenting the three broad conventional discussions of social justice, which see the individual person as the starting point for analyzing the criteria for a just society, a developed conception of social justice is presented, based on the discourse ethic of Jürgen Habermas, which offers a more collectivist account; it gives prominence to the justice needs of groups of people who are distinctive in some way. Psychological & anthropological studies linking gender with moral orientation, or exploring ethical values among the members of non-European cultures, add weight to this more collectivist view, which also runs parallel to a developed conception of liberalism in allotting criterial weight to membership of a cultural community when making a just distribution of benefits & burdens. An example of this conception is offered as it might be applied to matters of minority language policy, showing how an integration of Habermas with the critical realist ideas of Roy Bhaskar can lead to a more just outcome in making policies that extend to the culturally & socially different. Modified AA

Craig, Colette G. (U Oregon, Eugene 97403), **Language Shift and Language Death: The Case of Rama in Nicaragua,** UM *International Journal of the Sociology of Language,* 1992, 93, 11-26.

¶ Language shift & language death are discussed in relation to the Rama people of the Atlantic coast in Nicaragua. A sociolinguistic synopsis of the region is presented with special focus on population changes & the present state of Rama language use. A historical review of the Rama people & the decline of the language is examined. Also discussed is the current status of the language, & a search is made for signs of language decay that would demonstrate the impending death of the language. Creole languages that have arisen to replace Rama are reviewed, & it is concluded that Rama is following two patterns attributable to language death: the shift from Rama to Creole, & the disruption of traditional lifestyles among the small number of remaining Rama speakers. An epilogue discusses recent efforts to restore Rama teaching in schools & other efforts to rejuvenate the language; positive results are outlined. 6 Tables, 34 References. H. L. Stidger

Davis, William E. (Teaching Resources Center U California, Davi 95616), **Comparing Language Proficiency Scores and Student Evalua tions to Determine Policy for International Teaching Assistants,** U *College Student Journal,* 1991, 25, 4, Dec, 489-495.

¶ Most US universities test the oral English proficiency of internationa teaching assistants (ITAs) for hiring or supervision purposes using stan dardized tests. Here, the oral English proficiency of 27 ITAs, as mea sured by the Speaking Proficiency Assessment Kit (SPEAK)–the most commonly used standardized test–was compared with evaluations by their students. Even though SPEAK scores were positively associated with evaluations of communication & teaching quality, it is concluded that the practical value of SPEAK scores for policymakers is limited SPEAK provides useful information to those selecting or supervising ITAs, but by itself is unable to predict with any precision which ITAs will be successful. 1 Table, 16 References. Adapted from the source document.

93Z7935

Dingwall, Silvia (Zürich U, CH-8057 Switzerland), **Leaving Telephone Answering Machine Messages: Who's Afraid of Speaking to Machines?,** *Text,* 1992, 12, 1, 81-101.

¶ An examination of some of the special characteristics of messages left on telephone answering machines (TAMMs) as "discourse types." Letters, telephone conversations, & TAMMs are compared along several dimensions that point up both similarities & differences. TAMMs share some characteristics of both other forms, as reflected in the language used in leaving messages. Sample data collected in Switzerland are discussed. TAMMs are more like letters than telephone calls, in that they are both potentially permanent, allow interaction between producer & receiver, but provide potential for the producer to plan what is to be said, & are relatively independent of immediate context. TAMMs & telephone conversations are alike in that the final product in both cases is oral, & on-line production time is limited. 1 Table, 1 Figure, 24 References. Adapted from the source document.

93Z7936

Dunn, John A. (U Oklahoma, Norman 73019), **The Tsimshian Calendars,** UM *International Journal of the Sociology of Language,* 1992, 93, 27-36.

¶ The Tsimshian language of northern coastal British Columbia & southeast Alaska is examined with focus on its endurance in the face of encroaching Anglo lifestyles. Particular attention is given to lexico-semantic areas focusing on the Tsimshian calendar. Calendar texts collected by various researchers over the last century are analyzed & exemplified. Protective responses initiated by the Tsimshian community in an attempt to save their language include myth-based reinvention, amalgamation of the calendar, & attempts to salvage & preserve archaic vocabulary. A summary provides a synopsis of major points & concerns, & it is concluded that the Tsimshian people demonstrate tenacity in their resolve to revitalize their calendar & language. 10 Tables, 8 References. Eckert, Penelope & McConnell-Ginet, Sally (Instit Research Learning, Palo Alto CA 94304), **Think Practically and Look Locally: Language and Gender as Community-Based Practice,** UM *Annual Revie*

of Anthropology, 1992, 21, 461-490.

¶ In investigating the interaction between gender & language, two theoretical frameworks have been used: gender differences & male (M) dominance. In the gender difference framework, the case is made that separation of the sexes has produced distinctly M or female (F) communicative cultures, or that sex is one of several attributes determining social address. In the M dominance framework, the subordination of Fs at personal & institutional levels has suggested linguistic conventions, eg, politeness. Ms are seen as controlling language–misogyny has been evident even in evaluating Fs' speech in the research context. In separately evaluating these two frameworks, the joint construction of difference & dominance cannot be overlooked; both enter into explaining gender-language interactions. 120 References. M. Pflum

Fivush, Robyn (Dept Psychology Emory U, Atlanta GA 30322), **Gender and Emotion in Mother-Child Conversations about the Past**, *Journal of Narrative and Life History*, 1991, 1, 4, 325-341.

¶ Previous research has demonstrated that mothers begin discussing emotions with their children at a very early stage of development. It is probable that the ideas young children form about emotional experience & about themselves are influenced by the evaluative framework in which their mothers place emotional events. To determine whether a child's gender affects how mothers evaluate emotions, mother-child pairs were observed discussing specific past events during which the children (N = 15 boys & 15 girls, ages 2:8-2:11) experienced happiness, sadness, anger, & fear. Evaluation of the results shows that conversations about sadness were longer with daughters, tending to emphasize the causes of sadness & to focus on comforting the child. In contrast, conversations about anger were longer with sons. Mothers proved likely to accept retaliation as an appropriate response to anger for sons but not for daughters, who were encouraged to make peace with offending parties. Furthermore, these emotions were all placed in a more social interactional framework with daughters. This pattern is discussed in terms of its possible effects on the emotional socialization of children. It is suggested that these early differences may be related to gender differences in adults' emotional processing. 6 Tables, 24 References. Adapted from the source document.

Galloway, Brent D. (U Regina, Saskatchewan S4S 0A2), **The Samish Dialect and Straits Salish: Dialect Death and Dialect Survival**, UM *International Journal of the Sociology of Language*, 1992, 93, 37-51.

¶ Examined is the Samish dialect of Straits Salish, a native language spoken in the state of Washington & in British Columbia. Concern is expressed for whether or not this dialect will survive or become extinct. Evidence is presented demonstrating the current status of the dialect. Also discussed are the sociolinguistic reasons for dialect survival, even after the dialect was assumed to be extinct. A historical review of the tribal usage of Samish is given, & research into the derivation & path the language has followed is presented. Reports on interviews with Samish speakers are reviewed, & a detailed analysis of the language is provided. Features of current Samish that could signify dialect loss are delineated. It is concluded that studies focusing on the sign of dialect death can explain questions & anomalies in linguistic information gathered from last speakers. 14 References. H. L. Stidger

Garzon, Susan (U Iowa, Iowa City 52242), **The Process of Language Death in a Mayan Community in Southern Mexico**, UM *International Journal of the Sociology of Language*, 1992, 93, 53-66.

¶ The process of language death in a Mayan community in southern Mexico is investigated. Results of research conducted in Mazapa de Madero, a town in the final stages of language shift from the native Mayan Tektiteko to the popular Spanish language are elaborated. An evaluation as to whether this language shift is a harbinger of the death of the Mayan language is presented, & social & economic pressures contributing to this condition are identified. Historical information & relevant social data on the town & the language shift are reported. Steps in the language death process are identified: (1) an extended period of limited language contact culminating in a period of language shift, (2) a shrinkage of domains for the subordinate language, (3) use of the dominant language by parents with their children, & (4) failure by young people to become proficient in the subordinate language. It is concluded that widespread bilingualism, disappearing domains, parental language shift with children, & rejection of the language by children are all indicators of language death & can be utilized to form a model of the process. 9 References. H. L. Stidger

Goodman, Gail S., Bottoms, Bette L. & Schwartz-Kenney, Beth M. (Dept Psychology State U New York, Buffalo 14260), **Children's Testimony about a Stressful Event: Improving Children's Reports**, *Journal of Narrative and Life History*, 1991, 1, 1, 69-99.

¶ An exploration of age differences in children's ability to reconstruct a stressful event, specifically, receiving inoculations at a medical clinic. Several techniques for improving young children's memory & reducing their suggestibility were also evaluated. Children (N = 70, ages 3-7) were videotaped while receiving oral polio vaccines & inoculations at a medical clinic. To determine whether repeated interviewing was detrimental to children's memory & suggestibility, one group was interviewed about the event twice, once at 2 weeks & again at 4 weeks; another group was interviewed only once at 4 weeks. Children experienced interviews in either a "reinforcing" or "nonreinforcing" condition. Findings support previous research, revealing age differences in children's ability to report a real-life event. Repeated interviews & reinforcement did encourage greater accuracy in reports. Training produced positive results in reducing false identifications on the photo identification task, particularly for older children. No relationship was found between children's accuracy & their parent's ratings of stress. Findings indicate the importance of providing a warm, supportive interviewing style when working with young children. 6 Tables, 68 References. Adapted from the source document.

Hellinger, Marlis (English Dept U Hannover, D-3000 Federal Republic Germany), **Feminist Linguistics and Linguistic Relativity**, *Working Papers on Language, Gender and Sexism*, 1991, 1, 1, Apr, 25-37.

¶ Feminist linguistics & linguistic relativity are discussed in light of the Whorfian hypothesis (Whorf, Benjamin Lee, *Language, Thought, and Reality*, Cambridge: MIT Press, 1956). The centrality of Whorfian ideas to current linguistics & to the re-evaluation of feminist research is discussed. The Whorfian hypothesis is defined in terms of its major role in recent work in cognitive linguistics & its support by current feminist theoreticians. Recent findings on linguistic relativity are presented, & recent studies on generic masculines are examined. It is concluded that Whorfian effects within a language do occur & that lexical & pronominal variation in the use of human referents are important, as demonstrated by the continuance of highly charged discussion on the promotion of nonsexist language. 26 References. Hill, Jane H. & Mannheim, Bruce (Dept Anthropology U Arizona, Tucson 85721), **Language and World View**, UM *Annual Review of Anthropology*, 1992, 21, 381-406.

¶ Due to misinterpretation of the Sapir-Whorf hypothesis on linguistic relativity, language, thought, & meaning were for a time viewed as three discrete phenomena & were institutionalized in different academic disciplines. However, later rereadings of Edward Sapir & Benjamin L. Whorf (eg, Contini-Morava, E., "Form in Language: Sapir's Theory of Gram-

mar" in Cowen, W., Foster, M. K., & Koerner, K. (Eds), *New Perspectives in Language, Culture, and Personality: Proceedings of the Edward Sapir Centenary Conference*, Amsterdam: Benjamins, 1986, 341-364) reaffirmed their openness to universals, & two major branches of neo-Whorfian ethnographers have recognized that language, culture, & meaning are intertwined. One branch of the neo-Whorfians organizes the study of relations among the three phenomena in hypothetico-deductive terms; another branch has a semiotic or interpretive approach. In considering the relationship between language & other forms of knowledge & practice, these new syntheses are healthy. 1 Figure, 242 References. M. Pflum

Hiraga, Masako K. (U Air, 2-11 Wakaba Mihama-Ku Chiba City 261 Japan), **Metaphors Japanese Women Live By,** *Working Papers on Language, Gender and Sexism*, 1991, 1, 1, Apr, 38-57.

¶ An attempt is made to reveal hidden assumptions & evaluations about females implied in conventional metaphorical expressions of modern Japanese, & to show how they have influenced the actual customs & behavior of females & males in Japanese society. *Conventional metaphors* are viewed here as the shared assumptions about reality unconsciously taken for granted by the members of a certain linguistic community. Based on that view of metaphor, metaphorical expressions about females, conventionally used in modern Japanese, are analyzed in the hope of increasing the linguistic awareness about sexism in the Japanese language. 1 Table, 3 Figures, 20 References. Kwachka, Patricia (U Alaska, Fairbanks 99775), **Discourse Structures, Cultural Stability, and Language Shift,** *International Journal of the Sociology of Language*, 1992, 93, 67-73.

¶ Koyukon Athabaskan, spoken in the interior of Alaska, is a dying language, but the rapidity of its passing is relatively unusual for a Native American language. Historical & contemporary ethnographic data are presented, based on field work delineating factors associated with the language's demise. The bases for the Koyukon's strong maintenance of cultural & ethnic identity in the face of linguistic discontinuity are explored, & it is concluded that a dominant form of Koyukon discourse–the narrative–has transferred to the replacement language & thus mediated the language shift. 19 References. Makri-Tsilipakou, Marianthi (Dept English Aristotle U, GR-54006 Thessaloniki Greece), **Doing Disagreement: The Case of Gender,** *Working Papers on Language, Gender and Sexism*, 1991, 1, 1, Apr, 58-87.

¶ An investigation of the effect of gender on the choice of strategies for disagreement in cross-sex conversations between mature, university-educated females (Fs) & males (Ms). Roughly 17 hours of recorded authentic family &/or friendly discourse is qualitatively analyzed on the basis of a theoretical model that combines the notion of "face" with ethnomethodological conversation analysis. Within this framework, disagreement is viewed as the dispreferred–& thus, face-threatening & disaffiliative–second pair part of the adjacency pair initial assessment-agreement/disagreement (Pomerantz, Anita M., "Second Assessments: A Study of Some Features of Agreements/Disagreements," PhD dissertation, 1984) which, although oriented as such by both Fs & Ms, is nevertheless done differently. As a rule, Fs opt for hedged, mitigated "weak disagreement," usually prefaced by pauses & agreement tokens or accompanied by accounts. They also tend to go "off-record" when addressing Ms. Ms, on the other hand, tend either to go "bald-on-record" with their strong disagreement or displace it over a number of turns by employing intraturn delay. On the whole, the two sexes emerge as both paying attention to different aspects of face as well as deploying distinct "positive" & "negative polite" strategies. 64 References. Modified AA

Marriott, Helen E. (Dept Japanese Studies Monash U, Clayton Victoria 3168 Australia), **Intercultural Business Negotiations: The Problem of Norm Discrepancy,** *Australian Review of Applied Linguistics*, 1990, supplement 7, 33-65.

¶ Presented is a study of a videotaped business negotiation between an Australian & a Japanese businessman, supplemented by follow-up interviews with each. Analysis reveals that interactants in such intercultural contexts apply different communicative & sociocultural strategies. In particular, the Australian & the Japanese interactants differed further in their views toward the structuring & content of the proposal. Interactants sometimes evaluate the interaction of the other as inadequate as a result of this disparity between their norms. Some generalizations about Japanese business behavior are confirmed but at the same time many others are called into doubt. 2 Tables, 1 Figure, 2 Appendixes, 29 References. Mills, Sara (Dept English & Drama Loughborough U Technology, Leicester LE11 3TU England), **Discourse Competence: Or How to Theorize Strong Women Speakers,** *Hypatia*, 1992, 7, 2, spring, 4-17.

¶ Claims from feminist linguistic analysis that females' language is powerless are contested. The notion of a feminine speech style associated with femaleness is critiqued. An alternative approach to the relationship between language, gender, & power uses the term "discourse competence" to describe speech that is appropriately competitive & cooperative. From this position, it is possible to theorize strong female speakers without situating them within a system of masculine/feminine opposition. 37 References. Adapted from the source document.

Nihalani, Paroo (Dept English Language & Literature National U Singapore, 0511 Singapore), **Co-Articulation and Social Acceptability: Pragmatic Implications for World Englishes,** *World Englishes*, 1991, 10, 3, winter, 287-293.

¶ The validity of native-like standards as requirements in English is questioned. In particular, reference is made to allophonic variations, which are said to be necessary to maintain phonemic distinctions & social acceptability. It is argued that standards are biased by an exclusive monolingual society viewpoint & that social acceptability is an issue of social identity, not linguistics. Implications for English as a second language curricula in the Outer Circle of World Englishes are discussed. 25 References. Adapted from the source document.

93Z7952

Nilan, Pam, Having Fun and Thinking Deeply, *Working Papers on Language, Gender and Sexism*, 1991, 1, 1, Apr, 88-104.

¶ A framework of feminist poststructuralist analysis is applied to a transcript of an informal interview. The analysis involves a close examination of extracts of talk, using some important concepts from the theoretical framework of ethnomethodology. In the course of talking about her social world, a 14-year-old female articulates two distinct discourses of adolescent femininity in her talk. As an observable conversational strategy, she speaks sometimes as the quiet, intellectual, academically ambitious schoolgirl. At other times in the transcript, she comes across as the teenage girl who just wants to have fun–to go out on the town with a group of girlfriends, drink, dance, rage, & flirt with boys. Each discourse she takes up involves a perceivably different set of behavioral expectations & she makes judgments on the basis of these–judgments that, at first, seem to contradict each other. However, a feminist poststructuralist analysis of her talk in the interview transcript reveals not contradiction or confused thinking, but a cultural construction of adolescent feminine gender identity around the "beauty or brains" dichotomy. 9 References. Pauwels, Anne (Dept Linguistics Monash U, Clayton Victoria 3168 Australia), **Health Professionals' Perceptions of Communication Difficulties in Cross-Cultural Contexts,** *Australian Review of Applied Linguistics*, 1990, supplement 7, 93-111.

¶ Interview data are used to investigate the views of 32 health professionals regarding communication difficulties in cross-cultural contexts. Findings reveal that health professionals who regularly interact with people of diverse cultural backgrounds were more sensitive to the influence of culture on attitudes & behavior of people from a non-English-speaking background in relation to health care. They generally had some difficulty in determining the role of language in cultural misunderstandings when both interactants used the same language to communicate. 1 Table, 1 Appendix, 17 References. Polkinghorne, Donald E. (Division Counseling & Educational Psychology U Southern California, Los Angeles 90089-0031), **Narrative and Self-Concept,** *Journal of Narrative and Life History*, 1991, 1, 2-3, 135-153.

Comment, 155-167.

¶ When the self is thought of as a narrative or story–rather than a thing–the temporal & dramatic dimension of existence is emphasized. The operation of narrative "emplotment" in the shaping of self-concept is examined. Ways in which the self-narrative may decompose under stressful conditions are also considered. Psychotherapy can play a role in helping reconstruct a coherent self-narrative, & to integrate antithetical & complex aspects of lives into a unified whole. In **Conceptualization via Narrative: A Discussion of Donald E. Polkinghorne's "Narrative and Self-Concept,"** Michael Bamberg (Dept of Psychology, Clark U, Worcester, Mass) critiques Polkinghorne's theory of temporality. Problems with the assumption of a universal notion of temporality are noted & some supplements to Polkinghorne's model are suggested. 115 References. Adapted from the source document. Powell, Mava Jo (Dept English U British Columbia, Vancouver V6T 1W5), **Semantic/Pragmatic Regularities in Informal Lexis: British Speakers in Spontaneous Conversational Settings,** *Text*, 1992, 12, 1, 19-58.

¶ A multifunctional lexical perspective provides the basis for an investigation of compositional irregularities in the informally marked lexis of educated, adult British speakers as exemplified in the London-Lund corpus. Twenty face-to-face conversational settings are subcategorized into four formal & twenty informal contexts of situation. All informally marked words & idioms are inventoried & their frequencies noted. It is found that informal settings exhibit much higher frequencies of these items than formal settings. Analysis of the inventory indicates that in addition to evaluative function, three other properties recurred frequently in informal idioms–denotative vagueness, lexical intensity, & lexical expressivity. These four properties were found to be encoded in the vast majority of informal lexical units. The multifunctional perspective is found to be particularly effective in this analysis because it highlights lexical functions that may not be propositionally encoded. 4 Tables, 1 Figure, 69 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z7957

Pye, Clifton (U Kansas, Lawrence 66045), **Language Loss among the Chilcotin,** UM *International Journal of the Sociology of Language*, 1992, 93, 75-86.

¶ All situations of language loss are simultaneously instances of language acquisition. Language loss may be thought of as a case of defective bilingual acquisition. To fully understand the process of language loss, it is necessary to study how children in such situations decide which language to speak. Examined here are factors that influence children's language acquisition in Chilcotin, an Athabaskan language spoken in central British Columbia. Many Chilcotin speakers feel that Chilcotin is still a viable language. A sizeable % of children over 10 can still speak Chilcotin; however, children under 10 only speak English. This seems to be the result of a curious situation of language use: most Chilcotin parents, though fluent in Chilcotin, use English when speaking to children. Some parents feel that English is easier for their children to learn than Chilcotin. Within any Chilcotin house there are likely to be at least three generations. The oldest generation speaks fluent Chilcotin & only broken English. The middle generation is comfortable in either Chilcotin or English, & the youngest generation is comfortable when speaking English. Thus, the majority of Chilcotin babies are brought up within earshot of Chilcotin. Children, therefore, play a significant role in deciding the fate of languages. 2 Tables, 19 References. AA (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Rhodes, Richard (U California, Berkeley 94720), **Language Shift in Algonquian,** UM *International Journal of the Sociology of Language*, 1992, 93, 87-92.

¶ Language shift among Algonquian speakers in the US & Canada is examined with focus on providing explanations for contradictory developments when these languages come in contact with other languages. Aspects of changes identified in languages experiencing replacement in some towns but still functioning in others are delineated. Language function is discussed in terms of social factors that contribute to changes in the communicative requirements of existing language. Mixed languages are analyzed as to their existence & creation. Language shift & composition are discussed, & three general stages in the parallel advancement of language shift & change in language composition are identified. It is concluded that it is vital that research be conducted into Algonquian-speaking communities before other languages (eg, English & French) eradicate the remaining dialects. 12 References. H. L. Stidger (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Riessman, Catherine Kohler (School Social Work Boston U, MA 02215), **Beyond Reductionism: Narrative Genres in Divorce Accounts,** *Journal of Narrative and Life History*, 1991, 1, 1, 41-68.

¶ Limitations of particular forms of representation are examined, based on research about divorce. Three problems related to reduction & representation are discussed: (1) the gender bias resulting from divorce studies based on symptom scores, (2) the neglect of personal meanings & social context in reseach based on "complaints," & (3) the reductionism of narrative theory that focuses almost entirely on storied accounts of trauma. A comparison of these modes of representation & what they can reveal about the divorce process demonstrate that narrative analysis of divorce accounts provides insights unattainable through other approaches. 1 Table, 54 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Roth, Guenther (Dept Sociology Columbia U, New York NY 10027), **Interpreting and Translating Max Weber,** *International Sociology*, 1992, 7, 4, Dec, 449-459.

¶ It is argued that translation of Max Weber's work can be handled largely on the level of straightforward interpreting, given Weber's actual & elective affinities with the Anglo-Saxon world, particularly in politics & ethics. It is contended that Weber's works, for the most part, have proven to be "transmissible," although neo-Kantian philosophy & continental legal theory pose difficult translation problems. Weber, however, is not unaffected by the "aging" of language. While there is general agreement that some of Weber's work has become canonical in the English language literature, the term "canon" has no well-established meaning in the social sciences; four meanings for the term are distinguished. Other vicissitudes of the English Weber translations are discussed. It is concluded that general readability is the best that can be

achieved, because a translation becomes outdated whenever new theoretical issues arise. 26 References. Adapted from the source document.

Stroud, Christopher (Centre Research Bilingualism Stockholm U, S-10691 Sweden), **The Problem of Intention and Meaning in Code-Switching,** *Text,* 1992, 12, 1, 127-155.

¶ Presented are a description of & commentary on a single code-switched oratorical interaction that took place in a Papua New Guinea men's house. Detailed analysis shows that particular meaning cannot be confidently attributed to any given code-switch, as any single switch could be performing several different functions. It is argued that this ambiguity & indeterminacy is one of the most central & salient characteristics of code-switching in this particular village. In order to understand how this has come about, it is necessary to contextualize code-switching within the framework of the local ideologies of personhood, knowledge, & social interaction. Language use in this village is found to be an articulation of the social order & a means of managing interpersonal relations. High value is placed on the use of language to achieve consensus & harmony. The oscillation between hidden & explicit meaning is characteristic of the Melanesian approach to knowledge. Code-switching is suited to this outlook because it allows multiple possibilities of expression & interpretation. 51 References. Adapted from the source document.

Tyler, Andrea (U Florida, Gainesville 32611), **Discourse Structure and Specification of Relationships: A Cross-Linguistic Analysis,** *Text,* 1992, 12, 1, 1-18.

¶ Using an integrated discourse framework as developed by Andrea Tyler & Catherine Davies (see SA 40:1/92Y3700), an examination is made of two highly constrained, parallel texts, one produced by a native speaker of English & one by a native speaker of Korean. Analysis reveals in the English speaker's discourse several elements of the linguistic code, discourse management strategies, & an interpretive frame that make explicit the logical & prominence relations between ideas. These elements are found to be rarely used, or used in non-native-like ways, in the discourse of the Korean speaker, which is therefore more undifferentiated & "flat." The relationship between this failure to adhere to native-like discourse patterns & the tendency of listeners to judge nonnative speakers' discourse as difficult to follow is discussed. The source of this failure to adhere to target-language discourse norms is unclear at present. 1 Table, 53 References. Adapted from the source document.

Guilbault, Jocelyne (U Ottawa, Ontario K1N 6N5), **Ethnomusicology and the Study of Music in the Caribbean,** *Studies in Third World Societies,* 1991, 45, Oct, 117-139.

¶ Historical reasons for the slow development of Caribbean music studies are explored in terms of three theories: evolutionist, culture area, & music reflects culture. Certain aspects of the Caribbean's sociopolitical & cultural history that have contributed to the exclusion of its music from mainstream ethnomusicological studies are examined. Three distinct periods in Caribbean ethnomusicology are identified: (1) pioneering studies in the early 1900s by black movements designed to fight for their own rights; (2) the 1960s & 1970s, when preindependence political campaigns played a major role in the redefinition of the Caribbean culture as a symbol of identity; & (3) the 1980s, characterized by increases in mass communication, migration, & a growing music industry & ethnomusicological publications. 62 References. G. Castañeda

93Z7964

Hake, Sabine, Chaplin Reception in Weimar Germany, UM *New German Critique,* 1990, 51, fall, 87-111.

¶ Charlie Chaplin's discursive status & his constitution as a social & cultural figure in Germany in the 1920s & early 1930s are examined. Texts about Chaplin are used in a reflective way to highlight how he represented the US in a unique way to the German leftist-liberal intellectuals, who accepted him overwhelmingly. These texts provide evidence for how Chaplin's "little tramp" character was open to a wide range of interpretations, & how Chaplin resisted containment. His character served seemingly opposite poles of society–mass culture & the elitist film world, laughter & revolutionary politics. Charlie Chaplin existed as a function of discourse: his figure, including his physical appearance & gestures, was both the image & the text of public discourse. He thus became a focus of contention for a German society in transition. M. Pflum

93Z7965

Hart, Lynda (U Pennsylvania, Philadelphia 19104), **Karen Finley's Dirty Work: Censorship, Homophobia, and the NEA,** *Genders,* 1992, 14, Aug, 1-15.

¶ The July 1990 decision by National Endowment for the Arts chairman John Frohnmayer to deny funding to four strongly recommended performance artists clearly points to multiple homophobias. Three of the artists claim lesbian or gay identities, but the work of the fourth artist, heterosexual feminist Karen Finley, merits close scrutiny because it is her ostensible exceptionalism that leads to an expanded understanding of homophobia. Finley's work challenges dominant ideals of the heterosexual, patriarchal, female body by performing "unnatural acts" & speaking politics. As such, it is argued that she taps into the new Right's complex homophobia, whether or not Finley is herself homosexual, & that this is the underlying reason why her grant was not funded. M. Maguire

Williams, Clover Nolan (Folklore Instit, 504 North Fess Bloomington IN 47405), **Tradition and Art: Two Layers of Meaning in the Bloomington Quilters Guild,** *Uncoverings,* 1991, 12, 118-141.

¶ The ways in which quilters employ tradition & art as affective, vs objective, categories are explored, based on questionnaire & interview data obtained from members (N = 30 & 10, respectively) of the Bloomington, Ind, Quilters' Guild. Findings reveal how imperfectly "folkloristic" categories apply to contemporary folk groups. Quilters' definitions of their craft & traditions are highlighted to suggest that, despite the quilters' inability to articulate specific forms & methods of "traditional" quilting, they almost uniformly describe quilting in terms of the activity's associative & functional properties. The interviews also reveal the quilters' profound ambivalence toward designating quilting as "art." Uncomfortable appropriating the term "artist" for themselves, many express doubt about the authenticity of quilts that retain no instrumental potential. 1 Appendix. M. Maguire

Witkin, Robert W. (Dept Sociology U Exeter, EX4 4RJ England), **Van Eyck through the Looking Glass–Presentational Codes and Social Transition in the Formal Structure of a Fifteenth-Century Pictorial Text,** *Journal for the Theory of Social Behaviour,* 1992, 22, 3, Sept, 329-350.

¶ The way in which values are experienced through works of art is controlled not by perceptual laws, which determine how we see the world optically, but by the structure of social relations that constrains the form in which such values may be brought to mind. The most important set of constraints on form concerns the presentational code governing the level of abstraction at which a given society will permit its values to be considered, which reflects the principles of ordering in social relations. Abstraction is thus not merely a cognitive process, but also a sociopolitical process. Two such presentational codes are identified: invocational symboling, which characterizes many formalist aesthetic styles in so-called traditional societies; & evocational symboling, which characterizes perceptual-realist styles in urban societies with developed middle classes. A "moment" of transition between these two presentational codes is explored through a close examination of a painting by Jan van Eyck, *The Marriage of Arnolfini.* 1 Illustration. Modified AA

Gamson, Joshua (U California, Berkeley 94720), **The Assembly Line of Greatness: Celebrity in Twentieth-Century America,** *Critical Studies in Mass Communication,* 1992, 9, 1, Mar, 1-24.

¶ The history of two intertwining stories in US celebrity texts is chronicled, & their relationship to the development & organization of publicity apparatuses is discussed. In one storyline, dominant in the early twentieth century, the deserving rise naturally to the top. In the other storyline, stronger in later decades, celebrities are artificially manufactured. As institutional control weakened & publicity mechanisms grew more sophisticated, image manufacture & celebrity production became more visible in texts. In each period a balance was struck between the competing explanations of fame through the entry of new narrative elements, most notably an increase in the power attributed to audiences. 81 References. Možný, Ivo, M. Petrusek–Sociológia a literatúra (M. Petrusek–Sociology and Literature), *Sociológia,* 1991, 23, 4, 366-367. (SLO)

¶ A review article on a book by Miloslav Petrusek, *Sociológia a literatúra* ([Sociology and Literature] Prague: Plus, 1990 [see listing in IRPS No. 67]). This book is not primarily oriented toward professional sociologists, but rather toward literary writers, critics, & laypeople interested in the sociological viewpoint on their subject of interest. Special attention is given to Petrusek's analysis of sociognoseological & institutional paradigms. Adapted from the source document.

New Education, first published in 1978, is a long-established and respected journal, which provides an international forum for original ideas and investigations on current and future trends in educational theory and practice. The journal devotes its attention to *educational reforms affecting elementary and secondary curricula, teaching methods, curriculum design, development and evaluation, school syllabuses, educational administration, vocational education, aesthetic and health education, moral education, lifelong education, innovations, participation in education, comparative studies in academic achievement, teacher training and in-service education for elementary and secondary teachers.*

The articles are chosen for their originality, *readability and accessibility* to a *wide* audience of teachers, principals, academics, educational administrators, consultants and community education officers.

In order to ensure that articles are of the highest quality all contributions are submitted to at least two independent referees before acceptance for publication.

Contributions are invited (normally no more than 6000 words, in two copies with stamped addressed envelope for return) and should be sent to the Editor, *New Education*, **James Nicholas Publishers, P.O. Box 244, Albert Park, Australia, 3206.**

The journal is published twice a year, in July and December. An annual index and title-page is bound in the December issue.

1989 — Volume 11, ISSN 0156-0905

Subscription rates (payable in advance): one year US$90.00 Individuals and elementary and secondary schools US$48.00 (for accelerated surface postage and packing add US$5.00 per issue). Orders and remittances should be addressed to: **James Nicholas Publishers, P.O. Box 244, Albert Park, Australia, 3206.**

Alestalo, Marja (Dept Sociology U Helsinki, SF-00550 Finland), **Changing Social Responsibilities of the University: The Experience of Finland**, *Science and Public Policy (SPP)*, 1992, 19, 1, Feb, 43-53.

n the twentieth century, there has been an effort to make higher edu- ;ion available to all social classes rather than primarily to the elite. Ex- ined here is the regional policy adopted in Finland that decentralized expanded the university system. In the first expansion (1900-1920), wth strengthened the key faculties of medicine & humanities, & insti- ionalized the applied & technical sciences. During the second expan- n (1960s-1970s), the university became the sole focus of the sociopolit- l program. Today, greater priority is given to basic research. It is ar- ed that regional policy should be geared to locally relevant issues. 3 bles, 45 References. Adapted from the source document. Apple, Michael W. (Dept Curriculum & Instruction U Wisconsin, Madison 53706), **Education, Culture, and Class Power: Basil Bernstein and the Neo-Marxist Sociology of Education**, UM *Educational Theory*, 1992, 42, 2, spring, 127-145.

In a historical & critical analysis of neo-Marxist Basil Bernstein's work see, eg, *Class, Codes, and Control, Volume IV: The Structuring of Pedagogic Discourse*, New York: Routledge, 1990), the relationship between ulture & power in education is explored, along with connections among he schools, the economy, & class cultures. Specific issues raised by ernstein's work–class formation, class essentialism, & the changing na- ure of class itself–are delineated. It is contended that to push class rela- ions to the sidelines would be detrimental not only to education re- earchers, but also to the millions of children for whom class exploitation & domination are facts of life. L. Dorn (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Astin, Alexander W. (Higher Education Research Instit U California, Los Angeles 90032), **Educational "Choice": Its Appeal May Be Illusory**, UM *Sociology of Education*, 1992, 65, 4, Oct, 255-260. Comment, 260-262.

¶ In a comparision of the voucher system–in which vouchers would be awarded to parents to send their children to the primary or secondary school of their choice–with the free market system, it is contended that the successful public school would not grow to accommodate additional demand, but stratify according to the abilities & socioeconomic status of its students. The net effect of stratification would be a widening in the gap between the haves & have-nots in the larger society. In **Some Points on Choice in Education**, James S. Coleman (U of Chicago, Ill) argues that the result of choice of education would be to replace the current stratification by income & race by a stratification based on students' performance & behavior. This approach would provide incentives for students at lower levels to improve, which would in turn improve education. L. Dorn (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Avis, James (School Education Oxford Polytechnic, OX9 1HX England), **Social Difference and Antagonism within the 16-19 Core Curriculum**, *British Journal of Sociology of Education*, 1992, 13, 3, Sept, 361-373.

¶ It is argued that extant models of the core curriculum in the British education system are inadequate because their understanding of social difference is truncated, ie, they locate it within a pluralist framework & implicitly view it as an impediment that hinders equal opportunities. The goal of this is to normalize the white, male middle class & ignore social antagonism. Skill in the core curriculum for youth ages 16-19 becomes technicized, resulting in a differentiated & segmented course of studies. 1 Table, 43 References. Adapted from the source document. Bailey, Darlyne (Mandel School Applied Social Sciences Case Western Reserve U, Cleveland OH 44106-7164), **Organizational Change in a Public School System: The Synergism of Two Approaches**, *Social Work in Education*, 1992, 14, 2, Apr, 94-105.

¶ The synergistic effect of uniting the structure, process, & philosophy of organizational development & community organizing approaches to systemwide change. The product of this union, here termed the "organization development empowerment process" (ODEP), facilitates individual & organizational empowerment, especially in public organizations. The application of the ODEP is described in a case example of a suburban school district following a top-down initiative for restructuring its five elementary schools. Social workers are urged to consider the thoughtful interweaving of seemingly disprate change efforts, a practice critical to the continued effectiveness of the public school system. 2 Tables, 32 References. Bernhard, Armin, "Wir hatten stammelnd begonnen". Die *Ästhetik des Widerstands* als Bildungsgeschichte der Arbeiterbewegung ("We Got Off to a Poor Start." The *Ästhetik des Widerstands* as an Educational History of the Workers' Movement), *Das Argument*, 1992, 34, 2(192), Mar-Apr, 191-204. (GER)

¶ An analysis is presented of Peter Weiss's *Die Ästhetik des Widerstands* ((The Aesthetics of the Uprising) Frankfurt: Roman, 1975), which provides a fundamental contribution to the history of the workers' movement as well as a record of the history of education of the proletarian masses. Thus, this work serves to crystallize the modern formation of emancipatory forces under the conditions of real socialism. Special attention is given to: the capability to act culturally & participate in education through creative reception processes; atavistic vs emancipatory visions; & the introduction of self-education into the socialist educational model. 28 References. Bowers, C. A. (Coll Education U Oregon, Eugene 97403), **The Conservative Misinterpretation of the Educational Ecological Crisis**, *Environmental Ethics*, 1992, 14, 2, summer, 101-127.

¶ It is contended that the debate on educational reform in the US has been framed by conservative educational critics in a manner that ignores how fundamental cultural assumptions contribute to the ecological crisis. Examined here are the deep cultural assumptions embedded in their reform proposals that further exacerbate the crisis. Focus is on how they view rational empowerment, the progressive nature of change, & their anthropocentric view of the universe. It is concluded that this form of conservatism must be supplanted by the more biocentric conservatism of thinkers, eg, Aldo Leopold, Wendell Berry, & Gary Snyder. Adapted from the source document.

Brehony, Kevin J. (Faculty Education & Community Studies U Reading, RG6 1HY England), **'Active Citizens': The Case of School Governors**, *International Studies in Sociology of Education*, 1992, 2, 2, 199-217.

¶ Active citizenship, particularly the participation of citizens in the administration of school governing boards, is examined. In theory, school governing boards offer an excellent arena for active citizenship & the democratization of the school system, but in practice, they appear to be vehicles to use the skills of a small number of individuals & to render the local apparatus of administration ineffectual. Citizen participation in local school governing boards is impacted by various factors, eg, sexual & racial inequality & unequal distribution of societal resources that ensure that active citizens comprise only a small proportion of the entire citizenry. Various models of active citizenship are discussed. 50 References. Adapted from the source document.

Connell, Bob W. (Sociology Board U California, Santa Cruz 95064), **Citizenship, Social Justice and Curriculum,** *International Studies in Sociology of Education,* 1992, 2, 2, 133-146.

¶ Though Western education recognizes the connection between social justice & education, it often ignores the link between educational content & link distribution. Social justice in education is not achieved through the distribution of the same set of subject material to all students, but requires a curricular justice based on three principles: (1) participation & common schooling; (2) the interests of the least advantaged; & (3) the historical production of equality. Examples of how unjust curricula violate these principles are presented. Curriculum justice is discussed as a method of empowering the disempowered. 38 References. Adapted from the source document.

Connell, R. W., White, V. M. & Johnston, K. M. (Macquarie U, New South Wales 2109 Australia), **An Experiment in Justice: The Disadvantaged Schools Program and the Question of Poverty, 1974-1990,** *British Journal of Sociology of Education,* 1992, 13, 4, Dec, 447-464.

¶ The Disadvantaged Schools Program in Australia followed compensatory education models from the US & UK in substituting poverty for class, but gave greater scope for teacher activism. A four-year study of this program combined oral history, documentary analysis, survey method, & case studies in a national appraisal. The program's complex politics emphasize survival, not growth, with poverty defined as a minority issue. Participation was a major goal, & the program's financial structure, centering on local submissions, proved a vehicle of democratization in schools. Parent participation was hard to achieve, but a participatory pedagogy developed in classrooms. Program curriculum mostly remained close to mainstream curriculum, but has allowed some remarkable innovations in content & assessment. It is concluded that targeted programs are necessary in social reform, but cannot substitute for equity strategies operating across whole institutional systems. 2 Tables, 41 References. AA

93Z7998

Connell, R. W., White, Viv & Johnston, Ken (Macquarie U, New South Wales 2109 Australia), **Poverty and Education: Changing Conceptions,** *Discourse,* 1990, 11, 1, Oct, 5-20.

¶ Changes over time in concepts of the relation between poverty & education in Australia are discussed. In the nineteenth century, mass education was seen as a means of social control over children of the dangerous classes. With the rise of a labor movement, education came to be claimed as a citizen's right, & the poor were assimilated into the working class generally. In the mid-twentieth century, education was increasingly seen as a long ladder of meritocratic social promotion, with the poor perceived as a culturally different minority who failed to get their children on this ladder. This image underpinned compensatory education programs introduced in the 1970s. However, the experience of these programs, as well as of more sophisticated research on poverty, has undermined their founding assumptions. More recent work identifies schools as producers of inequality, & locates questions of poverty in large-scale structures of inequality. Context-rich curriculum is a key strategy now being generated. 36 References. Modified AA

Crisci, Pat E., March, Judith K. & Peters, Karen H. (Center School Personnel Relations Kent State U, OH 44242), **American School Reform: Sisyphus Condemned or Prometheus Unbound?,** *UM Government Union Review,* 1992, 13, 1, winter, 1-26.

¶ A report on the development of the Achievement Formula/TRIVET (Techniques of Responsive Intervention to Validate Effective Teaching) process to measure current levels of school staff & student performance, compare these levels against reform standards, & help school districts analyze whether district expectations are commensurate with student abilities. TRIVET training consists of instruction plus classroom observation time over an academic year, after which each teacher develops a teaching competency profile with the administrator. The workshop modules correspond to a set of behaviors & attitudes from Teacher Effectiveness of Process-Product research (planning, classroom management, instructional methods, student assessment, & learning climate). Four processes are used for observation & analysis of classroom instruction: preobservation conference, scripting the lesson observed, postobservation conference, & collaborative action plan. TRIVET has been field-tested in 3 small Ohio school districts & piloted in a large urban district, where 6,000+ students, 30 administrators, & 200 teachers have been involved since 1988. Pretest/posttest results on teacher observation analysis & prescription skills showed an overall growth of 68%. An independent performance audit concluded that the project provides the process & structure for improving student academic success. 6 Tables, 68 References. Modified AA

Debeauvais, Michel (11 rue Pierre Demours, F-75017 Paris France), **Outcasts of the Year 2000–A Challenge to Education in Europe,** *Comparative Education,* 1992, 28, 1, Apr, 61-69.

Translated by Edmund King.

¶ A profoundly negative aspect of European economic & social development–social exclusion–& the possibility of change through education are considered. Four key propositions are advocated: social exclusion results from unrestrained free market competition; threats to the world order (ie, drugs, unemployment, ethnic tension) can be curtailed through better education; democracy is not a natural or final state, but is subject to continual negotiation & dependent on continual education; & a more humanistic & democratic future will only emerge from implementation of a minimal education strategy that incorporates training for global awareness of world problems & for democratic conflict resolution. The persistent phenomenon of social exclusion & two educational strategies to alleviate exclusion (international & multicultural education) are discussed. 2 Tables, 50 References. M. Maguire (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Dekker, Ron, De Grip, Andries & Heijke, Hans (Rijks U Limburg, NL-6200 MD Maastricht Netherlands), **An Explanation of the Occupational Structure of Sectors of Industry,** *Labour,* 1990, 4, 3, winter, 3-31.

¶ As part of a project to develop an education/labor-market information system to help secondary & university students choose the right type of school &/or occupation, a model to disclose the factors underlying the development of the occupational pattern is devised. The shares of occupational classes in each economic sector are taken as points of departure. The explanatory variables are technological progress & cyclical & structural sectoral developments. For each occupational class, an estimation is made with the help of a linear model, the estimation method being that of weighted least squares. To permit several variables to be included in the equation, the data have been pooled over sectors & time. In 40% of all cases, a model with explanatory variables has been chosen; in the remaining instances, a sector-dummy model was found to suffice. 1 Table, 4 Appendixes, 24 References. Duran, Bernadine J. & Weffer, Rafaela E. (c/o Weffer–School Education DePaul U, Chicago IL 60614-3298), **Immigrants' Aspirations, High School Process, and Academic Outcomes,** *American Educational Research Journal,* 1992, 29, 1, spring, 163-181.

¶ The influence of family background on high school behavior & school outcomes for Mexican-American immigrant students was evaluated in a longitudinal study of 157 academically talented Mexican-American grade school children in a large midwestern city, who were followed up to their high school graduations in 1986-1989. The majority of the Ss enrolled in a math-science program (MSP) intervention in their freshman year, but 50% dropped out by their senior year. Analysis of questionnaire & interview data & standardized test scores showed that girls & more recent immigrants, with higher educational values in their families, were more likely to participate in the MSP. Girls had lower achievement scores than boys before & during high school, but MSP participation was associated with higher math scores. Years of US residence affected test scores, but during high school, immigrants' strategies for increasing learning also allowed them to perform better. High school outcomes were predicted by pre-high school achievement, MSP participation, & family educational values, which influenced students' willingness to take on the extra work of the MSP. 3 Tables, 1 Figure, 21 References. Edwards, Tony & Whitty, Geoff (c/o Whitty–Instit Education U London, WC1H 0NT England), **Parental Choice and Educational Reforms in Britain and the United States,** UM *British Journal of Educational Studies,* 1992, 40, 2, May, 101-117.

¶ Some of the underlying assumptions about how a free (or freer) market in education would operate are examined, drawing on arguments & evidence from both GB & the US. The contention that transfering power from the producers of education to its consumers will ensure that schools improve is considered, questioning the assumption that a market system would be more equitable as well as more efficient. Also addressed are claims that enhanced parental choice will produce greater diversity in educational provision, returning to the principle of equity in relation to the endemic problem of providing forms of schooling that are "different but equal." It is contended that giving priority to individual rights of exit from schools that are considered unsatisfactory may provide additional escape routes from some, while undermining the will & capacity to reform those schools that the least advantaged attend. However, while the proper balance between individual rights & collective goals is a value question, it is important to examine those operating assumptions about how choice works that are made by those for whom the benefits of an open market appear self-evident. 64 References. Emirbayer, Mustafa (New School Social Research, New York NY 10011), **Beyond Structuralism and Voluntarism: The Politics and Discourse of Progressive School Reform, 1890-1930,** *Theory and Society,* 1992, 21, 5, Oct, 621-664.

¶ An analysis of progressive school reform in the US 1890-1930 explains why it emerged & who its leaders were, & describes the movement's cultural & institutional goals. It is argued that narrow-structuralist approaches & their voluntarist rivals are inadequate to the task of explaining the development of early twentieth-century educational progressivism in both its administrative & pedagogical moments. Here, an analytical approach is developed to argue that, while socioeconomic & political transformations did shape the conditions for school reform during the early twentieth century, its timing & eventual consequences were decisively influenced by the emergence in the public sphere of a new discourse of "sacred" American ideals. Thus, the causes & outcomes of educational progressivism are explained in terms of conficts over the legitimate definition of these sacred ideals. 3 Tables. W. Howard (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Engelhardt, Walter Josef & Ernst, Heinz (Emilienstr 1, D-8500 Nurnberg Federal Republic Germany), **Dilemmata der Erzieherinnenausbildung zwischen Institution und Profession** (The Dilemma of Educational Training between Institution and Profession), *Zeitschrift für Pädagogik,* 1992, 38, 3, May, 419-435. (GER)

¶ Though kindergarten has become an integral part of family life in modern society, & now represents a socially required & standardized service, the training of kindergarten teachers has not kept pace with these developments. Neither the work nor a more professional image of kindergarten teachers has emerged. In the course of normalization, this sector has distanced itself from the field of social pedagogics & become oriented only in comparison to other disciplines. Teacher education, lacking a strong basis in sociopedagogical theory, has continued to emphasize personality formation rather than skills training, & thus runs the risk of becoming superfluous. 29 References. Feldman, Kenneth A. (Dept Sociology State U New York, Stony Brook 11794), **College Students' Views of Male and Female College Teachers: Part I-Evidence from the Social Laboratory and Experiments,** *Research in Higher Education,* 1992, 33, 3, June, 317-375.
¶ College students' preconceptions of male (M) & female (F) college teachers are examined through a review of relevant laboratory & experimental research. Although in a minority of cases, M teachers receive higher overall evaluations by students than do F teachers, findings do not show this globally. Perceptions & ratings of M & F teachers on specific instructional dimensions either showed no differences or inconsistent differences across studies. No same-gender or cross-gender bias existed & interaction effects between teachers' gender & other factors were not confirmed by other studies. More studies showed that students' perceptions of F teachers are more likely to be influenced by other factors. Finally, ratings of teachers were sometimes enhanced by gender-typical, & other times by gender-atypical, attributes & behaviors. 1 Table, 1 Appendix, 46 References. Adapted from the source document. Fenzel, L. Mickey (Psychology Dept Loyola Coll Maryland, Baltimore 21210), **The Effect of Relative Age on Self-Esteem, Role Strain, GPA, and Anxiety,** *Journal of Early Adolescence,* 1992, 12, 3, Aug, 253-266.
¶ The hypothesis that being older than most of one's classmates provides benefits to students, at least throughout elementary school, is investigated among 103 students in NY before & after the transition to middle school, with respect to self-esteem, school strain, grade point average (GPA), & anxiety. Data obtained via 3 standardized scales were subjected to partial correlation analyses, with father's education controlled. Results showed that relative age was associated positively with self-esteem & negatively with strain during fifth & sixth grade for females but not for males. The influence of father's education was particularly pronounced among the youngest Ss with respect to strain & GPA. It is concluded that the potentially detrimental effects of being relatively young carry on into middle school & that younger early adolescents whose parents have relatively little education are most at risk. 4 Tables, 31 References. Gillborn, David & Drew, David (Division Education U Sheffield, S10 2TN England), **'Race', Class and School Effects,** *New Community,* 1992, 18, 4, July, 551-565.
¶ With the development of new quantitative techniques (eg, multilevel

0038-0202/93 $1.50

modeling) in the late 1980s, researchers could assess schools' relative effectiveness while allowing for the different background characteristics of their pupil populations. An early major study to look at the effectiveness of multiracial schools (Smith, D. J., & Tomlinson, S., *The School Effect: A Study of Multi-Racial Comprehensives*, London: Policy Studies Instit, 1989) received much publicity. Here, this study is critically evaluated from both quantitative & qualitative perspectives, highlighting problems of methodology & interpretation, illustrating the complexity of the field, & emphasizing the dangers of simplification in a politically charged area where social research may be misused in ways that sustain existing inequalities of opportunity. It is concluded that school effects research, although potentially very important, is still in its infancy. Results must be considered with caution, especially in light of ethnographic research that demonstrates the power of social processes, some of which are hidden from statistical scrutiny. 52 References. Giroux, Henry A. (Miami U, Oxford OH 45056), **Border Pedagogy and the Politics of Postmodernism,** *Social Text*, 1991, 28, 51-67.

¶ The most useful & transformative aspects of border pedagogy are examined by situating them within contemporary political & cultural considerations that are redefining our traditional view of space, language, community, & possibility. Concerned with developing a democratic public philosophy that respects the notion of difference, border pedagogy not only acknowledges the shifting borders, which subvert & reterritorialize different configurations of culture, power, & knowledge, but also links the notion of schooling & education to a more substantive struggle for a radical democratic society. Border pedagogy is shown to be a public philosophy that combines an emancipatory notion of modernism with a postmodernism of resistance. 72 References. W. Howard

Giroux, Henry A. (Miami U, Oxford OH 45056), **Paulo Freire and the Politics of Postcolonialism,** *Journal of Advanced Composition*, 1992, 12, 1, winter, 15-26.

¶ It is argued that the work of Paulo Freire has been appropriated by North American scholars in ways that largely denude it of its important political insights. Refusing to analyze the politics of Freire's location as an anticolonialist writer & activist, many scholars have focused on those aspects of Freire's work that reduce it to nothing more than a highly charged methodology. In opposition to this approach, it is contended that North American scholars must engage in a radical form of border crossing to reconstruct Freire's work in the specificity of its historical & political construction. At one level, this means making problematic the institutional & ideological location of those intellectuals in the West situated within a Eurocentric discourse of power & privilege, which engages the question of the ideological weight of such a location & how it constructs a specific reading of Freire's work. At the same time, becoming a border crosser engaged in a productive dialogue with others means producing a space in which those dominant social relations, ideologies, & practices that erase the specificity of the voice of the other must be challenged & overcome. Freire's role as a border intellectual, border crosser, & postcolonial theorist is considered. 29 References. AA

Goldstein, Stephen (Faculty Law Hebrew U Jerusalem, IL-91905 Mount Scopus Israel), **The Teaching of Religion in Government Funded Schools in Israel,** *Israel Law Review*, 1992, 26, 1, winter, 36-64.

¶ The Israeli education system is multicultural & multireligious, with the state financing separate religious & nonreligious streams within the state educational system, as well as private education, which is also based primarily on religious distinctions. This system accords with the general pluralistic, multicultural organization of society. This analysis, however, must be tempered with the acknowledgment that it is impossible to distinguish clearly between national-cultural & religious aspects of "Jewishness." Thus, the nonreligious stream in the Jewish sector of state education has always been permeated with studies, eg, the Bible, that elsewhere may be considered religious. In recent years there has been growing controversy as to the extent to which such Jewish tradition should be a part of the curriculum of nonreligious schools. AA

Graetz, Brian (Dept Sociology La Trobe U, Bundoora Victoria 3083 Australia), **Gender, Equity and Participation in Australian Education,** *New Education*, 1991, 13, 1, 3-16.

¶ Gender differences in educational participation & attainment in Australia are examined, focusing on how much the gap between men's & women's attainments has declined with the expansion of educational opportunities & the decline in stereotyped gender expectations. Analysis of data from the 1984/85 Australian National Social Science Survey (N = 3,012 respondents) shows that net gender differences in basic schooling have declined substantially, but that some differences in higher education remain largely undiminished. Moreover, women's attainments are more constrained by social origins & less enhanced by ability. These results suggest that both structural factors (eg, social background) & cultural factors (eg, gender-based stereotypes & expectations) may still shape & constrain women's educational achievements. 30 References. Hansén, Sven-Erik (Faculty Education Åbo Akademi, PO Box 311 Finland), **Word and World in Mother Tongue Teaching in Finland: Curriculum Policy in a Bilingual Society,** *Language Culture and Curriculum*, 1991, 4, 2, 107-117.

¶ The development of native language (mother tongue) curricula in Finland is discussed in relation to three nationalist movements. Development

of native language education as a school subject is explored in its historical, political, linguistic, & pedagogical contexts in the Swedish & Finnish populations. Finland is a heterogeneous language society in which the language status of municipalities is reviewed after each decennial census. The Swedish-speaking population is decreasing, & bilingual Finnish-Swedish communities are at risk. The first phase of nationalism, during the late nineteenth century, reflected the larger European trend toward independence & changing local political & social conditions. This early wave resulted in unilingual school systems for Swedish & Finnish. The second phase, during the civil war in spring 1918, resulted in "radical Finnification" in higher education. The third phase, an ethnic revival of the 1970s typical of European struggles of integration & assimilation, resulted in official guidelines tolerant of different languages & cultures. Native language education was encouraged to maintain ethnic group culture. 23 References. Adapted from the source document.

Howley, Aimee & Hartnett, Richard (Dept Educational Administration Marshall U, Huntington WV 25701), **Pastoral Power and the Contemporary University: A Foucauldian Analysis**, IM *Educational Theory*, 1992, 42, 3, summer, 271-283.

¶ Michel Foucault's interpretation of the pastoral power of the state is used as a frame of reference for examining power relations in the contemporary university. Such relations, according to Foucault, depend on specific technologies by which the subject tells the truth about him or herself in order to receive salvation. Salvation takes place when the individual willingly accepts norms of behavior & discourse that the state, via its functionaries, deems best for that person. In the contemporary university three technologies embody power relations of this sort: the canon of the general education curriculum, the induction of the novice scholar, & the "confessional" evaluation. Ivatts, John (Froebel Instit Coll, London SW15 5PJ England), **The Case of the School Meals Service**, *Social Policy and Administration*, 1992, 26, 3, Sept, 226-244.

¶ Since 1979, British social policy has abandoned the postwar principles of universalism & adopted a deliberately residualist approach that imposes narrower selection criteria in social welfare provision. Here, this trend is evaluated in one area of welfare provision–the school meals service–by developing a historical analysis of an earlier period (1918-1939) when a residual model of welfare firmly held sway. Examination of historical evidence suggests that in important respects, the present situation with regard to the provision of food for children while at school recreates many of the circumstances pertaining during that prewar period: then, as now, selectivity, "targeting," & fierce Treasury restrictions on public expenditure were the order of the day. In light of the problems of administrative fragmentation, & of the failures, inconsistencies, & injustices of policies regarding school meals provision during that earlier period, it is concluded that contemporary developments within this service are disquieting, & a close scrutiny of nutritional & other consequences is essential. 14 References. Katz, Michael B. (History Dept U Pennsylvania, Philadelphia 19104), **Chicago School Reform as History**, IM *Teachers College Record*, 1992, 94, 1, fall, 56-72.

¶ Chicago (Ill) school reform, which refers to a legislative act, a process, & a social movement, began in Oct 1989 with vision & zeal, & with the hope of transcending historical limits on the potential for change. The significance in theory & practice of the history of Chicago school reform is explored, with attention to: the origins of bureaucracy & the ascendance of experts & professionals; educational reform as a social move-

ment; schools as contested terrain in terms of race & ethnicity; the revitalization of the public sphere; & the limits of educational reform when schools alone are asked to solve social problems. Questions for future theory & practice are also posed. M. Maguire

93Z8038

Kenway, Jane (Deakin U, Victoria 3217 Australia), **Gender Justice? Feminism, State Theory and Educational Change,** *Discourse,* 1990, 11, 1, Oct, 55-76.

¶ Implications of the current intellectual mood for gender & education policy analysis & advocacy are explored. Socialist feminist analyses of education policy are shown to have a relatively strong analytical & explanatory power with respect to discussing the oppressive dimensions of the state, but have limited capacity to effect change given their lack of a transformative agenda. Following a review of current concerns of feminist state theory, a set of criteria that might form the basis of an adequate feminist theory of the state &, by implication, a properly developed political project are presented. The analysis demonstrates how feminist state theories have been applied, either explicitly or implicitly, to the field of education policy. It is suggested that feminist theories of the state & feminist policy analysis & advocacy must grow together, & that such theories should be made explicit to ensure that their strengths & weaknesses are identified & that gender justice in & through education is more successfully pursued. 49 References. S. Millett

Kerckhoff, Alan C. (Duke U, Durham NC 27706), **Graphic Diagnosis, but No Plan of Therapy: A Review Essay on Jonathan Kozol's *Savage Inequalities*,** *International Journal of Group Tensions,* 1992, 22, 2, summer, 151-156.

¶ A review essay on a book by Jonathan Kozol, *Savage Inequalities* (New York: Crown, 1991 [see listing in IRPS No. 67]). This book presents graphic accounts of the worst public schools in the US, made even more horrific by the juxtaposition of successful nearby schools rich in resources. These discrepancies result not only from differences in the tax base of local communities, but also from inadequate state support. Funding inequalities arise from the tendency to blame the poor for their circumstances & to view expenditure of public funds in their behalf as a waste of money. Equal funding of both rich & poor schools is offered as the only solution to this educational dilemma. The argument supporting this solution, however, suffers from an overly narrow focus on schools & ignores such factors as inadequate prenatal health care, overburdened health services, & deplorable living conditions of children in poor communities. D. Generoli

Kirkness, Verna J. & Barnhardt, Ray (Dept Administrative/Adult/Higher Education U British Columbia, Vancouver V6T 1W5), **First Nations and Higher Education: The Four R's–Respect, Relevance, Reciprocity, Responsibility,** UM *Journal of American Indian Education,* 1991, 30, 3, May, 1-15.

¶ Indian people have been historically underrepresented in the ranks of college & university graduates in both Canada & the US. From an institutional perspective, the problem has been typically defined in terms of low achievement, high attrition, poor retention, weak persistence, etc, thus placing the onus for adjustment on the student. From the perspective of the Indian students, the problem centers on the need for a higher educational system that: respects them for who they are, is relevant to their view of the world, offers reciprocity in their relationships with others, & helps them exercise responsibility over their own lives. Implications of these differences in perspective & ways that initiatives within & outside of existing institutions are transforming higher education for American Indians/First Nations/Native people in both Canada & the US are considered. 20 References. Lankshear, Colin (Education Dept U Auckland, 1 New Zealand), **Literacy and Running Your Life: A Nicaraguan Example,** *Language and Education,* 1991, 5, 2, 95-111.

¶ Examined is the "two-edged sword" of literacy, defined as the potential of literacy to either contribute to the empowerment of individuals or groups or be turned against them, as a vehicle for dominating them & subverting their interests. On the basis of this, literacy programs intended to promote functional levels of literacy should be seriously scrutinized for what specific interests may lie behind them. Specifically examined are two literacy programs in Nicaragua, the 1980 Nicaraguan National Literacy Crusade & the subsequent program of Popular Basic Education for adults. A case study of a light industrial manufacturing cooperative, San José, which participated in both programs, is discussed as support for increasing evidence that literacy assumes empowering force when promoted within a context of policies & programs for just & democratic development. 37 References. Laursen, Per Fibaek (Instit Paedagogik U Københavns, DK-1017K Denmark), **Adgang til Videregaende Uddannelser i Danmark** (Admission to Higher Education in Denmark), *Dansk Sociologi,* 1992, 3, 3, Sept, 18-35. (DAN)

¶ Admissions to Danish universities are analyzed using Anthony Giddens's "Structuration Theory and Sociological Analysis" (in Clark, J., Modgil, C., & Modgil, S. [Eds], *Anthony Giddens: Consensus and Controversy,* London: Falmer Press, 1990). Applicants are very knowledgeable about admissions standards & procedures; however, they are not aware of the influence of the labor market on their option or of the limitations determined by their own choices. Giddens's theory accounts for the strange paradox that both admissions boards & applicants are informed, rational agents simultaneously & unconsciously reproducing & creating changes in the system; however, a shortcoming of the theory is its inability to account for the limitations of the admissions boards' actions. As organs of the government, the admissions boards should be able to legitimize their actions. 4 Tables, 4 Illustrations, 29 References. Adapted from the source document.

93Z8045

Lieberman, Myron, Reflections on the Rationales for Teacher Bargaining, UM *Government Union Review,* 1992, 13, 2, spring, 1-9.

¶ The theoretical & empirical basis for state legislation providing bargaining rights to teachers is examined. The rationales for teacher bargaining are to achieve equality with the private sector & to ensure that teachers' views be heard. The cases for these rationales, however, have limited supportive evidence. Public sector employment has many fundamental differences with private sector employment, eg, teacher expectancy of continued employment, teacher influence & veto power on public policy, teacher protection from loss of job & income by tenure & state

vs. All of These differences make discussion of the equality rationale iot. The rationale that teachers views simply be heard, & that parties the bargaining are not required to adopt proposals or make concesns, also has deficiencies. It overlooks teacher domination of the policyiking process & the dynamics of bargaining, & does not acknowledge it teacher bargaining is largely a political process decided by public & ivate opinion. Matějů, Petr & Řeháková, Blanka (Sociologický ústav Czechoslovak Academy Sciences, CS-11000 Prague 1 (Tel: 02-235-89-68-71; Fax: 02-235-78-88]), **Úloha mentálních schopností a sociálního původu ve formování vzdělanostních aspirací** (The Role of Mental Ability and Social Background in the Crystallization of Educational Aspirations), *Sociologický Časopis,* 1992, 28, 5, 613-635. (CZE)

To determine the effects of gender, mental ability, & educational background on educational aspirations, questionnaire data were obtained from Czechoslovak eighth graders (N = 3,700) in spring 1989. Results show that the educational climate of a family depends much more stongly on the mother's than the father's education. However, educational climate explains only 13% of the variance in children's mental ability. The effects of IQ & educational background on secondary school aspirations are much stronger for boys than for girls. The direct effect of social background on educational aspirations is at least as strong as the direct effect of IQ. Boys need a significantly higher IQ to express the same level of educational aspirations as girls. Part of the strong net effect of educational background may be explained by very limited educational opportunities & weak admissions criteria. Sex differences are analyzed in terms of a strong feminization of the high school system & the careers for which it prepares students. A low level of education is needed for typical male blue-collar occupations. 3 Tables, 2 Graphs, 46 References. Adapted from the source document. McCulloch, Gary (Dept Educational Research U Lancaster, LA1 4YL England), **The Social Life of Plants,** *British Journal of Sociology of Education,* 1992, 13, 3, Sept, 383-386.

¶ A review article on a book by G. Walford & H. Miller, *City Technology College* (Milton Keynes: Open U, 1991 [see listing in IRPS No. 67]). It is suggested that this work overglorifies the city technology college (CTC) through its focus on the prominent & successful Kingshurst CTC in Birmingham, England. Ethnographic research highlights the directive role of New Right educational policy in the CTC program, & the tensions between a hostile community & a newly established school. While the failure to examine parental attitudes toward the CTC is a major flaw, the need for an unbiased study of the school's unique academic & moral curriculum is supported. 14 References. J. Sadler (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Mitter, Wolfgang (Deutsches Instit Internationale Padagogische Forschung, D-6000 Frankfurt 90 Federal Republic Germany), **Educational Adjustments and Perspectives in a United Germany,** *Comparative Education,* 1992, 28, 1, Apr, 45-52.

¶ Transformations & innovations in education in eastern Germany resulting from reunification are discussed. Problems of miscommunication at the interpersonal, administrative, & legal levels are outlined. In addition, six specific aspects of contemporary educational policy are analyzed: (1) structurally, the West German educational system has been almost universally adopted; (2) curricularly, West German texts, values of freedom & human rights, & zeal for religious education have been uncritically imported; (3) vocationally, East German schools are challenged by technological backwardness; (4) in terms of higher education, faculty at East German colleges & universities have had to reapply for their former posts; (5) pedagogically, East German schools have had to confront long-denied issues of historical importance; & (6) for teachers themselves, issues of reeducation have become paramount. It is suggested that a perspective that combines realism, openness, & uncertainty will help young people accomplish what has to be done. 9 References. M. Maguire (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Pattnayak, Satya R. & Todorov, Alexandre A. (Dept Sociology Villanova U, PA 19085), **Family Size, Father's Education, and Children's Educational Attainment in Intact White Families**, *Sociological Spectrum*, 1992, 12, 4, Oct-Dec, 363-379.

¶ An effort is made to integrate two bodies of previous research on the relationship between family size & educational attainment, drawing on data from the 1972-1984 General Social Surveys for white US men & women (total N = 7,964) ages 25+ from intact families. Findings suggest that although there is a direct negative relationship between family size & educational attainment, it varies across levels of father's education. The effect of family size on educational attainment turns positive for men when the father's education is at least high school. For women, it is positive only when the father's education is at least a BA degree. Additionally, this relationship holds for men born after & for women born before 1950. It is concluded that changing labor market conditions & cultural pressures to be educated have contributed to such differential impacts of father's education on children's educational attainment across cohorts. 5 Tables, 38 References. Pink, William T. (Coll Education National-Louis U, Evanston IL 60201-1796), **The Politics of Reforming Urban Schools**, *Education and Urban Society*, 1992, 25, 1, Nov, 96-113.

¶ In school reform efforts, some school districts have applied a prepackaged program for an effective school in all their schools, without tailoring it to the particular needs of each school. This strategy has rarely improved student achievement. A second strategy has been decentralization of school systems, under which parental choice, teacher professionalization, & community empowerment have been proposed as model for change. The shortcoming of decentralization is the adoption of a microanalytic perspective. Experience with these two strategies shows that, without addressing the politics of conceptualizing the improvement strategy & the politics of strategy implementation, the strategy may be judged inappropriately, or not given enough time to become institutionalized. These problems are illustrated by a case study of the politics of recent school reform in the Chicago (Ill) Public Schools in four arenas. business interests in the city, state government, local school governance, & union activity. In this case, state & local politics had more influence in the concept & implementation of school reform than did theory, research, & practitioner knowledge, which were apparently excluded from the reform process. 35 References. Poll, Carol (540 North 11 St, New Hyde Park NY 11040), **Good IDEA Gone Wrong: The Need to Rework the "Individuals with Disabilities Education Act" for Children**, *Sociological Practice Review*, 1992, 3, 4, Oct, 203-211.

¶ The Individuals with Disabilities Education Act (IDEA), a landmark civil rights legislation, established a federal mandate in 1975 to ensure that youngsters with disabilities would be properly educated in public or private schools. It required parents & teachers to collaborate in developing an individualized educational plan (IEP) for each child. Here, a sociological perspective is employed to clarify how the IEP process actually increased structural conflict between parents & school officials & contributed to goal displacement in schools. The school's goal of developing the IEP in compliance with the "letter of the law" has taken priority over its use as an instructional guide. Suggestions are offered for reworking provisions of the law, & various models & strategies described for increasing the involvement of parents with disabled children in their children's education. 45 References. Rice, Alan (Monash U, Clayton Victoria 3168 Australia), **The Politi- cal Economy of Race and Education,** *Discourse*, 1990, 11, 1, Oct, 43-54.

¶ The shift in global consciousness regarding racism is explained in terms of changes in the international economy 1820-1980. It is argued that the rise & fall of international economies cannot be explained solely in terms of the economic activity of enterprises more or less competing freely & peacefully on world markets. Other factors, eg, military intervention, po- litical domination, & ideological legitimation, are also involved in the creation, maintenance, & transformation of international economies. To ignore these aspects of economic life is to distort the way international economics shape cultural institutions & the contribution that education makes to the ongoing operations of national & international economies. Examining Australia & its successful struggle against racism, it is con- tended that, in addition to the efforts of aboriginal activists & liberal re- formers, both the scope & timing of the change in Australia's racist ide- ologies are explained by the postwar political economy. 9 References. Ryckman, Richard M., Van den Borne, H. W. & Syroit, J. E. M. M. (Dept Psychology U Maine, Orono 04469), **Differences in Hypercom- petitive Attitude between American and Dutch University Students,** *Journal of Social Psychology*, 1992, 132, 3, June, 331-334.

0038-0202/93 $1.50

¶ Levels of hypercompetitiveness in US & Dutch university students were investigated using scale data collected from 88 students at the U of Maine (Orono) & 90 students from the Catholic U of Brabant (Tilburg) & the Free U (Amsterdam). Results indicate that both US & Dutch students see hypercompetitiveness as socially undesirable behavior. Also, the fact that both national groups fell below the theoretical midpoint on the hypercompetitiveness scale suggests that neither group is relatively hypercompetitive, although the US students were more so than the Dutch. Further analyses of normative data for a variety of student & nonstudent groups are recommended. 13 References. Modified AA

93Z8072

Seinfeld, Jeffrey, Culture and Curriculum Reform at Stanford University, UM *The Centennial Review,* 1992, 36, 1, winter, 105-127.

¶ Curriculum reform at Stanford U (Calif) is examined, focusing on ideological conflicts that resulted in the establishment of a more multicultural curriculum in 1988. The early reform effort of 1980 promised curriculum diversity, but excluded social scientists & professors of color from participating in the reform process. Faculty & students who felt excluded channeled their energies into the development of a task force that proposed: requiring all Western civilization courses to include the historical period of the past six to eight centuries; requiring the study of works by women, minorities, persons of color, & at least one of the non-European cultures that have contributed to US society; & eliminating the common list of books required for all courses in the program. These proposals led to the much publicized debate of 1988, which pitted a younger generation of scholars trained in poststructuralism against an older generation of humanist scholars. It is concluded that the debate at Stanford U demonstrates that social definition & identification are negotiable in the US university, & that society is responding to emergent balances of power. 34 References. Singh, Ram D. (Illinois State U, Normal 61761), **Underinvestment, Low Economic Returns to Education, and the Schooling of Rural Children: Some Evidence from Brazil,** UM *Economic Development and Cultural Change,* 1992, 40, 3, Apr, 645-664.

¶ Cross-sectional household data collected through surveys of approximately 500 low-income households from the rural regions of São Paulo, Minas Gerais, & Ceara in Brazil are used to estimate the economic returns to schooling & the allocative & the direct components of the productivity effect of schooling in a traditional farming system, & to evaluate the major economic factors hypothesized to determine household demand for the schooling of rural children. Results indicate a significantly higher overall rate of return to education & a greater economic role of farmer's schooling in agriculture than indicated in past studies. Analysis also reveals that: children's work time on the farm is positively related to the school enrollment of children, whereas children's household work time & children's off-farm earnings are negatively associated with school enrollment; & the use of modern inputs by farm households is positively associated with the schooling of children. The policy implications of these findings are discussed. 4 Tables, 32 References. W. Howard

Smith, Stephanie & Matthews, Tom (Measurement & Research Services Texas A&M U, College Station 77843-4239), **How Do Students Choose a Particular College? A Survey of Admitted Students: 1990,** UM *College Student Journal,* 1991, 25, 4, Dec, 482-488.

¶ Factors important in choosing a college among 566 freshmen admitted to a large public southwestern university were explored drawing on data obtained via a telephone survey. Results indicate that availability of financial aid, having relatives as alumni, & the advice of friends were the best predictors of whether a student attended a particular university. However, students cited the prospect of landing a job after college, the opportunity to pursue an advanced degree, academic reputation, & reasonable costs as the most important factors in choosing a particular college. Thus, what students identified as most important was not necessarily the best predictor of attendance. 4 Tables, 1 Figure, 8 References. Adapted from the source document.

Snauwaert, Dale T. (Dept Higher & Adult Education & Foundations U Missouri, Columbia 65211), **Reclaiming the Lost Treasure: Deliberation and Strong Democratic Education,** UM *Educational Theory,* 1992, 42, 3, summer, 351-367.

¶ Two recent works in democratic theory–James Fishkin's *Democracy and Deliberation: New Directions for Democratic Reform* & Benjamin

Barber's *Strong Democracy: Participatory Politics for a New Age* (respectively: New Haven, Conn: Yale U Press, 1991; & Los Angeles: U of California Press, 1984)--are placed in the context of the nature of liberty & self-determination. Focus is on the implications of participatory democracy for conceiving the broad aims of education. It is argued that the educational counterpart to the democratic vision offered by Barber & Fishkin is the development of an authentic consciousness defined by self-determination & moral inclusion, or what can be referred to as a "species" consciousness. Modified AA

Sommerkorn, Ingrid N., Buch besprechung (Essay Review), *Zeitschrift für Sozialisationsforschung und Erziehungssoziologie,* 1992, 12, 3, July, 272-275. (GER)

¶ A review article on a report by The Wellesley Coll Center for Research on Women, *How Schools Shortchange Girls* (Washington, DC: American Assoc University Women Educational Foundation, 1992 (see listing in IRPS No. 67)). Secondary analysis of data collected primarily during the 1980s confirmed what had long been suspected: coeducational public schools in the US do not provide equal educations to both genders. The report concludes that shortchanging the girls of today will result in shortchanging the US tomorrow in terms of a less-skilled work force. Implications for the current educational reform movement are discussed, & it is suggested that many of the criticisms of the US system can also be applied to the German school system. M. Meeks

93Z8081

Staton, Ann Q. & Hunt, Sandra L. (U Washington, Seattle 98195), **Teacher Socialization: Review and Conceptualization,** UM *Communication Education,* 1992, 41, 2, Apr, 109-137.

¶ More than 125 recent empirical research studies were categorized to construct a dialectical (ie, nonlinear model) of the socialization process of elementary & secondary school teachers. Key areas of study include the personal biographies that potential teachers bring to the socialization process; socialization during preservice training, & continued socialization during inservice teaching. Additional research is needed to conceptualize how these various factors intersect, & significant questions for future researchers are posed. 1 Figure, 161 References. Adapted from the source document.

Stephens, Robert T. & Repa, J. Theodore (25 Kind Rd, Hopewell Junction NY 12533), **Dropping Out and Its Ultimate Consequence: A Study of Dropouts in Prison,** UM *Urban Education,* 1992, 26, 4, Jan, 401-422.

¶ Among a random sample of 220 male inmates at the state correctional facility in Ossining, NY, 84% of whom had lived in an urban setting, 1989 questionnaire data revealed that 79% were high school dropouts. Compared to high school graduate prisoners, dropouts had experienced significantly greater rates of grade retention, school transfer, misbehavior, poor attendance, & poor academic performance, as well as less extracurricular activity. In addition to school-related problems, adverse socioeconomic conditions & poor role modeling contributed to dropping out. Major reasons given by the inmates for dropping out were wanting to work & being bored with courses. The dropout characteristics for incarcerated felons are similar to those in the literature for nonincarcerated male dropouts. Therefore, an important benefit of dropout prevention might be a reduction of imprisonment. 15 Tables, 38 References. Modified AA

Szebenyi, Péter (National Instit Public Education, H-1051 Budapest Hungary), **Change in the Systems of Public Education in East Central Europe,** *Comparative Education,* 1992, 28, 1, Apr, 19-31.

¶ It is hypothesized that the countries of East Central Europe can be regarded as a cultural subdivision within Europe based on their common historical roots & similar contemporary social-political issues. For this reason, remarkable coincidence can be found in their new education reforms & professional proposals. Ideological monism has been replaced with pluralism, the state monopoly of schooling has been eliminated, the uniform school structure has been loosening, & a new administrative system has been building in each country. However, there are differences; eg, changes have been more radical & rapid in Hungary. Modified AA

Thompson, Maxine Seaborn, Entwisle, Doris R., Alexander, Karl L. & Sundius, M. Jane (Dept Sociology North Carolina State U, Raleigh 27695-8107), **The Influence of Family Composition on Children's Conformity to the Student Role,** *American Educational Research Journal,* 1992, 29, 2, summer, 405-424.

¶ Interview data collected from 484 parents of first-grade students as part of the 1982 Beginning School Study in Baltimore, Md, are used to explore how family configurations (2-parent, mother-extended, or single mother) & the number of siblings affect conformity to the student role (measured in terms of lateness, absences, & conduct marks). Sociocultural factors that may mediate this relationship are also considered, including race, socioeconomic status, parental expectations, mother's age, & kindergarten attendance. Results indicate that: African-American first-grade students who have siblings are more often absent, children with siblings initially receive higher conduct marks, & children from 2-parent households are most likely to improve their conduct over the school year. Prior research may have exaggerated the positive effects of 2-parent households, since such family units tend to contain more siblings. 4 Tables, 1 Figure, 1 Appendix, 26 References. Adapted from the source document.

Tomiak, Janusz (15 Radbourne Rd, London SW12 0EA England), **Education in the Baltic States, Ukraine, Belarus' and Russia,** *Comparative Education,* 1992, 28, 1, Apr, 33-44.

¶ An examination of educational development in the Baltics, Ukraine, Belarus', & Russia following the demise of the USSR, identifying the key elements responsible for the emergence of new problems. Discussed are controversies concerning: the aims, administration, & control of educational systems; contents & methods of study; youth culture; & teachers & teacher training. Principal exponents of democratization & new types of educational establishments are identified. Drawing on recently published documents, regulations, reports from Eastern European scholars & Western visitors, & research in the field, it is concluded that the present educational difficulties cannot be easily overcome in the short run; if progress is to be made, close cooperation must exist between educators in the West & the new countries in Eastern Europe. Modified AA

93Z8087

Tomlinson, Sally (Goldsmith's Coll U London, SE14 6NW England), **Disadvantaging the Disadvantaged: Bangladeshis and Education in Tower Hamlets,** *British Journal of Sociology of Education,* 1992, 13, 4, Dec, 437-446.

¶ During the 1980s, the Inner London (England) Education Authority was unable to provide sufficient school places for children in Tower Hamlets; 95% of the resulting out-of-school children were of Bangladeshi origin. Here, described are the efforts of the Tower Hamlets Law Centre to register a complaint on behalf of the children, & the way in which the local & central education authorities avoided their responsibilities to these children. It is suggested that such a situation would never have been tolerated in a white, middle-class area. This contribution to the sociology of disadvantage indicates the tendency of policymakers to ignore the eco-

nomic & social structures that create disadvantage, & to focus on individual or family pathology as a major cause of disadvantage. 32 References. Adapted from the source document.

Tygart, C. E. (California State U, Fullerton 92534), **Do Public Schools Increase Juvenile Delinquency?,** UM *Urban Education*, 1992, 26, 4, Jan, 359-370.

¶ Correlations between social class (SC) & student delinquency in & outside of the school context were examined among 1,734 junior & senior high school students in urban southern Calif who in 1986 completed self-report instruments on 10 types of delinquency for the preceeding month & for the preceeding summer. Females (Fs) as individuals contributed 40% of the overall reported delinquency, but contributed much less than males (Ms) in the categories of robbery & sale of illegal drugs. Fs were less involved in delinquency than Ms during the summer & outside of school hours during the school year. Multivariate analysis reveals no relation between SC (parental education & income) or grade level & delinquency in general, but a modest negative relationship between SC & total F delinquency, & between grade level & summer/nonschool delinquency. Further insight into school as a sociological cause of delinquency could be obtained by comparing student to nonstudent delinquency. 3 Tables, 13 References. M. Pflum

Useem, Elizabeth L. (Bryn Mawr Coll, PA 19010), **Getting on the Fast Track in Mathematics: School Organizational Influences on Math Track Assignment,** *American Journal of Education*, 1992, 100, 3, May, 325-353.

¶ Interview data from school administrators in 26 districts in a major metropolitan area are drawn on to explore ways that school-level policies & procedures influence students' probabilities of being placed in the accelerated track in mathematics in the middle- & senior-high school years. Analysis indicates that substantial variations exist among districts in students' opportunities to be placed in this track. Differences in parental education levels & in beliefs among school administrators about the importance of & eligibility for accelerated math (especially calculus) help explain these variations. The exclusionary character of course assignment policies in mathematics in some districts supports findings of previous research that tracking policies have the effect of choking off the supply of highly trained students prepared for college-level mathematics. 4 Tables, 62 References. Adapted from the source document.

93Z8090

Useem, Elizabeth L. (Bryn Mawr Coll, PA 19010), **Middle Schools and Math Groups: Parents' Involvement in Children's Placement,** UM *Sociology of Education*, 1992, 65, 4, Oct, 263-279.

¶ Interview data collected 1988/89 from 86 mothers of children in grades 6 & 7 in 2 suburban communities near Boston, Mass, reveal that factors influencing the high correlation between parents' education levels & their children's placement in the mathematics tracking system as they enter middle & junior high school include the propensity of college-educated parents to be knowledgeable about their children's placement, to be integrated into school affairs & parental information networks, to intervene in educational decisions that school personnel make for their children, & to exert an influence over their children's preferences for courses. It is concluded that involvement of highly educated parents in their children's placement is one mechanism by which educational advantage is transmitted from one generation to the next. 5 Tables, 54 References. Adapted from the source document.

Van de Poel-Knottnerus, Frédérique & Knottnerus, J. David (Dept Foreign Languages & Literatures Oklahoma State U, Stillwater 74078), **Youth Society in Early Modern France: A Literary and Social Historical Analysis of the World of Secondary Schoolchildren,** UM *Sociological Inquiry*, 1992, 62, 4, fall, 397-412.

¶ Literary & social-historical records are drawn on to explore the youth society created in the lycées & collèges of France in the nineteenth & early twentieth centuries. A literary ethnography is constructed that presents a composite portrait of these youths' lives & society, & their personal & social experiences are delineated. Certain beliefs, practices, & rules, along with authoritarian/coercive relations & hierarchical social structures, characterized this youth society. The emergence of this historical instance of a youth society within an elite school system is explained in terms of important structural processes operating in this setting & the larger societal context. 61 References. Adapted from the source document.

Waks, Leonard J. (Pennsylvania State U, University Park 16802), **The Responsibility Spiral: A Curriculum Framework for STS Education,** *Theory into Practice*, 1992, 31, 1, winter, 13-19.

¶ Discussed is the "responsibility spiral" developed by the science-technology-society (STS) movement to promote responsible citizenship in this technology-dominated era. A task force of educators met in 1985 at Pennsylvania State U (University Park) to define STS education. The task force devised seven criteria essential to STS: responsibility; mutual influences of science, tecnology, & society; relation to social issues; balance of viewpoints; decision making & problem solving; responsible action; & integration of a point of view. The responsibility spiral emerges from these criteria & is broken down into five phases: self-understanding, study & reflection, decision making, responsible action, & integration. Four guidelines are offered to aid teachers in implementing the spiral model: (1) the STS curriculum is focused on responsibility; (2) the five phases are designed to assure that each receives attention; (3) the STS curriculum can be reorganized to assure proper balance for & sequencing of the five phases; & (4) the responsibility spiral is the core of STS education. It is surrounded by the rest of the curriculum, which may be linked to the core in creative ways. 2 Figures, 13 References. G. Castañeda

Walters, Pamela Barnhouse & James, David R. (Dept Sociology Indiana U, Bloomington 47405), **Schooling for Some: Child Labor and School Enrollment of Black and White Children in the Early Twentieth-Century South,** UM *American Sociological Review*, 1992, 57, 5, Oct, 635-650.

¶ Census & other government statistical data for NC & SC in 1910 indicate that racially segregated labor markets & racially unequal school systems affected school enrollment of black & white children. Analysis suggests that: (1) school enrollment of white children was depressed by employment in the textile industry; (2) school enrollment rates for both

races were unaffected by employment in the wood industry, most likely because of its low reliance on child labor; & (3) school enrollment rates for black children were depressed by inadequate educational opportunities provided by local governments. It is concluded that industrial employment depressed school enrollment among those children who were potential industrial laborers. Results also challenge the assumption that school enrollment expansion in the US was never constrained by a limited availability of educational opportunities. 3 Tables, 1 Figure, 1 Appendix, 53 References. Adapted from the source document.

Wehlage, Gary, Smith, Gregory & Lipman, Pauline (School Education U Wisconsin, Madison 53076), **Restructuring Urban Schools: The New Futures Experience**, *American Educational Research Journal*, 1992, 29, 1, spring, 51-93.

¶ An attempt at restructuring school organization & curriculum, & thereby modifying a school's core values & cultural beliefs about students' & teachers' experiences, was undertaken by the Annie E. Casey Foundation's New Futures Initiative. Quantitative & qualitative evaluations of the educational portion of 3 of the first 5 years of this initiative in 4 school systems–Dayton (Ohio), Little Rock (Ark), Pittsburgh (Pa), & Savannah (Ga)–show that little progress has been made in changing student outcomes, even with substantial efforts & resources. Provisional results indicate that: curriculum changes were supplemental (remedial) as opposed to fundamental; curricula remained traditional; harmonious social relations among students, teachers, & administrators developed only in pockets; & decentralization of decision making did not occur. However, community awareness of at-risk youth issues, high dropout rates, low academic achievement, teen pregnancy, & teen unemployment was raised, & some exploration of community resources has begun. An agenda for restructuring is proposed to effect the cultural changes needed for programs beyond New Futures to succeed. 1 Table. Adapted from the source document.

93Z8099

Wilson, Richard B. & Schmoker, Mike, Quest for Quality, *The Executive Educator*, 1992, 14, 1, Jan, 18-22.

¶ The Japanese management of Toyota, considered by many industry leaders to be the best automobile manufacturer in the US, is described as an example of site-based management. It is suggested that Toyota offers schools an inspiring vision of effective management that builds loyalty to the organization while giving extraordinary autonomy to employees. Toyota's methods are a refinement of the work of W. Edwards Deming, whose theories emphasize the importance of statistical controls in promoting quality & improvement. Toyota's numerous, changing goals & targets, which represent what is more meaningful & motivating to those closest to the job, are related to a school's objectives & outcome indicators. It is argued that the statistical approach modeled by Toyota reveals small, incremental improvement while it cultivates a spirit of dignity in a self-managing work force. Involvement in assessment & evaluation is an effective way to ensure the management remain focused & efficient. The value of employee discourse, whether informal get-togethers or large-scale meeting, & of a "can-do" approach to school management is discussed. S. Millett

——, **Review Symposium:** ***Racism in Children's Lives: A Study of Mainly White Primary Schools***, *British Journal of Sociology of Education*, 1992, 13, 3, Sept, 375-382.

¶ A review symposium on a book by B. Troyna & R. Hatcher, *Racism in Children's Lives: A Study of Mainly White Primary Schools* (Routledge, 1991 [see listing in IRPS No. 67]). **Sally Tomlinson** (Goldsmith's Coll, U of London, England) praises this excellent ethnographic study of three English primary schools, exploring the influences of race on children's interactions, beliefs, & behavior. After rebutting the authors' critique of an earlier study by D. G. Smith & Sally Tomlinson (*The School Effect–A Study of Multiracial Comprehensives*, London: Policy Studies Instit, 1989), their conclusion concerning the coexistence of racially egalitarian thinking & entrenched racism in the primary schools is supported. **Ken Roberts** (U of Liverpool, England) notes that the authors' contribution to race relations research, while methodologically novel, is not a clear advance over previous research. Citing Economic & Social Research Council studies, Troyna's & Hatcher's suggestion that romantic relationships in schoolchildren may increase racist sentiments is refuted. Their work is also criticized for not exploring teachers' views, racial differences in educational achievement, or the true roots of racial thinking. **Ian Menter** (U of West of England, Bristol), commends the theoretical model of racism offered in the book & its combination of interactional & structural perspectives, but critiques the omission of links between race & class & failure to examine teachers' perceptions. 7 References. J. Sadler

Ajerar, Hassane, Politique et prophetie: Islam et occident (Politics and Prophecy: Islam and the Western World), *Cahiers de Sociologie Economique et Culturelle, Ethnopsychologie*, 1992, 17, June, 79-91. (FRE)

¶ The role of the prophet in the Islamic world is contrasted with its Western version, using the examples of Ibn Khaldun & Niccolò Machiavelli, both scholars & political leaders acting in different spheres of the secular & the divine. Islam does not recognize the separation of the powers of church & state, as is practiced in the West. Consequently, prophecy is a mandate rather than a testimonial & needs to be represented in the community by a leader, either the prophet or a disciple. The classic writing of al-Farabi or Avicenna illustrate this difference. Ibn Khaldun rejected the Platonic leanings of his predecessors & adopted a social realist view of the state, favoring the centrality of economic & political necessities. Bastian, Jean-Pierre (Apartado Postal 20-656, Mexico DF 01000), **La Fonction sociale et politique des hétérodoxies religieuses en Amérique latine** (The Social and Political Function of Religious Heterodoxies in Latin America), *Social Compass*, 1992, 39, 4, Dec, 543-551. (FRE)

¶ The resurgence of heterodox religious movements in Latin America is not a sign of secularization & rationalization of belief. On the contrary, it is suggested, the movements are reintroducing basic elements like healing & magic, & do not entail new religious or political values. Discussed is the social marginality of heterodox movements & the relation between their growth & the growth of economic inequalities. The entrance of heterodox movements to politics marks a replacement of political actors by religious ones; however, this should not be viewed as a democratic modernization process, but as a type of integration into corporatist & clientelist relations. 20 References. Bax, Mart (Dept Anthropology Free U, NL-1081 HV Amsterdam Netherlands), **Female Suffering, Local Power Relations, and Religious Tourism: A Case Study from Yugoslavia**, *Medical Anthropology Quarterly (New Series)*, 1992, 6, 2, June, 114-127.

¶ The Yugoslavian women of Medjugorje (in southwest Hercegovina), one of the most famous & visited pilgrimage centers in the Roman Catholic world, have been experiencing fear & illness from what they claim to be devils. These conditions make it difficult for them to carry out their daily tasks, including running the lodging houses that cater to the pilgrims. An examination of the male-female differences in interpretation of the "diabolical" activities reveals that men & priests attribute them to medical reasons or "women's madness" rather than the activity of devils. It is concluded that demonology can reflect tension, channel emotions into recognized patterns of expression, & serve as an instrument of power. The women's psychosomatic problems reflect a long-term power struggle between the sexes to keep feuding & male physical violence within bounds. 39 References. Adapted from the source document. Bibby, Reginald W. & Brinkerhoff, Merlin B. (U Lethbridge, Alberta T1K 3M4), **On the Circulatory Problems of Saints: A Response to Perrin and Mauss**, UM *Review of Religious Research*, 1992, 34, 2, Dec, 170-175.

Reply, 176-178.

¶ In a refutation of the criticisms made by Robin D. Perrin & Armand L. Mauss (see SA 40:2/92Y6424) to Bibby's & Brinkerhoff's "The Circulation of Saints" (see SA 23:1/75H2007), it is contended that the ongoing study of Calgary, Alberta, churches was meant to focus on the immediate previous affiliation of new members. Thus, conservative churches grow by keeping track of geographically mobile members, hanging onto their children, & pursuing a few outsiders. In **Saints and Seriousness: A Reply to Bibby and Brinkerhoff**, Mauss (Washington State U, Pullman) & Perrin argue that Bibby's & Brinkerhoff's results deal with intergenerational retention, while their study was of adult recruitment, two separate factors in the differential growth equation. 3 Tables, 6 References. L. Dorn (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Broyles, Philip A. & Drenovsky, Cynthia K. (c/o Drenovsky–Shippensburg U, PA 17257), **Religious Attendance and the Subjective Health of the Elderly**, UM *Review of Religious Research*, 1992, 34, 2, Dec, 152-160.

¶ Questionnaire data collected in 1990 from a sample of 3,410 Wash residents ages 55-111 are used to show that, among the elderly, church attendance has a positive, statistically significant effect on subjective health even when simultaneously controlling for other possible explanatory variables. It is argued that religious commitment facilitates adjustment to the latter stages of life & leads to a positive evaluation of one's health. 2 Tables, 37 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z8110

Burns, Gene (Princeton U, NJ 08544), **Commitments and Non-Commitments: The Social Radicalism of U.S. Catholic Bishops**, *Theory and Society*, 1992, 21, 5, Oct, 703-733.

¶ Constructing a collective identity is a political process in which successful negotiation of that identity leads collective actors to identify more with affiliations in which they are more powerful; but it may also require avoidance of commitment on issues over which a collective actor's central group affiliations potentially conflict. US bishops, on most issues, have historically identified more with the international church than with secu-

lar US society, given their more powerful standing in the former. However, especially on issues of church-state relations, they avoided commitment on issues in which Roman doctrine was controversial within US politics & society. This ideological noncommitment became a central part of their identity. After Vatican II, however, the conflict between Roman church-state doctrine & participation in US society greatly lessened. Thus bishops became more committed to Roman doctrine on social & political issues, as they remained more powerful within the church than within US secular society. AA

Caldwell, Cleopatra Howard, Greene, Angela Dungee & Billingsley, Andrew (U Michigan, Ann Arbor 48109), **The Black Church as a Family Support System: Instrumental and Expressive Functions,** *National Journal of Sociology,* 1992, 6, 1, summer, 21-40.

¶ It is argued that the black church in the US is a viable family support system in light of the retraction of economic & social support programs sponsored by federal, state, & local governments. Interviews with representatives from 634 northern black churches found that 425 provided at least 1 family support program, for a total of 1,683 programs. The majority may be classified as programs designed to meet the instrumental needs of families. Implications of the findings for enhancing African-American family life are also provided. 3 Tables, 3 Figures, 23 References. Adapted from the source document.

Carroll, Michael P. (U Western Ontario, London N6A 5C2), **Religion, *Ricettizie,* and the Immunity of Southern Italy to the Reformation,** UM *Journal for the Scientific Study of Religion,* 1992, 31, 3, Sept, 247-260.

¶ An examination of the link between social structure & a belief in immanence in Italy. Protestantism had some early & limited successes in northern Italy, mainly because of the presenece of indigenous religious traditions that (like Protestantism) rejected immanence. Southern Italy, by contrast, never developed any indigenous immanence-rejecting traditions that could serve to "pull in" Protestantism, in part because local communities in the South were often organized around a *chiesa ricettizie* (churches of received priests), a type of church well studied by Italian scholars but generally ignored by English-speaking investigators. 45 References. Cartwright, Robert H. & Kent, Stephen A. (Dept Sociology U Alberta, Edmonton T6G 2H4), **Social Control in Alternative Religions: A Familial Perspective,** UM *Sociological Analysis,* 1992, 53, 4, winter, 345-361.

¶ Family models are pervasive in both the theological self-conceptions of alternative religious organizations & the sociological scholarship on them. It is argued that these models provide useful directions for studying alternative religions, since both institutions frequently enmesh their members in constraining social environments that facilitate the occurrence of sustained & systematic abuse. Noteworthy, therefore, is the failure of alternative religion scholars to incorporate insights from standard family violence literature–social structural, social systems, & feminist–that provide explanations about why members remain in abusive social relationships. These explanations shed light on the reasons why members remain in abusive alternative religions, & establish clear conceptual links between the sociology of religion & the sociology of the family. 90 References. Cavalcanti, H. B. (U Richmond, VA 23173), **Political Cooperation and Religious Repression: Presbyterians under Military Rule in Brazil (1964-1974),** UM *Review of Religious Research,* 1992, 34, 2, Dec, 97-116.

¶ Protestant denominations under Latin American military rule have typically either remained politically neutral or have given full cooperation to the government. A case study of a Brazilian Protestant church–the Presbyterian Church of Brazil–during the period of military regime, 1964-1974, explains how Protestant cooperation with the military aids the church in increasing control over its internal life, & is deeply rooted in three long-term trends in Brazilian Presbyterianism: the church's theological intransigence, its struggle to prove its national birthright, & the level of its membership's social prosperity. 69 References. Chaves, Mark & Higgins, Lynn M. (U Notre Dame, IN 46556), **Comparing the Community Involvement of Black and White Congregations,** UM *Journal for the Scientific Study of Religion,* 1992, 31, 4, Dec, 425-440.

¶ A comparative analysis of black & white churches draws on telephone survey data collected from a national probability sample of 1,862 US congregations in 1988 to investigate whether the extrareligious functions of black congregations have become attentuated in recent decades. Analysis reveals that in 1988, black congregations were not more active in secular activities in general, but were significantly more active in certain kinds of nonreligious activity, eg, those directed at serving underprivileged segments of the immediate surrounding community, & civil rights activities. The differences between black & white congregations in these activities were not explained by differences in congregational size, resources, urban/rural setting, or southern/nonsouthern location. Results support the theory that black congregations continue to perform nonreligious functions within their communities, although an interaction between race & congregational founding date suggests important variations within black religion. 3 Tables, 1 Figure, 18 References. Cochran, John K., Beeghley, Leonard & Bock, E. Wilbur (U Oklahoma, Norman 73019), **The Influence of Religious Stability and Homogamy on the Relationship between Religiosity and Alcohol Use among Protestants,** UM *Journal for the Scientific Study of Religion,* 1992, 31, 4, Dec, 441-456.

¶ Previous studies have demonstrated that religiosity is inversely related to alcohol use, & that the strength of this relationship varies across faith groups in a manner consistent with their theological postures. Here, the examination of the effect of faith groups on alcohol use is extended via analysis of the joint influence of religious stability & homogamy. Data from the 1972-1989 General Social Surveys for subsamples of Protestant adults reveal that the strength of the religiosity-alcohol use relationship varies predictably across childhood religion & current religious affiliation of respondent & spouse. 3 Tables, 44 References. Colas, Dominique (Dept Revues U France, F-91003 Evry Cedex), **Le Moment luthérien de la société civile** (The Lutheran Moment of the Civil Society), *Philosophie politique,* 1991, 1, 41-54. (FRE)

¶ The term "civil society" was first mentioned in a sixteenth-century French version of a text by Martin Luther (no reference provided). The Lutheran political model was conceptualized after models from antiquity, & proposed a new understanding of political vision formulated by Aristotle & Augustine. Discussed are commentaries & perceptions of the civil society idea by European thinkers in the Middle Ages & Early Modern era, including, eg, Gilles de Rome, Thomas Muenzer, Melanchthon, G. W. F. Hegel, & Karl Marx. The role of the tension between civil society, religion, & sentiments of national unity in Germany & France is discussed, & a brief reference made to the role of religion in the contemporary dissolution of communist regimes. I. Shagrir

Dalton, Lisle, Hammond, Phillip E., Ingersoll, Julie, Machacek, David, Pullen, Elizabeth, Valdez, Roger & Wilson, Brian (c/o Hammond–U California, Santa Barbara 93106), **Bringing Tocqueville In: Remedying a Neglect in the Sociology of Religion,** UM *Journal for the Scientific Study of Religion,* 1992, 31, 4, Dec, 395-407.

¶ Alexis de Tocqueville's *Democracy in America* ([George Lawrence's translation] Garden City, NY: Anchor Books, 1959 [1885]) is examined for its relevance to a general theory in the sociology of religion. De Tocqueville's master notion was that societies tended toward declining ascription, but that democracy would ultimately lead to totalitarianism. In the US, this tendency was held in check by the availability of land, the federal character of the government (particuarly the independent judiciary), & the mores of the people. Religion played a crucial role in this last counterforce through many mechanisms: (1) the religious & democratic function of public opinion; (2) the linkages between religion & political opinion; (3) religion's relationship to individualism; & (4) the privatization of religion & the nature of religious authority. De Tocqueville's concepts of religion are briefly compared with those of Max Weber. 1 Appendix, 15 References. Adapted from the source document.

deSilva, David A. (Emory U, Atlanta GA 30322), **The Revelation to John: A Case Study in Apocalyptic Propaganda and the Maintenance of Sectarian Identity,** UM *Sociological Analysis,* 1992, 53, 4, winter, 375-395.

¶ Sociologists of religion & biblical scholars often define the function of apocalypses & apocalyptic eschatology as a means of comforting the oppressed, ie, a form of other worldly theodicy in P. L. Berger's terminology (*The Sacred Canopy,* Garden City, NY: Doubleday, 1967). Careful scrutiny of the circumstances surrounding the writing & transmission of the Revelation of John leads to another possibility–apocalyptic literature & ideology may serve as a call to action & to protest of the dominant societal institutions & values. Here, tensions weighing on the Christian communities at the close of the first century are examined, exploring the interaction of the Revelation with these circumstances, particularly the imperial cult, as a summons to the churches to choose a path that will maintain the integrity of the subgroup's boundaries. Rather than comfort the disenfranchised, the Revelation appears to have set the Christians on a course of action that would lead to ultimate disenfranchisement. In this case, apocalyptic literature displays itself as revolutionary in character & intention. 42 References. Adapted from the source document.

Dixon, Richard D., Lowery, Roger C. & Jones, Lloyd P. (U North Carolina, Wilmington 28403-3297), **The Fact and Form of Born-Again Religious Conversions and Sociopolitical Conservatism,** UM *Review of Religious Research,* 1992, 34, 2, Dec, 117-131.

¶ Telephone interview data collected in 1989 from 287 white Protestants age 18+ living in a southeastern US county reveal a distinction between sudden & gradual Christian Protestant born agains. Here, an attempt is made to determine if the distinction is salient when examining influences on a composed index of sociopolitical conservatism. Findings reveal that: (1) the Gallup form of the born-again item elicits affirmative responses from both types of born agains; (2) whether a white Protestant is born again has a significant influence on sociopolitical conservatism at the bivariate level, but how one is born again–suddenly or gradually–does not; (3) when submitted to multivariate analysis, born-again status loses its salience as a significant independent influence on sociopolitical conservatism; & (4) other religious variables tapping fervor & fundamentalism correlate significantly at the multivariate level with sociopolitical conservatism, but certain sociopolitical variables are more salient. Implications are suggested. 2 Tables, 2 Appendixes, 29 References. Adapted from the source document.

Habibis, Daphne (School Social Work U Tasmania, Hobart 7001 Australia), **Change and Continuity: A Sufi Order in Contemporary Lebanon**, *Social Analysis*, 1992, 31, July, 44-78.
¶ An examination of the enduring role of the Sufi Orders in Lebanon, focusing on the adherents & the activities of the Naqshbandi Order in the northern Lebanese city of Tripoli during 1980/81. The extent of Sufi activity in Tripoli is explored, pointing out that, unlike many other areas of the Muslim world, Islamic fundamentalism never succeeded in gaining a firm stronghold on the town. The adherents of one branch of the Naqshbandi Sufi Order are described, as are the networks used by the Sheikh of the Order to gain followers. The attachment of adherents to the Order is explained in terms of their class position & their experiences of rapid social change & extreme political & civil disorder. It is concluded that, while the position of the Order in contemporary Lebanon is marginal, it retains its residual role of offering a private, inner theosophy. Its limited but ongoing appeal in Tripoli reflects an archaic residue of that city's unbroken tradition of adherence to Sufism, as well as the reassertion of the Naqshbandi Order's central devotional core, by offering answers to the problem of meaning. 62 References. Haerich, Paul (La Sierra U, Riverside CA 92515), **Premarital Sexual Permissiveness and Religious Orientation: A Preliminary Investigation**, UM *Journal for the Scientific Study of Religion*, 1992, 31, 3, Sept, 361-365.
¶ Questionnaire & scale data collected from 204 students at a small, private university in southern Calif are used to investigate the relationship between the normative aspects of sexuality, specifically premarital sexual permissiveness & religiousness based on the intrinsic (I) & extrinsic (Ep [personal benefits], Es [social relationships]) subscales of Allport's Religious Orientation Scale. Partial correlations, with controls for the effects of age, gender, & ethnic affiliation, indicated: (1) a replication of previous findings that the I subscale (but not E) was positively associated with church attendance & self-reported religiosity; (2) that Es was positively associated with church attendance; (3) that I was negatively related to permissiveness; & (4) the nonintuitive result that Ep subscale scores were positively related to permissiveness. Results suggest that future use of an I/Ep/Es approach might provide valuable information on the development of normative aspects of premarital sexuality. 1 Table, 10 References. Adapted from the source document.

Koertvelyessy, Tibor, Crawford, Michael H., Pap, Miklos & Szilagyi, Katalin (Dept Sociology & Anthropology Ohio U, Athens 45701), **The Influence of Religious Affiliation on Surname Repetition in Marriages in Tiszaszalka, Hungary,** *Journal of Biosocial Science,* 1992, 24, 1, Jan, 113-121.

Marriage records, 1806-present, for Protestants & Catholics (N = 972 & 299, respectively) in Tiszaszalka, a village in northeastern Hungary, are used to examine repeated pairs (RP) of surnames in marriages–ie, marriages within lineages, so that the surnames of a given husband & wife pair are repeated in other pairs. The results indicate that: (1) lineage-like behavior in mate choice results in population subdivision in both Catholics & Protestants; (2) unlike in some other Tiszahat villages, the isonymous & the repeating unions in Tiszaszalka occur in different lineages, so in neither of these subpopulations are isonymous & repeating unions monopolized by a few lineages; & (3) religious affiliation influences the mating structure of the population as measured by RP summary scores. 3 Tables, 1 Figure, 28 References. Adapted from the source document.

93Z8137

Kosmin, Barry A., Keysar, Ariela & Lerer, Nava (Mandell L. Berman Instit City U New York, NY 10036-8099), **Secular Education and the Religious Profile of Contemporary Black and White Americans,** UM *Journal for the Scientific Study of Religion,* 1992, 31, 4, Dec, 523-532.

¶ Data from the 1990 National Survey of Religious Identification for a subsample of 84,469 non-Hispanic white & 8,859 non-Hispanic black adults distributed across 14 religious groups are drawn on to explore relationships among social status, race, & religion in the contemporary US. Focus is on whether: (1) the historical pattern of social ranking among religious groups still exists in the 1990s; (2) African Americans fit the dominant pattern; & (3) national white-black educational disparities (used as a measure of social status) occur across all religious groups. 4 Tables, 12 References. Adapted from the source document.

Lamy, Philip (Dept Sociology/Social Work/Criminal Justice Castleton State Coll, VT 05735), **Millennialism in the Mass Media: The Case of *Soldier of Fortune* Magazine,** UM *Journal for the Scientific Study of Religion,* 1992, 31, 4, Dec, 408-424.

¶ Data obtained via a content analysis of a sample of *Soldier of Fortune* magazines, 1983-1990, & from a study of the 15th Anniversary *Soldier of Fortune* Convention & Exposition held in Las Vegas, Nev, in Sept 1990 are used to argue that *Soldier of Fortune* can be read as an apocalyptic text that expresses a postmodern & secular form of the classical millennial myth that spans the history of Christianity. In its American form, the myth renders the US as the millennial "Redeemer Nation," & has played an important role in the nation's history & culture. *Soldier of Fortune* & the survivalist subculture it represents demonstrate how the millennial myth becomes altered in form, redefined, & reproduced in the mass media & popular culture. The power of this sort of religious myth lies in its persistence & adaptability to changing times. 1 Table, 33 References. Adapted from the source document.

93Z8139

Ma, Li-Chen & Smith, Kevin (Dept Sociology/Social Work/Criminal Justice Lamar U, Beaumont TX 77710), **Social Correlates of Confucian Ethics in Taiwan,** *Journal of Social Psychology,* 1992, 132, 5, Oct, 655-659.

¶ Data from a 1984/85 nationwide social survey (N = 9,000 households) in Taiwan, are used to investigate the extent of support for Confucian ethical beliefs across sociodemographic groups in the Taiwanese population. Although the extent of such support varied across occupation, residence, & place of origin, it did not significantly vary across most socioeconomic groups. The convergence of Confucianism is explained in terms of recent economic development & social changes in Taiwan. 1 Table, 1 Appendix, 8 References. Adapted from the source document.

Martelli, Stefano, La religione tra modernità e post-modernità. A proposito del Convegno internazionale "La religione degli europei" (Religion between Modernity and Postmodernity: An International Convention on "The Religion of Europeans"), *Religioni e Società,* 1992, 7, 13, Jan-June, 132-138. (ITA)

¶ A large number of sociologists, theologians, & representatives of Christian churches & other religions participated in a conference on "The Religion of Europeans: Faith and Society in Europe at the End of the Millenium," held in Oct 1991 in Turin, Italy, examining data collected 1945-1989 in France, Germany, Hungary, Italy, Spain, & the UK. Key components included: the reconfiguration of religious beliefs: a drop in church attendance; church-sponsored social action programs; the relationship between religion & politics; & changes in religion itself during the modern & postmodern eras. M. Meeks

93Z8141

Martini, Luciano, Ricordo de padre Ernesto Balducci (Memoires of Father Ernesto Balducci), *Religioni e Società,* 1992, 7, 13, Jan-June, 99-105. (ITA)

¶ A posthumous tribute is paid to Father Ernesto Balducci, a prolific Italian writer on religious & social themes, who died 25 Apr 1992. Special attention is given to his *Il cerchio che si chiude. Intervista autobiografica* ([The Circle That Closes: An Autobiographical Interview] Genoa: Marietti, 1986), in which he revealed a great deal of his personal reflections. In addition to his distinguished publishing record, Balducci is remembered for his Sunday sermons & his ability to perceive the existential dimension of problems, as well as for his responsible participation in collective history. M. Meeks

93Z8142

Matějů, Petr (Instit Sociology Czechoslovak Academy Sciences, Jilská 1 CS-11000 Prague 1 [Tel: 42-2-235-89-68-71; FAX: 42-2-235-78-88]), **Beyond Educational Inequality in Czechoslovakia,** *Sociologický Časopis,* 1992, 28, special issue, Aug, 37-60.

¶ Though meritocratic processes are generally used to explain educational inequality in Czechoslovakia, it is argued that the same patterns of social fluidity can be generated by non- or antimeritocratic processes. The nonmeritocratic thesis suggests that, because of bureaucratic rules applied to admissions policy, the spontaneous tendency of higher social strata to use their social capital & to pass on social advantages to their offspring in socialist countries seems to be less restricted by meritocratic competition than in advanced capitalist countries. Preliminary results from a longitudinal survey started in Czechoslovakia in Jan 1989 support this thesis. 4 Tables, 4 Figures, 1 Appendix, 34 References. Adapted from the source document.

93Z8143

Matthes, Joachim (Instit Soziologie U Erlangen-Nürnberg, D-8520 Federal Republic Germany), **Auf der Suche nach dem "Religiösen". Reflexionen zu Theorie und Empirie religionssoziologischer Forschung** (In Search of the "Religious People." Reflections on the Theory and Empiricism of Religious-Sociological Research), *Sociologia Internationalis,* 1992, 30, 2, 129-142. (GER)

¶ It is argued that religion is a discursive fact; ie, it is a social fact established in social discourse. This definition makes it possible to investigate the hidden cultural assumptions in research on religion by theologians & social scientists. Also considered is how the cultural concept of religion in the West can be used to understand non-Western cultures. Adapted from the source document.

Melendez, Guillermo (Ecumenical Research Dept, Apartado postal 389-2070 Sabanilla San Jose Costa Rica), **The Catholic Church in Central America: Into the 1990s,** *Social Compass,* 1992, 39, 4, Dec,

553-570.
¶ An examination of the growth of Christian neoconservatism in Central America. During the 1980s, two prime factors contributed to the process: (1) the presence of neoconservative ideology from the US & its effective use of mass media; & (2) the disqualification by Pope John Paul II of the Central American popular church–distorting its Catholic image, presenting it as a threat to the ecclesiastical institution. The consequent restructuring of Catholicism in Central America included rebuilding the alliance between church & state, persecution of liberal progressive elements, & growth of Catholic authoritarianism. The reorganization of Catholicism is discussed in relation to political devleopments in Guatemala, El Salvador, Honduras, Nicaragua, & Costa Rica. Adapted from the source document.

Muro González, Víctor Gabriel, Estructura y acción renovadora en la iglesia católica mexicana contemporánea (Structure and Renovative Action in the Contemporary Mexican Catholic Church), *Nueva Antropología,* 1992, 12, 41, Mar, 83-99. (SPA)
¶ Based on analysis of historical documents, including Catholic magazines, & secondary data, barriers to the involvement of the Catholic church in social reform in Mexico in the twentieth century are described. The exclusion of the church from civil power, 1911-1940, contributed to the formation of a conservative anticommunist theology & the formation of conservative lay groups, eg, the *Liga Nacional para la Defensa de la Libertad Religiosa,* which confronted the government regarding its anticlerical policies, which even reduce the number of clerical personnel & training centers. When the government proposed new conditions of coexistence in the 1940s, the structural base of the church had been weakened; thus conservative lay groups emerged with significant power. Mutual support between the church & the government in the 1940s-1980s & strong antileftist ideology among Catholic lay groups made the formation & maintenance of religious opposition difficult, if not impossible. It is concluded that historical conditions have impeded the formation of a popular Catholic political movement in Mexico. J. Taylor

Nesti, Arnaldo, Religione e cultura. Il cattolicesimo nell'Italia contemporanea (Religion and Culture: Catholicism in Modern Italy), *Religioni e Società,* 1992, 7, 13, Jan-June, 37-61. (ITA)
¶ An analysis is presented of the role of Roman Catholicism in modern Italian society, with special emphasis on the polymorphism of religious experience. There are 224 dioceses with 26,000 parishes, 37,000 diocesan priests, 28,000 brothers, & 13,400 nuns; there is 1 diocesan priest for every 1,500 Italians. More than 4,500 social service organizations are sponsored by the church. About 80% of the population describe themselves as Catholic. Many of the crises in church life occurring after the Second Vatican Council now seem to have been overcome. The influence of the bishops' appeals in shaping voting behavior seems to be declining. Church attendance is down, & there is little agreement with church teaching on issues of sexuality. Nevertheless, the Catholic culture still persists in Italy. 2 Tables. M. Meeks

Palmer, Susan J. & Finn, Natalie (Dawson Coll, Glendive MT 59330), **Coping with Apocalypse in Canada: Experiences of Endtime in La Mission de l'Esprit Saint and the Institute of Applied Metaphysics,** UM *Sociological Analysis,* 1992, 53, 4, winter, 397-415.
¶ An investigation of millenarian activity in two Quebec new religious movements–La Mission de l'Esprit Saint & the Instit of Applied Metaphysics, founded by Winifred G. Barton–examines their differential success, drawing on data from interviews with former members (N not specified). It is postulated that if millenarian activity is approached not as a set of beliefs, but rather as a collective ritual of initiation into a new type of religious organization, then an important factor in the survival of millenarian movements is the quality of the ritual experience. A comparison of Barton's aesthetically satisfying apocalypse with the unmitigated fiasco that occurred in La Mission de l'Esprit Saint suggests that the prophet who is skillful as a stage manager & group facilitator can avert the crisis of cognitive dissonance & induce in the participants a state of "noncognitive consonance." 25 References. Pargament, Kenneth I., Olsen, Hannah, Reilly, Barbara, Falgout, Kathryn, Ensing, David S. & Van Haitsma, Kimberly (Dept Psychology Bowling Green State U, OH 43403), **God Help Me (II): The Relationship of Religious Orientations to Religious Coping with Negative Life Events,** UM *Journal for the Scientific Study of Religion,* 1992, 31, 4, Dec, 504-513.
¶ (For Part I, see Pargament, K., et al, "God Help Me (I): Religious Coping Efforts as the Outcomes to Significant Negative Life Events," *American Journal of Community Psychology,* 1990, 18, 6, 793-824.) An investigation of the relationship of intrinsic, extrinsic, & quest religious orientations to religious & nonreligious coping with a significant negative life event. Survey data from a sample of 538 members of 10 mainstream Christian churches in the midwestern US reveal that each orientation is associated with a different way of coping with specific life problems. When coupled with results from Part I, findings suggest that religious coping efforts might bridge the general religious orientation of the individual to the outcomes of critical life events. Results demonstrate the importance of the workings of religion in specific life situations. 1 Table, 40 References. Adapted from the source document.

Parker, Christián (CERC, Concha & Toro 13 Santiago Chile), **Christianity and the Cultural Identity of Latin America on the Threshold of the 21st Century,** *Social Compass,* 1992, 39, 4, Dec, 571-583.
¶ The current rise in Latin American consciousness is part of an identity search manifest in theology, sociology, philosophy, & the arts. Highlighted is the centrality to the identity search of Creole thinkers since the nineteenth century. The main impetus for the process comes from popular culture. Discussed is the decisive, but not exclusive, role of Christianity in popular culture. It is argued that popular religions play a dynamic & rebellious role in resisting Western cultural dominance. Adapted from the source document.

Perkins, H. Wesley (Hobart & William Smith Colls, Geneva NY 14456), **Student Religiosity and Social Justice Concerns in England and the United States: Are They Still Related?,** UM *Journal for the Scientific Study of Religion,* 1992, 31, 3, Sept, 353-360.

A 10-year follow-up of Perkins's "A Research Note on Religiosity as Opiate or Prophetic Stimulant among Students in England and the United States" (see SA 33:3/85O8549), which investigated religiosity & social justice concerns among college students in England & the US. The replicated study described here collected data using the same questionnaire & scale from 1,102 students at the same 5 diverse institutions in the 2 countries. With controls for students' social background characteristics, results in each country consistently failed to reveal high religiosity as an "opiate" inherently fostering less compassionate, inegalitarian, or racist attitudes. Rather, in both time periods, strong religious commitment was linked to heightened humanitarianism & a reduction in prejudice. However, nominal or moderate religiosity, as opposed to no religious allegiance, was associated with more racist viewpoints in both studies. 1 Table, 10 References. Adapted from the source document.

Prandi, Carlo, Immagine religiosa del mondo, identità, acculturazione (The Religious Image of the World, Identity, and Acculturation), *Religioni e Società,* 1992, 7, 13, Jan-June, 111-116. (ITA)

Note, 117-118.

¶ The five-hundredth anniversary of the discovery of America by Christopher Columbus is encouraging scholarly reflection on the impact of European institutions, including religion, on indigenous cultures. Closer examination reveals that Europe's religious imagination has both invaded & been invaded since the sixteenth century. Secularization & formal rationality in the Weberian sense substantially changed the character of European religion. The distinction is made between open & closed religious & moral systems. The rise of fundamentalism seeks to reverse the trend toward open systems. **Enzo Segre** notes that in Latin America, the Christian faith was adopted by some voluntarily & others under threat of force. The Indians with the simplest social systems offered the most resistance to European religion. Mixtures of Christian & folk beliefs can be seen in the oral traditions of the peasants. Implications for the next century are discussed. M. Meeks

Pratt, Michael W., Hunsberger, Bruce, Pancer, S. Mark & Roth, Don (Wilfrid Laurier U, Waterloo Ontario N2L 3C5), **Reflections on Religion: Aging, Belief Orthodoxy, and Interpersonal Conflict in the Complexity of Adult Thinking about Religious Issues,** UM *Journal for the Scientific Study of Religion,* 1992, 31, 4, Dec, 514-522.

¶ Respondents ([Rs] total N = 60) from 3 age groups (18-26, 27-45, & 60-86) drawn from a university & senior citizens recreation center in Canada were interviewed to investigate the integrative complexity of reasoning about 3 different types of religious issues. Rs reported their current beliefs, justifications, & views on alternative positions regarding: (1) a personally conflictual religious issue of their own report, (2) a personally nonconflictual issue, & (3) a standard dilemma involving evolutionist vs creationist accounts of human origins. Results showed that older Rs reasoned less complexly than did their younger counterparts in all three types of religious dilemmas. Personally conflictual dilemmas were discussed in a more complex fashion than were other types across age groups, suggesting that external dialogue about such issues is linked to more sophisticated mental structures of argumentation. Regression analysis showed that Rs who were older, more orthodox, reported less religious reflection, & had poorer verbal skills displayed less complex religious reasoning overall. 2 Tables, 24 References. Quigley, Declan (Dépt anthropologie sociale U Oxford, OX1 2JD England), **Le Brahmane pur et le prêtre impur** (The Pure Brahman and the Impure Priest), *Recherches Sociologiques,* 1992, 23, 2, 69-89. (FRE)

¶ Louis Dumont's thesis in ***Homo Hierarchicus: essai sur le*** *système des castes* ([*Homo Hierarchicus*: Essay on the Caste System], Paris: Gallimard, 1966) that the Brahman is India's highest caste is rejected. He suggests that this status results from association with priesthood; however, based on textual & ethnographic evidence, no necessary relation exists between caste membership & priesthood. It is argued that Brahmans achieve higher status in spite of links with degrading priesthood. The confusion stems from the polysemous signifier Brahmans. One meaning is caste (*jāti*) or kinship group, while the second refers to a profession or a function (*varna*). Dumont did not make the distinction between *jāti* & *varna* explicit in his writings. Six classes of Brahmans in varying degrees of purity are distinguished, ranging from the recluse to the funeral priest. The secular practice of priesthood is a threat to the Brahman's purity. Ethnographies of Gloria Raheja, Chris Fuller, & J. Parry are cited. 1 Table, 12 References. Adapted from the source document.

Rabinowitz, Jonathan, Kim, Israel & Lazerwitz, Bernard (Bar-Ilan U, IL-52100 Ramat-Gan Israel), **Metropolitan Size and Participation in Religio-Ethnic Communities,** UM *Journal for the Scientific Study of Religion,* 1992, 31, 3, Sept, 339-345.

¶ Data from the 1985-1989 General Social Surveys & the 1971 National Jewish Population Survey are used to evaluate the impact of metropolitan size on participation in Protestant, Catholic, & Jewish subcommunities in the US. The major hypotheses were: (1) the larger the religioethnic subcommunity, the less its members participate formally (eg, organizational membership); (2) the larger the Jewish or Catholic subcommunity, the more its members will participate informally (eg, within-group friendship); (3) the smaller the religioethnic group, the more its members are affected by community size; & (4) the majority subcommunity will be relatively impervious to the effects of community size. Hypotheses 1, 3, & 4 were supported by both surveys; hypothesis 2, tested only in the Jewish community, was also supported. 2 Tables, 12 References. Adapted from the source document.

Rawlyk, G. A. (Queen's U, Kingston Ontario K7L 3N6), **Fundamentalisms and Fundamentalism,** UM *Queen's Quarterly,* 1992, 99, 2, summer, 377-382.

¶ A review essay on a book edited by Martin E. Marty & R. Scott Appleby, *Fundamentalisms Observed* (Chicago: U of Chicago Press, 1992 [see listing in IRPS No. 67]). A collection of essays, this book offers reflections on the historical development & contemporary status of fundamentalism throughout the world. Various strands of fundamentalism are treated, including Roman Catholic, Jewish, North American Protestant, Hindu, & Islamic. The uneven collection provides convincing evidence that fundamentalism is far from dead in the major religious systems of the world. It is concluded that, despite urbanization, economic progress, secularization, & consumerism, many in the postmodern world are desperately searching for absolute values with which to cope with an increasingly disoriented present; fundamentalism provides such values. 2 References. Richards, P. Scott & Davison, Mark L. (Brigham Young U, Provo UT 84602), **Religious Bias in Moral Development Research: A Psychometric Investigation,** UM *Journal for the Scientific Study of Religion,* 1992, 31, 4, Dec, 467-485.

¶ The validity of the Defining Issues Test ([DIT] Rest, James R., *Development in Judging Moral Issues,* Minneapolis: U of Minnesota Press, 1979) for examining moral reasoning among conservative religious people is tested in 2 studies (N = 833 Mormons in Provo, Utah, & Saint

Paul/Minneapolis, Minn, & 57 undergraduates at Brigham Young U in Provo, Utah). Study 1 demonstrated that 16-25 (of 72) DIT items had differential item functioning; ie, they were measuring a different construct for conservative religious Ss. Study 2 indicated that a large proportion of this differential item functioning was due to the religious connotations of these items. It is concluded that the DIT is not completely valid for people from some conservative religious cultures. In addition, results suggest that Lawrence Kohlberg's theory of moral development (eg, see "Stage and Sequence: The Cognitive-Developmental Approach to Socialization" in Goslin, David A. (Ed), *Handbook of Socialisation: Theory and Research*, Chicago: Rand McNally, 1969, 347-480) is somewhat limited religiously & culturally. 3 Tables, 51 References. Adapted from the source document.

Salinas, Maximiliano (Abdón Cifuentes 49, Santiago Chile), **Christianity, Colonialism and Women in Latin America in the 16th, 17th and 18th Centuries**, *Social Compass*, 1992, 39, 4, Dec, 525-542.

¶ Three representations of woman were created by the colonial Christian church in the New World: (1) the heavenly ideal of woman, based on the Virgin Mary, which, for indigenous Latin American women, was unattainable; (2) the earthly woman, whose subordination by the church & society was expressed in laws & rules of conduct; & (3) the woman in Hell, an image created by the inquisition for witches & prostitutes. Manifestations in the colonial period of protest by women & other oppressed people against the imposition of Christian colonial domination are examined. Gradually the heavenly women image was rejected, & a new affective & liberated image of Mary emerged. Adapted from the source document.

Sanders, Jack T. (U Oregon, Eugene 97403), **Christians and Jews in the Roman Empire: A Conversation with Rodney Stark**, UM *Sociological Analysis*, 1992, 53, 4, winter, 433-445.

Comment, 447-451.

¶ A critique of Rodney Stark's investigation of early Christianity's connection with urban development (see SA 39:3/91X7059), questioning the statistical base of the study. Stark's analysis suggests that: population had some relation to where Christianity spread, distance from Jerusalem & Romanization were strong negative factors, & there was a high correlation between presence of a synagogue in a city & the establishment of Christianity there. It is argued that Stark's statistical sources, ie, atlases & the work of historian Adolf Harnack, are far less accurate & reliable than other available information. Furthermore, he offers a confusing analysis of the influence of the cultural setting on the spread of Christianity & makes a problematic (statistical) connection between Jewish presence (the existence of a synagogue in a city) & the expansion of Christianity. It is concluded that Stark's analysis is in need of revision with regard to the location of early Christian congregations, the size of those locations, the presence of Jews there, & the presence of Hellenization. In **Some Unkind Words for Jack Sanders**, Stark (U of Washington, Seattle) accuses Sanders of having no grasp of variation or of correlation, & seems unable to understand that tracing the spread of Christianity everywhere was not intended. It is argued that Sanders's criticism reflects his conviction that the mission to the Jews failed & that from a very early date Christians were overwhelmingly recruited from among the pagans, a position challenged in Stark's essay. 38 References. Schwarzwald, Joseph & Leslau, Abraham (Bar-Ilan U, IL-52900 Ramat-Gan Israel), **Religiosity, Subjective Norms, and Educational Attitudes in the Choice of Religious Education by Israeli Parents**, UM *Journal for the Scientific Study of Religion*, 1992, 31, 3, Sept, 261-278.

¶ Questionnaire data collected from 710 parents in Israel are used to evaluate the influence of parental religiosity, religious educational attitudes, subjective norms, & a variety of sociodemographic characteristics on parents' choices of religious vs secular elementary public education for their children. As expected, choice of school sector was related primarily to level of parental religiosity. LISREL analyses revealed that the parental decision was also influenced by such school characteristics as educational level & geographic location, as well as by perceived social norms. The specific weight of the variable shifted as a function of parental educational level & ethnicity. Social implications are discussed regarding the potential for social cleavage & separatism between religious & nonreligious Jews. 3 Tables, 2 Figures, 41 References. Adapted from the source document.

93Z8165

Smidt, Corwin & Kellstedt, Paul (Calvin Coll, Grand Rapids MI 49546), **Evangelicals in the Post-Reagan Era: An Analysis of Evangelical Voters in the 1988 Presidential Election**, UM *Journal for the Scientific Study of Religion*, 1992, 31, 3, Sept, 330-338.

¶ While evangelicals entered the 1980s as relatively apolitical citizens with predominantly Democratic partisan orientations, both of these political traits appeared to be changing during Ronald Reagan's presidency. Here, using data from the 1980, 1984, & 1988 National Election Studies, changing levels of politicization & partisanship among evangelicals in the 1988 general election are compared with those of the 1980 & 1984 elections to ascertain whether recent changes among evangelicals are likely to become permanent features of the political landscape. 3 Tables, 26 References. Adapted from the source document.

Stack, Steven & Wasserman, Ira (Wayne State U, Detroit MI 48202), **The Effect of Religion on Suicide Ideology: An Analysis of the Networks Perspective**, UM *Journal for the Scientific Study of Religion*, 1992, 31, 4, Dec, 457-466.

¶ Data from a Protestant subsample (total N = 5,726) of the 1972-1990 General Social Surveys are drawn on to test the hypothesis that the extent of social support networks in religious congregations serves to protect members against suicide. Results demonstrate that members of churches promoting network involvement have lower levels of suicidal ideology. In particular, members of churches with conservative theologies, nonecumenical relations, &/or whose teachings are in tension with the larger society have lower levels of suicidal ideology. Findings are independent of control variables drawn from alternative theories of suicide, thus supporting the validity of network theory. 4 Tables, 21 References. Adapted from the source document.

Thornton, Arland, Axinn, William G. & Hill, Daniel H. (Survey Research Center Instit Social Research U Michigan, Ann Arbor 48106-1248), **Reciprocal Effects of Religiosity, Cohabitation, and Marriage**, UM *American Journal of Sociology*, 1992, 98, 3, Nov, 628-651.
¶ Hypotheses of reciprocal causal relationships between the formation of cohabiting & marital unions & religious commitment/participation are tested with longitudinal interview data from a 1962-1985 panel study of mothers & children (N not specified) in Detroit, Mich. Results show that the religiosity of both influences the cohabiting & marital behavior of children; ie, those from less religious families have higher rates of entering intimate coresidential unions & a tendency to substitute cohabitation for marriage. Further analysis indicate that cohabitation decreases religiosity, while marriage increases it. 6 Tables, 44 References. Adapted from the source document.

93Z8172
Tomka, Miklós, A vallás mint változó rendszer (Religion as a System and Its Changes), *Szociológia*, 1990, 3-4, 155-184. (HUN)
¶ Religion in post-WWII Hungary is examined as a sociocultural system comprised of content (belief, religious practice, material religious culture), community (religious community & church), institution, & organization. After isolating a number of cultural & political phases during this period, various types of religious systems & the unique vitality of each are analyzed. The religious system is continually reproduced & adjusts itself to environmental requirements & the external world. While religion is a single system, its elements have a certain degree of autonomy; eg, the reproduction & renewal of religious faith & organization do not necessarily follow the same course. Similarly, the relationship of religious faith & morals is not necessarily related to the changing state-church relationship. Adapted from the source document.

93Z8175
Waxman, Chaim I., Review Essay: Are America's Jews Experiencing a Religious Revival?, UM *Qualitative Sociology*, 1992, 15, 2, summer, 203-211.
¶ A review essay on books by: Lynn Davidman, ***Tradition in a Rootless World: Women Turn to Orthodox Judaism*** (Berkeley: U of California Press, 1991); M. Herbert Danzger, ***Returning to Tradition: The Contemporary Revival of Orthodox Judaism*** (New Haven, Conn: Yale U Press, 1989); David Ellenson, ***Rabbi Esriel Hildesheimer and the Creation of a Modern Jewish Orthodoxy*** (Tuscaloosa: U of Alabama Press, 1990); & Debra Renee Kaufman, ***Rachel's Daughters: Newly Orthodox Jewish Women*** (New Brunswick, NJ: Rutgers U Press, 1991 [see listings in IRPS No. 67]). Although some scholars had rung the death knoll for religion & the sociology of religion by the mid-1960s, contemporary Jewish men & women are zealously returning to religious orthodoxy. These works explore this transformation in different ways. Ellenson's critical biography offers a historical & sociological analysis of the development of modern Orthodox Judaism. Danzger discusses the religious revival experiences of Jewish men, although it is noted that the movement holds greater appeal for women. Davidman's exemplary ethnography approaches Max Weber's *verstehen* concept in that she allows her informants to speak to her audience. Kaufman is less concerned with informant subjectivity, but attempts to create a composite image of the women who have turned to religious orthodoxy. 21 References. M. Maguire

Whitt, Hugh P. & Babchuk, Nicholas (Dept Sociology U Nebraska, Lincoln 68858-0324), **Some Theoretical and Methodological Reasons for Using Stephan-Deming Adjustments in Religious Mobility Tables**, *Social Science Research*, 1992, 21, 2, June, 204-215.
¶ A comment on the critique by D. E. Sherkat (see SA 39:1/91X2820) of the use by H. P. Whitt, H. J. Crocket, Jr., & N. Babchuk (see SA 37:3/89U6319) of F. F. Stephan-W. E. Deming (S-D) adjustments in religious mobility data ("On a Least-Squares Adjustment of a Sample Frequency Table When Expected Marginal Tables Are Known," *Annals of Mathematical Statistics*, 1940, 11, 427-444) in which Sherkat contended that S-D adjustments violate recent theory on religious conversion & commitment. Sherkat attached a different meaning than the authors intended to the term "model" & failed to recognize the distinction between description & causal inference. Sherkat advocated event history analysis with religious mobility data, but this individual-level technique would omit control of structural variables, eg, the size of the social network. Theoretical & methodological reasons for applying S-D type adjustments to studies of religious switching are defended, & illustrated with secondary data on religious switching by black Americans. 6 Tables, 21 References. Zaidman-Dvir, Nurit & Sharot, Stephen (c/o Sharot–Dept Behavioural Sciences Ben-Gurion U Negev, IL-84105 Beersheva Israel), **The Response of Israeli Society to New Religious Movements: ISKCON and *Teshuvah***, UM *Journal for the Scientific Study of Religion*, 1992, 31, 3, Sept, 279-295.
¶ Israeli responses to ISKCON (International Society for Krishna Consciousness) & *teshuvah* (the "return" of secular Jews to Orthodox Judaism) movements are compared with responses to new religious movements in other Western countries. It is argued that reactions in Israel can be understood in the context of: a close association between religion & state, the near monopoly of Orthodox Judaism in the provision of religious services, a division between religious & secular sectors, & the association of Judaism with Jewish-Israeli national identity. In contrast t

other Western societies, the most active & effective anticult activities in Israel have been initiated by religious interests & organizations, especially by the ultra-Orthodox. Even though secular Jews have depicted ISKCON & *teshuvah* as having similar negative effects (breaks with families & losses to the army, the economy, & social welfare), the response to *teshuvah* has been more ambiguous than the wholly negative response to ISKCON. 38 References. Albonetti, Celesta A. (Dept Sociology Texas A&M U, College Station 77843-4351), **Charge Reduction: An Analysis of Prosecutorial Discretion in Burglary and Roberry Cases,** *Journal of Quantitative Criminology*, 1992, 8, 3, Sept, 317-333.

¶ The prosecutor's decision to reduce original felony charges to a misdemeanor has serious social, legal, & economic consequences for the suspect. Here, a model of the variables affecting the likelihood of such a reduction in burglary & robbery offenses is presented. Drawing from W. B. Littrell's "principled charging" perspective (*Bureaucratic Justice: Police, Prosecutors, and Plea Bargaining*, Beverly Hills, Calif: Sage, 1979) & earlier research on labeling, the analysis involves estimating logistic regression equations specifying both main & interaction effects of the suspect's gender & race & variables related to suspect character, case seriousness, & legal seriousness. An empirical application using arrest data on 400 burglary & robbery charges in Jacksonville, Fla, 1979/80, provides partial support for Littrell's perspective. 4 Tables, 30 References. Arts, Wil (Dept Economic Sociology & Psychology Faculty Economics Erasmus U, NL-3000 DR Rotterdam Netherlands), **Community, Market, and State: Reflections on Their Potential for Achieving Economic Justice,** *Social Justice Research*, 1992, 5, 2, June, 137-153.

¶ An investigation of the potential of distinct societal decision-making & coordinating mechanisms as means of achieving economic justice, suggesting that three overarching ideal types of mechanisms, separately or in combination, enable mankind to cope with its economic challenge: communities, markets, & states. Each of these ideal types represents a different way in which economic decisions are made & the economic actions of members of society are coordinated. Considered is how each of these mechanisms can contribute to the solution of the problem of economic justice in modern times. 2 Tables, 1 Figure, 23 References. Adapted from the source document.

Boudon, Raymond (U Paris-Sorbonne, F-75270 France), **Sentiments of Justice,** *Social Justice Research*, 1992, 5, 2, June, 113-135.

Translated by Richard A. Nutbrown & William Abbott.

¶ Three theoretical approaches to the question of why certain types of social inequalities are legitimate are discussed: the universalist, the cultural, & the interactionist approach. The interactionist approach is defended: sentiments of justice can be predicted or deduced from the system in which the actors are located. It is important to know whether actors have reasons to be interested in the system of interaction in question, including reasons for approving the rules & the mode of its functioning. At the same time, the existence of an unrestricted residue must also be recognized: With good reasons one group of individuals can find that a certain state of affairs is just, another group that it is unjust. Because divergences of opinion are inescapable, certain questions pertaining to the issue of social justice can only be resolved by the method of regulated political debate. 22 References. Britt, Chester L., III, Gottfredson, Michael R. & Goldkamp, John S. (Dept Sociology U Illinois, Urbana 61801), **Drug Testing and Pretrial Misconduct: An Experiment on the Specific Deterrent Effects of Drug Monitoring Defendants on Pretrial Release,** UM *Journal of Research in Crime and Delinquency*, 1992, 29, 1, Feb, 62-78.

¶ To explore whether drug monitoring of released defendants alters their drug use & chances for pretrial misconduct, experiments were conducted in 2 Ariz counties. Defendants (total N = 360) randomly assigned to drug monitoring (urine analysis) & nonmonitoring groups completed interviews, & their records were analyzed. Results demonstrate that in Pima County, there was only a slight reduction in the rate of pretrial rearrest, & no differences in failure to appear at trial. In Maricopa County, one sample showed no difference in the rate of pretrial misconduct between the monitored & nonmonitored groups, but a second showed the monitored group to have a higher rate of pretrial failure, contrary to expectations. Research & the policy implications of these results for future pretrial drug testing efforts are discussed. 2 Tables, 11 References. Adapted from the source document.

Carlson, David Gray (Benjamin N. Cardozo School Law Yeshiva U, New York NY 10033-3299), **The Hegelian Revival in American Legal Discourse,** UM *University of Miami Law Review*, 1992, 46, 4, Mar, 1051-1067.

¶ A review essay on a book by Steven B. Smith, *Hegel's Critique of Liberalism: Rights in Context* (Chicago: U of Chicago Press, 1991 [see listing in IRPS No. 67]). Given the recent Hegelian renaissance among legal theorists, Smith's focus on Hegel's major & lesser known works is appreciated. Particularly useful to legal scholars is the dialogue in which Smith situates Hegel; through a careful reading of liberal philosophers whose work has greatly influenced US legal studies, including Thomas Hobbes, Immanuel Kant, John Locke, Montesquieu, & Jean-Jacques Rousseau, Hegel's contribution to legal scholarship is revealed. Also, because Smith attempts to address mainstream US liberal philosophy, unfamiliarity with Hegel's work does not preclude understanding. An attempt is made to determine whether Hegel's notion of totality is immune from his own critique of determinate being, which would fundamentally challenge any postmodern critique of Hegel. 1 Appendix. M. Maguire

Coltrane, Scott & Hickman, Neal (Dept Sociology U California, Riverside 92521-0419), **The Rhetoric of Rights and Needs: Moral Discourse in the Reform of Child Custody and Child Suppport Laws,** UM *Social Problems*, 1992, 39, 4, Nov, 400-420.

¶ Laws regulating the postdivorce custody & support of minor children underwent major changes during the 1980s. Here, the social-constructionist approach is used to analyze the claims making of fathers' rights groups promoting state joint custody preference statutes & mothers' groups promoting strict federal child support enforcement. The discussion is based on a review of the scholarly literature, media accounts, official statistics, congressional & state hearings, & rights groups' publications, supplemented by interviews with leaders of eight advocacy groups in southern Calif. Although directly opposed to each others' reforms, both groups used rhetorical strategies that included horror stories, numeric estimates, & an implied societal consensus. Findings of interviews indicate that private troubles were transformed into public issues via personal initiative & symbolic representation. Child custody & support reforms were likely to be adopted if they were incremental, attracted little media attention, & were consistent with professional concerns & prevailing ideologies. 1 Table, 74 References. Adapted from the source document.

Devillé, Anne, **La Naissance du syndicat de la magistrature: une approche contextuelle** (The Birth of the Union of French Judges: A Con-

textual Approach), *Sociologia del Diritto*, 1992, 19, 2, 81-114. (FRE)

¶ Factors leading to the emergence of the Union of French Judges (UFJ) in 1968 are examined. Socioeconomic conditions in France at that time culminated from unprecedented economic growth in the post-WWII period. As a unique & authentic social group, the UFJ promoted a new cultural style & image for the judiciary, reflecting changes toward solidarity, spontaneity, & self-management predominant in the justice system in the 1960s. Breaking with the structured hierarchy of the judiciary, the UFJ attracted judges disappointed with the former corporation-oriented Federal Magistrate's Union & the growing malaise in the judicial system. Yet, it emphasized continuity of membership with the Assoc des Anciens Auditeurs de Justice. The establishment of the UFJ saw changes both in recruitment methods for judges & in forms of justice. 82 References. Adapted from the source document.

Douzinas, Costas, McVeigh, Shaun & Warrington, Ronnie (Birkbeck Coll, London WC1E 7HX England), **The Alta(e)rs of Law: The Judgement of Legal Aesthetics**, *Theory, Culture & Society*, 1992, 9, 4, Nov, 93-117.

¶ The relationship of law to ethics, politics, & aesthetics is investigated using an outline of an Enlightenment version of the "appropriate" relationship between law & other discourses, & through a legal judgment concerning the location of a Henry Moore sculpture in the Christopher Wren Church of St. Stephen Walbrook. In tracing law's failure to hold the boundaries between itself & other discourses (ie, aesthetic, religious, architectural) that it respects, yet claims to control, the possibilities & consequences of reading texts as open to the circulation of discourse are specified. It is concluded that postmodernity is witnessing a return to a premodern form of judgment that has weakened modernist reason & subverted the hegemony of legal discourse vis-à-vis other discourse. 2 Photographs, 11 References. Flin, Rhona (Robert Gordon Instit Technology, Aberdeen AB9 1FR Scotland), **Child Witnesses in Criminal Courts**, *Children & Society*, 1990, 4, 3, autumn, 264-283.

¶ Current psychological research into the causes & effects of stress on child witnesses in court cases is reviewed. Causes of stress in both the pretrial period (repeated interviews, lack of legal knowledge, waiting for trial, & rescheduled cases) & the courtroom itself (waiting in court, lack of knowledge, courtroom layout, confronting the accused, examination, & crossexamination) are considered. Only after the causes of stress are identified & their effects determined can effective reforms be introduced. 1 Figure, 44 References. Adapted from the source document.

93Z8191

Garth, Bryant G., Power and Legal Artifice: The Federal Class Action, *Law and Society Review*, 1992, 26, 2, 237-271.

¶ Case studies from Calif's northern district & interviews with lawyers & representatives in federal class actions ([CAs] N not specified) are used to explore the contribution that CAs make to their ostensible beneficiaries. After distinguishing the major types of CAs in terms of the roles of lawyers & class representatives, CAs are evaluated & found not to be major contributors to social change. The CA does, however, play a much more significant role through its impact on the parties as litigants & as individuals involved with a dispute. To understand this dimension, disputants can be thought of as an audience that interprets itself–& is empowered or disempowered–in part by what it learns from watching a legal dramatization of the dispute. 2 Tables, 45 References. Adapted from the source document.

Granfield, Robert & Koenig, Thomas (Dept Sociology U Denver, CO 80208), **Learning Collective Eminence: Harvard Law School and the Social Production of Elite Lawyers**, UM *The Sociological Quarterly*, 1992, 33, 4, winter, 503-520.

¶ Data obtained via fieldwork, classroom observations, & student surveys/interviews (N = 494) at Harvard Law School (Boston, Mass) indicate that the school's informal curriculum reorients ambitious individualistic incoming students toward collective definitions of achievement. Learning to cooperate with rather than compete against classmates creates a sense of mutual eliteness, or "collective eminence." Students learn that professional success is available for all; therefore, only neurotic "gunners" try to outdo peers. This worldview is communicated through such processes as orientation-week meetings, classroom dynamics, recruitment criteria, corporate job interviews, & law review selection. Students are directed by this ideology toward jobs in the most prestigious law firms, both because they learn that such positions are their destiny & because the recruitment network that results from collective eminence makes these jobs extremely easy to obtain. This sharply contrasts with student experiences in less eminent law schools. 43 References. Adapted from the source document.

Gundersen, Aase (U Oslo, Blindern N-0316 3 Norway), **Popular Justice in Mozambique: Between State Law and Folk Law**, *Social & Legal Studies*, 1992, 1, 2, June, 257-282.

¶ The local popular tribunal in Mozambique functions at the lowest level of the court hierarchy, operating between formal & informal legal systems, & mediating between state law, local legal orders, & folk law. Here, observations of 60 cases heard in a neighborhood popular tribunal on the periphery on Maputo 1987/88, supplemented by observations at other tribunals & interviews with judges & litigants (N not provided), indicate that the ideology of popular justice includes popular participation, procedural informalism, & accessibility. Case examples of dispute settlement by the tribunal show the dominant judge has immense control, & informal legal orders prevail, but official state law influences the decisions. This form of popular justice has been moderately successful in carrying the content of social justice; eg, state law provides progressive guidance on gender equality, which is generally not observed in folk law. 33 References. Just, Peter (Williams Coll, Williamstown MA 01267), **History, Power, Ideology, and Culture: Current Directions in the Anthropology of Law**, *Law and Society Review*, 1992, 26, 2, 373-411.
¶ A review essay on books by: June Starr & Jane F. Collier (Eds), *History and Power in the Study of Law: New Directions in Legal Anthropology* (Ithaca, NY: Cornell U Press, 1989); Laura Nader, *Harmony Ideology: Justice and Control in a Zapotec Mountain Village* (Cambridge U Press, 1990); & Lawrence Rosen, *The Anthropology of Justice: Law as Culture in Islam* (Cambridge: Cambridge U Press, 1989 [see listings in IRPS No. 67]). In the evolution of the anthropology of law since the beginning of the 1980s, it seems that legal anthropologists must choose between moving to study law in the grander framework of history & power or in the sense of meaning & belief. Starr & Collier profess to approach the history & power side, but only one of their fourteen chapters makes the expected use of case histories. Nader's monograph is rich in ethnographic material. Her harmony ideology–the product of the indigenous world with Christian theology dispersed by missionaries–slights any accounting of Zapotec dispute settlement prior to the arrival of the Spaniards. Harmony ideology may, thus, not be dependent on missionary ideologies, as she posits. Rosen's book is a series of lectures analyzing the justice administered in the Moroccan courts of family & property cases. In this highly cultural account, Rosen argues that the apparent wide latitude of the courts is in fact limited by cultural & inarticulated powerful rules. 93 References. M. Merry, Sally Engle (Dept Anthropology Wellesley Coll, MA 02181), **Anthropology, Law, and Transnational Processes**, IN *Annual Review of Anthropology*, 1992, 21, 357-379.
¶ In analyzing & understanding legal phenomena, dispute-processing theory, derived in the 1970s from extended case analysis in anthropology, remains the core methodological approach in the anthropology of law in

the 1990s, but concerns about culture, meaning, & power have been added. Also, there has been a shift to analyzing the national & transnational contexts, greater interest in cultural analysis, & renewed interest in legal pluralism & in how law constructs & deconstructs power relations. National & transnational contexts have become increasingly important because of the recognition that unequal but mutually constitutive legal orders coexist & interact in colonized & other societies. The need to account for national & transnational processes in understanding local events involves understanding the processes of colonialism, legal systems of previous autonomous societies, & the borrowing of legal procedures. 278 References. Mertz, Elizabeth, Review Essay: Language, Law, and Social Meanings: Linguistic/Anthropological Contributions to the Study of Law, *Law and Society Review,* 1992, 26, 2, 413-445.

¶ A review essay on books by: Sally Engle Merry, *Getting Justice and Getting Even: Legal Consciousness among Working Class Americans*; & John M. Conley & William M. O'Barr, *Rules versus Relationships: The Ethnography of Legal Discourse* (both, Chicago: U of Chicago Press, 1990 [see listings in IRPS No. 67]). Different anthropological & linguistic approaches to legal discourse are reviewed, including the new anthropological vision of language as embodying social creativity. Conley's & O'Barr's study is a sociolegal study demonstrating that slight linguistic differences can have specific legal outcomes, while Merry's study has a broader focus, examining the relationship between legal language & social structures. Both state that they deal with understandings & discourse of ordinary people; however, they employ different methodologies to this end. Conley & O'Barr examine small claims courtrooms, while Merry examines cases that have reached mediation. Merry's discussion is grounded in a social contextual analysis of the courts & the communities studied; Conley & O'Barr have a broader view of linguistic varieties & cite the details of courtroom exchanges. Combining their approaches would contribute to a deeper cultural understanding of the more quantitative findings on litigant satisfaction. 105 References. M. Mitrossili, Maria, Intorno alla costruzione del diritto greco moderno. Una prospettiva sociologico-giuridica (On the Construction of Modern Greek Law. The Approach of the Sociology of Law), *Sociologia del Diritto,* 1992, 19, 2, 39-50. (ITA)

Translated from French by Alessandra Ferrari.

¶ In the contruction of the modern Greek legal system, a sociological imitation of the Western models articulates a socially dependent, open, & sensitive position for law. When the independent Greek state was founded in 1830, the three protectors (England, France, Russia) formed a German style Western state with a strong government, a bureaucratic organization, & a formal rational legal system. However, the Greek state did not answer the most basic needs of its citizens, operating in pre-Borghese economic & social structures. The transformations in law to accomodate these needs are examined. After their adoption in 1835, legal codes regulating the penal system, criminal & civil proceedings, & judiciary organization were in effect for more than 100 years. Greek civil law was defined by Roman law as it existed in Germany. Codification created a uniform, state-centered legal system aimed at more efficient control of various groups (farmers, gentry) within the new social order. 22 References. Pellegrini, Stefania, Studi longitudinali sulla litigiosità processuale (*Longitudinal Studies on Processual Litigation*), *Sociologia del Diritto,* 1992, 19, 2, 115-132. (ITA)

¶ A commentary on a thematic issue of *Law & Society Review* (1990, 24, 2), focusing on the theme of litigation. A summary of each contribution indicates a general trend away from the macrosociological & toward the microsociological approach. Citing lawsuit statistics & docket data, the latest research is concerned with analysis of the effects produced by social change on litigation patterns, the links between dispute theory & contextual studies in light of new theories, & comparative studies detailing experiences of a European work group. A longitudinal enquiry into litigation contextualizes exogenous & endogenous variables. Although exogenous factors–eg, family ties, social & community status, & religion–impact societal litigation rates, the endogenous factors of procedural law reforms, internal judicial system organization, & number of active judges are more critical. 39 References. Powers, David S. (Near Eastern Studies Dept Cornell U, Ithaca NY 14853), **On Judicial Review in Islamic Law,** *Law and Society Review,* 1992, 26, 2, 315-341.

¶ The prevailing wisdom among Islamicists for over fifty years has asserted that: there are no appellate structures in Islamic law (as is common in legal systems in complex societies), the decision of a judge is final & irrevocable, & a judgment may not be reversed under any circumstances. This exceptional nature of Islamic law has been explained by Martin Shapiro as a function of the absence of hierarchy in the Islamic religious community (*Courts: A Comparative and Political Analysis,* Chicago: U of Chicago Press, 1981). Here, an argument that Shapiro has been poorly served by Islamicist scholarship is presented based on reexamination of Islamic legal theory & an analysis of fourteenth-century Islamic court practice, demonstrating that: a judicial decision was reversible by the issuing judge himself, albeit under limited & precisely defined conditions; hierarchical organization was a regular feature of Muslim polities; the court of the chief judge of the capital city served as a court of review for the decisions of local judges; & Islamic law also developed a unique, nonhierarchical system of successor review. 69 References. Robles, Gregorio, Sociologia pura del diritto *versus* teoria pura del diritto: validità ed efficacia delle norme (Pure Sociology of Law versus Pure Theory of Law: The Validity and Efficacy of Norms), *Sociologia del Diritto,* 1992, 19, 2, 21-37. (ITA)

Translated from Spanish by Paolo Di Lucia.

¶ The formalist sociology of law (SofL), founded by Theodor Geiger (1891-1952), is examined. Elaborated in his *Vorstudien zu einer Soziologie des Rechts* ([Studies on a Sociology of Law] Copenhagen, 1947), Geiger's particular brand of neopositivist formalism drew from Georg Simmel's neo-Kantist sociology & A. Vierkandt's phenomenological sociology, & built on the theory of Scandinavian law. Despite Geiger's proposal that the SofL & the general theory of law were identical, a dualism between them continues. Although Hans Kelsen's background is analogous to Geiger's, & they both approach neopositivism, Geiger's attempts to reconcile formal analyses & true legal realism demonstrate influences from the Uppsala (Sweden) school. A critical evaluation of the concept of validity contrasts Kelsen's pure theory of law & Geiger's pure SofL, to determine if the dualism is justified. It is found that their continued dualism presupposes a dualism in the formal analysis between logico-linguistic & formal sociological analyses. Kelsen makes validity contingent on efficiency, while Geiger contends that the realist doctrine of validity is revealed by sociological analysis. 88 References. Adapted from the source document. Schneider, Hans Joachim (Dept Criminology U Münster/Westfalia, D-4400 Federal Republic Germany), **Crime, Criminological Research, and Criminal Policy in West and East Germany before and after Their Unification**, IJ *International Journal of Offender Therapy and Comparative Criminology*, 1991, 35, 4, winter, 283-295.

¶ In Oct 1990 the two German states united after forty years of separation. It is argued that criminological research needs to be started afresh in the new federal states since crime rate figures had been manipulated & empirical studies had not been carried out for decades in East Germany, & the differing standards of living & economic situations in the reunited nation will almost certainly lead to increased criminality & changes in its structure & appearance. The population must learn to trust the newly emerging judicial & criminal justice system. 10 References. Adapted from the source document.

93Z8213

Schorsch, Eberhard, **Psychoanalyse und Justiz** (Psychoanalysis and Justice), *Zeitschrift für Sexualforschung*, 1992, 5, 1, Mar, 1-10. (GER)

¶ An exploration of potential linkages between psychoanalytic & legal approaches toward sex offenders, along with some reasons why there has yet been little collaboration between them. It is argued that psychoanalysis supports the individual's case against society, while the courts defend society against individual demands & pathologies. Though governed by different kinds of logic, it is suggested that legal & psychoanalytic approaches are linked by the crime itself; psychoanalysts are criticized for failing to consider the crime as a specific act. Psychoanalysts should be assured that they will not be forced to take sides against the interests of their clients in the courtroom, but will be able to offer support & assistance Adapted from the source document.

Sethi, Raj Mohini (Dept Sociology Panjab U, Chandigarh 160014 Union Territory India), **The Perception of Popular Justice through State Power and the Counter-Legal Systems**, *Social & Legal Studies*, 1992, 1, 2, June, 307-320.

¶ The controversy over the "Rule of Law" has arisen because of the conflicting claims & divergent pressures exercised by the various components of the pluralist nation-state in independent India, along with divergent strains in its social development, eg, the simultaneity of universalism & particularism. Here, the state legal system is juxtaposed with an alternative legal system to explore how each is perceived as an instrument of popular justice & the nature of sanctions applied by them. Focus is on the districts of Amritsar & Gurdaspur in Punjab state–the districts most affected by militant operations. It is shown that in such areas, popular justice & the rule of law have become a major casualty. The ordinary courts of the land fail to provide effective remedies to the citizens, & the militant organizations have failed to develop an effective mechanism of law enforcement. Rather, they have created a fear among the people & have contributed to the malfunctioning of the existing judicial administration. The state legal system has also failed to protect the citizen & uphold the rule of law, & is perceived as repressive & hostile. It is argued that the effective administration of law through the democratic process can be achieved by showing due respect for the rights of the component units of the federation. The ideal of social justice makes it incumbent on the state to provide for the protection of the individual against the abuse of private as well as public power & ensure the existence of a participatory democracy. 1 Table, 18 References. Stookey, John A. (Arizona State U, Tempe 85287), **Trying Times: A Sociopolitical History of Litigation during the First Half of the Twentieth Century**, *Social Science History*, 1992, 16, 1, spring, 23-61.

¶ The activities of 4 Ariz county trial courts are examined to explore the influence of their local social & political environments in the first half of this century. Annual rates for divorce, contract, property, & tort cases were computed based on 28,060 superior court cases from Maricopa, Graham, Gila, & Santa Cruz counties 1912-1951. Regression analysis shows that the different social & political environments of these counties significantly affected the case types & rates; eg, Santa Cruz County, an international trade center, was dominated by business contract cases. The case rates changes over time were not linear, but reflected the social & political make-up of the particular county. In addition, litigation was affected differentially by the occurrence of two world wars, rapid social change, & an economic depression. Thus, the trial court at that time had a twin role as both a dispute resolver & a political actor. 4 Tables, 2 Figures, 2 Appendixes, 34 References. M. Pflum

Tallacchini, Mariachiara (U Pavia, I-27100 Italy), **Politica, economia, diritto: la sfida ecologica** (Politics, Economy, Law: The Ecological Threat), *Sociologia del Diritto*, 1992, 19, 2, 133-140. (ITA)

¶ A review of a monothematic issue of the Spanish journal *Sistema* (1991 [no other reference information given]) highlights the debate between the deep ecology movement (DEM) & the shallow ecology movement (SEM). Contributors present the economic, politica, ethical, & legal aspects of these ecological issues. According to the philosophically oriented DEM, ecology is the source of new methodologies of knowledge, or of new practical criteria for radically changing humans' attitude toward nature, to one that will ensure their continuing coexistence. By contrast, the more superficial & practical SEM considers the environmental crisis as a new problem to be solved with already established methods from a number of related perspectives. While the SEM approaches underlies international environmental agreements, it is unclear how various independent disciplines can work together to solve this new problem. Among topics discussed are: the growing convergence in international links between economic & environmental norms, the question of environmental policy decisions & popular consensus, & the development of a new legal framework for defining legal goods & private property. 18 References. 93Z8218

Treves, Renato, **Due sociologie del diritto** (Two Sociologies of Law), *Sociologia del Diritto*, 1992, 19, 2, 11-20. (ITA)

¶ There are two approaches to the sociology of law (SofL): (1) the lawyer's perspective focusing on the society in law; & (2) the sociologist's perspective, concerned with the law in society. A reaction to conceptual & legal formalism, the jurist approach is represented by writings of Rudolf von Jhering, Kantorowicz, & E. Ehrlich. Developed from the seventeenth-/eighteenth-century school of natural law, the sociologist's SofL is defined in the works of Auguste Comte, Emile Durkheim, Ferdinand Tönnies, & Talcott Parsons's structural-functionalist writings. Max Weber's theory of the rationalization of law emphasized both sides of the SofL, suggesting that a science of law be concerned with the norms & meaning that logically should be attributed to behaviors & actions of men faced with norms. Hans Kelsen proposed that formal legal science is founded on the principle of imputation, & develops into a SofL that outlines causes & effects of natural occurrences that are considered legal acts. Wegener, Bernd (Instit Soziologie U Heidelberg, D-6900 Federal Republic Germany), **Gerechtigkeitsforschung und Legitimationsnormen** (Social Justice Research and Legitimation Norms), *Zeitschrift für Soziologie*, 1992, 21, 4, Aug, 269-283. (GER)

¶ Social legitimation depends, among other factors, on whether people accept rules for distributing resources. To demonstrate the role that empirical research on social justice plays in studying distributive legitimation processes, a literature review is presented of the major theories of micro- & macrosociological justice. Next, a classification scheme for possible legitimation norms is suggested. The distribution of these norms depends on the distribution rules typical of a society & on the primary norms of justice based on these rules. However, the primary norms also evoke secondary norms supported by the disadvantaged groups. Secondary anslysis of data from the *International Social Survey Program: Codebook* (Cologne: Zentralarchiv, 1987) involving German & US households (N = 945 & 1,483, respectively) demonstrates the interaction

between primary & secondary norms. 3 Tables, 3 Figures, 129 References. Adapted from the source document.

Anson, Richard H. & Hancock, Barry W. (Albany State Coll, GA 31705), **Crowding, Proximity, Inmate Violence, and the Eighth Amendment,** *Journal of Offender Rehabilitation,* 1992, 17, 3-4, 123-132.

¶ Federal courts interpreting the "cruel & unusual" elements of the eighth amendment have ruled via *Holt* v. *Sarver* that prison crowding must be considered in light of the total space availability of a given institution. Here, this notion is rejected, arguing that consideration should be given to variability in body buffer zones for each individual inmate, aggression potential, & variability between violent & nonviolent inmates. Correctional practitioners should allocate institutional space after considering prior inmate violence regardless of mass court rulings that have not accounted for individual differences. 26 References. DeKeseredy, Walter S. & Schwartz, Martin D. (Dept Sociology & Anthropology Carleton U, Ottawa Ontario K1S 5B6), **British and U.S. Left Realism: A Critical Comparison,** *International Journal of Offender Therapy and Comparative Criminology,* 1991, 35, 3, fall, 248-262.

¶ British Left realism is compared with its US counterpart, within a critical context. Political & academic forces have indirectly contributed to the development of a united Left realist perspective in GB, while US realists have been forced to operate independently within more repressive political & academic contexts. The analysis suggests that significant differences in Left realist criminology include greater attention given by US radicals to reconstructing social & economic policies as well as criminal justice reform, & a US tendency to address all crime, while British proposals are concerned primarily with street crime. US Left realist strategies are discussed under the categories of economic policies, social services, & community crime prevention. It is argued that both US & UK Left realism essentially ignore the problems of both a patriarchal society & the victimization of women. 64 References. Adapted from the source document.

Dumond, Robert W. (Massachusetts Dept Correction, 100 Cambridge St Boston 02116-4802), **The Sexual Assault of Male Inmates in Incarcerated Settings,** *International Journal of the Sociology of Law,* 1992, 20, 2, June, 135-157.

¶ Drawing on key research spanning the last twenty years, sexual victimization of male inmates (MIs) in prison settings is examined, arguing that the sexual assault of MIs is an indictment of the US criminal justice system. For the MI victim, such assaults carry humiliation, degradation, & potential revictimization in a system that often does not employ meaningful strategies to deal with sexual violence. Clinical implications of treating MI sexual assault victims & strategies for institutional responses are discussed. Recommendations for prisons & correctional institutions include a scientific reporting of such incidences, a comprehensive crisis intervention protocol, & a more timely response toward prosecution of such offenses. 3 Tables, 2 Figures, 88 References. Feeley, Malcolm M. & Simon, Jonathan (Center Study Law & Society U California, Berkeley 94720), **The New Penology: Notes on the Emerging Strategy of Corrections and Its Implications,** *Criminology,* 1992, 30, 4, Nov, 449-474.

¶ Proponents of the new penology argue that a new language is emerging that shifts focus away from the traditional concerns of the criminal law & criminology, which have focused on the individual, & redirect the field to actuarial consideration of aggregates. Implications of this shift are discussed: (1) it facilitates development of a vision or model of a new type of criminal process that embraces increased reliance on imprisonment & merges concerns for surveillance & custody, & (2) it encourages decreased concern with punishing individuals & more attention to managing aggregates of dangerous groups. Ramifications for the training & practice of criminologists are outlined. 60 References. Adapted from the source document.

Hewstone, Miles, Hopkins, Nicholas & Routh, David A. (Dept Psychology U Bristol, BS8 1TN England), **Cognitive Models of Stereotype Change: (1) Generalization and Subtyping in Young People's Views of the Police,** *European Journal of Social Psychology,* 1992, 22, 3, May-June, 219-234.

¶ Intergroup contact & cognitive models of stereotype change are investigated, focusing particularly on the conversion & subtyping models. In the regional police force studies, 18 full-time school police officers in GB were attached to secondary schools to develop close contacts with pupils & their teachers. It was predicted that, even if students formed a positive overall view of their target policeman, this image would be unlikely to generalize to their stereotype of the police in general unless the school police officer was seen as highly typical, & that students would subtype the school police officer as distinct from the police in general. Two field studies, one involving a large-scale, longitudinal survey (N = 599 pupils) & a smaller study of cognitive representations (N = 42), were undertaken. Findings from the first study suggest that the school police officers were viewed as significantly more positive than the police in general, & that the less positive views of the police in general failed to become more positive with time. It is contended that the failure to generalize represents a basic weakness of the conversion model, ie, the fact that extreme disconfirmers (school police officers) are seen as atypical & unrepresentative of the police in general. Results from the second study also indicate that the students view their school police officers as distinct from the police in general but who share features with a set of caring & welfare professionals. It is concluded that subtyping the school police officer as separate from other members of the category inhibits stereotype change. 2 Tables, 1 Figure, 32 References. S. Millett

Lengfelder, Julie, Slater, Jennifer & Groves, David (Bowling Green State U, OH 43403), **Coping Strategies of Prison Inmates in Correctional Institutions,** IM *International Review of Modern Sociology*, 1992, 22, 1, spring, 13-26.

¶ The effects of a correctional recreational program are evaluated, using structured interview data from 247 inmates in a correctional institution in Lima, Ohio. Focus is on the type of recreation participated in by inmates during their leisure time, & their self-esteem. Results reveal no significant relationship between leisure involvement in general & self-esteem. However, an activity-by-activity analysis shows that billiards, competitive weight lifting, reading & library use, & religious services are positively related to self-esteem. Additional analysis indicates that leisure participation is related to a productive use of time, & that participation is a primary coping style used by inmates for dealing with their new environment. It is suggested that better use of leisure skills & the retention of a high self-esteem could lead to a lower rate of recidivism; implications for policy & recommendations for further research are discussed. 4 Tables, 35 References. Lilly, J. Robert & Knepper, Paul (Dept Sociology Northern Kentucky U, Highland Heights 41076), **An International Perspective on the Privatization of Corrections,** *Howard Journal of Criminal Justice*, 1992, 31, 3, Aug, 174-191.

¶ Described is a corrections-commercial complex that exists in the US, composed of private corporations profiting from imprisonment, government agencies responsible for criminal justice, & allied professional organizations. Evaluation of current correctional privatization proposals have ignored this structure & focused only on privatizing the operation of adult correctional facilities. It is argued that because of the corrections-commercial complex, privatization could also implies the privatization of financing & constructing prisons, operating juvenile facilities, providing work for inmates, & providing contractual services. The private sector is already heavily involved in correctional contracts & in nonsecure punishment. Correctional privatization represents an international market, closely linked to the international military-industrial complex in the post-Cold war era. Similarities & differences between the US, British, & Canadian correctional systems & policies are analyzed. 48 References. M. Pflum

Mitchell, Barry (Dept Legal Studies Coventry Polytechnic, CV1 5FB England), **Preparing Life Sentence Prisoners for Release,** *Howard Journal of Criminal Justice*, 1992, 31, 3, Aug, 224-239.

¶ Release on license of prisoners with life sentences in GB now occurs after an average of 12 years of incarceration. Procedures for preparing lifers for release & reintegration into society are investigated here, drawing on data obtained during interviews with prisoners, staff, & in-house probation officers in 2 Category C prisons, 4 open prisons, 7 hostels, & external probation services. A lifer being released moves gradually from more- to less-restrictive conditions, & is observed in transit for release potential; however, observers are usually not sufficiently trained to identify problems. An inordinate amount of time is spent in the open prisons awaiting replies to parole applications, & delays in release are common. Prisoners often make use of this time by traveling outside for education & employment purposes, & for reestablishing social & domestic ties. Careful planning is needed to ensure that this time is well-spent, but the uncertainty about release clouds the planning process. It is in society's interest to promote a system to maximize a lifer's integration into the community with sufficient personal/social & employment skills. 8 References. Palermo, George B., Smith, Maurice B. & Liska, Frank J. (Milwaukee County Mental Health Complex, 925 East Wells St #316 Milwaukee WI 53202), **Jails versus Mental Hospitals: The Milwaukee Approach to a Social Dilemma,** UM *International Journal of Offender Therapy and Comparative Criminology,* 1991, 35, 3, fall, 205-216.

¶ Data on male & female adults taken into custody or admitted to in- & outpatient services of the Milwaukee County (Wisc) Mental Health Complex (MCMHC) 1967-1989 are used to examine how the problems posed by mentally ill inmates are dealt with by the MCMHC, the jails, & the judicial system. Unlike national data showing negative linear relationships between mental health admissions & jail census data, the MCMHC findings indicate a strong relationship between various legal system variables & mental health system variables, suggesting that the systems are strongly interconnected. Results are explained in terms of the rapid detection of mentally or emotionally disturbed inmates, their treatment, & referral when indicated. Milwaukee's approach to the problem of the mentally ill in jails is recommended for other US communitites. 17 References. Adapted from the source document. Phyne, John (Saint Francis Xavier U, Antigonish Nova Scotia B2G 1C0), **Changes from Compliance to Deterrence among Federal Fishery Officers: An Atypical Case of Regulatory Policing?,** UM *La Revue Canadienne de Sociologie et d'Anthropologie/The Canadian Review of Sociology and Anthropology,* 1992, 29, 4, Nov, 524-534.

¶ Though previous research on regulatory officials has indicated their preference for compliance over deterrence in the regulatory process, structured interview data obtained in 1985 from a random sample of 51 fishery officers in Newfoundland yield different findings. While these officers are regulatory officials, their role has shifted from the use of compliance to the use of deterrence. This shift is explained in terms of the role of the state in restructuring Canadian inshore fisheries. It is cautioned that the distinction in the sociolegal literature between regulatory officials engaged in compliance & the public police engaged in deterrence, needs to be reexamined. 33 References. Prowse, Renate M., Weber, Hartmut-Michael & Wilson, Charles R. M. (U Portsmouth, PO1 2QQ England), **Rights and Prisons in Germany: Blueprint for Britain?,** *International Journal of the Sociology of Law,* 1992, 20, 2, June, 111-134.

¶ Critical issues regarding the rights of prisoners within the British & German prison systems are compared in the context of wider constitutional debates about human rights & citizenship. It is suggested that human rights are of more immediate importance to prisoners than to citizens at liberty in democratic societies because they are major determinants of prisoners' experiences in any prison system. The role of the European Convention of Human Rights in establishing & protecting the rights of prisoners in both countries is discussed. The analysis follows the framework of G. Richardson ("The Case of Prisoners' Rights" in Maguire, M., & Morgan, R. [Eds], *Accountability and Prisons,* Tavistock: London, 1985), which accepts that imprisonment necessarily involves the abrogation of some rights, but that these should be kept to a minimum. 82 References. Quinn, James F. & Holman, John E. (Instit Criminal Justice U North Texas, Denton 76203), **Electronic Monitoring and Family Control in Probation and Parole,** *Journal of Offender Rehabilitation,* 1992, 17, 3-4, 77-87.

¶ An exploration of the effects of electronic monitoring on the family's contribution to external constraint of felony offenders under community supervision, based on questionnaire & scale data collected from 121 probationers & parolees in 2 large metropolitan areas of a southwestern state using a pre-/posttest design. Statistical analyses indicate that reported levels of family control did not change significantly during the approximately 3 months of electronic monitoring to which these offenders were subjected. Analyses further indicate that neither demographic variables, offense type, or substance abuse history is significantly related to the levels of familial control reported by these offenders. 23 References. Shaw, Roger (Instit Criminology U Cambridge, CB2 1TN England), **Prisoners' Children and Politics: An Aetiology of Victimisation,** *Children & Society,* 1990, 4, 3, autumn, 315-325.

¶ In a call for more consideration of the needs of prisoners' children, it is argued that a lack of appropriate scrutiny results from the hidden nature of the problem as well as from the inability of the UK justice system to publicly admit that children are inadvertently punished when parents are imprisoned. Indeed, children may be even more victimized by parental absence than were the initial crime victims. Issues surrounding parental imprisonment are explored & a new approach to the problem is advanced. 64 References. Adapted from the source document. Terrill, Richard (Dept Criminal Justice Georgia State U, Atlanta 30303), **Organizational Change for England's Police: An American Perspective,** *Policing and Society,* 1992, 2, 3, 173-191.

¶ The Home Office in England recently proposed that an organization similar to the US Federal Bureau of Investigation (FBI) be introduced into the nation's police system. Here, reasons why this idea was presented are explored in terms of state-centered theory. Concern over the prospects of a rise in crime is identified as the specific catalyst that placed this proposal on the Home Office agenda. Select aspects of organizational theory are considered to assess the present organizational model of English policing & to analyze the possible impact that an FBI-type organization would have on its administrative format. An alternative scheme for organizational change based on regionalization is presented. 89 References. Adapted from the source document. Van Zyl Smit, Dirk (Faculty Law U Cape Town, Rosebank 7700 South Africa), **A Legitimate Prison System in a Future South Africa?,** *Legal Studies Forum,* 1992, 16, 2, 167-192.

¶ South African authorities, particularly since the 1940s, have sustained the legitimacy of the prison system in a hostile international & local political climate by appealing to international standards & by making strategic concessions. The relative efficacy of this process is related to the unevenness of the process of legitimation, demonstrating how a state that is widely perceived as being illegitimate can succeed in gaining a large measure of acceptance for some of its structures. The history of these struggles for legitimacy has left its mark on the organizational shape of the South African prison system & of the law that governs it. The structure of the system is highly militarized & the recognition granted to the rights of prisoners is weak. A future system will have to deal with this legacy. Modified AA (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Von Hofer, Hanns, Inkapacitering–en aktuell kriminolgisk diskussion (Incapacitation–A Current Criminological Debate), *Sociologisk Forskning,* 1992, 29, 2, 30-50. (SWE)

¶ Following a general overview of international research on incarceration & its effects, a critical evaluation is offered of a nationwide empirical study in Sweden that investigated potential negative effects of a 1983 penal reform that called for the conditional release of prisoners who had served 50% (rather than the former 66%) of their sentences. Reanalysis

of these data indicates that the study overestimated the negative effects of the reform on burglary rates. 5 Tables, 2 Figures, 72 References. Adapted from the source document.

Argyrous, George (School Social Science & Policy U New South Wales, Kensington 2033 Australia), **Kuhn's Paradigms and Neoclassical Economics**, *Economics and Philosophy*, 1992, 8, 2, Oct, 231-248.

¶ It is argued that Thomas Kuhn's notion of "paradigm" has been misinterpreted in the literature. Kuhn intended paradigm to mean an exemplar of good scientific behavior & not a general worldview, as it has commonly been interpreted. The analytical insight gained by this narrower concept of paradigm-as-exemplar is illustrated with reference to the development of the neoclassical consumption function. The history of the life cycle/permanent income hypotheses is traced to show that it represents a normal scientific tradition based on the elaboration of the exemplars contained in the classic works of M. Friedman & F. Modigliani. Also included is a discussion of the relationship between this narrower notion of paradigm-as-exemplar & the broader notion of paradigm-as-worldview. 43 References. AA

Calabrese, Andrew (Dept Communication Purdue U, West Lafayette IN 47907), **Changing Times for Scholarly Communication: The Case of the Electronic Journal**, UM *Technology in Society*, 1992, 14, 2, 199-220.

¶ The changes that have been taking place in the nature of scholarly communication as the use of computer & telecommunications becomes widespread are explored. Emphasis is given to the real & imagined impact of computer networking on the publication of peer-reviewed academic journals, suggesting that socially significant technical changes in the production & distribution of periodical literature are occurring on two fronts: (1) the computerization of the process of electronic manuscript submission, review, & editing is proceeding steadily with growing commercial support, indicating a progressive movement toward a long-term reduction in the flow of paper in the process from a manuscript to final copy; & (2) the processes of document distribution are becoming computerized, exemplified by the increasing number of systems not offering the full text of scholarly journals via telecommunications for remote access, & on optical disk for local retrieval. It is contended that there will be continued movement toward computerizing scholarly communication through the publication of scholarly journals. However, it is doubtful that the peer-reviewed electronic journal will be developed until the social & economic cost-benefit ratios of electronic vs paper-based storage & retrieval become more attractive. Adapted from the source document.

Freire, Olival, Jr. (Instit física U São Paulo, SP-01498 Brazil), **Comment on 'The Crisis in Physics'**, *Social Studies of Science*, 1992, 22, 4, Nov, 739-742.

Reply, 742-744.

¶ In a critique of Andrew Cross's "The Crisis in Physics: Dialectical Materialism and Quantum Theory" (see SA 40:4/92Z0939), it is argued that any partial analysis that does not reflect the development & entire content of the contributions of French physicist Paul Langevin will result in distorted interpretations. Of particular importance are Langevin's later papers, where he locates the cause of the crisis unchained by quantum theory in the notion of "mechanism." Cross's claims for the similarity between Langevin & Blokhintsev is refuted, arguing that Langevin's thinking is more closely aligned with that of Niels Bohr. Cross also fails to consider the relevance of the contributions regarding quantum theory's "hidden variables." In **Reply to Freire**, Cross (17 Harold Rd #2, London SE19 3PU England) claims that: (1) his interest in Langevin focused on his influence on the debates of the 1950s; (2) he purposely avoided analyzing Langevin's position on quantum theory in detail; & (3) he made no claim of "identity" between Langevin's views & those of Blokhintsev. David Bohm's influence on later "hidden variable" theorists was intentionally ignored, deciding that there was no relevance in what happened when these variables emerged from the political arena of the "crisis in physics" to become the focus of experimental endeavor. S. Millett

93Z8257

Komesaroff, Paul (Baker Instit, Melbourne Australia), **Bioethics and Nature: The Case of Animal Experimentation**, *Thesis Eleven*, 1992, 32, 55-75.

¶ Personal experiences as a practicing scientist are drawn on to rethink the animal experimentation controversy. The analysis unearths the philosophical & social roots of the contemporary opposition to the use of animals in science, & examines different kinds of discourses that have been used by the various parties to the debate. The origins of the animal liberation movement are briefly discussed, & the way in which science & ethics became intimately entwined during the Enlightenment is explored. Animal liberation is viewed as a radical attempt to initiate a reconsideration of the boundaries between nature & culture, between society & its environment. It is demonstrated that animal liberation's traditional formulations, which rely on the radical disjunction between nature & culture, are no longer tenable due to the transcendental conditions of sociality & discourse. 20 References. Luukkonen, Terttu (Academy Finland, SF-00551 Helsinki), **Is Scientists' Publishing Behaviour Reward-Seeking?**, *Scientometrics*, 1992, 24, 2, June, 297-319.

¶ Data obtained during interviews with teaching & research personnel in 4 university departments (zoology, biomedicine, automation technology, & control technology) in Finland (total N = 191 respondents) are drawn on to test the assumption that scientists are reward-oriented & attempt to publish in as prestigious channels as possible, seeking an optimal level in the hierarchy of publications. Results indicate that, in all these fields, scientists placed equal emphasis on the reward & communication functions of publishing. The actual publishing behavior of biomedical scientists, nevertheless, accorded best with the assumption of seeking an optimal level of publishing in terms of prestige. By contrast, in zoology & technical fields, local & field-related publishing habits appeared strong. 5 Tables, 6 Figures. Adapted from the source document.

Shokeid, Moshe (Dept Sociology & Anthropology Tel-Aviv U, Ramat-Aviv IL-69978 Israel), **Commitment and Contextual Study in Anthropology,** *Cultural Anthropology,* 1992, 7, 4, Nov, 464-477.
Reply, 478-495.

¶ An exploration of the construction of memory in ethnographic works, & the difficulties this construction poses in work that involved hostilities & polarized positions, drawing on examples of the work of anthropologists who have studied Israeli Arabs, in particular, Ted Swedenburg ("Occupational Hazards: Palestine Ethnography," *Cultural Anthropology,* 1989, 4, 265-272), & of Russian scientist Boris Hessen's 1931 work on Newtonian physics ("The Socio-Economic Roots of Newton's Principia," paper presented at the Second International Congress of the History of Science, London). It is argued that the memory of informants as well as of the researcher is influenced by the social & political context, which in turn affects the validity of published work. Anthropologists are called on to view critically the work of their colleagues & make clear distinctions between involvement, advocacy, & commitment; also, the contextual impact of politics & culture should be acknowledged in anthropological works. In **Occupational Hazards Revisited: A Reply to Moshe Shokeid,** Swedenburg (American U, Cairo, Egypt) refutes Shokeid's argument that his commitment to his informants led him to suppress information & tailor facts to his thesis. It is argued that Shokeid would not extend his argument to all "committed" anthropologists, but is using this critique to focus on scholarship on Palestine Arabs, due to his own cultural & political background. 40 References. Wynne, Brian (Fylde Coll U Lancaster, Bailrigg LA1 4YF England), **Carving Out Science (and Politics) in the Regulatory Jungle,** *Social Studies of Science,* 1992, 22, 4, Nov, 745-758.

¶ A review article on a book by Sheila Jasanoff, *The Fifth Branch. Science Advisers as Policymakers* (Cambridge, Mass: Harvard U Press, 1990 [see listing in IRPS No. 67]). Jasanoff analyzes the institutional constructions of science in & around the huge US administrative agencies–the Environmental Protection Agency & the Food & Drug Administration–which, since the 1970s, have practiced a distinctive form of science–regulatory science. A historic shift away from a populist democratic ideology of regulatory decision making toward a more technocratic one is described whereby agencies have turned to science for legitimation through quality control of their decisions. Consequently, a "fifth branch" of government, the science advisory community, has been institutionalized. It is suggested that this shift represents an attempt to escape subjection to government ideologies of deregulation, on the one hand, & the populist whims of the courts, on the other. However, this regulatory turn to science for greater stability & legitimation contains its own ambiguities that center on the notions that science is more malleable than suggested in the classical perspective, & that there is no preordained nor objective definition of the boundary between science & politics. These arguments are developed through case studies of regulatory actions during the 1980s. S. Millett (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z8267

Wynne, Brian (Fylde Coll U Lancaster, Bailrigg LA1 4YF England), **Representing Policy Constructions and Interests in SSK,** *Social Studies of Science,* 1992, 22, 3, Aug, 575-580.

¶ Daniel Lee Kleinman's exchange with Alberto Cambrosio, Camille Limoges, & Denyse Pronovost (CLP [see SA 40:4/92Z0948] over their paper, "Representing Biotechnology" [see SA 38:5/90X0676) is considered as an example of the debate between discourse-focused & interest-based explanations in the social studies of science & technology. By ex-

mining the construction & careers of policy dossiers in this case on biotechnology in Quebec, it is contended, CLP expose the creative negotiation of key classifications & categories in the structuring of a policy field. CLP's fieldwork ethnography is examined, & it is concluded that interest-based approaches, in their intrinsically more confrontational frame, offer more immediate energy, but ultimately less vision & potential scope, than do discourse-focused explanations. L. Dorn

72 sociology of technology

93Z8268

Buchmann, Marlis (ETH Zentrum, CH-8092 Zurich Switzerland), **Le Défi des nouvelles technologies. Contribution à l'étude du changement du monde du travail en Suisse** (The Challenge of New Technologies. A Contribution to the Study of Change in the World of Work in Switzerland), *Schweizerische Zeitschrift für Soziologie/Revue Suisse de sociologie*, 1992, 18, 1, 15-27. (FRE)

¶ Changes in the organization of the Swiss labor force & production methods are due in part to European integrative processes, accompanied by a reevaluation of Swiss social & cultural identity, social upheaval following the breakup of the USSR, & problematic immigration from the southern countries. The globalizing & homogenizing factors leading to the acceleration of these social changes are linked closely to advances in communication & information technology. This technology has changed both perceptions of space & time & increased competitiveness & volatility in the market. Swiss industrial structure & culture approach a decentralized model, favorable to flexible automation systems & latest technologies. 23 References. Adapted from the source document.

Dreyfus, Hubert L. (Dept Philosophy U California, Berkeley 94720), **Response to Collins, *Artificial Experts***, *Social Studies of Science*, 1992, 22, 4, Nov, 717-726.

Comment, 726-739.

¶ In responding to Harry M. Collins's views (*Artificial Experts: Social Knowledge and Intelligent Machines*, Cambridge, Mass: MIT Press, 1990) on the domains of machine intelligence & machine-like, digitalized human behavior, the "necessary" overlap between these domains is challenged. An argument is raised against the social constructionist view demonstrating that whether a domain has a structure amenable to theory is not a function of whether the practices defining the domain are regimented (eg, in chess). With the assumption that domains both amenable & unamenable to theory exist, probable responses from both parties are posited to the question, "Given that artificial intelligence machines are social isolates, how do they work?" In **Hubert L. Dreyfus, Forms of Life, and a Simple Test for Machine Intelligence**, Collins (Science Studies Centre, U of Bath, Avon BA2 7AY England) replies that Dreyfus's objections are not decisive, & that divisions between his own & Dreyfus's perspectives are larger than mere academic doctrine. It is contended that Dreyfus frequently confuses behavior-specific action with the ability to describe the action in terms of rules. S. Millett

93Z8270

Friedman, Paul J. (School Medicine U California San Diego, La Jolla 92093), **Mistakes and Fraud in Medical Research**, UM *Law, Medicine and Health Care*, 1992, 20, 1-2, spring-summer, 17-25.

¶ The debate surrounding research ethics has been muddled by disagreements about the definition of what scientists should be concerned about & what the federal government should take an interest in. Broad & narrow definitions of research misconduct have been proposed, but it is too often assumed that there is consensus on the converse–good scientific practice. Clear terminology is needed to facilitate resolution of problems. Mistakes are common & should be distinguished from culpable error, while deliberate deception is fraud. This boundary may be vague, however, because the element of intent is a key part of the distinction. The observed progression from error to culpable error to deliberate error, or fraud, reveals how & where intervention may be useful. The problem of reporting or discussing suspected misconduct is also considered. Modified AA

93Z8271

Fuller, Steve (Virginia Polytechnic Instit & State U, Blacksburg 24601), **Being There with Thomas Kuhn: A Parable for Postmodern Times**, UM *History and Theory*, 1992, 31, 3, Oct, 241-275.

¶ A review article on a book by Thomas Kuhn, *The Structure of Scientific Revolutions* (second edition, Chicago: 1970 [1962; see listing in IRPS No. 67]). Upon the thirtieth anniversary of the publication of Kuhn's book, antipositivist readings of it are viewed as misleading, & it is contended that the book's value resides in its capacity to alleviate the anxieties of alienated academics & defensive policymakers by teaching them that they could all profit from solving their own paradigmatic puzzles. The book's enduring influence is traced within the philosophy of science to the social sciences & science policy. Consideration is also given to the import of the General Education in Science (GES) curriculum at Harvard U (Cambridge, Mass) in which Kuhn taught prior to writing this work. The GES was designed to keep pure science in the good favor of the US public, in whose view it suffered after the use of the atomic bomb. Kuhn's model provided a plan for reconstituting any practice as science, allowing antiscientific academics to become scientists themselves, thereby neutralizing any radical challenges to the goals of scientific inquiry. Some of the inchoate possibilities for radical critique that Kuhn's success preempted are reconstructed, & suggestions for how they can be recovered in the contemporary academic environment are offered. Adapted from the source document.

93Z8272

Hamlin, Christopher (Dept History U Notre Dame, IN 46556), **Reflexivity in Technology Studies: Toward a Technology of Technology (and Science)?**, *Social Studies of Science*, 1992, 22, 3, Aug, 511-544.

¶ In an examination of the implications of the reflexivity issue for sociological & historical accounts of technology, recent attempts to apply methods of science studies to technology are reviewed. Also explored are demands for reflexivity in science studies & differerences between science & technology. It is contended that the peculiar characteristics of technology suggest a methodological stance in which the reflexivity problem is less formidable. If science & technology are alike in some ways, it is concluded that it may be better to illuminate science in the light of technology, rather than treating it as science & thus reverse the direction of methodological expansion. Adapted from the source document.

Law, John (Centre Technological & Organizational Practice U Keele, Straffordshire ST5 5BG England), **The Olympus 320 Engine: A Case Study in Design, Development, and Organizational Control**, UM *Technology and Culture*, 1992, 33, 3, July, 409-440.

¶ Reported is the design & development of the Olympus 320, a jet engine that was originally conceived by a British firm to power the French-built Concorde airplane. The Olympus 320, however, was replaced by another engine to accommodate design changes that increased the size of the Concorde. Secondary & archival material, along with interviews with persons who were involved in the design of the Olympus 320, are drawn on to examine this important episode in the development of postwar British aviation. From a sociology of organization perspective, the process of design & development is treated as a set of strategies for controlling aspects of the physical & social environment. Here, focus is on the organization of design, methods of technical modeling, & the process of product testing. It is shown that social modeling (ie, an organizational strategy for reducing uncertainty & for predicting the future character of social & technical relations) creates boundaries by setting up physical, organizational, & legal barriers that permit certain kinds of design mistakes to occur in private, away from the media & competitors. 11 Figures. W. Howard

Lestel, Dominique (U Rouen, F-76134 Mont-Saint-Aignan Cedex France), **Fourmis cybernétiques et robots-insectes: socialité et cognition à l'interface de la robotique et de l'éthologie expérimentale**

0038-0202/93 $1.50

(Cybernetic Ants and Robot-Insects: Sociality and Cognition in the Interface of Robotics and Experimental Ethology), *Social Science Information/Information sur les Sciences Sociales*, 1992, 31, 2, June, 179-211. (FRE)

¶ An exploration of the evolving scientific concept of the insect, in light of recent parallel research trends in computer & animal behavior science. Rejecting simplistic algorithms for description of the almost incomprehensibly complex patterns of insect behavior, both fields (especially ethology) are reevaluating the epistemological & psychological problems inherent in characterizing insects as robots. Just as some ethologists have drawn on models & concepts in artificial intelligence to describe insect societies, a few computer scientists & philosophers have suggested that ethology can become a basic resource for artificial intelligence. However, any convergence of experimental ethology & robotics must recognize their different conceptions of life & cognition. The disciplines differ in methods of theory production, ideas about the natural & the artificial, the progress rate in research, & financial backing. 65 References. J. Sadler

93Z8275

Lund, Reinhard, Samarbejde om fremme af teknologien (Cooperation about the Advancement of Technology), *Dansk Sociologi*, 1992, 3, 2, June, 39-52. (DAN)

¶ A study is presented on economic cooperation introduced by the implementation of new technologies. On a macroeconomic level, cooperation can be seen between many firms in the market; on a microeconomic level, cooperation occurs between the management & workers of an individual company. The positive results of product development or enhanced productivity on motivation cannot be reached if each sector acts autonomously. Rather, attitudes & activities involving new technologies must be shared. The benefits of cooperation as a type of interorganizational networking are discussed, & implications for industrial relations theory assessed. 3 Photographs, 25 References. Mackay, Hughie & Gillespie, Gareth (Dept Behavioural & Communication Studies U Glamorgan, CF37 1DL Wales), **Extending the Social Shaping of Technology Approach: Ideology and Appropriation,** *Social Studies of Science*, 1992, 22, 4, Nov, 685-716.

¶ A consideration of ways that the "social shaping of technology" (SST) approach to the technology-society relationship might be extended via incorporation of insights from media & cultural studies. Various approaches to SST are reviewed, focusing on the work of Raymond Williams (eg, see *Television Technology and Cultural Form*, London: Fontana, 1974) & Langdon Winner ("Do Artifacts Have Politics?" in MacKenzie, D., & Wajcman, J. (Eds), *The Social Shaping of Technology*, Milton Keynes, Bucks: Open U Press, 1985, 26-38). It is argued that the SST approach is limited because it fails to take account of: (1) ideology, which is central to functional & symbolic encoding; (2) marketing, central in both constructing the demand for technologies & in informing their development; & (3) the appropriation of technologies by users & the meaning it has for them. These ideas are discussed in relation to recent work on various domestic technologies. Adapted from the source document.

Sørensen, Knut H., Bilen og det moderne Norge: En sosioteknisk transformasjon (The Car and Modern Norway: A Sociotechnical Transformation), *Tidsskrift for samfunnsforskning*, 1992, 33, 1, 27-48. (NOR)

¶ In a modern society such as Norway, the car directs behavior in numerous spheres, & holds these together as a network. The automobile has developed with modernity because it shares the basic characteristics of modernity: individualism, growth, mobility, & flexibility. Here, in an interactional analysis of the relationship between modernity & the automobile, examined are how the car is culturally integrated in Norway & how this integration interacts with the political regulation of cars & communication. Three temporal stages in this interactive process in Norway are identified: institutional development (up until 1960), integration (1960-1970), & saturation & consolidation (1970 & beyond). 54 References. Van Lente, Dick (Erasmus U Rotterdam, NL-3000 DR Netherlands), **Ideology and Technology. Reactions to Modern Technology in the Netherlands 1850-1920,** *European History Quarterly*, 1992, 22, 3, July, 383-414.

¶ The question is addressed of how Dutch society reacted to the introduction of modern technology during the first phase of industrialization (1850-1920), examining the reactions of the four main sociopolitical movements that dominated Dutch society at the time: orthodox Protestantism, liberal Protestantism, Roman Catholicism, & socialism. It is found that, despite great differences in their views of society, these movements developed surprisingly similar (& optimistic) evaluations of modern technology & its social impact. The paucity of sustained criticism, as compared to, eg, England & Germany, is explained mainly by the weakness of the Romantic & Conservative movements, which was a consequence of the peculiar sociopolitical development of the nation. 2 Figures. Aghajanian, Akbar (Dept Sociology Fayetteville State U, NC 28303), **Population Change in Iran, 1966-86: A Stalled Demographic Transition?**, UM *Population and Development Review*, 1991, 17, 4, Dec, 703-715.

¶ Recent demographic changes in Iran are examined in relation to changes in the ideological & socioeconomic environment. The pre-Islamic revolution period, 1966-1976, is contrasted wth the postrevolution period, 1976-1986. Available data are limited, but show the 1966-1976 period was characterized by population growth, declining mortality, & a decreasing birthrate, which led to a slowdown in population growth toward the end of the decade. Population growth 1976-1986 accelerated due to a surging birthrate & immigration. Discussed is the impact on these changes of (1) demographic variables, eg, marriage & childbearing age; (2) government policies, eg, regarding women's social & economic status; & (3) socioeconomic changes, eg, rural-urban migration 5 Tables, 20 References. Babić, Marko, Iseljavanje Hrvata iz rimokatoličke župe Ulice u Bosanskoj Posavini (The Emigration of Croats from the Roman Catholic Parish of Ulice in Bosnian Posavina), *Migracijske teme*, 1991, 7, 1, May, 59-75. (SCR)

¶ The number of Croats in Bosnia & Herzegovina has been dropping for decades due to excessive emigration, although this has been a taboo fact to discuss until recently. This trend is illustrated by the microexample of the Roman Catholic parish of Ulice, serving 9 villages in the flatlands of Bosnian Posavina. The total population of the villages was 5,611 in 1981, 70% of whom were Croatian Catholics. The number of parishioners fell from 5,850 in 1974 to 4,100 in 1988. Additionally, 800 of those listed as parishoners were living temporarily abroad in Western Europe. 15 Tables, 3 Maps, 31 References. Adapted from the source document. Beaucage, André (Dépt sciences administratives U Québec, Hull J8X 3X7), **Les Migrations de travail dans la région de l'outaouais** (Worker Migrations in the Ottawa Area), *Recherches Sociographiques*, 1992, 33, 1, Jan-Apr, 55-81. (FRE)

¶ An exploratory study on daily work-home mobility in the Ottawa (Ontario) metropolitan area draws on 1971-1981 Canadian census data to explore socioeconomic & professional characteristics of commuters. A detailed analysis is provided of the prevalence of daily commutes, commuters' professions, salary, gender, & ethnic origin. Findings indicate that (1) commuters vs noncommuters occupy higher-income jobs; (2) more men than women commute; (3) men commuters earn more than women commuters. These observations are compatible with findings in Europe & the US, & are discussed in relation to the economic theory of human capital. 11 Tables, 20 References. Adapted from the source document. Beaud, Jean-Pierre & Prévost, Jean-Guy (Dépt science politique U Québec, Montreal H3C 3P8), **La Classification canadienne des occupations pendant l'entre-deux-guerres: réflexion sur un cas d'independance statistique** (Canadian Classification of Occupations in the Interwar Period: Reflection on a Case of Independent Statistics), *Canadian Journal of Political Science/Revue canadienne de science politique*, 1992, 25, 3, Sept, 489-512. (FRE)

¶ The professional model of labor-force classification was established in the beginning of this century in the UK & the US based on a distinction between intellectual & manual occupations. This model was not used in Canada. Canadian statistics were based on the Smithian distinction between producers & nonproducers, & census officers focused on measuring the division of labor. Three factors that shaped the Canadian independent approach are discussed here: (1) the centralization of the Canadian statistical system, (2) rejection by the founders of Canadian political economy of the classical representation of society, & (3) the strong correlation that existed between industry & occupation in the Canadian economic structure. Brym, Robert J. (Dept Sociology U Toronto, M5T 1P9 Ontario), **The Emigration Potential of Czechoslovakia, Hungary, Lithuania, Poland and Russia: Recent Survey Results**, *International Sociology*, 1992, 7, 4, Dec, 387-395.

¶ Factors that have recently increased the emigration potential of Russia & Eastern Europe are examined drawing on data obtained in a Feb 1991 survey of 4,269 residents of Czechoslovakia, Hungary, Lithuania, Poland, & Russia. Bearing in mind the volatility of the situation in the region, it is demonstrated that the proportion of adults wishing to emigrate from each of these countries in Feb 1991 varied from 2% in Lithuania to 13% in Poland. Total emigration potential from the region is estimated to have been 10.2-16.7 million. An analysis of bivariate relationships shows negligible rural-urban & educational differences between potential emigrants & others. Young men who were pessimistic about their country's economic & political prospects tended more than others to desire emigration. A multiple regression analysis indicates that age & pessimism concerning democracy are the main factors independently associated with desire to emigrate. 4 Tables, 26 References. Chavez, Leo R., Flores, Estevan T. & Lopez-Garza, Marta (Dept Anthropology U California, Irvine 92717), **Undocumented Latin American Immigrants and U.S. Health Services: An Approach to a Political Economy of Utilization**, *Medical Anthropology Quarterly (New Series)*, 1992, 6, 1, Mar, 6-26.

¶ The use of US health services by undocumented aliens is examined through interviews conducted in 1986 with 300 Mexicans & 296 Central Americans residing in San Diego, Calif, or Dallas, Tex, for at least 1.5 years. Though participants tended to use emergency rooms more than any other health service, little evidence was found to suggest that health services were overutilized. Also, the uninsured were much less likely than the insured to have used health services. The need for a political economy model attuned to variations among undocumented populations seeking health care is discussed. 8 Tables, 54 References. Adapted from the source document. Defo, Barthélémy Kuate (Center Demography & Ecology, 1180 Observatory Dr Madison WI 53706), **Mortality and Attrition Processes in Longitudinal Studies in Africa: An Appraisal of the Iford Surveys,** *Population Studies*, 1992, 46, 2, July, 327-348.

¶ The impact of sample attrition through dropouts on mortality analyses is examined through analysis of data from the 1978-1981 Infant & Child Survey of Yaoundé, Cameroon (N = 9,774). Critics of the survey suggested that attrition may have introduced sample selection bias to estimates of mortality & mortality differentials. Analyses through multinomial survival modeling & bivariate probit with a sample-selection framework reveal that average mortality levels & differentials would not have been different for children who dropped out than those who remained in the survey. Evidence suggests that mortality estimates are unaffected if attrition is ignored. 10 Tables, 1 Figure, 27 References. Adapted from the source document. Faour, Muhammad, The Demography of Lebanon: A Reappraisal, *Middle Eastern Studies*, 1991, 27, 4, Oct, 631-641.

¶ The political & demographic dominance of Christians (Maronites, Catholics, & Orthodox) in Lebanon was established following the last Lebanese census of 1932, which was the last one conducted by the French colonial government. Here, it is argued that significant transformations in the size, education, & political consciousness of the Muslim population call for a reappraisal of the political arrangement. However, the Christians, specifically the Maronites, consistently resist proposals for a new census, & obscure adequate statistics on population size & religious composition. Official demographic statistics are criticized, & calculations presented that trace the gradual increase of the Muslim population since 1932, indicating a current Muslim majority of 65%. 5 Tables, 1 Figure, 15 References. Feichtinger, Gustav & Steinmann, Gunter (Instit Econometrics/Operations Research/Systems Theory Vienna U Technology, A-1040 Austria), **Immigration into a Population with Fertility below Replacement Level–The Case of Germany,** *Population Studies*, 1992, 46, 2, July, 275-284.

¶ Based on stable population theory, the demographic effects of a steady stream of immigrants into a population with below-replacement fertility level are investigated, assuming that the fertility of foreigners is higher than that of the native-born. A discrete-time Leslie-type model is developed, & its asymptotic stationary behavior analyzed. Population statistics for East & West Germany in 1988 reveal that the asymptotic ratio between foreign- & native-born was not dependent on the size of immigration flow, but solely on relative fertility, sex ratio, & immigrant distribution. The effects of continuous immigration on population size & on the ratio of foreign-born citizens in the united Germany under different demographic regimes are also demonstrated. 3 Tables, 2 Figures. Findlay, Allan M. (Applied Population Research Unit U Glasgow, G12 3QQ Scotland), **Population Geography,** *Progress in Human Geography*, 1992, 16, 1, Mar, 88-97.

¶ For developments in population geography, 1990 proved to be a key year. Besides the economic & political importance of changing world events, & shifts in direction for new research in the field, population geography mourned the loss of two prominent French population experts, Alfred Sauvy & Jean Bourgeois-Pichat. Progress in the field is measured by advance in insightful & novel explanations since their research initially appeared. After reviewing their theories linking population & development, & their role in popularizing hard-core demographic techniques, new techniques of measuring mortality, fertility, migration, & their interrelatedness are discussed. Expanding analyses of biosocial, spatial, economic, & regional aspects of fertility, population geographers are now focusing on the research issue of migration, due to increases in migration flows & the development of new theories of migration, featuring the crucial explanatory dimensions of space & place. The disproportionate attention given certain population subgroups is noted. 99 References. J. Sadler (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Hogg, Robert S. (Canadian HIV Trials Network, 200-1033 Davie St Vancouver British Columbia V6E 1M7), **Indigenous Mortality: Placing Australian Aboriginal Mortality within a Broader Context,** *Social Science and Medicine,* 1992, 35, 3, Aug, 335-346.
¶ Mortality & population statistics for 4 indigenous groups are used to evaluate whether Australian Aboriginal mortality patterns are different from those exhibited by three other groups–Canadian Registered Indians, New Zealand Maoris, & American Indians/Alaskan natives. Findings demonstrate that, although all 4 groups have similar patterns of high adult mortality, the relative importance of some causes of death is different. Underlying disparities in cause-specific death rates most likely account for a large proportion of the differences in life expectancy among these populations. Australian Aborigines appear to be much worse off than the other groups, as indicated by every health status measure used. In addition to a much lower life expectancy at birth, they are characterized by higher age- & cause-specific death rates. Existing information on risk, psychosocial, & genetic factors does not fully explain why Australian Aborigines have higher rates of death & lower life expectancy compared to other indigenous groups. 6 Tables, 3 Figures, 48 References. Katz, Stephen (Dept Sociology Trent U, Peterborough Ontario K9J 7B8), **Alarmist Demography: Power, Knowledge, and the Elderly Population,** *Journal of Aging Studies,* 1992, 6, 3, fall, 203-225.
¶ Alarmist demography is a discourse popularized by mass media & cer-

0038-0202/93 $1.50

tain academicians contending that the needs of an ever-growing elderly population in Western welfare states will bankrupt the economic relief system. Drawing on Michel Foucault's theories on population politics, it is noted that the elderly have been represented as an object of knowledge & power, & as custodially marginalized. During the nineteenth century, shifting concepts of institutional welfare narrowed the composition of almshouse residents from needy people of all types to the poor & dependent elderly; thus, the almshouse became the old age home. The influence of Malthusian reactions to populationism during the nineteenth century was strengthened by the alarmist-biased statistical demographics of the social survey. Legitimated by Darwinism & social Darwinism, the Malthusian perspective suggested that a society's economic crises & social instability derived from uncontrolled increases in the dependent & marginalized populations. 75 References. Krūmiņš, Juris & Zvidriņš, Peteris (U Latvia, Riga 226098), **Recent Mortality Trends in the Three Baltic Republics,** *Population Studies,* 1992, 46, 2, July, 259-273.

¶ Data from international statistical organizations are used to investigate trends in male/female & urban/rural mortality & life expectancy in Estonia, Latvia, & Lithuania, 1955-1990, & to compare them to those in the former USSR & European countries; some comparisons are also made with pre-WWII data. Mortality rates by main causes of death during the 1980s are analyzed. At the end of the 1950s, life expectancy in the Baltic Republics was higher than in Eastern Europe, particularly for females, but this advantage was lost over the following decades. This is attributed to changes in social policy & to the consequences of wars & mass repressions. Mortality also declined as a result of the campaign against alcoholism in the 1980s, though social & ecological problems have halted the continued growth of life expectancy. 8 Tables, 5 Figures. Adapted from the source document.

Langlois, André (Dept géographie U Ottawa, Ontario K1N 6N5), **Les Réseaux migratoires franco-ontariens en mutation** (The Changing French-Ontarian Migratory Networks), *Recherches Sociographiques,* 1992, 33, 1, Jan-Apr, 83-102. (FRE)

¶ Analysis of the migration behavior of the French-Ontarian population reveals a specific francophone migration network. Official statistics on migration of Francophones & other linguistic groups in Ontario, 1981-1986, reveal that French Ontarians migrate more than other linguistic groups, primarily in southwestern Ontario. These findings indicate the significance of spatial proximity for community solidarity. Migration behavior is explored in relation to three models: conformity, specificity, & impact. 5 Tables, 32 References. Adapted from the source document.

Leão de Aquino, Estela Maria, Menezes, Greice Maria, Amoedo, Marúcia B. E. & Nobre, Letícia C. C., Mortalidade feminina no Brasil: Sexo frágil ou sexo forte? (Female Mortality in Brazil: The Weaker Sex or the Stronger Sex?), *Cadernos de Saúde Pública,* 1991, 7, 2, Apr-June, 174-189. (POR)

¶ To investigate gender-related differences in mortality rates among adults, official health statistics for 10 Brazilian state capitals in 1985 were analyzed. Results show that regional patterns are closely linked with the local level of industrialization. Gender-related differences are more pronounced in highly industrialized regions. The mortality differential averages 1.5 years in favor of women. Cardiovascular disease & external injuries, including violent acts, lead to a higher mortality rate for men, a pattern expected to persist. The greater longevity for women does not mean that they enjoy better life conditions. 8 Graphs, 29 References. Adapted from the source document.

Lester, David & Yang, Bijou (c/oYang–Dept Economics Drexel U, Philadelphia 19104), **Fertility and Suicide Rates: A Time Series Analysis in the United States,** *Journal of Biosocial Science,* 1992, 24, 1, Jan, 97-101.

¶ Statistical data from US government documents & other published sources are used in a time series analysis of the relationship between fertility & suicide rates 1933-1984 for people ages 15-44. Results indicate that the higher the fertility rate, the lower the suicide rate, for these age groups, for both whites & nonwhites, & for both men & women. The results support Emile Durkheim's theory of suicide. 2 Tables, 1 Appendix, 9 References. Adapted from the source document.

Lichter, Daniel T., McLaughlin, Diane K., Kephart, George & Landry, David J. (Population Research Instit Pennsylvania State U, University Park 16802), **Race and the Retreat from Marriage: A Shortage of Marriageable Men?,** UM *American Sociological Review,* 1992, 57, 6, Dec, 781-799.

¶ Evaluated is a marital search model that links the quantity & quality of available males (Ms) to first marriage transitions among black & white US females (Fs), drawing on data from the 1979-1986 waves of the National Longitudinal Survey of Youth (total N = 6,288). Discrete-time logit models reveal that: a shortage in the quantity & quality of available Ms in local areas negatively impacts Fs' transitions to first marriage; F economic independence is positively correlated with entry into marriage; racial differences in mate availability account for a small share of existing racial differences in marriage; & the effects of a shortage of economically attractive Ms is not simply an artifact of local demographic deficits of Ms to marry. 6 Tables, 1 Figure, 43 References. Adapted from the source document.

Manton, Kenneth G., Stallard, Eric & Tolley, H. Dennis (Duke U, Durham NC 27706), **Limits to Human Life Expectancy: Evidence, Prospects, and Implications,** UM *Population and Development Review,* 1991, 17, 4, Dec, 603-637.

¶ To understand the multidimensional process of aging & the determinants of life expectancy, one must know how: (1) organ systems interact & lose functionality at different stages; & (2) environmental factors influence genetically determined changes in organ systems. A multivariate risk-factor model is presented & applied to secondary life-expectancy data in two long-lived populations–health-insured Mormons & Harvard alumni–to explore theoretical life-expectancy limits. Results suggest that, with optimal risk-factor interventions, a life expectancy of age 95-100 might be achieved in the US & other industrialized countries. Implications of longer life expectancy are discussed. 7 Tables, 2 Figures, 111 References. Adapted from the source document.

Miah, M. Mizanur Rahman (School Social Work Southern Illinois U, Carbondale 62901), **The Cultural-Structural Contexts of High Fertility in Bangladesh: A Sociological Analysis,** UM *International Review of Modern Sociology,* 1992, 22, 1, spring, 99-110.

¶ An investigation of the cultural & structural contexts of high fertility in Bangladesh, focusing on the influence of two major forces–agrarian social structure & religious beliefs & practices. Secondary source data indicate that the agrarian social structure influences fertility through three specific factors–economic, familial, & political. Religion, on the other hand, supports high fertility through an elaborate system of rituals that are anchored in traditional rural beliefs & practices. Implications of these cultural-structural contexts of high fertility for national family planning programs are discussed. 31 References. Adapted from the source document. Nejašmić, Ivica, Depopulacija istočnojadranskih otoka i izumiranje kao moguća demografska perspektiva (The Depopulation of the East Adriatic Islands and Dying Out as a Possible Demographic Perspective), *Migracijske teme,* 1991, 7, 1, May, 77-99. (SCR)

¶ The eastern Adriatic islands of Croatia experienced population growth until 1910, followed by a reduction until a slight increase began again after 1981. In 1910, this area occupied about 5% of all Croatian territory & held about 5% of the population; by 1991 it held only about 2.5% of the population. From 1880 to 1948, about 95,000 people emigrated; after 1948 a mass exodus began, amounting to a 36.6% loss in the northernmost islands. The losses were greater in inland communities than on the coast. About 76 settlements are expected to die out in the near future. Of 28 islands, 14 will soon be totally uninhabited. 11 Tables, 3 Graphs, 2 Maps, 18 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Obermeyer, Carla Makhlouf (Dept Population & International Health Harvard U, Cambridge MA 02138), **Islam, Women, and Politics: The Demography of Arab Countries,** UM *Population and Development Review,* 1992, 18, 1, Mar, 33-60.

¶ Statistical data on fertility & health from the UN, World Bank, & other sources, 1950-1980, are used to test 3 propositions underlying interpretations of the demography of 20 Arab countries: (1) Arab countries do poorly in terms of demographical indicators; (2) this is due to Islam, & (3) the impact of Islam operates through the way it defines a low status for women. The claim that the high natality of Arab countries derives directly from religious doctrine, or indirectly through Islam's effect on the status of women, is challenged. It is concluded that a better understanding of demographic changes must include attention to the political context of fertility & health behavior. 4 Tables, 3 Figures, 150 References. Odedokun, M. O. (Faculty Business & Social Sciences U Ilorin, Nigeria), **Fertility-Infant Mortality Interrelationships and the Quality of Life: An Empirical Study,** *Development Policy Review,* 1991, 9, 4, Dec, 391-412.

¶ To examine the correlation between infant mortality & fertility rates, data from 40 countries–18 developing & 22 developed–were examined. Two data sets from the UN *Demographic Yearbooks* were used, for the 1950s through the 1980s; analyses were conducted taking into account the relatively poor quality of the data. Empirical results indicate overwhelming evidence of positive effects of fertility rates on infant mortality rates in most countries, especially developing countries. Further, the positive causation from infant mortality to fertility rates is slightly stronger in developed countries; mutual causation between the two rates is true in most countries–slightly more so in developed countries; & lack of mutual causation is very rare. Recommendations are made for additional research. 2 Tables, 43 References. S. Dilts (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Paul, Bimal Kanti (Dept Geography Kansas State U, Manhattan 66506), **Family Planning Availability and Contraceptive Use in Rural Bangladesh: An Examination of the Distance Decay Effect,** *Socio-Economic Planning Sciences,* 1991, 25, 4, 269-282.

¶ The effect of family planning availability on contraceptive use was examined through analysis of data collected via questionnaire from 1,111 married women living in a rural region of Bangladesh. Nonclinical contraceptive methods were found to be more popular than clinical methods, but no distance-decay effect was found for either method. Odds ratios tended to increase up to a distance of one mile from a public contraception facility, but then to decrease. The observed effect is explained in terms of the existence of paved roads in the study area, weaknesses in the supply of contraceptive services, & social, economic, & cultural constraints to public contraception facility use. 4 Tables, 5 Figures, 33 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Reinis, Kia I. (Demographic & Health Surveys, 8850 Stanford Blvd #4000 Columbia MD 21045), **The Impact of the Proximate Determinants of Fertility: Evaluating Bongaarts's and Hobcraft and Little's Methods of Estimation,** *Population Studies,* 1992, 46, 2, July, 309-326.

¶ An evaluation is presented of the efficacy of J. Bongaarts's ("A Framework for Analyzing the Proximate Determinants of Fertility" [see SA 27:4/79K2036]) & J. Hobcraft's & R. J. A. Little's ("Fertility Exposure Analysis: A New Method for Assessing the Contribution of Proximate Determinants to Fertility Differentials," *Population Studies,* 1984, 38, 21-45) methods for estimating the fertility-reducing impact of proximate determinants of fertility. Using Monte Carlo techniques to simulate reproductive histories for women in the US, People's Republic of China, & Bangladesh, it is shown that when fertility behavior is random, both methods work well; under more realistic conditions, however, both go astray. Neither works well when women employ stopping behavior once they have achieved their desired family size. While the simulations do not attempt to incorporate the innumerable complexities of fertility behaviors, the incorporation of only the simplest family-building strategy leads to the unambiguous conclusion that the methods yield poor estimates of the fertility-reducing impacts of marriage delay, contraceptive use, & induced abortions. 13 Tables, 1 Appendix. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Robinson, Warren C. (Pennsylvania State U, University Park 16802), **Kenya Enters the Fertility Transition,** *Population Studies,* 1992, 46, 3, Nov, 445-457.

¶ Changes noted between the 1984 & 1989 Kenya Contraceptive Prevalence Survey indicate rising modern contraceptive prevalence & declining fertility. It is suggested that the original pessimistic predictions concerning Kenya's fertility rate were based on aspects of Kenyan society &

programs, including a strong demand for children for economic & personal interests, the culture's pronatalist perspective, & the former ineffectiveness of Kenya's family planning program. However, recent trends are based on major attitudinal changes by both men & women during the last twenty years & on the increasing effectiveness of the family planning program. 2 Tables. Ruggles, Steven (Dept History U Minnesota, Minneapolis 55455), **Migration, Marriage, and Mortality: Correcting Sources of Bias in English Family Reconstitutions,** *Population Studies,* 1992, 46, 3, Nov, 507-522.

¶ Although it has been debated whether the demographic behavior of nonmigrants (people who never leave their place of birth) used in English family reconstitution studies are representative of the general population, the distorting effects of migration-censoring have not been adequately considered. Here, it is shown that even when the demographic behavior of nonmigrants is identical to that of the general population, migration-censoring will significantly bias family reconstitution results. In particular, existing family reconstitution studies underestimate both age at marriage & life expectancy. The potential magnitude of bias introduced by migration is assessed, & several new techniques for correcting the errors are suggested. 13 Tables. Adapted from the source document.

Saint-Blancat, Chantal, La donna musulmana immigrata e la "rivolta dei padri" (The Immigrant Muslim Woman and the "Revolt against the Fathers"), *Religioni e Società,* 1992, 7, 13, Jan-June, 63-85. (ITA)

¶ Muslim family law is drastically opposed to the modern juridical system, derived from reflection on the laws of social history. In contrast, Muslim culture interiorizes the transmission of the sacred norms instituted by God. The principles of law (in Arabic, *fiq*) led to an intellectual construction with a constant relation between divine law & human law, & to a corpus of living rules. Marriage is viewed as a religious duty, not in the sense of consecrating relationships, but rather, for providing the social foundation for reproduction of the family. The woman's purpose is to increase the husband's posterity. The interiorization of prohibitions of corporal, nutritional, & sexual behaviors is achieved through primary socialization at home. Muslim families who emigrate to Western Europe face problems in maintaining their traditional standards in societies where women are considerably more emancipated. Western schools, stressing self-realization & individual competition, are at odds with traditional Muslim teachings. Most Muslim girls stop attending school at age 15-16. The first signs of mixed marriages, between Western men & Muslim women, indicate a weakening of the traditional concept of the Muslim immigrant family. Thus, instead of being instruments to continue or reproduce the old social structure, women are now becoming the protagonists of change. 59 References. M. Meeks

Seifert, Wolfgang (Wissenschaftszentrum Berlin Sozialforschung, D-1000 30 Federal Republic Germany), **Die zweite Ausländergeneration in der Bundesrepublik. Längsschnittbeobachtungen in der Berufseinstiegsphase** (The Second Generation of Immigrants in Germany. Longitudinal Studies of Occupational Entrants), *Kölner Zeitschrift für Soziologie und Sozialpsychologie,* 1992, 44, 4, Dec, 677-696. (GER)

¶ To examine the living conditions & socioeconomic mobility of immigrants to Germany, secondary data from 9,000 native Germans & 3,000 immigrants (reported in Ute Hanefeld's *Das Sozio-ökonomische Panel* [The Socioeconomic Panel], Frankfurt, 1987) are analyzed. Findings show that German language proficiency, social contact with Germans, & ethnic identification had little connection with educational level or occupational status. In contrast to most other studies, no evidence was seen of a general assimilation cycle. Second-generation immigrants are employed principally in industrial work; however, many immigrants have been promoted to skilled positions. For the second generation, wages are on par with native Germans of the same age group, & thus, should not be viewed as marginalized in the job market. 8 Tables, 35 References. Adapted from the source document.

Smil, Vaclav (Dept Geography U Manitoba, Winnipeg R3T 2N2), **Population Growth and Nitrogen: An Exploration of a Critical Existential Link,** UM *Population and Development Review,* 1991, 17, 4, Dec, 569-601.

¶ The significance of nitrogen to population growth & individual well-being is discussed. After describing the value of nitrogen to human nutrition, an account of nitrogen balance in the world's crop production is provided. Estimates of global nitrogen inputs into cropping are calculated The evolution of nitrogen dependence in the world's agro-ecosystems is reviewed, with examples from East Asian agricultural practices. Energy & environmental implications of nitrogen dependence are described Means to maximize the efficiency of nitrogen fertilizers are noted, eg, reducing nitrogen losses from agro-ecosystems, & implementing improvements in the timing of fertilizer application & incorporation of fertilizer into the soil. 3 Tables, 3 Figures, 76 References. Adapted from the source document.

93Z8330

Souglobin, Sergei (Instit Sociology Ukrainian Academy Sciences, Ul Vladimirskaya 54 Kiev 252601), **Ethnic Politics in a Multi-Ethnic State: Canadian Immigrant Communities and Political Process,** *Migracijske teme,* 1991, 7, 1, May, 47-58.

¶ The relationship between ethnicity & politics is explored for the modern multiethnic federative state of Canada. Analytically, ethnic politics can be seen as both group- & state-based. Emphasis on group politics encourages the analysis of each component in the political functioning of ethnic communities. In this light the political representation & organization of Canadian ethnic structures is discussed by defining the contextual scope of potential models of distinctively ethnic political behavior. Ethnic patterns in political participation are increasingly vague, showing rapid & efficient ethnic mobility & integration. The low profile of internal ethnopolitics seems to be counterbalanced by the highly promoted but depoliticized ethnic pluralism in external Canadian ethnopolitics. 27 References. Tienda, Marta & Wilson, Franklin D. (Population Research Center U Chicago, IL 60637), **Migration and the Earnings of Hispanic Men,** UM *American Sociological Review*, 1992, 57, 5, Oct, 661-678.

¶ A 5% sample of the 1980 Census Public Use Microdata Sample is analyzed to explore the relationship between geographic mobility & the earnings of Hispanic & white men ages 25-64 (N = 22,437) in 1979. Analysis indicates that, despite the distinctive social & residential profiles of Mexican, Puerto Rican, & Cuban men, residence in a concentrated ethnic area deters migration for all groups, even though they experience modest earnings penalties; such residence is not related to labor force participation. The earnings returns to migration, at least over the short term, are negligible. Consistent with prior research on economic inequality, the effects of residence in an area of ethnic concentration & area wage rates on earnings differed among Mexicans, Puerto Ricans, & Cubans, though only trivial effects of migration on earnings are demonstrated for all 3 groups. 6 Tables, 32 References. Adapted from the source document.

Wintle, Michael (Dept European Studies U Hull, HU6 7RX England), **Push-Factors in Emigration: The Case of the Province of Zeeland in the Nineteenth Century,** *Population Studies*, 1992, 46, 3, Nov, 523-537.

¶ An examination of the push factors associated with Dutch emigration to the US 1835-1880 from the province of Zeeland. Most Dutch emigrants came from rural areas where agricultural modernization was eroding the position of the small farmer & laborer. Religion played an important role in emigration, particularly the orthodox Calvinist secession of 1834, which stimulated the nineteenth-century Calvinist wave of emigration. Evidence also suggests that community emigration occurred within small, growing young families, many of whom eventually concentrated east of Lake Michigan. It is argued that, while emigration is often the result of hardship & persecution, it also occurs when times are good, during a form of socioeconomic renaissance, & that it is often promoted by individuals who are not an ideological or political minority. Evidence also indicates that when farming was profitable, many people saved much of their profits to take advantage of the land booms in the US. 11 Figures, 1 Appendix. Adapted from the source document.

Yang, Haiou (Dept Sociology U Hawaii, Honolulu 96822), **Population Dynamics and Kinship of the Chinese Rural Elderly: A Microsimulation Study,** *Journal of Cross-Cultural Gerontology*, 1992, 7, 2, Apr, 135-150.

¶ National statistics & survey data on fertility, nuptiality, & mortality in rural China, 1850-1982, are used to create a sociodemographic microsimulation of the kinship dynamics of the elderly that seeks to address: (1) the extent to which these kinship structures, which form the demographic capacity of the family support system, will be affected by the 1970s fertility decline; & (2) when these changes in the kinship structure will occur. Results show that due to population momentum, the crisis in the family support system for the rural elderly will not occur in the near future; however, if fertility does follow the path as hypothesized in the one-child-per-couple scenario, the strength of the family support system will begin to weaken around 2040. This simulation study also reveals that even with the rapid fertility decline of the 1970s, the elderly in the future are likely to have more kin at the horizontal level, eg, a living spouse & siblings than in the past. 9 Figures, 29 References. Adapted from the source document.

93Z8335

Bokina, John, The Domination of Nature Revisited: A Critique of Edward O. Wilson, UM *Telos*, 1989, 80, summer, 138-148.

¶ The agenda proposed by Edward O. Wilson in *Sociobiology: The New Synthesis* (Cambridge, Mass: Harvard U Press, 1975) is critiqued, despite the legitimation of & increasing research in the discipline indicating wider acceptance of Wilson's ideas. It is suggested that Wilson's sociobiology does not offer genuine alternatives to the established study of sociopolitical life. While there are surface similarities between the Frankfurt School's position arguing for the domination of nature & primacy of a biological component in human life & Wilson's biophilia, closer examination reveals that critical theory's use of the normative dimension in the conceptions of both human & external nature, as well as its embedded social theory, is contradicted by sociobiology. It is argued that Wilson disallows biology's emancipatory element, & furthers a conservative interpretation of liberal capitalism. J. Sadler

Giampietro, Mario (Instit nazionale nutrizione, I-00179 Rome Italy), **Genetic Engineering and Risks to the Biosphere,** *International Journal on the Unity of the Sciences*, 1992, 5, 1, spring, 7-30.

¶ In a theoretical framework for assessing the risks of genetic engineering technology on the physical & biological capital of the biosphere, three hierarchical levels of technological activity are distinguished: biospheric, societal, & individual. Each level contains a different space/time scale of cost/benefit assessment & a different goal for the system. However, due to the interdependence of levels, technical decisions made on one level affect other levels, but in decisions including these different levels, there will be ethical issues & political conflict between values; eg, consideration of single genes without simultaneous examination of the equilibrium among species could result in the destructive use of genetic manipulation. Thus, a more holistic approach is needed. A better understanding of the equilibrium in the biosphere & careful & strict regulatory measures for the practical application of genetic engineering are warranted. 3 Figures, 16 References. Adapted from the source document.

93Z8337

Lieberman, Leonard, Reynolds, Larry T. & Friedrich, Douglas (Dept Sociology & Anthropology Central Michigan U, Mount Pleasant 48859), **The Fitness of Human Sociobiology: The Future Utility of Four Concepts in Four Subdisciplines,** UM *Social Biology*, 1992, 39, 1-2, spring-summer, 158-169.

¶ An investigation of the acceptance of sociobiology's key concepts in the subdisciplines of animal behavior, cultural anthropology, developmental psychology, & biological anthropology, based on questionnaire data obtained in 1984/85 from 1,631 persons in these subdisciplines in 3 types of US educational institutions: universities, 4-/5-year colleges, & community colleges. Concepts evaluated include kin selection, reciprocal altruism, male-female reproduction strategy, & the genetic basis for altruism. Results show that the rate of acceptance is highest among biologists, followed by biological anthropologists, developmental psychologists, & cultural anthropologists. 1 Table, 47 References. L. Dorn

Rist, Marilee C. (1680 Duke St, Alexandria VA 22314), **Genes and Behavior**, *The Executive Educator*, 1991, 13, 12, Dec, 16-21.
¶ Drawing on a study of twins conducted by Thomas J. Bouchard et al (see SA 39:2/91X4005), the influence of genetics on personality is explored. Contrary to the predominant view in recent decades, which has attributed greater influence on personality to nurturance from parents & teachers, recent research suggests a stronger influence from heredity. The data reported by Bouchard are unsettling to those who fear that if children are not achieving academically, their failure will be blamed solely on biological predetermination. It is argued, however, that the implications of the twins study are just the opposite, & that teachers have the responsibility to identify & nurture each child's natural propensities. Bouchard's commonsense advice for parents & teachers is discussed. S. Millett

Roberts, D. F. & Dann, T. C. (Dept Human Genetics U Newcastle upon Tyne, NE1 7RU England), **Social Class and Diachronic Trends in Physique in Young University Women**, *Journal of Biosocial Science*, 1992, 24, 2, Apr, 269-279.
¶ Using data on a sample of 5,191 female students admitted to the U of Warwick (Coventry, England) 1971-1986, physique as measured by height, weight, & ponderal index was examined in relation to family variables & socioeconomic class. Stature & weight both show a secular tendency to increase, & reveal no indication of any slowing of rate. The different social classes do not participate equally in these trends, in a way that is difficult to reconcile with the attribution of the diachronic changes to simple improvement in environmental conditions. Maternal competence is suggested as a possible factor in the pattern of class difference. 5 Tables, 17 References. Adapted from the source document.

Taylor, Charles Alan (Dept Speech Communication Indiana U, Bloomington 47405), **Of Audience, Expertise and Authority: The Evolving Creationism Debate**, *The Quarterly Journal of Speech*, 1992, 78, 3, Aug, 277-295.
¶ A rhetorical account for the appeal of creationism is explored, arguing that creationism endures not only in spite of the response of the scientific community, but also, in part, because of it. An analysis of the creationism controversy based on a review of materials published 1975-1990 indicates that the scientific response to creationism misconstrues both the scientific pretensions of creationism & the relative insularity of scientific decision making on questions of public policy. The response ultimately proves unresponsive to the public appeal of creationism, which is grounded in an empiricist folk epistemology. Implications are drawn for theoretical understandings of the relationships between technical & public discourses & the related relationship between technical expertise & rhetorical authority. 116 References. Becerra, Rosina M. & Chi, Iris (School Social Welfare U California, Los Angeles 90024), **Child Care Preferences among Low-Income Minority Families**, *International Social Work*, 1992, 35, 1, Jan, 35-47.

¶ Interview data obtained from non-Hispanic white, Chinese-American, & Mexican-American families (N = 104, 111, & 117, respectively) in 3 low-income housing areas in Los Angeles, Calif, each with at least one child under age 3 & an annual household income of less than $10,000, are used to examine cross-cultural similarities & differences in use of child care. The findings reveal that most mothers preferred to have their infants & toddlers cared for at home by spouses, relatives, neighbors, or friends; however, mothers employed full time more often paid for child care, indicating that the need to work is the primary factor in choosing formal over informal child care. A greater tendency among Chinese mothers to choose formal care is suggested to result from the cultural emphasis on early education. In general, the findings show that ethnic minorities utilize child care centers less than non-Hispanic whites, even when controlling for degree of need; this low utilization can be explained in terms of limited knowledge about the availability & benefits of child care centers, limited accessibility to the centers, language barriers, cultural differences in childrearing, & availability of support networks. 14 References. Brodzinsky, David M. & Brodzinsky, Anne B. (Dept Psychology Rutgers U, New Brunswick NJ 08903), **The Impact of Family Structure on the Adjustment of Adopted Children**, UM *Child Welfare*, 1992, 71, 1, Jan-Feb, 69-76.

¶ Various scales & checklists were used to assess the psychological & academic adjustment of 130 adopted children ages 6-12 living in 5 different family constellations: only children, children with younger/older adopted siblings only, & children with younger/older biological siblings only. Few differences were found, suggesting that family structure, while complicating the dynamics of adoptive family life, plays a minor role in adoption adjustment. 23 References. Bronfenbrenner, Urie, Gibt es Universalien in der Kindererziehung? Ein Interview mit Urie Bronfenbrenner (Are There Universals in Child Upbringing? An Interview with Urie Bronfenbrenner), *DISKURS*, 1992, 1, 51-52. (GER)

Interview conducted by Donata Elschenbroich.

¶ In an interview, Urie Bronfenbrenner contends that comparative cultural socialization research of the last two decades has shown that every culture exerts a variety of constructive & destructive effects on its children. In some countries, eg, communist regimes, too much control is exercised over children, while in the US, societal chaos affects children negatively. The problems in US education, leading to a shortage of qualified workers, are due not only to inadequacies in the school system, but also due to emotional problems in the students' homes. The lack of family policy in the US is lamented. Social research should not only learn about children but also learn from them. M. Meeks (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Cahill, Spencer E. (Skidmore Coll, Saratoga Springs NY 12866), **The Sociology of Childhood at and in an Uncertain Age**, UM *Contemporary Sociology*, 1992, 21, 5, Sept, 669-672.

¶ A review essay on nine books on children (see listings in IRPS No. 67). Although fear for children because of child abuse, missing children, & moral neglect overshadowed the media in the 1980s, the sociological study of child development did not officially arrive until the inauguration of the journal, *Sociological Studies of Child Development*, in 1986. Unfortunately, the works reviewed here tend to take an adult's perspective on the sociology of childhood; some authors believe that the adults in charge can save children, while others envision permanent problems. The closest to a true sociology of children is found in F. C. Waksler's *Studying the Social Worlds of Children: Sociological Readings* (New York: Falmer Press, 1991), but even this volume lacks information on the history of childhood & contributors to the sociology of childhood. 4 References. Chesler, Mark A., Allswede, Jennifer & Barbarin, Oscar O. (U Michigan, Ann Arbor 48104), **Voices from the Margin of the Family: Siblings of Children with Cancer**, *Journal of Psychosocial Oncology*, 1991, 9, 4, 19-42.

¶ Siblings (N = 21) of child cancer patients, ages 10-21, were interviewed on their perceptions of themselves & their families facing cancer. Some of the major themes expressed by the children were: worry & distress about the illness, changes in activity patterns & family life, changing relationships with parents, & a desire to help care for the patient & their parents. The siblings advocated that others in the same position exhibit good behavior & repress negative feelings, & that they take care of themselves & their families. Suggestions to parents & clinical professionals for making more informed & compassionate responses to the situations of young cancer patients' siblings are discussed. 1 Figure, 60 References. Colberg-Schrader, Hedi (Deutsches Jugendinstit eV, Freibadstr 30 D-8000 Munich 90 Federal Republic Germany), **Kindheitsforschung für die Praxis** (Research on Childhood for Praxis), *DISKURS*, 1992, 1, 22-27. (GER)

¶ Today's children are growing up under new circumstances, including demographic factors, a variety of family lifestyles, economic inequality, regional differences, ethnic factors, tension from parents' family & career concerns, & environmental problems of urbanization. Nurseries, providing institutionalized child care, are acquiring an educational function, teaching children the first steps in learning to survive in an increasingly complex world. The day care center is seen as the first independent station of a young person's life course, providing basic orientation for extrafamilial social situations. Additionally, it offers children in a congested urban milieu room to play & learn. Greater flexibility is needed in the organization of day care networks, utilizing cooperation between informal structures & large institutions. 21 References. M. Engelbert, Angelika (Fakultät Soziologie U Bielefeld, D-4800 1 Federal Republic Germany), **Wie "teuer" sind Kinder? Wert und Kosten von Kindern für Familien und Gesellschaft** (How Expensive Are Children?: The Value and Cost of Children for Families and Society), *DISKURS*, 1992, 1, 12-21. (GER)

¶ The question of who will bear the costs of bringing up children is gaining in importance in Germany; debate centers around the necessity of government subsidies to families. Parents elect to have children to enrich their own lives emotionally, to enjoy new experiences that their children will bring them, & to find meaning in life. Society is interested in children as a means of the quantitative & qualitative reproduction of the labor force. Currently, in Nordrhein-Westfalen, the family's monthly cost per child represents 68% of the total cost, with the balance picked up by the state. 1 Table, 2 Graphs, 26 References. M. Meeks (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Gaiser, Wolfgang & Nissen, Ursula (Deutsches Jugendinstit eV, Freibadstr 30 D-8000 Munich 90 Federal Republic Germany), **Kindheit heute–Aufwachsen in der Moderne. Einführung in das Thema** (Childhood Today–Growing Up in Modern Times. Research on the Theme), *DISKURS*, 1992, 1, 2-5. (GER)

¶ In an introduction to a journal issue dedicated to the problems of children in modern society (see related abstracts in SA 41:2), a literature review shows that most studies negatively assess the impact of social change on children, who are increasingly seen as narcissistic, inattentive, weak, & aggressive. The International Year of the Child proclaimed by the UN in 1979 led to the realization that children have fundamental rights just as adults do. Unfortunately, most of the published studies lack a sound empirical basis; rarely does anyone bother asking the children what they feel their true needs & desires are. Only now are the first data banks being compiled by the German Instit for Youth. A brief summary is given of the major articles in the issue. 18 References. M. Meeks (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Gruber, Carolyn (11605 Swains Lock Terrace, Potomac MD 20854), **Naturally Occurring Play Patterns in Groups of Latency Aged Children**, *Child & Adolescent Social Work Journal*, 1992, 9, 1, Feb, 35-52.

¶ Play groups of 143 children ages 5-12 in 11 primary schools were observed during recesses, & their play patterns categorized as practice play, symbolic play or games with rules, & cooperative or competitive. Loglinear anlysis showed that lower socioeconomic status (SES) children did not choose symbolic play at a later age than did higher SES children, as hypothesized, but the middle- & upper-class children were much more likely to choose games with rules. Girls were more likely than boys to engage in cooperative play, & older girls engaged in this form of play more than younger girls, suggesting gender differences in the socialization of aggression. In mixed gender groups, the boys influenced the tendency to play competitively. Games with rules were chosen most by older male groups. The best predictor of practice play, engaged in more by girls & lower SES groups, was gender, followed by class. There was no support for the hypothesis that play preferences were influenced by the prepubertal stage. It is suggested that Jean Piaget's model, which predicts relative & absolute increases over age in playing games with rules, contains a masculine & middle-class bias; implications for theory development & clinical practice are explored. 41 References. Hoffman, Michael A. & Levy-Shiff, Rachel (c/o Levy-Shiff–Dept Psychology Bar-Ilan U, Ramat-Gan IL-52900 Israel), **Children's Vulnerability to Stressful Life Events in Mothers' Eyes: Effects of Gender and Parental Experiences**, *Sex Roles*, 1992, 27, 1-2, July, 39-45.

¶ To assess sex differences in children's vulnerability to stress, 80 Israeli middle-class mothers of elementary school children were asked to predict the level of difficulty that low- & high-stress life events would pose for children in 8 situations described in vignettes. Results indicated that: mothers of boys predicted greater child difficulties with stress than mothers of girls, & maternal perceptions of sex differences in vulnerability were influenced by observation of their own children under stress. It is concluded that there is considerable agreement between professional opinion & lay wisdom regarding male vulnerability to stress. 1 Table, 16 References. Adapted from the source document. Krappmann, Lothar (Forschungbereich Entwicklung & Sozialisation, Lentzeallee 94 D-1000 Berlin 33 Federal Republic Germany), **"Nun spielt doch endlich etwas Schönes!" Aushandeln, Streit und Freundschaft in der Kinderwelt** ("Now Play Something Nice!" Negotiating, Arguing and Friendship in the World of Children), *DISKURS*, 1992, 1, 44-50. (GER)

¶ Many adults seem frustrated by the frequency & intensity with which children argue among themselves. An analysis of the dynamics of children's disagreements shows that their resolution is very different from that of adults. From an early age, children allowed to play in unsupervised groups learn that their peers have likes & dislikes just as they do. Eventually, they begin to co-construct a system based on mutual fairness; later, a sense of truth & justice emerges. Friendships are built with the expectation that there will be enjoyable experiences & equitable treatment. Until puberty, boys & girls usually socialize separately. It should be noted that the general patterns of games & social groupings of childhood can be carried on into adulthood. 1 Figure, 11 References. M. Meeks (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Magnusson, David (Dept Psychology U Stockholm, S-10691 Sweden), **Individual Development: A Longitudinal Perspective**, *European Journal of Personality*, 1992, 6, 2, June, 119-138.

¶ A longitudinal research program focusing on the interaction between individual & environmental factors was established in 1965 at the Dept of Psychology at the U of Stockholm, Sweden. Beginning in 1965, boys & girls in grades 3, 6, & 8 in a central Sweden community were followed into adulthood, adding students each year until the group totaled 1,400. Most of the data were collected in group interviews with Ss' parents, teachers, & peers, & from public records. Socioecological information was collected on family, school, & neighborhood. This initial analysis considers results of 4 subprojects/issues: how early vs late maturation affects social development & educational & occupational choices in girls; how parental value systems more than socioeconomic status affects girls' educational & occupational choices; whether the correlation between early aggressiveness & subsequent criminality & alcohol problems in boys may be due to the correlation of early aggressiveness with other traits in a small group of people; & whether hyperactivity & adrenaline excretion are related to persistent criminality. The importance of longitudinal research for understanding the process of individual development is strongly emphasized. 3 Tables, 2 Figures, 31 References. Adapted from the source document. Mann, Eberhard M., Ikeda, Yoshiko, Mueller, Charles W., Takahashi, Akihisa, Tao, Kuo Tai, Humris, Edith, Li, Bao Ling & Chin, Dorothy (Dept Psychiatry U Hawaii, Honolulu 96826), **Cross-Cultural Differences in Rating Hyperactive-Disruptive Behaviors in Children**, *The American Journal of Psychiatry*, 1992, 149, 11, Nov, 1539-1542.

¶ Based on videotape vignettes, an 18-item behavior observation checklist, & scale data, differences in ratings of hyperactive-disruptive behaviors in children by mental health professionals in the People's Republic of China, Indonesia, the US, & Japan (total N = 37) are investigated. Clinicians from China & Indonesia rated target behaviors for all children higher than did clinicians from the US & Japan. Since all raters observed identical tapes, the disparities may be due to differences in perception than to any differences in actual symptom level, reflecting varying cultural standards for appropriate childhood behaviors. It is argued that significant differences in cultural perceptions of symptoms may complicate cross-cultural comparisons of epidemiological studies of disruptive behavior disorders, particularly if rating scales & behavioral observation are used as primary diagnostic tools. Future research that compares ratings of parents & other professionals (eg, teachers & pediatricians) in different countries is recommended. 1 Table, 1 Figure, 14 References. S. Millett (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Meir, Avinoam & Ben-David, Yosef (Dept Geography Ben-Gurion U Negev, IL-84105 Beersheva Israel), **A Latent Surplus: Changing Value of Sedentarizing and Semi-Urbanizing Nomadic Bedouin Children**

in Israel, UM *Urban Anthropology*, 1992, 21, 2, summer, 137-152.

¶ Due to semi-urbanization, the economic value of young & adult children has declined among Israel's nomadic Bedouin people. Because shrinking pastoral resources & the transition to a public-service & labor-market dependent society, children have left the production cycle & entered the consumption cycle. In contrast, the sociopolitical value of children is still high, due precisely to the same semi-urbanization process. Semi-urbanization has produced contradictory processes, & thus the social norm of value of children has changed from uniform to pluralistic. Consequently, the Bedouin are now within a demographic state of a latent surplus of children. 23 References. Adapted from the source document.

Melhuish, Edward C., Moss, Peter, Mooney, Ann & Martin, Susan (Dept Psychology U Wales, Bangor LL57 2DG), **How Similar Are Day-Care Groups before the Start of Day Care?**, *Journal of Applied Developmental Psychology*, 1991, 12, 3, July-Sept, 331-346.

¶ Interview & questionnaire data were collected from 255 women in the greater London, England, area before their return to employment & the start of day care. Here, comparisons are made on the basis of maternal employment & type of day care chosen, with attention to women's attitudes & well-being, childrens' development, temperament, & daily experience, & mother-infant interaction. Results showed more similarities than differences among Ss related to whether women would return to employment & in type of day care selected. Unexpected differences were found associated with the return to employment in the use of nonparental care & differentiation by gender in mother-infant interaction. 2 Tables, 45 References. Adapted from the source document.

93Z8359

Morgan, Mimi, Review of Robert Coles Studies of the Moral, Political, and Spiritual Life of Children, *Children and Youth Services Review*, 1992, 14, 3-4, 379-381.

¶ A review essay on three books by Robert Coles: *The Spiritual Life of Children* (Boston: Houghton Mifflin, 1990); *The Moral Life of Children* (Boston: Atlantic Monthly Press, 1986); & *The Political Life of Children* (Boston: Atlantic Monthly Press, 1986) (see listings in IRPS No. 67]). In these volumes, Coles examines different aspects of children's experiences from a cross-cultural perspective. In *The Political Life*, nationalism & ideology are the primary themes, & the power of families & larger communities in influencing children is assessed. In *The Moral Life*, the power of the media on children is discussed. *The Spiritual Life* has less definite common ground when discussing religious beliefs across cultures. Coles's use of common methods (drawings) to elicit children's responses in all three thematic areas enriches the reader's understanding of the children's perspectives. M. Pflum

93Z8360

Nissen, Ursula & de Rijke, Johann, Was tun Kinder am Nachmittag? (What Do Children Do in the Afternoon?), *DISKURS*, 1992, 1, 35-43 (GER)

¶ Common observations on how German children spend their time outside of school include remarks on the high amount of structured participation in institutionally organized activities, clubs, & sports events. On the other hand, some observers find that, in a modern urban setting, with an increasing proportion of families in which both parents work, many children are isolated & lonely, & have few chances to meet other children other than at school. Parents are often called on to transport their children across town to sports practice & events & dance & music lessons. Girls are more restricted than boys in their spatial mobility, & are frequently forbidden to visit certain areas deemed dangerous; thus, they are more likely to congregate at special youth centers. In rural areas, 64% of youth participate in sports clubs, compared to 39% in the cities. School homework takes up at least one hour per day for most children, even in the primary grades; for older children, the amount may be several times more. It is apparent that modern society is restructuring the quantity & quality of children's leisure time. 11 References. M. Meeks

Overbay, Jane Dring (Purdue U, West Lafayette IN 47907), **Ethical Principles Influencing Parents of Well Children**, *Issues in Comprehensive Pediatric Nursing*, 1991, 14, 2, Apr-June, 93-101.

¶ Data obtained via a mail survey of 61 parents of well children in a rural Ohio county are used to investigate the ethical principles that influenced their decisions regarding the hypothetical choice of treatment options, focusing on the principles of autonomy, beneficence/nonmaleficence, & justice. All three ethical principles are deemed to be influential in the decision-making process of parents of well children. The mean score for the principle of autonomy was significantly higher than the mean score for the principles of beneficence/nonmaleficence. Open-ended questions regarding the principle of justice revealed many frustrations regarding the health care system. Results demonstrate the need for nurses & other health care providers to be aware of the influence these ethical principles have on decision making, & the importance of autonomy to the parents of well children. 3 Tables, 7 References. Adapted from the source document.

Patterson, Charlotte J., Vaden, Nancy A., Griesler, Pamela C. & Kupersmidt, Janis B. (Dept Psychology U Virginia, Charlottesville 22903), **Income Level, Gender, Ethnicity, and Household Composition as Predictors of Children's Peer Companionship Outside of School**, *Journal of Applied Developmental Psychology*, 1991, 12, 4, Oct-Dec, 447-465.

¶ In an investigation of the role of family income level, ethnicity, household composition, & gender as predictors of children's companionship in activities with peers, questionnaire data were collected from a heterogeneous sample of children (N = 866) in grades 2-4 in a small southern US city. Results reveal that children from low-income homes were less likely to experience peer companionship outside of school. It is suggested that opportunities for peer companionship among children be considered a relevant feature of social programs designed to serve low-income families. 4 Tables, 1 Figure. Adapted from the source document.

Pinto, Aureen, Folkers, Eric & Sines, Jacob O. (Dept Psychiatry U Rochester Medical Center, NY 14642), **Dimensions of Behavior and Home Environment in School-Age Children: India and the United States**, UM *Journal of Cross-Cultural Psychology*, 1991, 22, 4, Dec, 491-508.

¶ The conceptual equivalence of objectively & quantifiably measurable dimensions of children's behavior & home environment in the US & in India is compared using a combined etic-emic approach. In the US, information was provided by the mothers of 681 children ages 9-14 using the Missouri Children's Behavior Checklist & Home Environment Questionnaire; these measures were revised for cultural relevance to an Indian population, & completed by the mothers of 419 children ages 5-16 in southern India. Similar dimensions of home environment & children's behavior emerged for both samples. Dimensions of behavior also had similar item content across both cultural groups, although the specific item content of home environment dimensions differed. Features of home environment were consistently related to several behaviors of children in both countries. Implications & limitations of these findings are discussed. 11 Tables, 29 References. Adapted from the source document.

93Z8364

Riches, Peter, The New Children Act: An Overview, *Children & Society*, 1991, 5, 1, spring, 3-10.

¶ The philosophies & principles underlying GB's Children Act of 1989 are examined. Due to increasing dissatisfaction with existing legislation & professional practice, the Act's primary principles include: bringing private & public law together, balancing parents' & children's rights, placing primary concern on the child's welfare, invervening only when necessary, & making a distinction between voluntary & statutory involvement. The Act also calls for local authority support for children & families, & provision of community homes. 1 Figure. D. Generoli

93Z8365

Sia, Niranjan & Sahoo, Fakir M. (c/o Sahoo-Utkal U, Bhubaneswar 751004 Orissa India), **Combating Children's Learned Helplessness**, UM *The Indian Journal of Social Work*, 1991, 52, 3, July, 325-336.

¶ In an investigation of the origin of helplessness, 225 children were classified into mastery-oriented & helpless categories, & by urban & rural background, based on questionnaires. Mothers (N = 86) of these groups

completed a socialization questionnaire, measuring their expectancy relating to childhood activities, socialization emphases, childrearing practices, & self-perception. The findings are explained in the framework of the current model of human helplessness. Implications are suggested for planning child management programs that can attenuate helplessness. 3 Tables, 10 Figures, 6 References. Adapted from the source document.

93Z8366

Slaughter-Defoe, Diana T., Kuehne, Valerie Shahariw & Straker, Jane K. (2003 Sheriden Rd, Evanston IL 60208), **African-American, Anglo-American, and Anglo-Canadian Grade 4 Children's Concepts of Old People and of Extended Family**, *International Journal of Aging and Human Development*, 1992, 35, 3, 161-178.

¶ Cross-cultural & racial/ethnic differences in 104 fourth-grade children's concepts of old people & extended family are explored, drawing on scale & interview data to compare African Americans, Anglo Americans, & Anglo Canadians in Ill & Alberta. Analysis indicates that the 2 Anglo groups were significantly more similar in their attitudes toward the elderly & their concepts of family than the Afro-American group. Anglo-American children were significantly more likely to include extended family members in their concept of family; Anglo-Canadian children had a significantly higher level of age discrimination ability; & African-American children showed more positive attitudes toward older people. Overall findings of negative attitudes toward old people were consistent with earlier studies. The implications of children's ageist attitudes for increasingly aging Western societies are noted, particularly given impoverished children's potential need for extrafamilial social supports. 2 Tables, 35 References. Adapted from the source document.

93Z8367

Tunnard, Jo & Ryan, Mary, What Does the Children Act Mean for Family Members?, *Children & Society*, 1991, 5, 1, spring, 67-75.

¶ The impact of the Children Act of 1989 on professional practice with children & their families in GB is examined. The Act attempts to balance protection of children's rights & fairness, & emphasizes partnership between families & the state to provide for a child's welfare. It acknowledges that the child's interests are best served by remaining with family & friends. The Act calls on local authorities to develop the state-family partnership through several means: (1) identification of children in need; (2) publication of information about available services; (3) involvement of families in planning & decision making; & (4) establishment of procedures for challenges & complaints. Voluntary care has been replaced by a service provision of accommodation; the need for ethnically sensitive practice is acknowledged. D. Generoli

93Z8368

Ulich, Michaela & Oberhuemer, Pamela (Staatsinsti Frühpädagogik & Familienforschung, Arabellastr 1 D-8000 Munich 81 Federal Republic Germany), **Wer gehört zu einer Familie? Die Perspektive von Kindern** (Who Belongs to a Family? The Perspective of Children), *DISKURS*, 1992, 1, 28-34. (GER)

¶ Although a wide variety of family structures & lifestyles coexist in Germany, many people cling to the traditional perception of a family consisting of father, mother, & children. To determine if children also share this model, or if they make up their own model, interview data were obtained from 300 children ages 4-8. These young respondents (Rs) reported an average of 7 family members, but that figure included extended family, eg, aunts or cousins, especially if they share living quarters. A divorced father living apart was still regarded as a family member unless the mother had remarried. Rs viewed the ideal family as including 3-4 children; Rs from single-parent families tended to dream about life in a larger, stable family. Different ideals were held by boys vs girls, & by only children vs those with siblings. 3 Tables, 2 Figures, 11 References. M. Meeks

Adger, Hoover, Jr. (Dept Pediatrics Johns Hopkins Hospital, 600 North Wolfe St Baltimore MD 21205), **Problems of Alcohol and Other Drug Use and Abuse in Adolescents**, *Journal of Adolescent Health*, 1991, 12, 8, Dec, 606-613.

¶ The evolution of causal theories–eg, problem behavior, social learning, stage, biopsychosocial, & social stress theories–of adolescent alcohol & drug use is reviewed. The more advanced theories point out that risk evaluation for adolescents includes many factors: genetic & family, peer-related, psychological, biological, environmental, & demographic. Given their long-term relationships with patients & their families, primary care physicians are in unique positions to recognize abuse early, & diagnose & treat/refer adolescent patients showing evidence of alcohol or other drug abuse. However, risk behavior in early adolescence needs to be evaluated without negative labeling, & experimental drug use needs to be clinically distinguished from abuse. The recent trend toward early usage of alcohol among adolescents makes it clear that alcohol & drug abuse remain major medical & public health problems. M. Pflum

al-Nooby, Abdel Aziz & al-Raddad, Mohamed (c/o al-Raddad–Kuwait U, 13060 Safat), **Transliterated title not available** (Student's Problems in the New Government Areas: An Analytic Study of Some New Culturally Heterogeneous Areas in Kuwait), *Journal of the Gulf and Arabian Peninsula Studies*, 1990, 16, 62, Apr, 169-202. (ARA)

¶ An attempt to understand the problems faced by primary & secondary school students of middle- & lower-income families resettled in state housing in new areas of Kuwait. The pressures caused by changes in residence, school, & social environment subsequent to students' move to the new areas were examined. Changes in forms of social control & conditioning & the impact of these changes on scholastic achievement & behavior at school are noted. Recommendations are presented to help social workers deal effectively with the problems faced by these students. 2 Tables, 11 References. Adapted from the source document.

Böckler, Stefan (Associazione Italo-Tedesca sociologia U studi Trento, I-38100 Trient Italy), **Die deutsche Jugend. Voraussetzungen und Perspektiven der Generationsbildung im vereinten Deutschland** (German Youth. Presuppositions and Prospects for the Formation of a Consciousness of Generation in a Unified Germany), *Zeitschrift für Soziologie*, 1992, 21, 5, Oct, 313-329. (GER)

¶ A literature review is presented showing the impossibility of overcoming the socio-/politicocultural differences between the eastern & western sectors of Germany without forming a common consciousness of generation among all young people. Both studies showing the two groups pulling together as well as those viewing them as still very separated suffer from inadequacies. It would be more reasonable to assume that, in view of the selective modernization already begun in the former East Germany, both convergences & divergences specific to different spheres of social life may be expected. The most important factor will be the possibility for both groups to procure comparable life experiences now & in the future, abolishing the asymmetries in their mutual perceptions. 65 References. Colby, Ira C. (U Texas, Arlington 76019-0580), **The Throw-Away Teen**, *The Journal of Applied Social Sciences*, 1990, 14, 2, spring-summer, 277-294.
¶ Investigated here are the multidimensional issues surrounding the "throw-away" teen (homeless youth), including actions of public agencies, state policies, & family law. National statistics reveal that the life problems of the throw-away teen go virtually unrecognized, due not to a lack of compassion, but to legal & human services barriers, eg, parental consent requirements, minimal funding, & lack of commitment to help. It is concluded that the social work community must be proactive in advocating the legal & social needs of these young people & help to ensure that they are all provided with a nurturing environment. 1 Table, 20 References. Adapted from the source document.

Croft, Candace A., Sorrentino, Mary Claire & Friedberg, Susan L. (American Academy Pediatrics, 141 NW Point Blvd Elk Grove IL 60009-0927), **Interacting with Youth on Issues of AIDS and Sexuality: A Picture of Current Pediatric Practice**, *Health Values*, 1991, 15, 6, Nov-Dec, 23-31.
¶ Current levels of pediatric interaction related to issues of sexuality & AIDS (acquired immune deficiency syndrome) are explored, drawing on mail questionnaire data from 1,230 pediatricians in direct patient care, all Fellows of the American Academy of Pediatrics. Results indicate that while a majority of pediatricians are discussing AIDS & sexuality-related topics with their patients, variability of dicussion rates exists across topics & adolescent age groups. Additionally, there appears to be a low level of topic integration. 5 Tables, 24 References. Adapted from the source document.

Fisher, Martin, Schneider, Marcie, Pegler, Cynthia & Napolitano, Barbara (Medical Coll Cornell U, Manhasset NY 11030), **Eating Attitudes, Health-Risk Behaviors, Self-Esteem, and Anxiety among Adolescent Females in a Suburban High School**, *Journal of Adolescent Health*, 1991, 12, 5, July, 377-384.
¶ Questionnaire data obtained from 268 female students at a suburban high school in NY indicate that 66+% saw themselves as overweight, & 80+% as above the weight at which they would be most happy. Eating attitudes scores suggest that 18% suffered from eating disorders. Rs the most unhappy about their weight were more likely to have lower self-esteem & higher anxiety & to participate in more health-risk behaviors, eg, cigarette smoking, alcohol & drug use, & sexual activity with more partners. The clustering of health-risk behaviors in vulnerable adolescents is discussed. 5 Tables, 46 References. Adapted from the source document.

Ford, Donna Y. (Coll Human Environmental Science U Kentucky, Lexington 40506-0054), **Self-Perceptions of Underachievement and Support for the Achievement Ideology among Early Adolescent African-Americans**, *Journal of Early Adolescence*, 1992, 12, 3, Aug, 228-252.
¶ Likert-type scale data from 148 African-American fifth & sixth graders in an urban Ohio school district are drawn on to explore their perceptions regarding the US achievement ideology & the ramifications of such support on their academic achievement. Perceptions about the social, cultural, & psychological determinants of underachievement are also examined relative to a paradox of underachievement. Descriptive, comparative, & discriminant analyses were used to examine differences in students' perceptions by gender & academic program. Gender differences were not statistically significant. Gifted students, however, expressed the greatest support for the achievement ideology, & perceived determinants of achievement & underachievement differently than did average students who, along with males, were more likely to personify a paradox of underachievement. Implications & recommendations are discussed for urban educators working with early adolescent African-American youth are discussed. 2 Tables, 71 References. Adapted from the source document.

Gibbs, Jewelle Taylor & Moskowitz-Sweet, Gloria (School Social Welfare U California, Berkeley 94720), **Clinical and Cultural Issues in the Treatment of Biracial and Bicultural Adolescents**, *Families in Society*, 1991, 72, 10, Dec, 579-592.
¶ Based on clinical case studies of 10 biracial & 10 bicultural adolescents (10 males & 10 females) ages 14-18, who were referred for treatment in school & community settings, the major conflicts experienced by biracial & bicultural adolescents in their attempts to master developmental tasks are identified. Clinical, sociocultural, & environmental issues relevant to the Ss & their families are also explored. Conflicts identified in the treatment of these youth included their: dual racial or ethnic heritage, social marginality, sexuality & impulse management, separation-individuation from parents, & educational & career aspirations. Defense mechanisms & coping strategies used by the Ss in various conflict situations are discussed. In assessing biracial & bicultural adolescents, it is suggested that the professional should evaluate age-appropriate behaviors & issues, attitudes of parents & relatives toward their biracial/bicultural identity, school & community resources, & peer relationships & social networks. Intervention strategies at the individual, family, school, & community levels, as well as implications for training & practice are discussed. 44 References. Adapted from the source document.

Hawkins, Wesley E. (Dept Public Health U Oregon, Eugene 97403), **Problem Behaviors and Health-Enhancing Practices of Adolescents: A Multivariate Analysis**, *Health Values*, 1992, 16, 4, July-Aug, 46-54.
¶ Survey & scale data obtained from 1,065 high school students in the Pacific Northwest indicate that those who engage in problem behaviors are less likely to engage in health-enhancing behaviors. Multivariate analysis reveals that male respondents who were more likely to smoke cigarettes, use marijuana/hashish, drink alcohol, carry a knife or weapon, engage in physical fighting, drive while drinking, use hard drugs, & engage in sexual intercourse were less likely to engage in healthful eating behavior, seat belt use, adequate sleep, & positive dental care. Results were similar for females, except for dental, drink/driving, & exercise behaviors. 3 Tables, 18 References. Adapted from the source document.

Hill, Robert F. & Fortenberry, J. Dennis (Dept Pediatrics U Oklahoma Health Sciences Center, Oklahoma City 73190), **Adolescence as a Culture-Bound Syndrome**, *Social Science and Medicine*, 1992, 35, 1, July, 73-80.
¶ The late-twentieth-century US version of adolescence is discussed in

terms of being a created developmental period defined by its problems. It is contended that adolescence has been medicalized into a condition that is inherently pathological, & represents a culture-bound syndrome. Development of the concept of the "at-risk" or "high-risk" adolescent has made the presence of adolescence a marker for disease, ie, a symptom, which has distinctive cultural features with roots in the increasingly narrow age stratifications of the nineteenth century. The etiology of adolescence (the developmental loss of childhood & acquisition of adult status) summarizes conflicts of conformity & individualism, & distinctive professional cultures have arisen to provide the culture-specific ideology & technology for diagnosis & treatment. Implications for the identification & understanding of other culture-bound syndromes are discussed. 1 Table, 1 Figure, 49 References. Adapted from the source document.

Jessor, Richard (Instit Behaviorial Science U Colorado, Boulder 80309-0483), **Risk Behavior in Adolescence: A Psychosocial Framework for Understanding and Action,** *Journal of Adolescent Health,* 1991, 12, 8, Dec, 597-605.

¶ A general conceptual framework for understanding adolescent risk is presented, which considers interrelated conceptual domains (biology, social environment, perceived environment, personality, & behavior) of risk & protective factors as they affect adolescent lifestyles & health/life outcomes. Adolescents at high risk exhibit early & long-term involvement in an organized pattern of risk behavior without the involvement of protective behaviors. The model implies that the more successful prevention & intervention efforts will be more comprehensive (ie, multiple domain), promote protective behavior, & acknowledge the social environment. 1 Figure. M. Pflum

93Z8383

Kagan, Jerome (Harvard U, Cambridge MA 02138), **Etiologies of Adolescents at Risk,** *Journal of Adolescent Health,* 1991, 12, 8, Dec, 591-596.

¶ Five types of adolescents at risk for problems are identified, based on the assumptions that all young persons understand the differences between right & wrong, identify with their class & ethnic groups, are presented with tasks to adapt their behavior to adulthood, & operate best under conditions of mild uncertainty. The five types--those with chronic school failure, those with family environments of abuse or neglect, those especially vulnerable to peer values & persuasion, excessive risk-takers, & those not subject to generally accepted norms of behavior--interact with temperament & gender. US progress in solving the problems of adolescence is retarded by too much tolerance for aggressive behavior & indifference to the plight of the lower classes. M. Pflum

Karraker, Meg Wilkes (U Saint Thomas, Saint Paul MN 55105), **Socioeconomic or Race Differences? Explaining Black and White Adolescent Females' Plans for Education,** UM *Urban Education,* 1992, 27, 1, Apr, 41-58.

¶ Questionnaire data from a national sample of 4,573 black & white high school senior females (Fs) in the class of 1980 who participated in the High School & Beyond study reveal that those from high-income families have the highest levels of educational aspirations. However, when compared to whites, black Fs: (1) in all family income categories are less likely to plan to terminate education with high school graduation; (2) in families with incomes less than $25,000, are more likely to plan graduate education; & (3) in families with incomes of $25,000+, are more likely to plan a doctoral degree. Multiple regression analysis supports the hypothesis that a F is more likely to plan higher education if she has a mother with higher education, is from a higher-income family, is black, & lives in a mother-only family. It is concluded that, although the impact of socioeconomic factors on F educational aspirations is significant, the effect of race cannot be discounted. 3 Tables, 37 References. Ketterlinus, Robert D., Lamb, Michael E., Nitz, Katherine & Elster, Arthur B. (NIH/NICHD, 9190 Rockville Pike BSA Bldg #333 Bethesda MD 20892-9901), **Adolescent Nonsexual and Sex-Related Problem Behaviors,** *Journal of Adolescent Research,* 1992, 7, 4, Oct, 431-456.

¶ Data from a subsample (N = 1,197 males (Ms) & 1,834 females (Fs), 75% white & 25% black) of the 1980 National Longitudinal Survey of Youth are drawn on to compare the involvement in problem behaviors of those who were: (1) virgins, (2) sexually experienced but never pregnant, & (3) pregnant or parents. Logistic regression analyses reveal that, after controlling for the effects of sociodemographic status, age, school status, & frequency of attendance at religious services, sexually experienced, never pregnant adolescents are more likely than virgins to have been involved in four types of nonsexual problem behaviors. However, pregnant/parenting adolescents are no more likely to engage in such behaviors than are their experienced but never pregnant peers. For Ms, but not for Fs, early age at first intercourse is associated with increased involvement in problem behaviors. Implications for policy & interventions for adolescents at risk are discussed. 4 Tables, 1 Appendix, 82 References. Adapted from the source document.

Kozaitis, Kathryn A. & Cousins, Linwood (U Michigan, Ann Arbor 48109), **Perspectives on Adolescence in Multicultural Settings,** *Children and Youth Services Review,* 1992, 14, 3-4, 382-386.

¶ A review article on books by: Victoria Katherine Burbank, *Aboriginal Adolescence: Maidenhood in an Australian Community* (New Brunswick, NJ: Rutgers U Press, 1988); Marida Hollos & Philip E. Leis, *Becoming Nigerian in Ijo Society* (New Brunswick, NJ: Rutgers U Press, 1989); & Mercer L. Sullivan *"Getting Paid," Youth, Crime and Work in the Inner City* (Ithaca, NY: Cornell U Press, 1989 (see listings in IRPS No. 67)). Each of these books considers the predicament of adolescents facing rapid social change & an increasingly uncertain economic future. Based on research with adolescent girls in Mangrove, Australia, Burbank explores the relationship among social change, the regulation of sexual behavior, & the indigenous system of marriage. Hollos & Leis demonstrate that Ijo adolescence cannot be understood apart from its sociocultural context, including religion, family, & national & international political-economic forces. Sullivan explores how individual, economic, & sociocultural factors explain delinquency & crime among adolescents in a US inner city. While each study utilizes a different field research methodology & focuses on a culturally distinct setting, this comparative perspective suggests several similar themes & posits three key recommendations for child welfare: to reaffirm kin group interdependence, promote cultural equilibrium, & entreat community-based initiatives. M. Maguire

Lortie-Lussier, Monique & Fellers, Gloria L. (School Psychology U Ottawa, Ontario K1N 6N5), **Self-Ingroup Relationships: Their Variations among Canadian Pre-Adolescents of English, French, and Italian Origin,** *Journal of Cross-Cultural Psychology*, 1991, 22, 4, Dec, 458-471.

¶ Questionnaire data are used to explore the individualist & collectivist value orientations of 40 English-, 40 French-, & 36 Italian-Canadian (EC, FC, & IC, respectively) children ages 10-12 in Ottawa relative to ideal self, self-esteem, & peer relations. Although most children expressed comparable conceptions of self-esteem & self-centered projections of an ideal self, significant differences persisted, & others emerged with respect to self-ingroup relationships across ethnic & gender groups. As expected, ECs were the most individualist, ICs the most peer oriented, & FCs the most family oriented. Accentuation of gender differences was encountered, but not consistently for the three ethnic groups. Although the North American individualist value orientations of the ECs appeared to reflect egalitarian childrearing values, the different values toward significant others of the FC & IC youth suggest different parental modes of gender-role socialization. Results are discussed within cross-cultural perspectives on self-ingroup relationships, & implications are drawn with regard to cultural diversity in Canada. 1 Table, 1 Appendix, 35 References. Adapted from the source document.

Mansel, Jürgen & Hurrelmann, Klaus (U Bielefeld, D-4800 Federal Republic Germany), **Belastungen Jugendlicher bei Statusübergängen. Eine Längsschnittstudie zu psychosomatischen Folgen beruflicher Veränderungen** (Adolescent Stress during Status Transitions: A Longitudinal Study of the Psychosomatic Consequences of Career Development), *Zeitschrift für Soziologie*, 1992, 21, 5, Oct, 366-384. (GER)

¶ To investigate the stress experienced by German adolescents graduating from secondary school & entering the work force, questionnaire data were obtained from a representative sample of 2,086 students, with a follow-up survey of 523 of the respondents. Such transitions are potentially critical in a society with high levels of vocational training, a breakdown in traditional social patterns, & aspirations to develop an individual personality. Changes in levels of psychological, social, & somatic stress involved in education & career development were assessed, showing that unplanned negative events correlated with an increase in psychosomatic complaints. This trend was intensified in cases of dissatisfaction with personal situation & with subjective evaluations of the burden of educational & vocational demands. 5 Tables, 2 Figures, 30 References. Adapted from the source document.

93Z8391

Mechanic, David (Rutgers U, New Brunswick NJ 08903), **Adolescents at Risk: New Directions,** *Journal of Adolescent Health*, 1991, 12, 8, Dec, 638-643.

¶ While social class (SC) indirectly relates to many adolescent risk behaviors, a change in SC would not be sufficient to change a high-risk life trajectory for an adolescent. Moderate social deprivation may, in fact, contribute to positive adaptation & assist in developing coping skills & self-respect; however, social deprivations of large magnitude overwhelm children & their families. It is suggested that an attempt be made to identify the specific contextual conditions that contribute to family & community disorganization, & thereby increase the probability of adolescent risk. Intervention alternatives for the family & community can then be planned. Since the US is at a point where a generation of youth may be lost, any effort to strengthen family life, improve schools, & engage young people in responsible roles in the community has to be national. Nave-Herz, Rosemarie (Instit Soziologie U Oldenburg, D-2900 Federal Republic Germany), **Ledige Mutterschaft: eine alternative Lebensform?** (Unwed Motherhood: An Alternative Lifestyle?), *Zeitschrift für Sozialisationsforschung und Erziehungssoziologie*, 1992, 12, 3, July, 219-232. (GER)

¶ Factors related to the increasing social acceptance of unwed motherhood in Germany are investigated, based on interview & questionnaire data obtained in 1991 from 26 & 177 unwed mothers, respectively. While the prestige of unmarried mothers was very low in the past, & women sought to avoid illegitimate births, now, due to socioeconomic changes & individualization processes, the deliberate choice to bear a child out of wedlock by planning a family headed only by a mother may represent one of many possible lifestyles. This practice is much more common in the former East Germany, where the illegitimacy rate for births in 1989 reached 33.6%. 1 Table, 35 References. Adapted from the source document.

Nishida, Yoshimasa, Transliterated title not available (Identity in Identity Politics: Analysis of Life Histories of Buraku People), *Soshioroji*, 1992, 37, 2, Oct, 3-19. (JPN)

¶ It is argued that the young people in a Buraku community, where the liberation movement has been actively engaged, hold positive identities because they have received messages since childhood implying that: the outer society is to be blamed, they are expected to fight discrimination, & they must form a forward-looking identity. However, their positive identity is likely to be destabilized as they mature & face discrimination. The moral career of young Buraku people suggests a difficulty of identity politics. It is hypothesized that the conventional definition of Buraku people prevails in the larger society because success in the struggle over competing social definitions with respect to stigmas is confined to the ingroup. It is also contended that young Buraku people who grow up in the midst of an institutionalized liberation movement acquire a positive identity within a protective setting, which becomes more vulnerable to discrimination once outside that setting. 14 References. Phalet, Karen, Groepsgerichtheid en prestatiemotivatie bij turkse migrantenjongeren (Group Orientation and Achievement Motivation with Turkish Migrant Youth), *Tijdschrift voor Sociologie*, 1992, 13, 2, 157-188. (DUT)

¶ To investigate reasons behind the poor academic performance of Turkish immigrant students, questionnaire data were obtained 1989-1991 from high school students, including 884 Turkish immigrants in Belgium & 309 of their peers in Istanbul, Turkey. Their motivational choices in key areas of life are compared with mainstream Belgian culture, taking social class differences into account. Cross-cultural motivational conflicts are found between group loyalty & autonomy & between individual achievement & social contact. Preference for group loyalty & individual achievement in the Turkish work ethic led to a blending of group-oriented & individualistic values. In this light, a social-promotion model is proposed for Turkish migrant youth. 1 Table, 3 Figures, 59 References. Adapted from the source document.

Rogers, David E. (Cornell U Medical Coll, 1300 York Ave New York NY 10021), **Adolescents at Risk Conference: Summation,** *Journal of Adolescent Health*, 1991, 12, 8, Dec, 644-647.

¶ A summation of papers & discussions at the Seventh Cornell U (New

York, NY) Conference on Health Policy (see related abstracts in SA 41:1), which focused on adolescents at risk. Reports indicate that the US is neglecting the welfare, growth, & development of its teenagers. Adolescent violence, polydrug use, & early alcohol use are on the increase, coupled with earlier & more frequent sexual experience. The US belief in the nuclear family as solely responsible for its children, the belief in social Darwinism, & US indifference to the poor are at fault for adolescent risk. Conference attendees reveal an ambivalence about the future of adolescents; while adolescents are resilient, profound & fundamental changes in US social infrastructure are needed to improve their position, including a generous commitment to children. Schall, Matthew, Kemeny, Attila & Maltzman, Irving (Dept Psychology U California, Los Angeles 90024-1563), **Factors Associated with Alcohol Use in University Students,** UM *Journal of Studies on Alcohol,* 1992, 53, 2, Mar, 122-136.

¶ Questionnaire data were used to examine drinking, drug use attitudes, beliefs, personality, & demographic characteristics among university students. Gender, ethnic, & social group differences were also examined. It was concluded that a biopsychosocial matrix of determinants influenced alcohol consumption & its excessive consumption. Two general factors emerged that may be interpreted as entering into a complex approach-avoidance conflict where the net approach tendency determines overall alcohol consumption. Personality characteristics & presumably their biological correlates, as well as set & setting, or attitudes, beliefs, & environmental influences, contribute to the approach-avoidance conflict that determines abstinence or varying amounts of alcohol consumption. 5 Tables, 1 Figure, 65 References. 93Z8402

Swatos, William H., Jr., Adolescent Satanism: A Research Note on Exploratory Survey Data, UM *Review of Religious Research,* 1992, 34, 2, Dec, 161-169.

¶ A 3-wave questionnaire survey of a purposive sample of 1,182 high school sophomores & juniors conducted in a midwestern metropolitan area 1989/90 used a "close friend" approach to ask questions about Satanic activity, since patterns of behaviors among teenagers are likely to be similar between individuals & close friends. Involvements in Satanic activity are related to other anti- & prosocial behaviors & to the students' own religious activities & rock music preferences & activities. Purported Satanic involvement is shown to be an extreme form of deviance, most probably connected to other antisocial activities as a legitimation rather than a motivation. No evidence is found for Satanism as an organized movement. 1 Table, 22 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Waldmann, Sabine & Straus, Florian (Instit Praxisforschung & Projektberatung, Sendlinger Str 54 D-8000 Munich 2 Federal Republic Germany), **Identität und soziale Netzwerke: Ein Vergleich von ost- und westdeutschen Jugendlichen** (Identity and Social Networks: A Comparison of East and West German Youth), *DISKURS,* 1992, 1, 53-59. (GER)

¶ The formation of identity in the postmodern society takes place in an atmosphere of social individualization & lifestyle pluralization. Simultaneously, the significance of personal social networks for people finding their own identity is increasing. The existence of many social subcultures leads to adoption of a patchwork of partial identities, contradictory in many aspects. To investigate these trends, interview data (Ns not provided) were obtained in fall 1989 from West German youth with good employment prospects & West & East German youth who were unemployed. The relevance of social networks for Western individualism vs Eastern collectivism is examined in terms of the dichotomies between experimentation & existence, expression & sharing, & self-advertising & blending in with the crowd. 13 References. Wiggins, Beverly & Wiggins, James A. (Instit Research Social Science U North Carolina, Chapel Hill 27599-3355), **Specification of the Association between Sociability and Drinking Level among College Students,** UM *Journal of Studies on Alcohol,* 1992, 53, 2, Mar, 137-141.

¶ Panel data obtained 1985-1988 from 3 samples of undergraduates (N = 100 each) at the U of North Carolina, Chapel Hill, are used to examine the multidimensionality of sociability & to test the hypothesis that the various dimensions are differentially related to drinking level. Measures of 6 dimensions of sociability were correlated with the drinking levels of college students, both male & female. Although some weak associations were found, none of the dimensions of sociability examined had better explanatory power than more traditional measures of sociability. 2 Tables, 1 Appendix, 17 References. Willemsen, Eleanor & Sanger, Carol (Dept Psychiatry Santa Clara U, CA 95053), **Statutory Emancipation of Minors: Use and Impact,** *American Journal of Orthopsychiatry,* 1991, 61, 4, Oct, 540-551.

¶ Emancipated minors have the legal authority of an adult & can make legal decisions for themselves without parental consent or involvement. Interviews with 18 adolescents living in the San Francisco (Calif) Bay area who petitioned for emancipation under a Calif statute are used to investigate the operation of statutory emancipation & its effects on people's lives. Findings reveal that the decision to seek emancipation is often based on the concerns of adult family members, & that those adults sometimes facilitate the actual legal process. Also found is that the statute's prerequisites for emancipation are frequently not fulfilled. 1 Table, 24 References. Adapted from the source document. Wilson, Patricia M. & Wilson, Jeffrey R. (Dept Family Resources & Human Development Arizona State U, Tempe 85287), **Environmental Influences on Adolescent Educational Aspirations: A Logistic Transform Model,** *Youth and Society,* 1992, 24, 1, Sept, 52-70.

¶ Data from the 1980 wave of the High School & Beyond study for a subsample of 2,896 black & white high school seniors living in 2-parent families are used to explore factors within the family & school environments that influence adolescents' educational aspirations. Logistic regression analysis yielded significant effects on adolescent educational aspirations for: parents' educational level; perceived parental & teacher aspirations for adolescents; parents' influence on high school plans; school factors that interfere with education; socioeconomic status; sex; & race. Females were more likely to have low aspirations, & blacks more likely to have higher aspirations than their white counterparts. It is concluded that since factors within both the family & school environments play significant roles in influencing the development of adolescents' educational aspiration, a home-school interface that provides an even more cogent influence should be nurtured. 4 Tables, 32 References. ——, **Coping with Marital Transitions: A Family Systems Perspective,** *Monographs of the Society for Research in Child Development,* 1992, 57, 2-3(227), 1-238.

¶ In this special journal issue, results are presented of a longitudinal investigation of relationships in families headed by divorced custodial mothers during the transition to remarriage, focusing on the adjustment of adolescents in the reconstituted family systems. Data obtained over a 26-month period via interviews, questionnaires, checklists, & in-home observations of family interactions with a sample of 164 white families with at least a high school education are drawn on to compare adolescent adjustment in intact, divorced single-mother, & remarried families in terms of parent-child & sibling relationships & overall family/school/social functioning. Results indicate that adolescents experienced the most positive outcomes in all three family types in the presence of an authoritative style of childrearing. Offspring of the nondivorced were more competent & manifested fewer behavior problems than did their counterparts in divorced & remarried families. Few interactions of child gender & family structure were obtained, contrary to previous studies of younger children. Over the course of the study, no adjustment to the remarriage was demonstrated in terms of stepfather-stepchild relationship or overall stepchild adjustment. A commentary summarizes the findings & offers explanations for the lack of independent gender effects of family structure on adolescent functioning, hypothesizing that the lower levels of adjustment in both types of nontraditional families may be due to differences in parenting quality that existed before the dissolution. 54 Tables, 7 Figures, 2 Appendixes, 178 References. Balshem, Martha, Oxman, Gary, van Rooyen, Deborah & Girod, Kathy (Dept Anthropology Portland State U, OR 97207-0751), **Syphilis, Sex and Crack Cocaine: Images of Risk and Morality,** *Social Science and Medicine,* 1992, 35, 2, July, 147-160.

¶ Drawing on a larger 3-year project dealing with groups at high risk for syphilis, findings of a qualitative substudy to investigate cultural issues specific to syphilis & crack cocaine use & to explore the cultural context of sexual behavior are presented. Interview data were collected from 40 high-risk Ss in Ore recruited through residential drug treatment facilities, county epidemiologists' case files, homeless shelters, & public school nursing staff; 12 were confirmed recent syphilis cases & 2 reported having had syphilis prior to the study. Crack cocaine use was reported by 31 Ss, & 12 reported having experience as professional prostitutes. Findings reveal that sexual activity involving multiple anonymous partners often takes place within the context of crack cocaine use. Ss described themselves as adhering to common American values regarding cleanliness, morality, & sexual behavior, & they spoke of choosing sex partners according to whether a prospective partner "looks clean." Ss use conceptions of cleanliness & morality in constructing definitions of high- & low-risk sexual behavior as they negotiate a life that endangers their sense of moral control, thereby invoking beliefs & values central to the dominant culture. 4 Tables, 1 Figure, 82 References. Bradford, John M. W., Boulet, J. & Pawlak, A. (Forensic Services Royal Ottawa Hospital, 1145 Carling Ave Ontario K1Z 7K4), **The Paraphilias: A Multiplicity of Deviant Behaviours,** *Canadian Journal of Psychiatry/Revue Canadienne de Psychiatrie,* 1992, 37, 2, Mar, 104-108.

¶ The multiple nature of paraphilia is examined among a sample of 443 males admitted for psychiatric assessment in the Sexual Behavior Clinic at an Ottawa (Ontario) hospital, based on sexual histories obtained from respondents. Focus is on individual behaviors related with these paraphilias: homo- & heterosexual pedophilia, homo- & heterosexual hebephilia, transvestism, voyeurism, lewdness, frotteurism, attempted rape, rape, & exhibitionism. It is contended that the *DSM-III* paraphilia criterion that bizarre imagery & acts are needed for sexual excitement is oversimplified. Rather, classification by self-reported deviant sexual behavior is considered more reliable. Also, it is observed that common classification by a single primary paraphilia is inaccurate; clinicians should explore individual combinations of multiple deviations. 2 Tables. I. Caldwell, John C., Caldwell, Pat & Orubuloye, I. O. (Health Transition Centre Australian National U, Canberra ACT 2601), **The Family and Sexual Networking in Sub-Saharan Africa: Historical Regional Differences and Present-Day Implications,** *Population Studies,* 1992, 46, 3, Nov, 385-410.

¶ Two approaches to determining the role of historical regional differences in sexual networking in sub-Saharan Africa & their contemporary implications for research concerning sexually transmitted diseases, particularly AIDS (acquired immune deficiency syndrome), are discussed. The first approach applies a model developed from observation & interviews with elderly people (N not specified) in Ekiti, a district of Nigeria. The second approach represents a continued investigation of nineteenth- & early twentieth-century studies & of later attempts to work with survivors of that period to reconstitute the way of life before external cultural influences changed it. Findings appear to suggest that there was a greater regional contrast in historical patterns of sexual activity than is presently true. The trend toward a greater similarity in sexual freedom across Africa is largely a product of the collapse of the colonial experience. The regional differences in sexual networking, however, are not sufficient to explain the marked difference in AIDS cases between West Africa & the rest of the region. It is concluded that, while sub-Saharan Africa is not culturally homogenous, aspects of sexuality in traditional society extended across the region more than previously recognized. 2 Figures. Adapted from the source document.

Dür, Wolfgang, Haas, Sabine & Till, Wolfgang (U Wien, A-1060 Austria), **Homosexuelle Lebenszusammenhänge und AIDS. Ein Bericht über Forschungsergebnisse aus Österreich** (Homosexual Lifestyle and AIDS. Results of an Austrian Study), *Österreichische Zeitschrift für Soziologie,* 1992, 17, 3, 35-48. (GER)

¶ To investigate social factors influencing behaviors conducive to contracting or avoiding AIDS (acquired immune deficiency syndrome), interview data were obtained 1990/91 from 171 Austrian male homosexuals in Vienna, Graz, & Salzburg. Findings indicate that individuals with a firmer, more positive homosexual self-identity are much more likely to employ safer sexual techniques, engage in stable partnerships, & be well integrated into the gay community. In contrast, homosexuals who are isolated or who have low social status are much more likely to engage in risky behaviors. AIDS prevention strategies are discussed, focusing on condom usage. 3 Tables, 25 References. Adapted from the source document.

Heine-Wiedenmann, Dagmar, Zwischen sexueller Emanzipation und Gewaltverhältnis: neuere Arbeiten zur Pornographie (Between Sexual Emanicipation and Violence: New Works on Pornography), *Soziologische Revue,* 1992, 15, 4, Oct, 360-367. (GER)

¶ A review essay on books by: Bettina Bremme, *Sexualität im Zerrspiegel. Die Debatte um Pornographie* ([Sexuality in a Distorted Mirror. The Debate on Pornography] Münster/New York: Waxmann, 1990); Andrea Dworkin, *Pornographie. Männer beherrschen Frauen* ([Pornography. Men Controlling Women] Frankfurt: Fischer, 1990); Henner Ertel, *Erotika und Pornographie. Repräsentative Befragung und psychophysiologische Langzeitstudie zu Konsum und Wirkung* ([Erotica and Pornography. A Representative Survey and Psychophysiological Long-Term Study of Consumption and Effect] München: Psychologie Verlags Union, 1990); & Rüdiger Lautmann & Michael Schetsche, *Das pornographierte Begehren* ([The Pornographic Desire] Frankfurt/New York: Campus, 1990 [see listings in IRPS No. 67]). These works contribute to the debate on pornography in the US & Germany. Dworkin's book is a denunciation of the many facets of a misogynistic culture made explicit through pornography. Similarly, Bremme treats pornography not as an isolated cultural phenomenon, but rather, as embedded in the context of a patriarchal society with a long tradition of suppressing women & healthy sexuality. Lautmann & Schetsche take a narrower view of pornography & concentrate only on magazines, ignoring videos, films, & other media. Ertel's analysis of questionnaire data from 6,000 men & women reveals that pornography consumption in general had little effect on respondents' sexual behavior, encouraging violence only in a limited number already predisposed toward violence. Holland, Janet, Ramazanoglu, Caroline, Sharpe, Sue & Thomson, Rachel (Goldsmith's Coll U London, SE14 6NW England), **Pleasure, Pressure and Power: Some Contradictions of Gendered Sexuality,** UK *The Sociological Review,* 1992, 40, 4, Nov, 645-674.

¶ Heterosexual young females (Fs) must negotiate sexual relationships with males (Ms) in situations where sex is defined largely in terms of M needs & which lack notions of a positive [illegible]ity. Data from a subsample of 39 Fs ages 16-21 in London & [illegible]ster, England, who participated in the Women, Risk & AIDS (acquired immune deficiency syndrome).Project demonstrate both the range of pressures on them to engage in sexual practices that are risky, violent, or not pleasurable, but also the possibilities for young Fs to empower themselves in sexual relationships. F control over sexual safety is undermined by the dominance of M sexuality & F compliance in satisfying M desires. Empowerment is a contradictory & contested process requiring both critical reflection (intellectual empowerment) & the transformation of sexual experiences (experiential empowerment), but some young Fs are able to put it into practice. 1 Appendix, 48 References. Adapted from the source document.

Hollander, Judith & Haber, Linda, Ecological Transition: Using Bronfenbrenner's Model to Study Sexual Identity Change, *Health Care for Women International,* 1992, 13, 2, Apr-June, 121-129.

¶ U. Bronfenbrenner's ecological transition model (*The Ecology of Human Development: Experiments by Nature and Design*, Cambridge, Mass: Harvard U Press, 1979) is applied to the coming-out process of lesbians. Sexual identity change is conceptualized as an individual's ecological transition, ie, changes in activities, roles, & interpersonal relationships within the individual's social environment. These changes cause alterations in settings & creation of new settings, & therefore extend the individual's immediate environment. Reviewed are the implications of ecological transition on relationships & relationship formation, development of new activities, internal conflict, & social support. A framework for intervention by health care professionals is presented. 2 Figures, 17 References. Adapted from the source document.

Innala, Sune M. & Ernulf, Kurt E. (Dept Psychology U Göteborg, S-40020 Sweden), **Understanding Male Homosexual Attraction: An Analysis of Restroom Graffiti**, *Journal of Social Behavior and Personality*, 1992, 7, 3, 503-510.

¶ Homosexual graffiti (N = 406 examples) from 2 men's restrooms at the U of Hawaii Manoa, Honolulu, are analyzed to explore the dynamics of male homosexual attraction. Of the graffiti with a contact-seeking content (83%), the most frequently desired object traits were male genital traits (36%). In sexual exchange, the most frequently desired behaviors were oral (33%) & anal (25%) behaviors, while sadomasochism comprised 13% of all desired behaviors. Most contact-seeking messages that did state a role preference, expressed that Ss desired a submissive-recipient role in sexual exchange; this was most marked in sadomasochism, supporting those earlier studies that have found homosexual masochists to outnumber homosexual sadists. 1 Table, 1 Figure, 1 Appendix, 23 References. Adapted from the source document.

Joseph, K. Michael, Adib, S. Maurice, Joseph, Jill G. & Tal, Margalit (c/o Jill G. Joseph–School Public Health U Michigan, Ann Arbor 48109), **Gay Identity and Risky Sexual Behavior Related to the AIDS Threat**, UM *Journal of Community Health*, 1991, 16, 6, Dec, 287-297.

¶ Questionnaire data are drawn on to investigate the relationship between risky sexual behavior & issues of gay identity among 825 homosexual men in Chicago, Ill, focusing on 3 main conceptual categories important to gay identity: sexual identity, gay social interaction, & identity development milestones. Each of these is analyzed as to their predictive effect on risky sexual behavior related to the threat of human immunodeficiency virus at intervals of 6-18 months. Results suggest that successful integration into a gay network plays a role in reducing risky sexual behavior, regardless of the chronological timing of personal events marking a gay man's "coming out" history. 3 Tables, 1 Figure, 14 References. Adapted from the source document.

93Z8425

Jubber, Ken (Dept Sociology U Cape Town, 7700 Rondebosch South Africa), **The Socialization of Human Sexuality**, *South African Sociological Review*, 1991, 4, 1, Oct, 27-49.

¶ Sexuality & sexual identity are defined, & a distinction made between sexuality, sex, & gender. The biology of sexuality & sexual socialization among primates is briefly discussed, & the concept of "protosocialization" is introduced as a key to understanding human sexual socialization. It is argued that gender identity is inseparable from genital identity; as such, gender plays a crucial role in sexual socialization. Some salient aspects of sexual socialization through the years from infancy to late adolescence are traced schematically, highlighting the different forms of sexuality characteristic of male & female adolescents. Research on sexuality & sexually related matters in South Africa is reviewed, revealing only sporadic & scattered treatment of a topic which, in light of the acquired immune deficiency syndrome epidemic, sexual abuse, sexual harassment, rape, teenage pregnancies, & the high birth rate, is deserving of more serious attention. 59 References. Adapted from the source document.

Kutchinsky, Berl (Instit Criminology & Criminal Law U Copenhagen, DK-1017K Denmark), **The Politics of Pornography Research**, *Law and Society Review*, 1992, 26, 2, 447-455.

Response, 457-461.

¶ It is argued that, in his review essay on pornography (see SA 39:5/91Y1608), Steven Alan Childress falsely presented Kutchinsky's criminological research on pornography reported in John H. Court's "Sex and Violence: A Ripple Effect" (in Malamuth, Neil M., & Donnerstein, Edward [Eds], *Pornography and Sexual Aggression* [see IRPS No. 38/87c00828]). Childress's conclusion that research on the causal relationship between pornography & sex crime is inconclusive may have been biased by a desire to please his liberal audience as well as a most selective choice of statistics from the obviously flawed Court study. In **Pornography, "Serious Rape," and Statistics: A Reply to Dr. Kutchinsky**, Childress (Tulane U, New Orleans, La) maintains that the "inconclusiveness verdict" for population studies on pornography & sex crime is the only one appropriate at present. Correlation studies such as these have their limitations, & results depend heavily on the variables measured. In addition, reported rape, rape rates, & rape may not be as interchangeable as Kutchinsky believes, & serious rape should not be distinguished from nonserious rape. 20 References. M. Pflum

Metts, Sandra, Cupach, William R. & Imahori, T. Todd (Dept Communication Illinois State U, Normal 61761), **Perceptions of Sexual Compliance-Resisting Messages in Three Types of Cross-Sex Relationships,** UM *Western Journal of Speech Communication,* 1992, 56, 1, winter, 1-17.

¶ The effects of compliance-resisting sexual messages on a recipient are examined based on questionnaires completed by 638 undergraduate students in response to scenarios varying relationship type (friendship, ambiguous relationship, & dating relationship) & rejection message (highly indirect, moderately indirect or direct, & highly direct). Scenarios were judged for constraint, predictability, face preservation, & comfort (the dependent variables). ANOVAs indicated a main effect for rejection message for all 4 dependent variables, but no main effect for relationship type or gender. Rejection messages that were moderate in directness (based on stage of the relationship or personal preference) were perceived to be more face preserving & more comfortable than the highly indirect or direct ("not sexually attractive") messages. A 2-way effect between relationship type & rejection message was observed for predictability: students perceived that sexual rejection was less predictable in dating relationships, & thus, rejection in a dating relationship was less face preserving & uncomfortable than in other relationships. Relationship type was significant for predictability, face preservation, & comfort. Gender was significant for constraint, predictability, & comfort; females perceived sexual rejection as more constraining, less predictable, & more uncomfortable than males did. 3 Tables, 30 References. Adapted from the source document.

Metz, Michael E. (Medical School U Minnesota, Minneapolis 55454), **Es el amor una characterística de la sexualidad humana?** (Is Love a Characteristic of Human Sexuality?), *Revista Latinoamericana de Sexología,* 1991, 6, 3, 205-233. (SPA)

¶ An examination of the relationship between love & sex from a humanistic perspective, based on a review of the literature. It is proposed that love & sex enhance each other in the human developmental process. Five elements critical to the integration of love & sex are discussed: understanding that it is a lifelong developmental process; acknowledging loneliness as a primary mechanism facilitating the maturation of love & sex; developing relationship skills necessary for love; learning sexual skills necessary for physical intimacy; & bridging gender differences in interpersonal interaction. Different levels of intimacy are outlined, & cognitive-behavioral models proposed. It is concluded that the relationship between sex & love evolves over the course of relationships, & that their integration should be a common goal in a significant relationship. 2 Tables, 2 Figures, 27 References. Adapted from the source document.

93Z8434

Miller, Rowland S., Johnson, James A. & Johnson, Judy K. (Sam Houston State U, Huntsville TX 77341), **Assessing the Prevalence of Unwanted Childhood Sexual Experiences,** *Journal of Psychology and Human Sexuality,* 1991, 4, 3, 43-54.

¶ In an attempt to avoid the conceptual & definitional problems of past studies of sexual victimization, an explicit checklist describing a variety of unwanted, overt sexual behaviors experienced before the age of 16 was developed. Administration of the checklist to 162 male & 183 female students in psychology courses at a southwestern state university revealed that 45% of respondents (Rs) reported bothersome incidents, & 20% had engaged in unwanted oral, anal, or vaginal sex; these severe experiences occurred both more frequently & for longer periods than did less severe experiences. It is suggested that the checklist may be an optimal method for eliciting self-report of early, aversive sexual experiences, which may be considerably more prevalent than is commonly believed. 4 Tables, 1 Appendix, 15 References. Oliver, Mary Beth & Sedikides, Constantine (Dept Communication Studies Virginia Polytechnic Instit & State U, Blacksburg 24061-0311), **Effects of Sexual Permissiveness on Desirability of Partner as a Function of Low and High Commitment to Relationship,** UM *Social Psychology Quarterly,* 1992, 55, 3, Sept, 321-333.

¶ Data obtained during 2 experiments with heterosexual undergraduates (total N = 248) at the U of Wisconsin, Madison, are drawn on to evaluate the predictions of the double standard & the evolutionary perspectives concerning the role of sexual permissiveness in desirability of partner at different levels of perceived commitment to a relationship. Results indicate that females (Fs) preferred low levels of sexual permissiveness for both low- & high-commitment partners, & rated permissive targets lower than nonpermissive targets on both dating & marriage desirability. Males (Ms) also preferred low levels of sexual permissiveness for committed partners, & rated permissive targets lower on marriage desirability. Ms, however, preferred higher levels of sexual permissivenss for low-commitment partners, & rated permissive targets higher on dating desirability. Results are consistent with both the double standard & the evolutionary perspective. 5 Tables, 37 References. Adapted from the source document.

Phelan, Shane (U New Mexico, Albuquerque 87131), **Social Constructionism, Sexuality and Politics,** *Women & Politics,* 1992, 12, 1, 73-78.

¶ A review article on books by: Edward Stein (Ed), *Forms of Desire Sexual Orientation and the Social Constructionist Controversy* (New York & London: Garland Publishing, 1990); Judith Butler, *Gender Trouble: Feminism and the Subversion of Identity* (New York & London: Routledge, 1990); & Celia Kitzinger, *The Social Construction of Lesbianism* (London & Newbury Park: Sage Publications, 1987 [see listings in IRPS No. 67]). Stein presents a range of essays illustrating the debate in sexuality research between social constructionists & essentialists. Kitzinger seeks to challenge social science perspectives, not only of lesbianism, but in general. Butler moves from questions that assume stable primary identities to those concerning the construction & critique of those identities. G. Castañeda

Phillimore, Peter (Centre Urban & Regional Development Studies U Newcastle-upon-Tyne, NE1 7RU England), **Unmarried Women of the Dhaula Dhar: Celibacy and Social Control in Northwest India,** UM *Journal of Anthropological Research,* 1991, 47, 3, fall, 331-350.

¶ Examined is the social status of *sādhin*–an unconventional but respectable alternative to the accepted female roles of wife & mother in Kangra, in northwest India. A *sādhin* typically remains in her tribal village, is allowed to acquire property, & in many contexts dresses & acts like a man. It is shown that the status of *sādhin* derives its legitimacy from the Hindu ascetic tradition, & that it is marriage & sexuality rather than worldly life that a *sādhin* renounces. The highly localized & comparatively recent historical emergence of *sādhin* is linked to the settlement in Kangra of Gaddis & neighboring Hindu groups who migrated from the mountainous interior over the last century, bringing with them different codes & conventions about women's conduct. It is concluded that the cultural creativity that transforms the negative associations of spinsterhood into the positive associations of a *sādhin* also entails the denial of sexuality to these individuals by classing them as asexual. 1 Table, 1 Figure, 33 References. Adapted from the source document.

Riccio, R. (Dept Geography San Diego State U, CA 92182), **Street Crime Strategies: The Changing Schemata of Streetwalkers,** UM *Environment and Behavior,* 1992, 24, 4, July, 555-570.

¶ In urban areas, streetwalkers have unique dealings with the environment, having to be aware of shifting stimuli & able to react accordingly to remain in business & avoid arrests. Here, data obtained via field observations, police arrest records, & interviews with 37 imprisoned streetwalkers in San Diego, Calif, are drawn on to investigate the transactions & schemata of streetwalkers in light of various sociocultural factors. Analysis indicates that while women of different races use similar street crime strategies, their schemata differ: black & white streetwalkers work at different times, & sometimes places, during the day. The interrelationships between behavior, space, & time are apparent & reveal the dynamic, multifaceted nature of criminal transactions. 4 Tables, 6 Figures, 14 References. Adapted from the source document.

Ritts, Vicki & Engbretson, Robert O. (U Missouri, Saint Louis 63121), **College Students Attitudes toward Adult Materials and the Legal Rental of Adult Videos,** UM *College Student Journal*, 1991, 25, 4, Dec, 440-450.

¶ Scale & questionnaire data are drawn on to explore attitudes toward adult material (pornography) & the legal rental of adult videos in a sample of 44 male (M) & 76 female (F) undergraduates at a midwestern US university. Analysis indicates that: 60% of the Ss favor legal rental of adult videos; an inverse relationship exists between authoritarianism & rental; & a higher % of Ms significantly favor legal rental. Significant gender differences are also revealed with regard to adult materials & attitudes toward First Amendment issues, rape, & the alleged moral breakdown of society. 4 Tables, 47 References. Adapted from the source document.

Rodgers, Joseph Lee, Harris, David F. & Vickers, Karen Bradley (c/o Harris–Dept Psychology U North Carolina, Chapel Hill 27599), **Seasonality of First Coitus in the United States,** UM *Social Biology*, 1992, 39, 1-2, spring-summer, 1-14.

¶ The seasonality of first coitus among adolescents & young adults in the US is investigated using questionnaire data from 1,405 adolescents in 4 junior high schools in Tallahassee, Fla, 1980-1982, & the National Longitudinal Survey of Youth (N = 4,000+ females, interviewed in 1979 & 1984/85). The summer vacation theory confirmed that adolescents are most likely to lose their virginity in June, especially, & in the summer months, in general; both biological & psychosocial explanations are explained. It is suggested that programs directed toward sex education, contraceptive use, & pregnancy prevention should be directed toward these seasonal patterns. 4 Figures, 21 References. L. Dorn

Rust, Paula C. (Dept Sociology Hamilton Coll, Clinton NY 13323), **The Politics of Sexual Identity: Sexual Attraction and Behavior among Lesbian and Bisexual Women,** UM *Social Problems*, 1992, 39, 4, Nov, 366-386.

¶ Questionnaire data obtained from 365 lesbian- & bisexual-identified women regarding their sexual identity histories, behaviors, & feelings of sexual attraction reveal aggregate differences between the experiences of lesbian & bisexual women, as well as a wide range of common sexual experience. It is argued that the tension that characterizes relations between lesbian- & bisexual-identified women is not the result of failure to recognize these similarities in experience. Instead, historical circumstances have led to a situation in which bisexuality poses a personal & political threat to lesbians & lesbian politics; the similarity between lesbians' & bisexuals' experiences aggravates rather than mitigates this threat. 4 Tables, 4 Figures, 59 References. Adapted from the source document.

Schmidt, Gunter, Klusmann, Dietrich & Zeitzschel, Uta (c/o Klusmann–Medizinische Klinik U Hamburg, D-2000 20 Federal Republic Germany), **Veränderungen der Jugendsexualität zwischen 1970 und 1990** (Changes in Adolescent Sexuality between 1970 and 1990), *Zeitschrift für Sexualforschung*, 1992, 5, 3, Sept, 191-218. (GER)

¶ Interview data obtained from samples of youth ages 16-17 in the Federal Republic of Germany in 1970 & 1990 (N = 602 & 415, respectively) are drawn on to examine changes in adolescent sexual attitudes & behaviors. Results indicate that the trend toward earlier sexual activity that began during the 1960s did not continue; behavior during the 1970s was essentially similar to that during the 1990s. Males (Ms) report being less controlled by sexual urges, & more inclined to link sex with love & steady relationships; females (Fs) exhibit a similar, but less pronounced, change in attitudes. Fs tend to take more initiative in heterosexual encounters than previously, but essential gender differences in sexual behavior have remained constant. Neither education nor the problem of acquired immune deficiency syndrome/human immunodeficiency virus appear to have altered sexual behavior. Results are discussed within the context of changing M-F relationships & contemporary gender issues. 18 Tables, 11 References. Adapted from the source document.

Schmidt, Kirsten W., Fouchard, Jan R., Krasnik, Allan, Zoffmann, Henrik, Jacobsen, Henrik L. & Kreiner, Svend (Dept Epidemiology Statens Seruminstit, Copenhagen Denmark), **Sexual Behaviour Related to Psycho-Social Factors in a Population of Danish Homosexual and Bisexual Men,** *Social Science and Medicine*, 1992, 34, 10, May, 1119-1127.

¶ In an investigation of the use of condoms in relation to HIV (human immunodeficiency virus) status in Danish homosexual & bisexual men, 3 categories of sexual practices were identified: safe sex, potentially safe sex, & unsafe sex. Anonymous questionnaires were enclosed in a gay pornographic magazine, distributed to male members of the Danish Gay & Lesbian Assoc, & enclosed in the Assoc's magazine. Of 2,058 respondents, 29.7% indicated that they had had unsafe sex (without a condom) in the last year. Multivariate analysis revealed an increase in unsafe sex with higher numbers of partners & lower ages. Results emphasize the need for further preventive efforts to reduce transmission of HIV. 3 Tables, 3 Figures, 1 Appendix. Adapted from the source document.

Stanley, Liz (U Manchester, M60 1QD England), **Romantic Friendship? Some Issues in Researching Lesbian History and Biography,** *Women's History Review*, 1992, 1, 2, June, 193-216.

¶ A critical discussion of the assumptions & consequences of the "spotlight" approach to historical biography, exemplified by a particular feminist conceptualization of women's friendships, from the late eighteenth to the early twentieth centuries, as "romantic friendship." The analysis examines a number of interpretive issues in understanding the dynamics of the friendship group of some militant women associated with Emily Wilding Davison in the Edwardian suffrage organization, the Women's Social & Political Union. The notion of romantic friendship in relation to Edith Lees Ellis, whose husband Havelock Ellis saw her friendships as lesbian, is explored, Havelock contending that a sexologist applied the term to condemn the friendships. More primary research on particular women's close relationships & the social context in which these were located, as opposed to premature theoretical generalization, is recommended. Adapted from the source document.

Strunin, Lee & Hingson, Ralph (School Public Health Boston U, MA 02215), **Alcohol, Drugs, and Adolescent Sexual Behavior,** *The International Journal of the Addictions*, 1992, 27, 2, Feb, 129-146.

¶ The relationship between adolescent alcohol & drug use & unprotected sexual intercourse is examined using data from a 1990 telephone survey of 1,152 youth ages 16-19 in Mass. The findings reveal that: 66% of the Ss reported having had sexual intercourse, of whom 64% had sex after drinking & 15% after other drug use; 49% were more likely to have sex if they & their partner had been drinking; 17% used condoms less often after drinking; & 32% would be more likely to have sex if they & their partner had used drugs, with 10% less likely to use condoms after drug use. It is concluded that the greatest risk for HIV (human immunodeficiency virus) infection, sexually transmitted diseases, & unwanted pregnancy is the likelihood of intercourse after consuming drugs or alcohol, not the decreased likelihood of condom use after substance use. 6 Tables, 56 References. Adapted from the source document.

93Z8446

Sundin, Jan (Dept Health & Society Linköping U, S-58183 Sweden), **Sinful Sex: Legal Prosecution of Extramarital Sex in Pre-**

Industrial Sweden, *Social Science History,* 1992, 16, 1, spring, 99-128.

¶ In seventeenth-century Sweden, as a concession to the Protestant state church, secular laws became more severe prohibiting extramarital sexual relations. Legal prosecution of unwanted sexual behavior also defined the limits of female roles during a period of increased responsibilities for women in the economic & legal sphere, necessitated by the uneven sex distribution caused by wars & excess male mortality. The most common type of these crimes was simple fornication, in practice proven by the pregnancy of an unmarried woman. Using birth registers, lists of fines, & court protocols of 2 cities & 2 countryside districts, case histories are used to analyze Swedish legislation & legal practice concerning "sinful sex" from 1600-1840. 5 Figures, 26 References. Tiefer, Leonore (Dept Urology Montefiore Medical Center, Bronx NY 10467), **Commentary on the Status of Sex Research: Feminism, Sexuality and Sexology,** *Journal of Psychology and Human Sexuality,* 1991, 4, 3, 5-42.
Introduction, 1-3.

¶ Following a biographical sketch by Carol Tavris in **Introduction to Dr. Leonore Tiefer's Commentary,** Tiefer discusses reasons for the lack of feminist influence on sexology, drawing on new theory & methodology from academic feminism. Reasons beyond unfamiliarity for feminism's minimal impact are explored, including the mistaken impression that sexology already is feminist, & active resistance within sexology to learning what feminist analysis has to offer. Consequences of the neglect of feminist perspectives in sexology are discussed, as well as what a sexology more informed by feminism might look like, what stages the scholarship might go through, & what methods & theoretical perspectives might become popular. 1 Table, 1 Appendix, 92 References. S. Millett

Uhlmann, Allon J. (Dept Prehistory & Anthropology Australian National U, Canberra ACT 2601), **A Critique of Leavitt's Review of Sociobiological Explanations of Incest Avoidance,** *American Anthropologist,* 1992, 94, 2, June, 446-448.
Reply, 448-450.

¶ Gregory C. Leavitt's criticisms of the sociobiological explanation of incest avoidance (see SA 40:1/92Y4082) are examined. Though Leavitt argues that recurrent inbreeding reduces genetic load & does not necessarily result in negative consequences for individuals, his analysis ignores pertinent information & issues, uses examples of questionable utility, & is not substantiated by empirical data. He suggests that factors other than sociobiological factors are involved in avoidance of inbreeding, but such arguments do not undermine the survival value of incest avoidance & do little to challenge sociobiological evidential claims or theoretical views. In **Inbreeding Fitness: A Reply to Uhlmann,** Leavitt (Gustavus Adolphus Coll, St. Peter, Minn) states that these criticisms result from poor understanding of his & others' work & dismissal of contradictory information as exceptional, & cites research suggesting that inbreeding does not reduce heterozygosity as much as thought; adaptation to the environment can occur without genetic changes, & environmental change is not so rapid as to warrant constant change in population genes. It is concluded that sociobiology's crucial assumption that inbreeding produces harmful effects is unfounded. 22 References. D. Generoli

Wilson, David, Zenda, Alwyn & Lavelle, Susu (Psychology Dept U Zimbabwe, Mount Pleasant Harare), **Predicting Zimbabwean Women's Ability to Tell Their Partners to Use Condoms,** *Journal of Social Psychology,* 1992, 132, 2, Apr, 261-263.

¶ The capacity of M. H. Becker's Health Belief Model ("The Health Belief Model and Personal Health Behaviour," *Health Education Monographs,* 1974, 2, 324-508) & M. Fishbein's & I. Ajzen's theory of reasoned action (*Belief, Attitude, Intention, and Behaviour: An Introduction to Theory and Research,* Reading, Mass: Addison-Wesley, 1975) to predict women's capacity to tell their partners to use condoms is examined through questionnaire data collected from 89 female first-year teacher trainees in Harare, Zimbabwe. Fishbein's & Ajzen's model was found to explain 47% of the variance in intended condom use. Attitude toward behavior was significantly related to intention to tell one's partner to use condoms, while subjective norms, perceived behavioral control, & perceived barriers demonstrated no significant association 11 References. 93Z8451

Arendell, Terry (U Wisconsin, Madison 53706), **After Divorce: Investigations into Father Absence,** *Gender & Society,* 1992, 6, 4, Dec, 562-586.

¶ Analysis of in-depth interviews with 75 divorced fathers in NY suggests that postdivorce paternal absence is more than a literal practice: it is also a perceived option & a standard of comparison. Father absence is a strategy of action, the objective of which is to control situations of conflict & tension & emotional states. The majority of Ss shared common explanations with regard to father absence, suggesting their participation in a "masculine discourse of divorce." A primary theme in this discourse is the rhetoric of rights. 47 References. Adapted from the source document.

Barnett, Rosalind C. & Marshall, Nancy L. (Center Research Women Wellesley Coll, MA 02181), **Worker and Mother Roles, Spillover Effects, and Psychological Distress,** *Women and Health,* 1992, 18, 2, 9-40.

¶ Using scale data from a disproportionately stratified random sample of 403 mothers in Mass ages 25-55 employed as nurses or social workers, addressed are whether: employed mothers are more distressed than working women without children, women's experiences at work & as parents affect experience of psychological distress, & a positive or negative spillover from one role to another contributes to psychological distress. Findings indicate that employed mothers are at no greater risk of psychological distress than are employed women who are not mothers. Results indicate that the quality of an employed mother's job has a direct effect on level of psychological distress, independent of the quality of the relationship with children. Having a positive relationship with children is associated with low levels of distress, independent of the quality of work role It is suggested that employed mothers seem to compartmentalize their subjective experiences in their job & parenting roles, providing alternative arenas in which to reduce psychological distress. 5 Tables, 3 Figures, 1 Appendix, 36 References. Adapted from the source document.

Barnett, Rosalind C., Marshall, Nancy L. & Pleck, Joseph H. (Center Research Women Wellesley Coll, MA 02181), **Adult Son-Parent Relationships and Their Associations with Sons' Psychological Distress,** *Journal of Family Issues,* 1992, 13, 4, Dec, 505-525.

¶ A random sample of 285 sons, ages 25-40, in the Boston, Mass, area, living in cohabitational relationships, completed scales & participated in interviews designed to assess the relationship between the quality of adult

sons' experiences in their current relationships with their mothers & fathers & sons' psychological distress. Results indicate that sons who reported a positive relationship with their mother or father also reported low psychological distress. The presence or absence of female siblings moderated the association between both the son-mother & son-father relationship quality & sons' distress. This association was also moderated by parents' age, &, among sons with fathers, by sons' education. 3 Tables, 2 Figures, 41 References. Adapted from the source document.

Benson, Mark J., Arditti, Joyce, Reguero de Atiles, Julia T. & Smith, Suzanne (Dept Family & Child Development Virginia Polytechnic Instit & State U, Blacksburg 24061-0416), **Intergenerational Transmission: Attributions in Relationships with Parents and Intimate Others,** *Journal of Family Issues*, 1992, 13, 4, Dec, 450-464.

¶ Scale data are used to explore the attributions of 141 young adults ages 18-23 about their relationships with their parents & intimate others, as well as their evaluations of the quality of these relationships. Findings indicate that higher relationship quality is related to attributions in ways consistent with attributional theory. Attributional differences between current & past relationships suggest relationship-sustaining vs relationship-terminating attributional patterns. Attributions about intimate relationships are also associated with attributions about relationships with parents, but findings suggest some refinements in attribution theory regarding close relationships. The value of exploring the intergenerational transmission of attributional patterns is discussed. 2 Tables, 1 Figure, 33 References. Adapted from the source document.

Bertrando, Paolo, Fiocco, Paola Maria, Foscarini, Patrizia, Palvarini, Rosa Meri & Pereira, Jacqueline (Dept Psychiatry U Milano, I-20122 Italy), **"Be Thin": The Cybernetics of Obesity,** *The Australian and New Zealand Journal of Family Therapy*, 1990, 11, 4, Dec, 202-207.

¶ A cybernetic perspective of obesity, which considers those aspects of eating behavior that are capable of creating differences in meaning, is explored It is contended that fatness is information, or construed difference as suggested by G. Bateson (*Mind and Nature: A Necessary Unit*, New York: E. P. Dutton, 1979), in which "fat" is considered in the context of the environment. Categories of messages that obesity may intend include a help-seeking pattern in which the individual strives for attention, & a defensive strategy by which obesity represents a hiding place & detachment. Two patterns of family interaction are proposed that correlate with these two modes of obesity. It is suggested that therapeutic intervention should aim at restraining the interactions that support the mode's premises. 23 References. Adapted from the source document.

Bleich, Christiane & Witte, Erich H. (Psychologisches Instit I U Hamburg, D-2000 13 Federal Republic Germany), **Zu Veränderungen in der Paarbeziehung bei Erwerbslosigkeit des Mannes** (On Changes in the Couple Relationship during Unemployment of the Male Partner), *Kölner Zeitschrift für Soziologie und Sozialpsychologie*, **1992, 44, 4, Dec, 731-746. (GER)**

¶ To determine how a male partner's unemployment affects the dynamics of the couple relationship, mail questionnaire & scale data were obtained from German couples (N = 108, ages 19-54) in which the man had been unemployed for periods of 3-60 months. Unemployment is shown to be a negative experience for the individual & for the couple as well. Analysis of scale data reveals a decline in adaptation & cohesion. Additionally, the complexity of several dimensions of the partnership was reduced. The self-assessment of relationship quality indicated a high stress level during the period of unemployment. 3 Tables, 58 References. Adapted from the source document.

93Z8459

Bryant, W. Keith & Wang, Yan (Dept Consumer Economics & Housing Cornell U, Ithaca NY 14850), **Time Together, Time Apart: An Analysis of Wives' Solitary Time and Shared Time with Spouses,** *Lifestyles*, 1990, 11, 1, spring, 89-119.

¶ Interview & diary data obtained 1977/78 from 2-child, 2-parent families in NY, La, Utah, & Wisc (total N = 633) are used to compare the time spouses spend together in household work activities, leisure activities, & eating vs time spent alone by wives in these same activities. Statistical analyses confirm the hypothesis that shared times in the 3 activities are charged with extra meaning when compared with wives' solitary time (WST) in the same activities: WST is negatively related to family income, & WST spent in household work & leisure activities is positively related to husband's price of time. Spouses' shared times in these activities rise & WST falls on weekends. 8 Tables, 27 References. Adapted from the source document.

Buehlman, Kim Therese, Gottman, John Mordechai & Katz, Lynn Fainsilber (c/o Gottman-Dept Psychology U Washington, Seattle 98195), **How a Couple Views Their Past Predicts Their Future: Predicting Divorce from an Oral History Interview,** *Journal of Family Psychology*, 1992, 5, 3-4, Mar-June, 295-318.

¶ An approach to the study of couples & families called family psychophysiology is described, characterized by: synchronized physiological & behavioral data; a multimethod, multiinformant measurement package; & assessment of prospective longitudinal change. Ss consisted of 56 families, recruited by newspaper advertisement, who participated in oral history interviews & marital laboratory sessions, which were repeated in a 3-year follow-up. Findings reveal that the oral history variables predicted divorce or marital stability with approximately 94% accuracy. The oral history variables also correlated with: Time 1 marital interaction in both problem solving & affect, the couple's physiological reactivity during marital interaction, & Time 1 & Time 2 marital satisfaction. It is concluded that the success of the method is due in part to careful attention to psychometrics, emphasis on quantitative observational techniques, use of sophisticated statistical methods, & a lifespan developmental approach to family life. 7 Tables, 1 Appendix, 37 References. Adapted from the source document.

93Z8461

Carver, Margaret D. & Jones, Warren H. (c/o Jones-Dept Psychology U Tennessee, Knoxville 37996), **The Family Satisfaction Scale,** *Social Behavior and Personality*, 1992, 20, 2, 71-83.

¶ Recounted are the development & empirical testing of the Family Satisfaction Scale (FSS), using samples of 675 college students & 165 adults recruited from community groups. Results indicated that a single factor underlies responses to FSS items; a revised 20-item version of the FSS yielded acceptable estimates of internal & temporal stability. Subsequent analyses indicated that FSS scores were related to various measures of family attitudes (eg, cohesion, task acceptance), as well as to current interpersonal functioning & attitudes (eg, loneliness, social support, & marital satisfaction), supporting the scale's validity. 4 Tables, 17 References. Adapted from the source document.

Charles, Maria & Höpflinger, François (Dept Sociology Stanford U, CA 94305), **Gender, Culture and the Division of Household Labor: A Replication of U.S. Studies for the Case of Switzerland,** *Journal of Comparative Family Studies*, 1992, 23, 3, autumn, 375-387.

¶ Most industrial market economies have seen a steady rise in the number of occupationally active women, even those with young children. However, the growth of women's occupational role has not been accompanied by a commensurate reduction in their household duties. Although there are market substitutions for some services traditionally provided by housewives, their domestic work continues to be very time consuming, es-

pecially for those with young children. A review of US research shows that the overwhelming majority of domestic work is performed by women, regardless of the extent of their occupational demands. A comparative examination of 622 Swiss couples, based on 1980 interviews, shows a similar situation. 3 Tables, 44 References. Adapted from the source document.

Cohn, Deborah A., Silver, Daniel H., Cowan, Carolyn P., Cowan, Philip A. & Pearson, Jane (Dept Psychology U Virginia, Charlottesville 22903-2477), **Working Models of Childhood Attachment and Couple Relationships,** *Journal of Family Issues,* 1992, 13, 4, Dec, 432-449.

¶ Previously documented linkages between adults' working models of childhood attachment relationships & the quality of parent-child relationships are explored in the case of adult-adult relationships, drawing on interview, scale, & observational data from 27 married couples & their preschool children. Though self-reported marital satisfaction is unrelated to adult attachment classifications for both husbands & wives, statistically significant differences are evident between relationships involving secure & insecure husbands: relationships in which the husband is secure are more positive & less conflictual. This finding suggests that a secure partner may buffer the maritally negative effects of insecure attachment, although too few couples involving a secure wife & an insecure husband were interviewed to determine if the effects are gender-specific. 1 Table, 1 Figure, 37 References. Adapted from the source document.

93Z8465

Dasgupta, Sathi (Narcotics & Drug Research Inc, 11 Beach St New York NY 10013), **Conjugal Roles and Social Network in Indian Immigrant Families: Bott Revisited,** UM *Journal of Comparative Family Studies,* 1992, 23, 3, autumn, 465-480.

¶ Elizabeth Bott's in-depth study of 20 London (England) families hypothesized that conjugal role segregation within a family is related to connectedness of social networks in the environment (*Family and Social Networks,* London: Tavistock, 1971). Bott's hypothesis is reexamined here in the context of similar experiences encountered by Indian immigrant families in the US, based on in-depth interviews with 25 couples who settled in the suburbs of 2 major northeastern US cities. Findings show that the external network of the Indian immigrants does not include kin members, but the lack of kin is not associated with a joint family organization for Indian immigrants as Bott hypothesized. Their family organization displays a combination of division of conjugal responsibility, joint pursuit of leisure time activities, & jurisdictional division in the areas of decision making, with the tasks performed by each spouse complementary to those of the other. The development of complementary organization is attributed to: absence of kin network, which provides long-term help; the class situation of the families; & lack of affective ties with the network structure. The support system provided by the network, rather than network density, is the crucial variable explaining conjugal role segregation in Indian immigrant families. 4 Tables, 15 References. Douglas, Harriet (School Social Work U Maryland, Baltimore 21201), **Assessing Violent Couples,** *Families in Society,* 1991, 72, 9, Nov, 525-535.

¶ An empowerment-based approach is used to develop a model for assessing couple violence that involves identifying problems to solve, & seeking the strengths of both partners & the relationship, instead of reinforcing the power imbalance between abuser & abused. Issues such as detection of violence, emotional dependency, shifting power balance, external stressors, & factors to consider in prognosis are addressed. Suggestions for what to look for & how to find it, with examples, are given for assessing the cycle of violence, reciprocal couple interactions, functions of violence, & violence across generations. Agencies are challenged to expand focus & services to enable accurate assessment of the stages of violence in a couple's relationship, help prevent escalation to the crisis stage, & assist partners in preservation of a meaningful relationship. 1 Appendix, 16 References. Douthitt, Robin A., Zick, Cathleen D. & McCullough, Jane (Family Resources & Consumer Science U Wisconsin, Madison 53706), **The Role of Economic & Demographic Factors in Explaining Time-Use of Single and Married Mothers,** *Lifestyles,* 1990, 11, 1, spring, 23-51.

¶ A system of time allocation equations based on household production theory is estimated for both married & single mothers, drawing on time-use & panel data collected from urban & rural, single- & 2-parent, 2-child families in Calif, Utah, & nationwide (total Ns = 291,314 & 5,000 households, respectively). Results indicate that married & single mothers make different decisions about how to allocate their time to household production, child care, leisure, & paid work. Specifically, they respond differently to a change in their shadow wage rates, unearned income, paid child care, & ages of children; possible explanations for these differences are considered. 5 Tables, 39 References. Edleson, Jeffrey L. & Frank, Marilyn D. (School Social Work U Minnesota, Minneapolis 55455), **Rural Interventions in Woman Battering: One State's Strategies,** *Families in Society,* 1991, 72, 9, Nov, 543-551.

¶ Minn's experience in developing a statewide network of battered women's programs is presented with focus on results of a survey of 40 woman battering interventions in small cities, towns, rural areas, & reservations. Key persons in 31 programs responded to mailed questionnaires constructed from telephone interviews (N = 21) & a national survey of battered women's programs. Analysis of populations served & program phi-

losophies, activities, & structures identifies successful strategies: take the time necessary to determine the best way to serve battered women in a particular community; maintain high visibility; develop cooperative interagency relationships; & expect attitude changes to be slow. Minn's experience in gaining legislative & mutual support can inform rural intervention programs in other states. 3 Tables, 17 References. Adapted from the source document. Eggebeen, David J. (Population Research Instit Pennsylvania State U, University Park 16802), **Changes in Sibling Configurations for American Preschool Children,** UM *Social Biology,* 1992, 39, 1-2, spring-summer, 27-44.

¶ In an examination of the effect on a child's development of number & sex of siblings, birth order, & birth spacing, censuses of preschool-aged children from 5 successive birth cohorts were studied using US Census Public Use Microdata Sample data, 1940-1980. Results show a marked decline in the number of siblings & in the proportion of children experiencing an opposite-sex older sibling. It is concluded that these trends must be taken seriously as possible mechanisms of social change in society. 6 Tables, 2 Figures, 46 References. L. Eisenhandler, Susan A. (Dept Sociology U Connecticut, Waterbury 06710), **Lifelong Roles and Cameo Appearances: Elderly Parents and Relationships with Adult Children,** *Journal of Aging Studies,* 1992, 6, 3, fall, 243-257.

¶ Although parents may accept their child as an adult, expectations & ingrained patterns of child-parent/parent-child interaction lead the parent to make cameo appearances in their adult children's lives & vice versa. Here, elderly parents' understanding of ties with their adult children & its effects on elderly self-identity are explored, based on qualitative studies using open-ended interviews with a community of elderly parents (total N = 57, age 60+). Content analysis of the interview data reveals that lifelong parental roles (especially the mothering role) centered on reworking, or straightening out relationships with adult children, accomplished through visits & advice giving/receiving. The parents' cameo appearance was prompted by a substantial change in their lives, crisis in the child's life, or the renewal of unresolved parent-child conflicts. 15 References. Hanks, Roma S. & Settles, Barbara H. (Dept Individual & Family Studies U Delaware, Newark 19716), **Theoretical Questions and Ethical Issues in a Family Caregiving Relationship,** *The Journal of Applied Social Sciences,* 1988-1989, 13, 1, fall-winter, 9-39.

¶ Theoretical & ethical issues relating to family caregiving are examined via an analysis of the case of Roswell Gilbert, a 76-year old retired engineer who shot & killed his wife of 51 years, a victim of Alzheimer's disease & osteoporosis, based on an in-depth interview with the Gilberts' daughter, transcriptions of testimony from Gilbert's trial, & media reports. A neo-Kantian justification for Gilbert's action is presented, but then countered with arguments from a feminist perspective. The rights of the family in making decisions that involve such potentially illegal acts as euthanasia are explored using an extension of Robert Nozick's economic entitlement theory (eg, see *Philosophical Explanations,* Cambridge, Mass: Harvard U Press, 1981). A symbolic interaction perspective is used as a bridge between family & ethical theory in the analysis. Adapted from the source document. Harvey, David M., Curry, Cynthia J. & Bray, James H. (c/o Bray-Dept Family Medicine Baylor Coll Medicine, Houston TX

77005), **Individuation and Intimacy in Intergenerational Relationships and Health: Patterns Across Two Generations,** *Journal of Family Psychology,* 1991, 5, 2, Dec, 204-236.

¶ The intergenerational theory of personal development within the family system is evaluated using causal modeling & structural equation analysis. The theory hypothesizes that individual processes of individuation & intimacy directly influence the physical & psychological health of family members, & that these patterns are transmitted from one generation to the next. A survey of middle-age adults (N = 204 fathers & 250 mothers) & their college-age children (N = 511 undergraduates) reveals that parental patterns of individuation & intimacy significantly predict the parents' health & emotional distress & influence patterns among children. Although mother-child patterns differ in important ways from father-child patterns, the intergenerational transmission hypothesis is supported. Implications for theory & clinical practice are explored. 8 Tables, 3 Figures, 38 References. Adapted from the source document.

Hiatt, Ann Reniger & Godwin, Deborah D. (Coll Education & Allied Professions U North Carolina, Charlotte 28223), **Use of Time and Preferences for Time Allocation among Urban, Employed, Married Women,** *Lifestyles,* 1990, 11, 2, summer, 161-181.

¶ The relationship between preferences for household production time, employment time, & leisure, & actual time use, was examined in a random sample of 235 employed, married women via questionnaires in which Ss estimated their time use on an average weekday & weekend day in 13 activities & indicated their preferences for time in those activities. Results of hierarchical multiple regression procedures suggest that weekday employment time is not related to preferences for more or less time in household production; however, wives allocating more time to employment want to spend less time at that & more in leisure. Weekend employment time is related to preferences for more time in leisure, child care, & other household work. Time spent performing household work is not related to preferences for more or less time in any activity except the desire for more leisure time on weekends. 2 Tables, 51 References. Adapted from the source document.

Hiew, Chok C. (U New Brunswick, Fredericton E3B 5A3), **Separated by Their Work: Families with Fathers Living Apart,** UM *Environment and Behavior,* 1992, 24, 2, Mar, 206-225.

¶ A cross-cultural analysis of work & family life as overlapping domains, focusing on the impact of father absence (FA) on Japanese civilian *tanshinfunin* families, in which fathers are required by work to live away from their families for prolonged periods, & 66 Canadian military families. Data obtained via questionnaires & scales from mothers & teachers, & interviews with their elementary school children, in Canada, & results of previous empirical research in Japan, indicate that FA that produced a loss of perceived social support by wives was negatively correlated with children's behavioral adjustment & academic performance. Children reported the most stress during actual FA, & most frequently used emotion-focused coping methods. Children who also used more social support as a means of coping with FA showed less acting-out behaviors in the classroom. Implications of work-related FA as mediated by family coping resources & cultural factors are discussed. 4 Tables, 2 Figures, 29 References. Adapted from the source document.

Higgins, Christopher A. & Duxbury, Linda E. (School Business Administration U Western Ontario, London N6A 3K7), **Work-Family Conflict: A Comparison of Dual-Career and Traditional-Career Men,** *Journal of Organizational Behavior,* 1992, 13, 4, July, 389-411.

¶ Differences between the antecedents & consequences of work-family conflict for dual-career men (those with a wife also employed in a managerial or professional job) & traditional-career men (those whose wife is a homemaker) were investigated. A national sample of 136 dual-career (DC) males (Ms) & 137 traditional-career (TC) Ms completed standard scales to evaluate quality of work & family life, life satisfaction, work & family conflict, & work-family conflict. A partial least squares technique (LISREL) supported a stronger positive relationship between work & family conflict for DC than for TC Ms. A stronger positive relationship for DC Ms also held between work & work-family conflict, but not between family conflict & work-family conflict, indicating that DC Ms experienced greater work-family conflict because of work, not family, conflict. Overall, results indicate that there may be less support in the workplace for work-family conflict for Ms in DC families. 2 Tables, 1 Figure, 1 Appendix, 93 References. M. Pflum

Höpflinger, François (Soziologisches Instit U Zürich, CH-8057 Switzerland), **Zukunft der Familie–ein Plädoyer für einen neuen Generationenvertrag** (The Future of the Family–A Plea for a New Generational Contract), *Soziologische Revue,* 1992, 15, 4, Oct, 337-340. (GER)

¶ A review essay on a book by Franz-Xaver Kaufmann, *Zukunft der Familie. Stabilität, Stabilitätsrisiken und Wandel der familialen Lebensformen sowie ihre gesellschaftlichen und politischen Bedingungen* ([The Future of the Family: Stability, Stability Rises and Changes of Familial Life Forms as Well as Social and Political Conditions] Munich: C. H. Beck, 1990 [see listing in IRPS No. 67]). Kaufmann's assessment of nuclear family structure is essentially pessimistic, although he does not accept a simplistic linear model of the family's demise. The value of the work lies in its illustration of ambivalences present in the contemporary development of family forms. Several worthy suggestions concerning the development of social & family policy are also proffered Although Kaufmann recognizes that the family is a private entity, he identifies its social & economic contributions that benefit everyone. M Meeks

Jaffe, Eliezer David (School Social Welfare Hebrew U Jerusalem, Mount Scopus IL-91905 Israel), **Helper Preferences of Couples from Ethnically Mixed and Homogeneous Marriages,** UM *Journal of Comparative Family Studies,* 1992, 23, 3, autumn, 455-464.

¶ A projective test based on examination of passport photographs was used to explore preferences for social workers (SWs) from Ashkenazi (Western) & Sephardi (Eastern) backgrounds by Israeli married couples (total N = 90) from homogeneous or mixed ethnic backgrounds. Findings showed that couples from mixed marriages preferred Western SWs significantly more than did the ethnically homogeneous groups of couples. Of Sephardi couples, 60% preferred Ashkenazi SWs, while 82% of the couples from mixed marriages preferred Ashkenazi SWs. Findings also showed that age, sex, length of marriage, & educational background influenced ethnic preferences of SWs. It is concluded that ethnic background is an accurate, although relative, predictor of differential preferences. Hypotheses proposed to explain these findings suggest that mixed marriages may be constructed, at least partially, from cognitive motivation for Western family style, or that one or both spouses have weak preferences, low ethnocentrism, & high acceptance of others. 5 Tables, 22 References. Johnson, Michael P., Huston, Ted L., Gaines, Stanley O., Jr. & Levinger, George (Dept Sociology Pennsylvania State U, University Park 16802), **Patterns of Married Life among Young Couples,** *Journal of Social and Personal Relationships,* 1992, 9, 3, Aug, 343-364.

¶ The conceptual typology of marriage offered by J. Bernard ("The Adjustments of Married Mates," in Christensen, H. T. [Ed], *Handbook of Marriage and the Family,* Chicago, Ill: Rand McNally, 1964, 675-739) is used to assess the structure of contemporary US marriages, drawing on data collected from 100 rural couples interviewed in 1981 as newlyweds & then yearly through 1983. Couples are grouped according to their allocation of time to work vs leisure, examining gender asymmetry in labor force production, sex-typing of household work, gender differentiation in leisure time spent with family & friends, & amount of time the couple spends together. Cluster analysis distinguishes 4 marriage types–symmetrical (42%), parallel (27%), differentiated companionate (21%), & role-reversed (10%)–that differ in their sex-role attitudes, but not in marital satisfaction. 4 Tables, 27 References. Key, Rosemary J. & Sanik, Margaret Mietus (Dept Consumer Economics & Housing Cornell U, Ithaca NY 14850), **The Effect of Homemaker's Employment Status on Children's Time Allocation in Single- and Two-Parent Families,** *Lifestyles,* 1990, 11, 1, spring, 71-88.

¶ Following a brief review of evidence from the literature on adolescents' family roles when their mothers are employed, the effect of maternal employment status on children's time allocation in 1- vs 2-parent families is compared, drawing on time-use data from 291 families with children ages 10+ in Calif. Particular focus is on the impact of living in a family in which the mother is employed professionally, employed nonprofessionally, or not employed outside the home on older child's time allocated to household/school work & recreation. Controlling for age & sex of older children & constraints on their time, results indicate that the effect of maternal employment status on older child's time allocation does not differ by family structure; neither does maternal employment status explain a significant amount of variance in children's time allocation. 5 Tables, 35 References. Adapted from the source document.

Kiernan, Kathleen E. (Family Policy Studies Centre, London NW1 6XE England), **The Impact of Family Disruption in Childhood on Transitions Made in Young Adult Life,** *Population Studies,* 1992, 46, 2, July, 213-234.

¶ Differences in the timing of educational, occupational, & demographic transitions for children who grew up with both natural parents vs those who experienced the dissolution of their parents' marriage through death or divorce, & whose remaining parent did or did not remarry, are investigated, using life history data from a 1958 birth cohort of approximately 8,000 youth in GB surveyed at ages 16 & 23. Results indicate that children of divorce were no more likely than those brought up with both natural parents to make these transitions at an early age; the single exception was that young people from stepfamilies formed after death or divorce were most likely to leave home early, & for reasons of friction. The effects of parents' marital disruption differed between the sexes: young men from stepfamilies were more likely to form partnerships & become fathers at an earlier age than their contemporaries from intact or lone-mother families. For young women from both step- & lone-parent families, the propensity to form unions in their teens, to have a child at an early age, & to bear a child outside marriage was higher than for those from intact families. 11 Tables. Kulis, Stephen S. (Dept Sociology Arizona State U, Tempe 85287-2101), **Social Class and the Locus of Reciprocity in Relationships with Adult Children,** *Journal of Family Issues,* 1992, 13, 4, Dec, 482-504.

¶ In an examination of the relationship between patterns of reciprocal & asymmetrical intergenerational aid & parents' ratings of the quality of their relationships with adult children, two questions are addressed: (1) whether there is an identifiable pattern of specific substantive exchanges that contributes most to high relationship ratings, & whether this distinctive locus of reciprocity differs in blue- vs white-collar families. Data from the 1987/88 National Survey of Families & Households for a subsample of 4,477 US parents with adult children are used to test competing models of reciprocal & asymmetrical exchanges between parent & child. Findings indicate that white-collar families are somewhat more involved in all types of exchanges, & that the link between reciprocity & positive relationship ratings is stronger in these families than among blue-collar families. Asymmetrical instrumental assistance from parent to child is associated with lower ratings among blue-collar families, & financial assistance from parent to child appears to lower relationship ratings in white-collar families. 3 Tables, 2 Figures, 58 References. Kytir, Josef, Formen der Familiengründung in Wien in den Jahren 1984 bis 1989 (Family Formation in Vienna 1984-1989), *Österreichische Zeitschrift für Soziologie,* 1992, 17, 3, 49-63. (GER)

¶ To examine the changing dynamics of the formation of new families in Vienna, Austria, official data on first-born children (N = 48,000) delivered 1984-1989 were analyzed. Findings show that: 23% of mothers were not married; 23% had married less than 7 months before giving birth, 4% 7-9 months earlier, 16% about a year before the birth, 17% within the previous 3 years, & 7% 5+ years earlier. A plurality of family lifestyles can be seen in the departure from the pre-1960 pattern of marriage followed by childbirth the following year; many women are delaying childbirth. This plurality is more evident among better educated women. 5 Tables, 3 Figures, 15 References. M. Meeks

Lakshmanasamy, T. (Dept Econometrics U Madras, 600005 India), **The Family, Risk and Self Insurance: An Application of Portfolio Selection Model,** *Indian Journal of Social Science,* 1991, 4, 4, Oct-Dec, 567-589.

¶ Following a review of the literature on family security, an attempt is made to analyze the role of family as a risk management institution in low-income settings. Faced with the risk of not being able to maintain a

steady income, families diversify their portfolios in various social, economic, & demographic institutions. This strategy operates mainly through household consumption & production relations, largely facilitated by inter- & intrahousehold relationships. Family insurance becomes necessary when market insurance is weak or absent. A family portfolio selection model is advanced, & it is shown that family portfolio investment strategies are efficient for risk diversification & income smoothing. In fact, family formation & household structure can themselves be seen as grounded in risk management strategies. 3 Figures, 59 References. Levitt, Mary J., Guacci, Nathalie & Weber, Ruth A. (Dept Psychology Florida International U, North Miami 33181), **Intergenerational Support, Relationship Quality, and Well-Being: A Bicultural Analysis,** *Journal of Family Issues,* 1992, 13, 4, Dec, 465-481.

¶ Questionnaire data are used to explore exchanges of intergenerational support in a southeastern US metropolitan bicultural (Anglo/European-American & Latin American) sample of young-adult women, their mothers, & their maternal grandmothers (total N = 159). Analysis reveals that support exchanges were imbalanced across generations, with middle-generation women providing more support to mothers & daughters than they received. Support & relationship quality were linked for younger mother-daughter dyads, but perceptions of older women regarding relations with daughters were positively biased & not tied significantly to support exchange. Intergenerational relationship quality was associated with well-being for each generation. The cross-cultural consistency of these results suggests that they represent more general patterns of intergenerational relations. 5 Tables, 1 Figure, 29 References. Adapted from the source document. Liao, Callian & Heaton, Tim B. (PO Box 12654, San Diego CA 92112), **Divorce Trends and Differentials in China,** UM *Journal of Comparative Family Studies,* 1992, 23, 3, autumn, 413-429.

¶ Traditionally, divorce in China has been rare, due to strong cultural norms & social pressures. Since 1950, however, new marriage laws & social change have altered the nature of family life. Divorce differentials are examined using data from the 1985 China In-Depth Fertility Survey. Findings show that divorce is more common among urban residents, those with more education, those who are still young, & those whose marriages are arranged. After other variables are controlled, work status & time period have little impact on divorce, which remains an unusual occurrence, despite important sociodemographic differentials. 5 Tables, 42 References. Little, J. I. (Dept History Simon Fraser U, Burnaby British Columbia V5A 1S6), **Ethnicity, Family Structure, and Seasonal Labor Strategies on Quebec's Appalachian Frontier, 1852-1881,** UM *Journal of Family History,* 1992, 17, 3, summer, 289-302.

¶ Manuscript census data for the township of Winslow in Quebec are drawn on to explore the economic role of the Highland Scot & French-Canadian family during the first three decades of settlement, 1852-1881. Analysis indicates that while families in both groups depended on seasonal wages earned outside the district, there were important differences in their survival strategies that were reflected in the composition of their families. The contrasting composition & economic role of the family in each group were in turn a reflection of two disparate cultures. Rather than being abandoned under the pressure of frontier conditions, presettlement values & traditions enabled each group to adapt in a unique way to the harsh environment of the upper Saint Francis district. 5 Tables, 3 Figures, 36 References. Mauldon, Jane (Graduate School Public Policy U California, Berkeley 94720), **Children's Risks of Experiencing Divorce and Remarriage: Do Disabled Children Destabilize Marriages?,** *Population Studies,* 1992, 46, 2, July, 349-362.

¶ An exploration of the effect of a child's disability or serious chronic illness on: (1) the risk of the parents' divorcing before the child reaches the age of 11, & (2) the mother's chances of remarriage. Data from the 1981 Child Health Supplement to the National Health Interview Survey, which provided information on 10,000+ children, indicate that divorce is significantly more common among the parents of disabled or sickly children than among those of healthy children; these disruptive effects are even stronger when children are ages 6-9 than when they are younger. It is hypothesized that divorce becomes a viable option for some parents once a sickly child has started to spend part of the day away from home, in school. In contrast, a child's health status does not predict the mother's waiting time to remarriage. A range of potentially confounding demographic factors are controlled in the models, & their effects on children's chances of experiencing parental divorce are as expected. 4 Tables. McQuillan, Kevin (U Western Ontario, London N6A 3K7), **Falling Behind: The Income of Lone-Mother Families, 1970-1985,** UM *La Revue Canadienne de Sociologie et d'Anthropologie/The Canadian Review of Sociology and Anthropology,* 1992, 29, 4, Nov, 511-523.

¶ The Public Use Microfiles of the 1971 & 1986 Canadian censuses are

analyzed to investigate the economic well-being of lone-mother families. Results indicate that despite a 16% increase in the real income of such families, the income gap between lone-mother & two-parent families widened appreciably over this period. Although real wages for both husbands & lone mothers rose slowly, a sharp increase in the labor force participation rate of married women allowed two-parent families to increase their total family income significantly. By contrast, demographic changes among lone-mother families limited the increase in total family earnings & slowed the rise of family income. 4 Tables, 20 References. Možný, Ivo & Rabušic, Ladislav (Dept Sociology/Social Work/Social Policy Masaryk U, CS-66088 Brno Czechoslovakia (e-mail: rabu@/lvt.phil.muni.cs.bitnet)), **Unmarried Cohabitation in Czechoslovakia,** *Sociologický Časopis,* 1992, 28, special issue, Aug, 107-117.

¶ The prevalence of unmarried cohabitation in Czechoslovakia is examined through a survey of all partners applying for marriage licenses in Brno in 1985 & 1990 (N = 1,562 & 1,384, respectively). Results show that 31% & 37% of couples entering their first marriage, & 73% & 77% of those entering a second or third marriage, lived together in 1985 & 1990, respectively. Czechoslovakian cohabitation did not follow the Scandinavian style of single persons not intending to marry, but was overwhelmingly oriented to the goal of marriage. Cohabitation is discussed as stemming from the merging of mechanic & organic solidarity, increased life opportunities in Czechoslovakia, & housing availability. 3 Tables, 31 References. Noller, Patricia, Seth-Smith, Mary, Bouma, Ruth & Schweitzer, Robert (Dept Psychology U Queensland, 4072 Australia), **Parent and Adolescent Perceptions of Family Functioning: A Comparison of Clinic and Non-Clinic Families,** *Journal of Adolescence,* 1992, 15, 2, June, 101-114.

¶ Differences in parents' & adolescents' perceptions of family functioning were investigated in 2 studies involving samples of youth ages 12-16 (total N = 73) referred for behavior problems to a clinic in Brisbane, Australia, matched with 63 nonclinic adolescents, all of whom completed self-descriptive questionnaires & a family functioning scale. Mothers in the second sample were also queried using the Child Behavior Checklist & the same family scales. With the Study 1 sample, MANOVAs showed no main or interactive effects of sex or group on adolescents' perceptions of family functioning, though scores on this scale correlated with self-concept. Both groups rated their family functioning negatively, but self-concepts in the nonclinic adolescents were higher than for the clinic adolescents. MANOVAs of data from Study 2 showed that clinic adolescents & their mothers both rated the family low in intimacy, high in conflict, & controlled in parenting style. Nonclinic adolescents saw their families as less intimate & more conflictual than did their mothers, supporting a generational stake hypothesis. Results suggest that once adolescent behavior reaches a critical negative point, parents give up their positive views of family functioning. 4 Tables, 25 References. Okonjo, Kamene (Dept Sociology & Anthropology U Nigeria, Nsukka), **Aspects of Continuity and Change in Mate-Selection among the Igbo West of the River Niger,** UM *Journal of Comparative Family Studies,* 1992, 23, 3, autumn, 339-360.

¶ Trends in mate selection & marriage in Third & First world situations reflect the continuity & change in the institution of the family. In the social sciences, it is now understood that marriage is a social phenomenon calculated to legitimize the paternity of children. Thus, definitions of marriage as a socially legitimate sexual union, based on sexual relations as a condition of marriage, & assuming the existence of a marriage contract that spells out reciprocal rights & obligations between spouses & their future children, are not fully satisfactory. More adequate definitions are outlined based on field data from the Igbo west of the Niger River, Nigeria. 5 Tables, 1 Figure, 20 References. Adapted from the source document.

Oyserman, Daphna, Benbenishty, Rami & Ben-Rabi, Dalia (Merrill-Palmer Instit, 71-A East Ferry Detroit MI 48202), **Characteristics of Children and Their Families at Entry into Foster Care,** *Child Psychiatry & Human Development*, 1992, 22, 3, spring, 199-211.

¶ File data for a sample of 800 children in the Israeli foster care system are used to evaluate child & family characteristics. Following a description of child- & parent-based problems identified at the time of placement, as well as the reasons for entry into care, differences in family constellations are discussed. Findings indicate that the vast majority of children entered care for parent-based (particularly mother-based) problems rather than child-based problems. Reasons for entry were likely to be multiple, including child neglect & financial problems. When at least 1 parent was deceased, children entered foster care at a later age & with fewer problems than when both parents were alive at entry into care. Families with parents that were living together at the time of placement appeared to be the most problematic. Implications for service planners & future research are discussed. 4 Tables, 17 References. Adapted from the source document.

Penn, Peggy, Feed-Forward: Future Questions, Future Maps, UM *Child Welfare*, 1992, 71, 1, Jan-Feb, 19-35.

Introduction, 3-17.

¶ In **Accepting Parental Responsibility: "Future Questioning" as a Means to Avoid Foster Home Placement of Children**, George D. MacDonald describes the application of Peggy Penn's technique of "future questioning" in working with abdicating parents who resort to foster home placement of children with behavioral problems. The procedure allows family members to relate their present lives to future lives together using alternate scenarios, in a series of four preplacement planning sessions. Two specific cases illustrate the technique, based on work done by the Child & Family Services of Central Manitoba, Carman, with 21 potential abdicating parental couples. Of the 17 who underwent the preplacement sessions, unnecessary placements were avoided in 12 cases. The text of Penn's article is then reprinted (originally appearing in *Family Process*, 1985, 3, Sept, 299-310), presenting the "feed-forward" technique in which families consider various alternatives to their problems. The usefulness of positive connotation, learning to learn, alternative solutions, future mapping of changes, & general & developmental premises are discussed, & illustrated with specific cases. 12 References. Pett, Marjorie A., Lang, Nancy & Gander, Anita (Coll Nursing U Utah, Salt Lake City 84112), **Late-Life Divorce: Its Impact on Family Rituals**, *Journal of Family Issues*, 1992, 13, 4, Dec, 526-552.

¶ Data collected via semistructured interviews & mail questionnaire are drawn on to investigate the perceived changes in specific family celebrations, traditions, important life cycle events, & day-to-day family contact that occurred for a group of 115 adult children in Salt Lake City, Utah, whose parents had divorced after a long-term marriage. A strong positive correlation was found between perceived disruptiveness of the parental divorce & changes in family rituals, particularly at Thanksgiving & Christmas. The role of women as kinkeepers, sibling differences, & the implications of evolving family ritual activities for theory development, research, assessment, & intervention are explored. 4 Tables, 39 References. Adapted from the source document.

Raviv, Amiram, Maddy-Weitzman, Edie & Raviv, Alona (Dept Psychology Tel-Aviv U, Ramat-Aviv IL-69978 Israel), **Parents of Adolescents: Help-Seeking Intentions as a Function of Help Sources and Parenting Issues**, *Journal of Adolescence*, 1992, 15, 2, June, 115-135.

¶ Help-seeking by parents relative to a variety of problems with their adolescents was investigated, drawing on questionnaire data from 119 mothers & 68 fathers of adolescents ages 16-17 near Tel-Aviv, Israel. Repeated measures ANOVA yielded main effects for issue & support source, as well as a significant interaction effect. Parents indicated that they would first seek help from their spouse, regardless of the issue, but would seek professional help on particular issues related to the source's expertise. Fathers were more inclined to seek help from teachers & counselors, & more highly educated parents seek psychologists' help more than those with less education. Fathers would seek help more than mothers on inculcating values, sex, mood, & independence issues. Parents were more self-confident on the issues of values & communication, & least self-confident on the issues of social problems & moodiness. 3 Tables, 5 Figures, 54 References. Adapted with permission of Academic Press.

Rose, Madeleine Kornfein (California State U, Long Beach 90840-0902), **Elective Single Mothers and Their Children: The Missing Fathers**, *Child & Adolescent Social Work Journal*, 1992, 9, 1, Feb, 21-33.

¶ Seventeen single adult women who intentionally became mothers–elective single mothers–were interviewed in Los Angeles, Calif, during their pregnancy & until the child was age 6. These mothers remained unmarried throughout the study, living in father-absent households. Three patterns of absent-father roles emerged: 10 children had "ghost" fathers whom they had never met & had little information about; 4 children had "visitor" fathers whom they saw approximately once a year; & 3 children had "auxiliary parent" fathers who behaved similarly to a noncustodial parent. More active fathers had generally known the mother for 6+ months before the pregnancy. Most mothers reported that their children were quite accepting of the father's absence & expressed little curiosity about him, perhaps in response to cues of the mother's discomfort with the topic. Psychological testing at age 6 showed that most of the children may need special support from social workers since they may be dealing only with a father in their fantasies. 3 Tables, 16 References. Rossi, Peter H. (Social & Demographic Research Instit U Massachusetts, Amherst 01003), **Assessing Family Preservation Programs**, *Children and Youth Services Review*, 1992, 14, 1-2, 77-97.

¶ A review of evaluations of family preservation programs indicates that while most used randomized experiments or close equivalents, & were carefully conducted, they did not provide definitive findings concerning effectiveness. Shortcomings include: (1) the numbers of Ss were too small to detect effects reliably; (2) the programs were not given enough time to be fully operational before evaluation; (3) the major criterion of success, placement avoidance, was arguably insufficient; & (4) the evaluation strategies were too simple. As a consequence, the evaluations neither support nor contradict the effectiveness of family preservation programs. 21 References. Adapted from the source document.

93Z8525

Rossi, Peter H. (Social & Demographic Research Instit U Massachusetts, Amherst 01003), **Strategies for Evaluation**, *Children and Youth Services Review*, 1992, 14, 1-2, 167-191.

¶ In a discussion of strategies for evaluations of family preservation programs, it is contended that randomized controlled experiments provide the most credible effectiveness measures. It is also argued that changes in the well-being of children & families should be considered as major criteria for successful treatment, with less emphasis on placement avoidance. A distinction is made between "site" & "grand" strategies, the former being appropriate for local agencies & the latter for the national scene. Site strategies can generally use simple one-factor experiments, whereas grand strategies require complex factorial experiments that test variations in family preservation programs as well as effectiveness with different kinds of clients. 1 Table, 1 Figure, 12 References. Adapted from the source document.

Stoller, Eleanor Palo, Forster, Lorna Earl & Duniho, Tamara Sutin (State U New York Coll, Plattsburgh 12901), **Systems of Parent Care within Sibling Networks,** *Research on Aging,* 1992, 14, 1, Mar, 28-49.

Interviews conducted with a probability sample of persons ages 65+ in upstate NY with at least 1 living child provided data that are used to investigate factors related to the participation of adult children in their elderly parents' helping networks. A three-stage decision model was tested which predicts the likelihood that: (1) an adult child is named as a helper; (2) an adult child is chosen as the primary helper in social networks; & (3) among those networks containing at least one son & one daughter, a son is selected rather than a daugher as the primary helper. Results demonstrate the importance of geographic proximity in predicting the involvement of adult children in parental helping networks; the integral role of daughters & other female family members is also highlighted. The influence of other factors is also investigated, including parental marital status, gender, level of functional impairment, & family structure. 3 Tables, 1 Figure, 49 References. Adapted from the source document.

Towns, Alison & Seymour, Fred (Psychology Dept U Auckland, 1 New Zealand), **What about the Family in Family Therapy Research?,** *The Australian and New Zealand Journal of Family Therapy,* 1990, 11, 4, Dec, 222-228.

¶ Recommendations for family therapy evaluation presented in *The State of the Art in Family Therapy Research: Controversies and Recommendations* (Wynne, Lyman [Ed], New York: Family Process Press, 1988) are examined to illustrate the difficulties that clinicians encounter when attempting evaluation of their work. Each recommendation is discussed from the perspective of family therapists who were primarily clinicians but who moved into the academic area. The effects of these recommendations on the family under study are discussed, along with reasons why clinicians are reluctant to evaluate their work. Criteria specific to the family that are related to ethics, parsimony, & research design are offered that will assist clinicians in selecting measurement instruments to evaluate family therapy. It is suggested that the criteria may result in more clinically relevant research to respond to complaints about the paucity of family therapy evaluation from clinicians. 50 References. Ward, Russell A. & Spitze, Glenna (State U New York, Albany 12222), **Consequences of Parent-Adult Child Coresidence: A Review and Research Agenda,** *Journal of Family Issues,* 1992, 13, 4, Dec, 553-572.

¶ A review of the literature reveals that, though coresidence by parents & adult children is not preferred or normative, neither is it uncommon. Contrary to expectations that such arrangements are based on caregiving for frail older parents, they more typically reflect the housing needs of the coresident children, who are disproportionately unmarried. Although limited research indicates that coresidence is not generally characterized by dissatisfaction & conflict, considerable gaps remain in understanding its implications for parent-child relations & well-being. Conceptual approaches related to life-course transitions & exchange relations are used as theoretical frameworks to develop research hypotheses, & methodological & empirical issues are discussed. 1 Figure, 67 References. Adapted from the source document.

Whitsett, Doni & Land, Helen (School Social Welfare U California, Los Angeles 90024), **Role Strain, Coping, and Marital Satisfaction of Stepparents,** *Families in Society,* 1992, 73, 2, Feb, 79-92.

¶ Types of role strain & coping in remarried parents & the relationship of these variables to marital satisfaction are investigated based on index & scale data obtained on a sample of 73 urban stepparents of children ages 5-12. The most prominent aspect of role strain was a lack of clarity regarding spousal expectations of the stepparent role. T-tests showed that stepmothers indicated higher levels of role strain than stepfathers. The relationship between role strain & marital satisfaction was inverse. Stepparents used active coping methods more often than avoidant methods, & problem-focused coping more often than emotion-focused coping; differences in coping strategies related to the length of time married & gender. Coping methods & coping foci were significantly related to role strain; avoidant coping methods were positively associated with role strain & women used emotion-focused coping strategies more often than men. Stepparents with lower self-esteem & self-efficacy used avoidance coping & emotion-focused coping more often than those with higher self-esteem. For practice, results imply that role strain, coping strategies, & the stepparents' sense of control over life need attention. 4 Tables, 1 Figure, 47 References. Adapted from the source document.

Yang, Haiou & Chandler, David (Dept Sociology U Hawaii, Honolulu 96822), **Intergenerational Relations: Grievances of the Elderly in Rural China,** *Journal of Comparative Family Studies,* 1992, 23, 3, autumn, 431-453.

¶ Interview data obtained in 1987 from 158 elderly persons in 2 rural villages of the People's Republic of China (30 of them interviewed in depth) indicate that mother-/daughter-in-law disputes are still common, but power has shifted to the young in recent years. Ideological & lifestyle differences between generations are not significant issues, though household expenditure & the care of grandchildren are grievances for a few. Most intergenerational grievances occur in the type & amount of economic support the elderly receive from their sons, & the property division among their sons. The elderly reported that most disputes & grievances are endured or avoided, reflecting the loss of power for the older generation under decollectivization. There are no mediation or other institutionalized dispute resolution mechanisms available in these villages. 2 Tables, 33 References. Adapted from the source document.

Bensel, Joachim (Instit Biologie 1 Albert-Ludwigs-U, D-7800 Freiburg Federal Republic Germany), **Behavior of Toddlers during Daily Leave-Taking and Separation from Their Parents,** *Ethology and Sociobiology,* 1992, 13, 4, July, 229-252.

¶ Observational data are drawn on to discuss the behavior of children ages 1-3 at a day-care center (DCC) serving parents attending a university in Freiburg, Federal Republic of Germany. The children's behavior

was observed (1) before, during, & after daily leave-taking of their parents, & (2) during everyday DCC routine as well as in a comparative situation when a parent was present. Children who showed a long leave-taking phase played less during the first half-hour after leave-taking. Children to whom it was possible to make a comparison showed more "aside-behavior" & grief behavior as well as less initiatives to contact adults when their parents were absent than they did in their presence. Some children produced various substitute stimuli for parental presence while their parent was absent. It is concluded that the extent of playing behavior is a measurable indicator that can be used to track the subsidence of excitement after parental leave-taking. 5 Tables, 3 Figures, 36 References. Adapted from the source document.

Bush, Patricia J. & Iannotti, Ronald J. (School Medicine Georgetown U, Washington DC 20007), **Elementary Schoolchildren's Use of Alcohol, Cigarettes and Marijuana and Classmates' Attribution of Socialization,** *Drug and Alcohol Dependence*, 1992, 30, 3, Aug, 275-287.

¶ In each of 2 years beginning in the fourth & fifth grades, urban elementary public schoolchildren (N = 5,995) in Washington, DC, completed surveys about substance use & health-promoting behaviors; in addition, they completed an instrument that permitted each child to have a socialization score attributed by classmates. Conditional multiple logistic regression indicated that socialization was negatively associated with use of alcohol without parental permission & negatively associated with cigarette use in year 2. Shyness, a nonsocializational scale item, was negatively associated with use of cigarettes in both years, with use of alcohol without permission, & with marijuana use in year 2. Excelling at sports was an attribute positively associated with alcohol use without permission & cigarette use in year 2. It is suggested that elementary school children can ascribe social characteristics to their classmates that are associated with & predict health-related behaviors. 5 Tables, 35 References. Adapted from the source document.

Kellerhals, Jean, Montandon, Cleópâtre, Ritschard, Gilbert & Sardi, Massimo (Dépt sociologie U Genève, CH-1211 4 Switzerland), **Le Style éducatif des parents et l'estime de soi des adolescents** (Educative Style of Parents and Adolescent Self-Esteem), *Revue française de Sociologie*, 1992, 33, 3, July-Sept, 313-333. (FRE)

¶ An examination of the effects of family cohesion & educative style on self-esteem in the construction of a teenager's identity. In 1989, interviews with 309 families of teenagers age 13, using structured questionnaires, assessed variations in 4 types of family cohesion (parallel, bastion, association, & companionship), 4 socioprofessional levels (workers, first-line & upper management, academics), 3 major educative styles (rule-bound, maternalist, contractual), & 3 levels of self-esteem. Path analysis reveals clear links between self-esteem & educative style, enhanced by a greater degree of autonomy/support & higher quality of teenager/adult communication. In addition, self-esteem was greater in boys whose parents had a contractual educative style. Finally, the mutually beneficial effects of self-esteem & education improve with higher social standing. 6 Figures, 29 References. Adapted from the source document.

Kollock, Peter (U California, Los Angeles 90024), **The Possibility of Cooperation,** *Contemporary Sociology*, 1992, 21, 5, Sept, 672-676.

¶ A review essay on books by: Michael Argyle, *Cooperation: The Basis of Sociability* (London: Routledge, 1991); Robert A. Hinde & Jo Groebel (Eds), *Cooperation and Prosocial Behavior* (Cambridge: Cambridge U Press, 1992); & Elinor Ostrom, *Governing the Commons: The Evolution of Institutions for Collective Action* (Cambridge: Cambridge U Press, 1990 [see listings in IRPS No. 67]). Research on cooperation has been driven by two famous metaphors: the prisoner's dilemma game & the tragedy of the commons. Ostrom believes that these metaphors are limited, arguing that communities of actors are able to manage "commons" without intervention. She is successful in analyzing how a group of people might commit to cooperation & then monitor each other's actions, but does not quite explain how these institutional structures arise. Argyle believes that the two metaphors are not only limited, but useless. His book is disappointing in its cursory treatment of a plethora of topics related to cooperation, eg, sharing, helping, love, & sex. Hinde's & Groebel's book is stronger in its interdisciplinary diversity, & with the editors' interest in prosocial behavior in general. M. Pflum

Bacal, Ro-Ann A., Migration and Fertility in the Philippines: Hendershot's Selectivity Model Revisited, *Philippine Population Journal*, 1988, 4, 1-4, Jan-Dec, 53-67.

¶ Gerry E. Hendershot's selectivity model of migration presented in "Cityward Migration and Urban Fertility in the Philippines" (see SA 23:1/75H1917) assumes that migration is not a random process, but one in which migrants are "selected" at their place of origin. By comparing fertility rates among rural-to-urban migrants with rates among natives of Manila, Philippines, Hendershot finds support for his claim that migrants are persons seeking upward mobility. Hendershot also suggests, however, that these differences diminish over time, as social & technological trends interrupt the process. Here, data from the 1983 National Demographic Survey concerning 5,094 migrant & nonmigrant married women are analyzed to determine whether they differ significantly in terms of socioeconomic, demographic, & fertility-related characteristics. Multiple regression analysis indicates that migration in fact explains far less than education, labor force participation, & contraceptive use. 10 Tables, 26 References. Adapted from the source document.

93Z8541

Baggaley, Andrew R. (Graduate School Education U Pennsylvania, Philadelphia 19104), **Abortion Beliefs and Values: A Simpler Analysis**

of the Tamney, Johnson, and Burton Data, in *Journal for the Scientific Study of Religion*, 1992, 31, 4, Dec, 533-534.
Reply, 535-536.
¶ A methodological critique of the use of a path model by Joseph B. Tamney, Stephen D. Johnson, & Ronald Burton (see SA 40:5/92Z2448) to explain attitudes toward abortion. It is argued that their use of complex LISREL regression analysis requires acceptance of a priori hypotheses that may not be warranted. This can be avoided by a simpler analysis of the intercorrelations of attitudinal variables & development of an orthodoxy composite score, which is shown to relate to abortion attitudes. In **Not Seeing the Trees for the Forest: A Reply to Baggaley**, Johnson (Ball State U, Muncie, Ind), Tamney, & Burton suggest that this analysis ignores important interrelationships between variables & is unduly critical of LISREL analysis. Aspects of their path model are clarified. 3 References. D. Generoli (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Burke, B. Meridith (22996 Standing Oak Court, Cupertino CA 95014), **Genetic Counselor Attitudes towards Fetal Sex Identification and Selective Abortion,** *Social Science and Medicine*, 1992, 34, 11, June, 1263-1269.
¶ Questionnaire data obtained from 34 counselors in 4 major US cities indicate that client choice for abortion based on fetal sex is not a rare occurrence; respondents (Rs), however, considered prenatal diagnosis of sex selection as a frivolous use of a scarce medical resource, & condemned the cultural values behind it. Rs were clearly in conflict in counseling such people because, while they condemned the use of prenatal diagnosis for sex selection purposes, they supported nondirective counseling. They coped with this cognitive dissonance by redefining the issues: classifying wrong sex children as "unwanted"; reminding themselves that cultural values are relative; & stressing the importance of remaining prochoice. Withholding information on fetal sex was not an option to most Rs, since it would violate patient autonomy; further, 60% would like to know fetal sex if they themselves were pregnant. De Silva, W. I. (Demographic Training & Research Unit U Colombo, Sri Lanka), **Relationships of Desire for No More Children and Socioeconomic and Demographic Factors in Sri Lankan Women,** *Journal of Biosocial Science*, 1992, 24, 2, Apr, 185-199.
¶ Interview data obtained in the 1982 Sri Lanka Contraceptive Prevalence Survey (N = 4,500 ever-married females (Fs) ages 15-49) reveal that Fs who wish to stop childbearing: differ in socioeconomic status from their counterparts who want more children. Educated Fs are more likely to be motivated to cease childbearing than noneducated Fs; Christian or Sinhalese/Buddhist Fs are more willing to stop childbearing than Moor/Muslim or Tamil/Hindu Fs. The relationships between sex composition of existing children & Fs' fertility desires indicate that although moderate son preference exists it does not affect their contraceptive behavior. Among those who want no more children, 15% are at risk of unwanted pregnancy because they do not practice contraception, although better education & being Christian or Sinhalese/Buddhist reduced the risk of unwanted pregnancy. Fs whose husbands disapproved of contraception had over four times higher risk of unwanted pregnancy than Fs whose husbands approved. 6 Tables, 5 Figures, 25 References. Fuszara, Malgorzata (Instit Social Prevention & Resocialization Warsaw U, PL-00-325 Poland), **Abortion in Poland: Will Feminism Emerge?,** UM *Radical America,* 1990, 24, 2, Apr-June, 57-73.

¶ Despite the fact that 90+% of the Polish population belongs to the Catholic church & the vast majority consider themselves to be believing Christians, abortion in Poland has spread widely, with some estimates as high as one million per year. Only a small proportion of women view abortion as morally right, but nearly 40% of women surveyed would rather have an abortion than an unwanted child. The most frequent reason given for abortions was material or housing conditions. The introduction of a 1989 draft abortion act hopes to ban abortions, experiments, & medical intervention on unborn children, & would allow compensation for damages suffered by a fetus. Opponents of the ban view the draft as lacking a positive program to prevent abortions & provisions to allow exceptions, & believe it will not produce its intended affects. D. Generoli

Janowitz, Barbara, Suazo, Margarita, Fried, Daniel B., Bratt, John H. & Bailey, Patricia E. (Family Health International, PO Box 13950 Research Triangle Park NC 27709), **Impact of Social Marketing on Contraceptive Prevalence and Cost in Honduras,** *Studies in Family Planning,* 1992, 23, 2, Mar-Apr, 110-117.

¶ An examination of the impact of the Honduran Family Planning Assoc's (HFPA's) contraceptive marketing program on overall contraceptive use, use by particular subgroups, source of supply, & costs. The program marketed the oral contraceptive Perla. Two national surveys of maternal-child health & family planning conducted in 1984 & 1987 (total N = 8,732) reveal that, although use of oral contraceptives increased only slightly, the HFPA program's share of the oral contraceptive market increased significantly. To have realized cost savings as a result of clients switching from community-based distribution programs & commercial sources, the HFPA would have had to reallocate its resources. Instead, the number of distributors in the community-based program increased, while the amount of couple-years of protection from oral contraceptives decreased. 8 Tables, 13 References. Adapted from the source document.

Kane, Thomas T., El-Kady, Adel A., Saleh, Saneya, Hage, Marvin, Stanback, John & Potter, Linda (School Hygiene & Public Health Johns Hopkins U, Baltimore MD 21205), **Maternal Mortality in Giza, Egypt: Magnitude, Causes, and Prevention,** *Studies in Family Planning,* 1992, 23, 1, Jan-Feb, 45-57.

¶ The maternal mortality rate in Giza, Egypt, 1985/86, was more than thirty times higher than the level in Sweden. The death registration system & interviews (N not specified) with family members of the deceased were used to show that almost 50% of the maternal deaths occurred at home or on the way to the hospital. Most frequently reported causes of death were postpartum hemorrhages, hypertensive diseases of pregnancy, & other obstetric complications. It is suggested that physicians & public health specialists emphasize prevention as well as treatment to reduce the maternal mortality rate. Specific prevention strategies, gleaned from medical profiles of each deceased, are offered. 9 Tables, 3 Figures, 1 Appendix, 40 References. Adapted from the source document.

Kaufman, Joan, Zhirong, Zhang, Xinjian, Qiao & Yang, Zhang (Dept Population & International Health Harvard School Public Health, Boston MA 02115), **The Quality of Family Planning Services in Rural China,** *Studies in Family Planning,* 1992, 23, 2, Mar-Apr, 73-84.

¶ An examination of the quality of family planning services in 4 rural counties of the People's Republic of China, analyzing availability of contraceptive methods, information given to users, & provider knowledge about methods. Data from a 1987 survey of 318 married women of reproductive age & a sample of service providers in Fujian & Heilongjiang provinces reveal that: there is no shortage of contraceptives; variations in community wealth have determined use of the intrauterine device (IUD), with high failure rates; women are poorly informed about the various methods; not all providers who insert IUDs & distribute birth control pills are knowledgeable about contraindications & side effects; & most women use the IUD or sterilization. Improvements in family planning services in China are foreseen. 6 Tables, 1 Figure, 38 References. Adapted from the source document.

Kim, Young-Mi, Rimon, Jose, Winnard, Kim, Corso, Carol, Mako, I. V., Lawal, Sebiosiga, Babalola, Stella & Huntington, Dale (School Hygiene & Public Health Johns Hopkins U, Baltimore MD 21202), **Improving the Quality of Service Delivery in Nigeria,** *Studies in Family Planning,* 1992, 23, 2, Mar-Apr, 118-127.

¶ The impact of a nurse training program in family planning counseling skills on the quality of service delivery at the clinic level in Nigeria is examined using data from client exit interviews (N = 480), expert observation, & inspection of medical abstracts. A quasi-experimental design is employed to compare nurses who received 6 weeks of family planning technical training with a control group. Findings show that trained nurses performed better in interpersonal relations, information giving, counseling, & mechanisms for encouraging continuity. The likelihood of clients attending follow-up visits improved when they were attended by trained professionals. It is concluded that short-term counseling training can improve the quality of care provided by family planning workers. 1 Table, 4 Figures, 16 References. Adapted from the source document.

Knodel, John, Chayovan, Napaporn & Siriboon, Siriwan (U Michigan, Ann Arbor 48109), **The Impact of Fertility Decline on Familial Support for the Elderly: An Illustration from Thailand,** UM *Population and Development Review,* 1992, 18, 1, Mar, 79-103.

¶ Interview data from a nationally representative sample of 3,252 respondents age 50+ residing in private households in Thailand are used to predict how the recent & substantial reduction in fertility may affect the extent to which future generations of elderly will be supported by

0038-0202/93 $1.50

their families. Analysis indicates that the impact of fertility decline per se will be relatively moderate with respect to coresidence (the most crucial aspect of familial support) despite an impending radical shift from the present situation, in which most Thai elderly have at least 5 children, to one where the large majority will have only 2 or 3. Few elderly are likely to be childless or to have only 1 child, & elderly parents with at least 2 children are still quite likely to live with 1 of them. It is concluded that, in settings similar to Thailand, the negative effect of lower fertility on familial support for the elderly need not be an overriding concern when making policy decisions. 4 Tables, 1 Figure, 1 Appendix, 36 References. Li, Virginia C. & Clayton, Serena (School Public Health U California, Los Angeles 90024), **Familiy Planning Information, Education and Communication: Current Activities in the People's Republic of China,** *International Quarterly of Community Health Education,* 1991-1992, 12, 2, 107-117.

¶ Data obtained in 1989/90 via on-site observations at clinics in urban & rural areas, document analysis, & interviews with officials, staff, & clients (Ns not provided) are drawn on to describe family planning activities in the People's Republic of China, focusing on education & publicity designed to promote family planning. Today these activities rely heavily on modern communication technology, especially TV & video, & continue to reflect an urban bias in content. The absence of male involvement in family planning is also noted. Family planning education has been strengthened in certain areas with the "five phases" approach & with the organization of "key households." The Family Planning Assoc, with 200,000 grass-roots associations throughout the country & 17,000,000 members has greatly increased the pool of workers to deliver educational services. It has also been instrumental in developing insurance schemes for one-child families, & in surveillance aimed at detecting unplanned pregnancies. A need is seen for improved training in the development of educational materials for family planning & in the provision of contraceptive services in rural areas. 5 References. Adapted from the source document.

Maeder, Christoph (Soziologisches Seminar Hochschule Saint Gallen, Tigerbergstr 2 CH-9000 Switzerland), **Reproduktionsmedizin in der Schweiz: Ergebnisse und Interpretationen einer repräsentativen Bevölkerungsbefragung** (Reproductive Medicine in Switzerland: Results and Interpretations of a Survey of a Representative Sample of the Population), *Schweizerische Zeitschrift für Soziologie/Revue Suisse de sociologie,* 1992, 18, 2, 363-391. (GER)

¶ Technological innovation has made it possible for doctors & biologists to intervene increasingly in procreation & pregnancy. Against a background of a heated debate on the opportunities & consequences arising from practices of this kind, telephone interviews were conducted with a sample of 602 respondents from German, French, & Italian regions of Switzerland. To establish to what degree there exists a normative correlation with this development of reproductive technology. While the results show that acceptance of the techniques in question is selective, they do not indicate general & consistent rejection. In particular, prenatal diagnostics & the related possibility of interruption of pregnancy received remarkably high approval. On the other hand, among middle-class families, the implication of a third party donor is a significant normative obstacle to artificial insemination. 7 Tables, 3 Graphs, 57 References. Modified AA

Martins, Ignez Ramos, Costa, Sarah Hawker, Freitas, Sylvia Regina da Silva & Pinto, Cristiane Schuch, Aborto induzido em mulheres de baixa renda–dimensão de um problema (Induced Abortion among Low-Income Women–Dimensions of the Problem), *Cadernos de Saúde Pública,* 1991, 7, 2, Apr-June, 251-266. (POR)

¶ To investigate the incidence of abortion among lower-class women in Rio de Janeiro, Brazil, interview data were obtained from 1,783 respondents (Rs) ages 15-49 in 7 slum neighborhoods. Despite the illegality of abortion, 21.4% of the Rs had terminated at least 1 pregnancy; of these, 60% had been using some form of birth control when they became pregnant. Women should be taught to use birth control pills properly, & provided with better access to family planning within the health services framework. Abortions performed by paraprofessionals or by women themselves resulted in more complications than those performed by physicians. Consequences of the restrictive abortion laws are discussed. 7 Tables, 2 Figures, 12 References. Adapted from the source document.

Mathews, Paul W. (Australian National U, Canberra ACT 2601), **Medical Idioms as Legitimate Responses to Family Planning,** *Social Analysis,* 1992, 31, July, 103-125.

¶ Based on fieldwork conducted 1987/88, it is shown how the people of a Philippine rural community perceive & respond to the National Family Planning Program. The medical underpinnings of the program are explored in terms of B. S. Turner's thesis of the body (*The Body and Society: Explorations in Social Theory,* Oxford: Basil Blackwell, 1984) & Michel Foucault's theory of power/knowledge. It is argued that family planning is an attempt by the state to impose systematization & discipline on the masses through a process of medicalization, masked in the rhetoric of economic developmentalism. Filipinos perceive this state intrusion as attempting to delimit or alter socioeconomic roles, particularly those of children & parents, & they respond in the same medical idiom as that used by the state. 2 Tables, 57 References. Modified AA

93Z8565

McCarthy, James & Maine, Deborah (Center Population & Family Health Columbia U, New York NY 10032), **A Framework for Analyzing the Determinants of Maternal Mortality,** *Studies in Family Planning,* 1992, 23, 1, Jan-Feb, 23-33.

¶ It is estimated that 500,000 women in developing countries die each year from complications of pregnancy, abortion attempts, & childbirth. Presented here is a framework for the analysis of maternal mortality–drawn from the existing literature & models for fertility & child survival–that analyzes the cultural, social, economic, behavioral, & biological factors that influence maternal mortality, in an attempt to reduce pregnancies & complications of pregnancies & childbirth, & to improve the outcomes for women. Intervention strategies–including family planning, safe abortion services, & improved labor & delivery services–are also described. 2 Figures, 32 References. Adapted from the source document.

Meier, Kenneth J. & McFarlane, Deborah R. (Dept Political Science U Wisconsin, Milwaukee 53201), **State Policies on Funding of Abortions: A Pooled Time Series Analysis,** *Social Science Quarterly,* 1992, 73, 3, Sept, 690-698.

¶ Abortion funding policies were used in the US during the 1980s to affect the prevalence of abortion among low-income women. Using data from previously published research, 1983-1989 (N = 198 abortion cases), it is argued that abortion funding policies are determined by a combination of redistributive policy & morality policy, & therefore influenced by political forces, eg, prior redistributive policy & conservative ideology, & by the strength of advocacy groups. A third determinant of abortion funding, it is suggested, may create biases for support of current policy. 1 Table, 22 References. Adapted from the source document.

Murphy, M., Economic Models of Fertility in Post-War Britain–A Conceptual and Statistical Re-Interpretation, *Population Studies,* 1992, 46, 2, July, 235-258.

¶ The "new home economics" theory of fertility is reviewed, & the conclusion of one of its originators, Harvey Leibenstein ("An Interpretation of the Economic Theory of Fertility. Promising Path or Blind Alley?" *Journal of Economic Literature,* 1974, 12, 457-479), that empirical tests of the model have been unsuccessful, is reassessed & found to be confirmed for the case of some widely cited econometric studies that used macrolevel time-series data. The pitfalls in formulating, fitting, & inter-

0038-0202/93 $1.50

preting such models are discussed, & explanations used to dismiss alternative explanations of postwar fertility trends are criticized as simplistic & invalid. Although the theory provides substantial insights, attempts made to validate it have failed because many of the model's requirements have been ignored; it is questioned whether the model is capable of empirical confirmation. It is concluded that progress will be made only by a fruitful dialogue between various social science disciplines, together with improved data sources & careful empirical studies. 1 Table, 1 Appendix. Pariani, Siti, Heer, David M. & Van Arsdol, Maurice D., Jr. (Medical Faculty U Airlangga, Surabaya Indonesia), **Does Choice Make a Difference to Contraceptive Use? Evidence from East Java,** *Studies in Family Planning,* 1991, 22, 6, Nov-Dec, 384-390.

¶ Interview data obtained in 1987 from a purposive sample of 2,501 female clients at government family planning program clinics in 6 regencies of East Java, Indonesia, (& reinterviews with 1,945 respondents in 1988) are used to explore their contraceptive experiences, focusing on factors affecting sustained contraceptive use. Results indicate that whether the user was granted her choice of method was a very important determinant of sustained use. The interaction between whether choice was granted & whether there was hunsband-wife concurrence on method choice was also significant. The highest rate of discontinuation occurred when method choice was denied in the presence of husband-wife agreement on method choice, & the lowest rate occurred when method choice was granted in the presence of such concurrence. It is concluded that contraceptive continuation can be enhanced when family planning workers pay more attention to the stated desires of their clients, or when policy is instituted allowing clients to use their method of choice. 5 Tables, 17 References. Piplai, Chumki, Chatterjee, Sikha, Bhattacharyya, Sarmistha & Ghosh, Aloke K. (Anthropological Survey India, 27 Jawaharlal Nehru Rd Calcutta 700016), **Family Planning in an Urban Setting: Some Observations,** *Journal of the Indian Anthropological Society,* 1990, 25, 2, July, 170-177.

¶ To explore Indian families' adoption of family planning methods in relation to socioeconomic factors–eg, income, occupation, education–interviews were conducted 1974-1976 with 2,001 Bengali couples in a Calcutta maternity hospital. Findings reveal no relation between adoption of family planning & caste, but a direct relationship between planning & educational status, increased as economic condition improves. Employed women use family planning methods much more than do housewives. 11 Tables, 14 References. Adapted from the source document.

Plotnick, Robert D. (Graduate School Public Affairs U Washington, Seattle 98195), **The Effects of Attitudes on Teenage Premarital Pregnancy and Its Resolution,** UM *American Sociological Review,* 1992, 57, 6, Dec, 800-811.

¶ Data from a non-Hispanic white subsample of 1,142 females (Fs) ages 14-16 when first interviewed as part of the National Longitudinal Survey of Youth in 1979 are drawn on to explore the influence of attitudes & related personality variables on the probability of teenage premarital pregnancy &, when a pregnancy occurs, whether it is resolved by abortion, having an out-of-wedlock birth, or marrying before the birth. Analysis shows that self-esteem, locus of control, attitudes toward F family roles, attitudes toward school, educational aspirations, & religiosity are associated with premarital pregnancy & its resolution in directions predicted by problem behavior theory. It is concluded that attitudes & related personality variables are important paths through which family background characteristics influence adolescent sexual & marital behavior. 3 Tables, 41 References. Radecki, Stephen E. & Beckman, Linda J. (Memorial Family Medicine Long Beach Memorial Medical Center, CA), **Determinants of Child-Bearing Intentions of Low-Income Women: Attitudes versus Life Circumstances,** *Journal of Biosocial Science,* 1992, 24, 2, Apr, 157-166.

¶ The relative impact of childbearing motivations vs life circumstances on intention to have a(nother) child is examined among low-income women in Los Angeles County (Calif) based on surveys conducted in 1985 & 1986 (N = 454 & 464, respectively). Results reveal that future childbearing intentions are strongly related to current parity level regardless of marital status, race/ethnicity or economic status. Psychological motivating factors predict childbearing intentions of nulliparous women, but not those of parous women. Multivariate analyses show that motivation for parenthood & life circumstances combined predicted women's childbearing intentions 88.6% of the time for nulliparous women, but 73.7% for parous women. These findings suggest that, in a low-income population, the onset of parenthood reduces the relationship between specific motivations for childbearing & actual childbearing intentions, & diminishes the ability to predict childbearing intentions based on both attitudinal & social/structural factors. 5 Tables, 19 References. Adapted from the source document.

Reynes, Josefina F., The Dynamics of Contraceptive Adoption in Bohol, Philippines: 1976-1978, *Philippine Population Journal,* 1988, 4, 1-4, Jan-Dec, 23-37.

¶ Childbearing couples in the Bohol province, a rural & predominantly Catholic region of the Philippines, were subjected to an intensive family planning program 1976-1978. Because nearly 33% of the couples shifted from natural to regulated fertility during the 30-month interval, a model was constructed to identify the motivations & costs that determine a couple's decision to adopt the new birth control method. Survey data collected from 414 couples reveal 2 dimensions of "costs"–community/ecological factors, & interpersonal/personalized aspects of reproductive practice. The interpersonal/personalized factors are found to be more strongly related to a couple's adoption of regulated fertility. The extent to which these findings are generalizable to rural populations is also explored. 4 Tables, 58 References. Adapted from the source document.

Richter, Donna L., Sy, Francisco S., Mukhtar, Qaiser, Addy, Cheryl **L. & Macera, Caroline A.** (School Public Health U South Carolina, Columbia 29208), **Contraception and HIV Prevention among** Women **in Public Health Clinics,** *Health Values,* 1992, 16, 1, Jan-Feb, 3-9.

¶ In an investigation of women's knowledge of the effectiveness of various contraceptive methods in preventing HIV (human immunodeficiency virus) transmission, their use of the methods, & aspects of their sexual behavior, interviews were conducted with 300 female clients of a sexually transmitted diseases clinic, an urban family planning (FP) clinic, & a rural FP clinic in a southeastern state. Results indicate gaps in respondents' (Rs) knowledge of the effectiveness of contraceptive methods in HIV prevention, including confusion about the effectiveness of condoms. Relatively low rates of regular condom usage, & high rates of never using condoms were reported. Poor & less educated Rs & those age 20+ were most likely to report never using a condom. Whites were more likely than blacks to correctly assess the HIV-prevention effectiveness of contraception methods. 3 Tables, 12 References. Adapted from the source document.

Ross, John A. (Research Division Population Council, NY), **Sterilization: Past, Present, Future,** *Studies in Family Planning,* 1992, 23, 3, May-June, 187-198.

¶ Although its use has grown only gradually & annual rates of adoption remain low, sterilization is chosen by more couples worldwide as the preferred method of contraception. The high prevalence of sterilization is attributed to its excellent continuation rate, appeal to a broad age range at the time of adoption, & long history of availability. International statistics from several sources on patterns of sterilization show that users are concentrated in the People's Republic of China & India, but numerous smaller countries also have high proportions of couples using the method. Personal characteristics that differentiate its use within each country are

identified: age, parity, residence, & sex. A new projection method indicates that approximately 159 million sterilization adoptions are expected between 1990 & 2000, 50% of them in China; the higher accuracy of such projections in comparison to those for other contraceptive methods is discussed. 3 Tables, 7 Figures, 18 References. Adapted from the source document.

93Z8576

Sander, William (DePaul U, Chicago IL 60604), **Catholicism and the Economics of Fertility,** *Population Studies,* 1992, 46, 3, Nov, 477-489.

¶ Data from four cohorts of married women born before the 1940s, derived from the General Social Survey 1973-1989, are drawn on to examine the effect of Catholicism on fertility in the US. Results indicate that many previous studies on Catholicism are flawed because of sample selection bias, which arises because ex-Catholics prefer smaller families than non-Catholics. Also, religious activity is shown to have no effect on fertility if it is treated as an endogenous variable. Further, it is shown that the fertility transition is partly related to the changing effect of Catholic norms. 12 Tables. Adapted from the source document.

Sered, Susan & Abramovitch, Henry (Dept Sociology & Anthropology Bar-Ilan U, IL-52100 Ramat-Gan Israel), **Pregnant Dreaming: Search for a Typology of a Proposed Dream Genre,** *Social Science and Medicine,* 1992, 34, 12, June, 1405-1411.

¶ Data on dreams during pregnancy were collected from 55 postpartum women on the maternity ward of an Israeli hospital. Findings show that women bearing their first child & those with complicated obstetrical histories reported more dreaming. The collected dream corpus suggests that dreams during pregnancy constitute a distinct dream genre. A tentative typology of that genre is developed, & it is argued that the context of disclosure is highly relevant to the dream content reported. 29 References. Adapted from the source document.

Simmons, Ruth, Mita, Rezina & Koenig, Michael A. (School Public Health U Michigan, Ann Arbor 48109-2029), **Employment in Family Planning and Women's Status in Bangladesh,** *Studies in Family Planning,* 1992, 23, 2, Mar-Apr, 97-109.

¶ How employment in family planning affects the prestige, professional status, & social influence of community workers (CWs) is examined using data from focus group interviews conducted with CWs, their husbands, community leaders, & community women (N not given) in 1987/88 in Matlab, Bangladesh. Findings indicate that: although CWs initially faced intense hostility in the community, they succeeded in maintaining the prestige that is traditionally accorded women; the CWs established themselves as valued health & family planning professionals in a social context in which professional roles for women are few; & the CWs gained social influence by performing a range of functions in the community. The leadership roles that CWs now assume imply a degree of status that seemed inconceivable a decade ago in Bangladesh. 9 References. Adapted from the source document.

Simonds, Wendy (Emory U, Atlanta GA 30322), **At an Impasse: Inside an Abortion Clinic,** *Current Research on Occupations and Professions,* 1991, 6, 99-115.

¶ Drawing on experience as a part-time counselor in an abortion clinic in New York City, the clinic workers' complex moral standpoints on the issue of abortion & the opposing ideologies of medical workers & counselors are explored. It is suggested that, from the medical perspective, abortion is an event in a pregnant woman's life that should be managed by medical workers. In contrast, the nondirective tenets of social work depict abortion as an event through which a woman can, with the facilitating assistance of counselors, achieve a degree of control over her actions. Generally, clinic workers' behavior fails to clearly articulate either perspective. Tensions resulting from opposing perspectives of clinic work & the ultimate dominance of the medical view are discussed. It is suggested that mitigating such an impasse must include a willingness on the part of abortion providers to reconsider their view of abortion as stigmatized & morally reprehensible. 16 References. Adapted from the source document.

Solomon, Susan Gross (Dept Political Science U Toronto, Ontario M5S 1A1), **The Soviet Legalization of Abortion in German Medical Discourse: A Study of the Use of Selective Perceptions in Cross-Cultural Scientific Relations,** *Social Studies of Science,* 1992, 22, 3, Aug, 455-485.

¶ The Soviet legalization of abortion in 1920 set off heated debates among German physicians (MDs) about the German criminal code, which criminalized abortion. Scientific discourse between the champions & critics of Soviet legalization in the two countries, which became an integral part of historical medical discourse in the USSR, are compared here. Multiple instances of selective perception of the Soviet policy, which appears to have had a political rather than a scientific utility, are revealed. To the extent that German & Soviet MDs functioned as advocates for specific positions in the domestic abortion debates, it is concluded their selective perception afforded them invaluable latitudes in argumentation. Vlassoff, Carol (Special Programme Research & Training Tropical Diseases World Health Organization, CH-1211 Geneva 27 Switzerland), **Progress and Stagnation: Changes in Fertility and Women's Position in an Indian Village,** *Population Studies,* 1992, 46, 2, July, 195-212.

¶ Questionnaire interview data are drawn on to compare the status, fertility, & contraceptive use between 1975 & 1987 of married women ages 15-26 in a Maharashtra, India, village. Analysis reveals that changes in women's position were both positive & negative: although education & age at marriage had increased, the 1987 cohort was more conservative in many respects. Fertility appeared to be declining, & women were increasingly completing their families quickly & then undergoing sterilization. However, the decline in fertility goals was not due primarily to changes in women's status, but to the active sterilization campaign in the community. The one constraint on fertility limitation was the need for sons, & some indicators of women's status–education, age at marriage, & distance from the natal home–made a significant difference on this. The finding that women's autonomy seemed to be related to "marriage distance" deserves further study, particularly in South Asia & other patrilocal societies. 6 Tables. Zablan, Zelda C. (Population Instit U Philippines, Diliman Quezon City), **Proximate Determinants of Philippine Fertility: 1983 Levels and Patterns,** *Philippine Population Journal,* 1988, 4, 1-4, Jan-Dec, 81-102.

¶ Factors that directly & indirectly affect fertility levels among Filipino women are identified by examining 3 stages of the family life cycle through data collected in the 1983 National Demographic Survey. At the family formation stage, women bear children rapidly once they have married. In terms of spacing births, younger women allow shorter intervals between pregnancies than their older cohorts, which might suggest a contemporary change in fertility strategies. Finally, with respect to the age at which they stop having children, Filipino women seem to take full advantage of their reproductive years, but this trend may diminish over time as the culture increasingly incorporates effective contraceptive methods. 17 Tables, 6 References. Achté, Kalle (Dept Psychiatry U Helsinki, SF-00180 Finland), **Suicide Prevention: Future Trends**, *Integrative Psychiatry*, 1991, 7, 3-4, 230-233.

¶ While reducing the rate of suicide has become a priority in Finland, results have been discouraging thus far. Mounting suicide rates among the young & old, the role of treatment organizations, & current risk evaluation procedures are discussed. More competent risk referral services are needed to detect patients who are at risk if therapeutic treatment is to be effective in preventing suicide. In addition, the need for more research on the causes of suicide & the biological & ethical implications of suicide prevention are considered to determine what prevention programs should focus on & how well they meet their targeted goals. 13 References. Battin, Margaret (U Utah, Salt Lake City 84112), **Voluntary Euthanasia and the Risks of Abuse: Can We Learn Anything from the Netherlands?**, IM *Law, Medicine and Health Care*, 1992, 20, 1-2, spring-summer, 133-143.

¶ Taking seriously the claim that voluntary euthanasia & physician-assisted suicide will lead to abuse if legalized, several issues are discussed: the risk of abuse, possible types of abuse, & protections against abuse. In the Netherlands, the only country in which euthanasia is openly practiced, a study commissioned by the government (in which 405 physicians were interviewed & 7,000 completed questionnaires) suggests that systematic abuse is unlikely. Abuse can be either interpersonal (family & friends) or professional, but fear of both types is unfounded because protective precautions can be implemented, including policies designed to protect the quality of & guard against the distortion of a patient's choice. M. Maguire (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z8589

Dickinson, George E. (Dept Sociology & Anthropology Coll Charleston, SC 29424), **First Childhood Death Experiences**, *Omega*, 1992, 25, 3, 169-182.

¶ Adult reminiscences about their childhood experiences of death are examined via analysis of essays on the topic written by 440 US students in college death-&-dying classes. Content analysis reveals that 50+% of all first experiences with death involved relatives & 28% involved a pet. Children's responses to death showed emotions similar to those expressed by adults: 33+% remembered crying & many still had clear recollections of the funeral. It is concluded that childhood experiences with death, loss, or separation can become important influences on how an adult sees life & copes with death. 1 Table, 18 References. Gelwick, Richard (Coll Osteopathic Medicine U New England, Biddeford ME 04005), **The Patient Self-Determination Act and "Dax's Case"**, *The Journal of Medical Humanities*, 1992, 13, 3, fall, 177-187.

¶ The case of burn patient Donald Cowart, now known as Dax, has become a classic in biomedical ethics debate. Theologian Lonnie Kliever's book, *Dax's Case* (New York, 1985), with contributions by twelve scholars covering law, philosophy, history, nursing, psychiatry, medicine, & religion, shows the many facets involved in patient self-determination in a life-threatening situation. The questions raised in this case also raise broader challenges that need to be faced in implimenting the Patient Self-Determination Act of 1991. These challenges concern: the adequacy of the patient's history, finding the true message in a request to die, the danger of opposing individual rights to professional respect & care, the need for dialogue in a request to die, the place of time-limited contracts, the meaning of quality of life, conflicts of interest, the words used for self-determination, the difference between the sufferer & caregivers, the moral ambiguity of pain, the loneliness of rights, & the variable meanings of suffering & death. The challenges of *Dax's Case* bring to light many of the issues to be faced in the new era of patient self-determination. AA (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Leenaars, Antoon A. & Lester, David (c/o Lester–Stockton State Coll, Pomona NJ 08240), **Comparison of Rates and Patterns of Suicide in Canada and the United States, 1960-1988**, *Death Studies*, 1992, 16, 5, Sept-Oct, 417-430.

¶ A comparison of the rates & patterns of suicide in Canada & the US: (1) by year, 1960-1988, for both sexes; (2) by chronological age/developmental age; & (3) before & after midlife. Analysis of national statistical data clearly shows that the rates & patterns are different in these two countries, with Canada having a higher rate than the US Young adult males are a particularly high-risk group, especially in Canada. Possible explanations for these differences are presented, including reliability of suicide certification, decriminalization of suicide in Canada in 1972, attitudes toward suicide, & sociocorrelates of suicide. Implications for prevention & service are also provided. 1 Table, 2 Figures, 36 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z8592

Normand, Claude L. & Mishara, Brian L. (c/o Mishara–LAREHS U Québec, Montreal H3C 3P8), **The Development of the Concept of Suicide in Children**, *Omega*, 1992, 25, 3, 183-203.

¶ The development of childhood conceptions of death & suicide is examined through interview & questionnaire data collected from 20 children in grades 1, 3, & 5 at a French-speaking public school in Montreal, Quebec. Findings indicate that 10% of first graders, 50% of third graders, & 95% of fifth graders have a basic understanding of suicide, & their attitudes toward it are either neutral or negative. Thoughts on suicide are

significantly related to age, the concept of death, & experiences with death, which, in turn, are significantly related to cognitive development. 5 Tables, 27 References. Adapted from the source document.

Noronha, Ceci Vilar & Daltro, Maria Esther, A violência masculina é dirigida para Eva ou Maria? (Is Male Violence Directed toward Eve or Mary?), *Cadernos de Saúde Pública,* 1991, 7, 2, Apr-June, 215-231. (POR)

¶ An analysis of different types of violent crimes committed in the Brazilian state of Bahia. Nationally, unnatural deaths due to traffic accidents, homicides, & suicides are the third most common cause of death, acting to increase the demand for emergency health services. Analysis of crime incidents reported in the local press in 1989 shows that police were responsible for 24% of violent deaths of young males (Ms), a greater proportion than the 18.6% due to fighting among criminals. Although the official statistics make it appear that most violent crime victims are M, many rapes & instances of domestic violence against females (Fs) go unreported. Ms are usually the perpetrators of these violent crimes; however, there are also cases of Fs attacking & killing Ms & other Fs. A move away from the ideology of F inferiority would decrease violence, but this seems like a remote possibility for Brazil with its current mindset. 2 Tables, 3 Graphs, 12 References. Adapted from the source document.

Platt, Stephen, Micciolo, Rocco & Tansella, Michele (MRC Medical Sociology Unit, 6 Lilybank Gardens Glasgow G12 8QQ Scotland), **Suicide and Unemployment in Italy: Description, Analysis and Interpretation of Recent Trends,** *Social Science and Medicine,* 1992, 34, 11, June, 1191-1201.

¶ Inconsistencies in the research literature on the connection between unemployment & suicide led to undertaking longitudinal & cross-sectional aggregate-level analyses with Italian statistics, 1977-1987, a period when unemployment rose for both genders. Findings show that the female (F) suicide rate fell, correlating negatively with unemployment, but the male (M) suicide rate rose, correlating positively. Further, examination of suicide & employment rates in 18 Italian areas reveals no regional correlation for either gender. However, suicide rates among employed & unemployed, separately & combined, together with the relative & population attributable risks for each year, were higher among the unemployed than the employed; cross-sectional analysis showed negative associations of mean annual unemployment rate & mean annual suicide rate across 18 regions for both Ms & Fs. This contradictory & inconsistent evidence is discussed in terms of underreporting of suicide rates, & the possibility of an indirect causal link between employment & suicide. 5 Tables, 3 Figures, 65 References. Adapted from the source document.

Schwartz, Matthew & Kaplan, Kalman J. (c/o Kaplan-Dept Psychology Wayne State U, Detroit MI 48202), **Judaism, Masada, and Suicide: A Critical Analysis,** *Omega,* 1992, 25, 2, 127-132.

¶ Many cite the mass suicide at Masada in 73 AD as an example of Jewish thought, & describe the modern state of Israel as having a "Masada complex." This view is challenged here, via examination of *Bellum Judaicum* (The Jewish Wars) by Roman historian F. Josephus (Whiston, W. (Tr), *Complete Works,* Grand Rapids, Mich: Kregel Publications, 1985), who was the primary, & for many centuries, exclusive source on this topic. Analysis of speeches at Masada, & at a slightly earlier mass suicide at Jotapata, indicates clearly that suicide represents a Greco-Roman rather than a Jewish response to stress. These speeches conform to Plato's dualism between body & soul & Seneca's sense of freedom rather than to biblical & rabbinic thought. This conclusion is buttressed by the absence of a suicide narrative in *Josippon,* the Jewish reconstruction of Josephus, & by several examples of similar collective suicides in Greco-Roman literature. The motives of Josephus are explored in the context of his desire to differentiate himself from the Sicarii while being both a good Jew & a good Roman. 10 References. Weir, Robert F. (Coll Medicine U Iowa, Iowa City 52242), **The Morality of Physician-Assisted Suicide,** *Law, Medicine and Health Care,* 1992, 20, 1-2, spring-summer, 116-126.

¶ Arguing that physician-assisted suicide (PAS) is justifiable & necessary in certain circumstances, the issue is legally & ethically examined. The case against PAS centers on the medical profession's commitment to healing & the claims that: (1) physicians should not cause death, (2) patients should not request PAS, (3) PAS will lead to mistrust & abuse, & (4) PAS is unnecessary. Relying on evidence from recent cases in Mich & NY, it is argued that PAS responds to current medical reality, alleviates patient suffering, optimizes patient control, minimizes harm to patients & others, & is an act of compassion. Allowing that certain conditions must be met when determining whether PAS is appropriate, it is recommended that the practice be decriminalized & that new public policies be established that make PAS an acceptable alternative. William, Jane Louise (Goldberg Marriage & Family Therapy Center Syracuse U, NY 13244), **Don't Discuss It: Reconciling Illness, Dying, and Death in a Medical School Anatomy Laboratory,** *Family Systems*

Medicine, 1992, 10, 1, spring, 65-78.
¶ Communication strategies among faculty & first-year medical students during human cadaver dissection are explored. Inductive ethnographic research, including participant observation & unstructured interviews (N = 6) conducted during 14 weeks of a gross anatomy lab course at US medical school, is used to examine cognitive & affective responses to dissection. Particular attention is paid to the history & maintenance of the medical faculty's tacit prohibition against discussion of their own & their students' anxiety about illness, dying, & death. The difficulty that professors have in handling their own discomfort during this yearly ritual, & the anxiety of students for whom this is a new experience, are discussed, along with ways that this tension is exacerbated by dual "conspiracies" to silence any vocalizations of fear. 29 References. Abood, Doris A. & Conway, Terry L. (Dept Nutrition/Food/Movement Sciences Florida State U, Tallahassee 32306-2033), **Health Value and Self-Esteem as Predictors of Wellness Behavior,** *Health Values*, 1992, 16, 3, May-June, 20-26.
Lifestyle data were collected in 1985 via questionnaire from 3,045 US Navy personnel regarding a variety of health & fitness-related behaviors & values, & self-esteem. The value that respondents placed on health predicted specific health behaviors & the general practice of wellness behaviors. Self-esteem did not predict specific health behaviors, but did predict general wellness behavior after controlling for the value placed on health. 3 Tables, 20 References. Aggleton, Peter & Kapila, Mukesh (Goldsmith's Coll U London, SE14 6NW England), **Young People, HIV/AIDS and the Promotion of Sexual Health,** *Health Promotion International*, 1992, 7, 1, 45-51.
¶ The lay & professional literatures on HIV (human immunodeficiency virus) & AIDS (acquired immune deficiency syndrome) generally characterize young people as being at high risk of infection. Their social immaturity, spontaneity, emotional volatility, & propensity to risk-take is said to render them specially vulnerable. Here, the appropriateness of such a view is questioned, arguing for a more socially differentiated understanding of young people & their HIV/AIDS health promotion needs. Aspects of relevant European epidemiology are reviewed, & the dominant ideology of youth & adolescence & its impact on HIV/AIDS work are described. Key implications for policy & practice are identified. 1 Table, 32 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Agyepong, Irene Akua (Operations Research Unit Ministry Health, PO Box 184 Adabraka Accra Ghana), **Malaria: Ethnomedical Perceptions and Practice in an Adangbe Farming Community and Implications for Control,** *Social Science and Medicine*, 1992, 35, 2, July, 131-137.
¶ As sociocultural factors that can influence malaria transmission & control, community perceptions relating to malaria causation, diagnosis, treatment, & prevention are investigated, based on participant observation, interviews, & questionnaires administered to all girls ages 10-19 in a rural community in Ghana. Among 112 girls examined, the crude parasite rate was 49% during the rainy season & 47% in the early dry season. Lay people as well as traditional healers are able to describe the symptoms & signs of malaria. According to ethnomedical perceptions, diagnosis & treatment of uncomplicated episodes of malaria at home is the predominant response in this community. Ethnomedical perceptions of malaria causation & treatment on which self-care is based differ from conventional biomedical perceptions. Most community members perceive malaria as an environmentally related disease caused by excessive contact with external heat that upsets the blood equilibrium, rather than connecting the disease with the mosquito. Implications of the findings for approaches to control are discussed. 1 Table, 1 Figure, 21 References. Adapted from the source document. Airey, Tony (Intermediate Technology Transport Ltd, Ardington Oxon OX12 8QJ England), **The Impact of Road Construction on the Spatial Characteristics of Hospital Utilization in the Meru District of Kenya,** *Social Science and Medicine*, 1992, 34, 10, May, 1135-1146.
¶ The effects of road construction on the catchment area of Chogoria hospital in the Meru District of central Kenya are explored via analysis of patient records, 1983-1986. Results indicate that reduced travel time is a more important effect than reduced travel costs. However, the hospital is now attracting patients from farther away, whose expenditure on fares is similar to that prior to road construction. Institutional barriers, particularly the economic barrier of fee-paying treatment, are found to be the main explanation for this finding. 8 Tables, 9 Figures, 43 References. Albert, Steven M. (Philadelphia Geriatric Center, 5301 Old York Rd PA 19141), **The Autonomy of Lay and Professional Knowledge in Home Health Care,** *Journal of Aging Studies*, 1992, 6, 3, fall, 227-241.
¶ Data obtained via a 40-item "caregiver knowledge quiz" are analyzed to assess familial caregiver expertise in home health care among 3 samples: intensive caregivers, college students with no exposure to home health tasks, & gerontologists with professional exposure to home health tasks (N = 43, 54, & 18, respectively). Consensus modeling is used to explore (1) level of shared knowledge in each group, & (2) differences in group knowledge. Despite their intensive caregiving experience, caregivers' answers are most similar to those of college students; caregiving experience does not lead them to embrace the expertise of gerontologists. Ethnographic materials offer insight on the reasons for this autonomy of lay & expert knowledge. 2 Tables, 1 Figure, 1 Appendix, 17 References. Adapted from the source document. Anderson, Warwick (Dept History Science Harvard U, Cambridge MA 02138), **The Reasoning of the Strongest: The Polemics of Skill and Science in Medical Diagnosis,** *Social Studies of Science*, 1992, 22, 4, Nov, 653-684.
¶ Data obtained via participant observation are used to describe the attempt by clinical scientists & computer experts to introduce computer diagnosis to the wards of a major Australian teaching hospital in Melbourne during the 1960s & 1970s. A logical-empiricist procedure construed as a "scientific" model of medical diagnosis–challenging traditional physicians' (MDs') claims of "craft knowledge"–had the potential

to define a new social & institutional role for clinical research. The "craft" & "scientific" representations of diagnosis are treated symmetrically here as discursive resources used to legitimate the divergent competencies of two competing occupational subgroups; neither, however, is privileged as an explanatory framework. Attributions of skill may serve distinct social goals & institutional interests. To secure a place for this diagnostic technology, clinical scientists appealed to a scientific method that MDs were prepared to use rhetorically to bolster their diagnoses, but not to redefine the diagnostic process. The institutional authority of MDs allowed them to ignore a model of diagnosis that would circumvent their control of a crucial aspect of medical work. 2 Figures. Adapted from the source document.

Angel, Ronald J. & Idler, Ellen L. (Dept Sociology U Texas, Austin 78759), **Somatization and Hypochondriasis: Sociocultural Factors in Subjective Experience,** *Research in Community and Mental Health,* 1992, 7, 75-97.

¶ Drawing on the literature in anthropology & cognitive psychology, a theory of the impact of acculturation & language on the degree of differentiation between the physical & the emotional in subjective experience is developed & tested. Data from the National Health & Nutrition Examination Surveys demonstrate that even among highly acculturated individuals, perceptions of overall physical health & one's affective state are highly correlated. The data also reveal rather dramatic disagreements between physicians' assessments of individuals' overall health & individuals' self-assessment. Testing the possibility that the tendency to express distress in somatic terms changes as people age, the data reveal that, among individuals with similar clinically assessed levels of arthritic joint damage, there is great variation in reports of pain, suggesting that individuals who are optimistic in their general outlook experience & report less pain. As a whole, results support the proposition that all illness is simultaneously mental & physical, & that these two realms of experience are not distinguished subjectively. 4 Tables, 1 Figure, 54 References. Barrett, Hazel R. & Browne, Angela W. (Derbyshire Coll Higher Education, DE3 1GB England), **Beri-Beri: Age-Gender Bias in the Gambia,** *Social Science and Medicine,* 1992, 34, 11, June, 1295-1297.

¶ An investigation of an outbreak of beri-beri in Gambia in 1988, in which men ages 15-49 were the group most affected. The age & gender biases of the outbreak are of interest because women & children are usually more susceptible than men to conditions associated with malnourishment. It is noted that at the time of the outbreak, medical treatment took precedence over socioeconomic investigations, making it difficult to ascertain why certain age & gender groups were affected & thus to target them for future preventive health education programs. Where possible, medical investigations must be combined with socioeconomic studies if future outbreaks of this kind are to be avoided. 9 References. Adapted from the source document.

Barsky, Arthur J., Cleary, Paul D. & Klerman, Gerald L. (Massachusetts General Hospital, Warren 631 Fruit St Boston 02114), **Determinants of Perceived Health Status of Medical Outpatients,** *Social Science and Medicine,* 1992, 34, 10, May, 1147-1154.

¶ The role played by medical morbidity, psychiatric disorder, functional status, & hypochrondriacal attitudes in patients' opinions of their overall health status is assessed. A random sample of 188 patients of the general medicine clinic of the Massachusetts General Hospital completed a hypochondriasis questionnaire, perceptual & cognitive tests, & interviews. Multiple regression analysis shows that how healthy patients feel is more closely related to their fears & beliefs about disease than it is to clinical assessments of their health status. Prior work was also confirmed indicating people gauge how healthy they are by appraising their disabilities & functional impairments. 4 Tables. Adapted from the source document.

Becker, Gay & Nachtigall, Robert D. (School Nursing U California, San Francisco 94143), **Eager for Medicalisation: The Social Production of Infertility as a Disease,** *Sociology of Health and Illness,* 1992, 14, 4, Dec, 456-471.

¶ The case of infertility, a social problem recently reconceived as a disease, is used to explore the social & cultural basis of medicalization. It is maintained that placing social problems within a biomedical framework fails to provide an adequate solution for conditions that deviate from cultural norms because such norms are implicit in biomedical ideologies about the nature & treatment of diseaase. Interview data collected from 43 US couples undergoing infertility treatment in 1984/85 are used to examine: the disparity between initial expectations about ease & speed of treatment; the confrontation with medical definitions of abnormality; & the cumulative effects of treatment, in which emotional exhaustion from infertility treatment competes with the need to produce a pregnancy. It is concluded that individual efforts to eradicate feelings of abnormality for childlessness by lending medical legitimacy to an inability to conceive are undermined by a medical system in which concepts of disease & abnormality are implicit. 38 References. Bishop, Paul D. & Lipsitz, Angela (Psychology Dept Northern Kentucky U, Highland Heights 41076), **Sexual Behavior among College Students in the AIDS Era: A Comparative Study,** *Journal of Psychology and Human Sexuality,* 1991, 4, 3, 135-148.

¶ Sexual behavior in the context of increasing heterosexual risk of AIDS (acquired immune deficiency syndrome) is compared between a 1982 sample of 175 males (Ms) & 188 females (Fs), & a 1988 sample of 154 Ms & 199 Fs, all from a university in northern Ky. Contrary to expectations, survey findings reveal that sexual activity increased over the 6-year period: for both sexes, more students in the 1988 sample had engaged in intercourse, with more partners, & sexual standards were more permissive. Although there was an increase in the use of birth control, increased condom use did not appear to be a result of fear of AIDS. In fact, for Fs, condom use decreased. Overall, students' sexual, contraceptive, & verbal behavior suggested no obvious concern about AIDS. These results are compared to other research, & discussed in terms of more liberal sexual standards, & a more permissive attitude about sexual activity on the part of parents of Ms. It is concluded that the sexual revolution of the 1960s & 1970s may be continuing, despite the AIDS epidemic. 3 Tables, 21 References. Adapted from the source document.

Bond, Lydia S. (Pan American Health Organization, 525 23rd St NW Washington DC 20037), **Street Children and AIDS: Is Postponement of Sexual Involvement a Realistic Alternative to the Prevention of Sexually Transmitted Diseases?,** *Environment and Urbanization,* 1992, 4, 1, Apr, 150-157.

¶ The risks faced by street children (particularly those in Latin America) in contracting AIDS (acquired immune deficiency syndrome) or other sexually transmitted diseases are examined. Homeless children are characterized by high levels of intravenous drug use, prostitution, participation in a gay or bisexual lifestyle, & denial of the health risks accompanying these behaviors. Educational intervention with homeless youths is

limited by lack of personnel & resources, lack of statistical, epidemiological, & health information on homeless youth, & noncompliance by the homeless youths with school sessions & follow-up services. Preventive health services culturally specific to the country in which they will be implemented must be designed to combat this growing problem. Adapted from the source document.

Brody, Baruch (Center Ethics/Medicine/Public Issues Baylor Coll Medicine, Houston TX 77030), **Special Ethical Issues in the Management of PVS Patients,** IM *Law, Medicine and Health Care*, 1992, 20, 1-2, spring-summer, 104-115.

¶ Noting the general medical consensus about decision making at the end of life, five bioethical issues regarding patients in a persistent vegetative state (PVS) who are not terminally ill are discussed: whether (1) PVS patients are really dead, (2) artificial nutrition & hydration can be withheld, (3) life-sustaining therapy is medically inappropriate, (4) ordinary standards are applicable to PVS patients, & (5) scarce resources should be spent on their care. Concluding that PVS patients are "nondead nonpeople," it remains a case-specific matter whether nutrition & life-prolonging therapy should continue or be withheld & whether issues of funding & human dignity should enter into the equation. M. Maguire

Caldwell, John C., Orubuloye, I. O. & Caldwell, Pat (Health Transition Centre Australian National U, Canberra ACT 2601), **Underreaction to AIDS in Sub-Saharan Africa,** *Social Science and Medicine*, 1992, 34, 11, June, 1169-1182.

¶ Both governments & communities in sub-Saharan Africa have inadequately responded to the short- & long-term mortality for AIDS (acquired immune deficiency syndrome). Government reasons for underreaction stem from fear of losing tourist revenues, sensitivity to intruding on private matters, lack of confidence in AIDS statistics, & viewing AIDS as a problem from & for "foreigners." Also, African governments are still skeptical of the usefulness of biomedicine to treat AIDS. A more fundamental reason for the governmental underreaction, however, is the lack of pressure from the populace about AIDS. Community reasons for underreaction relate to the population's traditional religious beliefs, reinforced by those of the newer Christianity & Islam. In the traditional belief system, death is controlled by destiny, so that AIDS is seen as a divine punishment, possibly mediated by witchcraft. Belief in witchcraft combines with religious injunctions against excessive sexual activity to restrain AIDS victims from seeking help or even talking about AIDS. Stoicism in the face of death & belief in the afterlife also contribute to underreaction. As a result of all these factors, African governments have not pressured international resources for help, & the international organizations have been reluctant to offend the governments by unsolicited intervention. 80 References. Christensen, Alan J., Smith, Timothy W., Turner, Charles W., Holman, John M., Jr., Gregory, Martin C. & Rich, Martina A. (Dept Psychology U Utah, Salt Lake City 84112), **Family Support, Physical Impairment, and Adherence in Hemodialysis: An Investigation of Main and Buffering Effects**, *Journal of Behavioral Medicine*, 1992, 15, 4, Aug, 313-325.

¶ Questionnaire data from 81 in-center & home hemodialysis patients followed by the U of Utah Nephrology Dept are used to investigate the main & interactive effects of social support in the family & illness-related physical impairment on patient compliance. Results indicate that patients holding perceptions of a more supportive family environment exhibit significantly more adherence to fluid-intake restrictions than do patients reporting less family support; family support is not associated with adherence to dietary restrictions. The effect of family support on fluid-intake adherence is not moderated by level of physical impairment. This pattern suggests that the influence of support on adherence is more attributable to a main or direct effect, as opposed to a buffering process in the face of increased physical impairment. 2 Figures, 31 References. Cline, Rebecca J. Welch, Johnson, Sarah J. & Freeman, Kim E. (Dept Communication Processes U Florida, Gainesville 32611), **Talk among Sexual Partners about AIDS: Interpersonal Communication for Risk Reduction or Risk Enhancement?**, *Health Communication*, 1992, 4, 1, 39-56.

¶ Whether heterosexual college students followed advice from the Surgeon General & American College Health Assoc to talk with their sexual partners about acquired immune deficiency syndrome (AIDS), what triggered discussion, & why students who desired to talk about AIDS failed to do so were investigated with data collected by open-ended questions as part of a survey of 588 randomly selected undergraduate students in a major university in the southeastern US. Although 66% of the heterosexual & sexually experienced respondents talked with their partners about AIDS, only 33% discussed safer sex topics, & only 6% discussed condom use. Discussion among general AIDS talkers usually was triggered by media, casual conversation, & education efforts, & by sexual encounters & fear among safe sex talkers. Reasons given for not talking about AIDS with a potential sexual partner concerned the potential threat to the sexual encounter & self-image. It is concluded that unless talking about AIDS leads to condom use, the advice from public health officials & health educators may enhance rather than diminish risk. Tables, 38 References. Coppo, P., Pisani, L. & Keita, A. (Centro sperimentale educazion sanitaria, CP 1435 Perugio Italy), **Perceived Morbidity and Health Behaviour in a Dogon Community**, *Social Science and Medicine*, 1992, 34, 11, June, 1227-1235.

¶ Distance to health centers, hygiene, education, socioeconomic status & episodes of morbidity in the last 6 months were assessed in interview with members of 179 households in Bandiagara District, Mali. Self medication was reported to be the most common method of treatment o illness overall; outside treatment was used only in cases of serious illness Method for treatment of illness (none, self-medication, or exterior treatment) was related to socioeconomic status, hygiene, & education level with poorest households resorting more often to traditional remedies Hygiene was inversely related to illness rates, but distance to health centers was not related to the method of treatment. Type of practitioner (traditional vs cosmopolitan) was strongly related to illness type; "spiritual" illnesses tended to be treated by traditional therapists. Five case studies illustrate these practices. 7 Tables, 6 Figures. Adapted from the source document.

Croft, Candace A. & Sorrentino, Mary Claire (American Academy Pediatrics, 141 NW Point Blvd Elk Grove IL 60009-0927), **Physician Interaction with Families on Issues of AIDS: What Parents and Youth Indicate They Desire**, *Health Values*, 1991, 15, 6, Nov-Dec, 13-22.

¶ For health professionals to fulfill an educator role about acquired immune deficiency syndrome (AIDS) requires implementation of a focused approach that fits the parameters of the office visit (ie, limited office time & patient interaction). A needs assessment of AIDS knowledge & educational preferences is reported, in which surveys & focus group interviews were conducted with parents, youth, & school professionals (total N = 738) in Seattle, Wash. Results indicate that youth have misinformation about AIDS, ask AIDS questions of parents & school professionals, & desire to learn more about AIDS. Health professionals were perceived as credible sources of AIDS education; recommendations for effective education are offered. 6 Tables, 14 References. Adapted from the source document.

Daniels, Norman (Dept Philosophy Tufts U, Medford MA 02155), **HIV-Infected Health Care Professionals: Public Threat or Public Sacrifice?**, *The Milbank Quarterly*, 1992, 70, 1, 3-42.

¶ An overview of the ethical controversy surrounding the guidelines established by the Centers for Disease Control (CDC) & American Medi

cal Assoc (AMA) for restricting the practice of HIV (human immunodeficiency virus)-infected health professionals. It is argued that this debate centers on the issue of prioritizing the rights of infected workers vs those of patients. Despite the low risks of transmission, the concerns of patients should not be dismissed as irrational, nor can the dispute about rights be avoided by claiming with the AMA that professionals have obligations to refrain from imposing "identifiable risks," however low, on patients. Nevertheless, allowing the full exercise of patient rights, either by giving patients the opportunity to know the risks they face & to switch providers, or by removing infected providers (compulsory switching), would also be detrimental to service providers. It is concluded that these guidelines be rejected & other infection control measures developed. 53 References. Adapted from the source document.

De Jong, Wouter M. (National Committee AIDS Control, Polderweg 92 NL-1093 KP Amsterdam Netherlands), **Policy on AIDS and Drug Users: The State of Affairs in The Netherlands,** *Health Promotion International,* 1991, 6, 4, 257-261.

¶ After briefly reviewing the distribution & ethnic composition of drug users in the Netherlands, the Dutch policy of culturally integrating drug problems into society is described. Measures include decriminalization of possession of marijuana, drug treatment institutions, & municipal health services. AIDS (acquired immune deficiency syndrome) prevalence (total infected 1,531) among drug users was 8.8% in Jan 1991. Data on HIV (human immunodeficiency virus) infection among drug users, available only for Amsterdam, reveal a prevalence of 31%-34% in 1986/87. Policy measures for HIV/AIDS risk reduction, prevention, & care are described. Issues in 1991 include a reassessment of prevention policies, improving needle & syringe exchange/distribution programs, encouraging drug users to form AIDS-oriented organizations, & integrating AIDS care into general hospitals. 2 Tables, 2 Figures, 12 References. I. Shagrir

Dean, Kathryn (Instit Social Medicine U Copenhagen, DK-2100 Denmark), **Double Burdens of Work: The Female Work and Health Paradox,** *Health Promotion International,* 1992, 7, 1, 17-25.

¶ A discussion of problems faced by women coping with the double workloads of family care & paid employment, based on interviews regarding child care & domestic work burdens conducted in 1980 with 450 adults in Denmark. Findings reveal women still have major responsibility for child care & housework regardless of their employment status. Furthermore, statistically significant independent relationships were found between workloads in the family & symptoms of illness among women. The persistence of traditional gender roles was also suggested by the findings regarding network variables & male symptoms of illness. The health promotion implications of the findings are discussed. 4 Tables, 2 Figures, 29 References. Adapted from the source document.

Dougherty, Charles J. (Creighton U, Omaha NE 68178), **An Axiology for National Health Insurance,** UM *Law, Medicine and Health Care,* 1992, 20, 1-2, spring-summer, 82-91.

¶ Four ethical values pertinent to the debate about health care reform are examined: freedom, equality, happiness, & fairness. It is argued that the main value constraint in achieving any form of national health insurance is the exaggerated emphasis Americans place on the value of freedom. Arguments for national health insurance based on the other three values are developed, & it is concluded that a new balance must be achieved in the relationship among these values. This is illustrated by reference to the requirements of three reform alternatives: market-based, employer-mandate, & a government-run insurance program. AA

Elkeles, Thomas & Seifert, Wolfgang (Forschungsgruppe Gesundheitsrisiken & Präventionspolitik Wissenschaftzentrum Berlin Sozialforschung, D-1000 30 Federal Republic Germany), **Arbeitslosigkeit und Gesundheit. Langzeitanalysen mit dem Sozio-Ökonomischen Panel** (Unemployment and Health. Longitudinal Analyses with the Socioeconomic Panel), *Soziale Welt,* 1992, 43, 3, 278-300. (GER)

¶ An investigation of the relationship between unemployment & poor health, based on 1984-1988 longitudinal interview data from 5,516 West Germans, ages 18-64, as described in U. Hanefeld's *Das Sozio-okonomische Panel,* ([The Socioeconomic Panel] Frankfurt, 1987), supplemented by a literature review. Results show that controversy exists as to whether poor health is a cause or result of unemployment. Analysis of the new data suggests that unemployed people suffered more health problems than their employed peers, but those with poor health were more likely to be out of work than those who were healthy. It is concluded that poor health is not a cause of unemployment, but rather, of its prolongation. 6 Tables, 61 References. M. Meeks

England, Stephanie Legg & Evans, Jeremy (Dept Psychiatry & Behavioural Medicine Östmarka Hospital, PO Box 3008 Lade N-7002 Trondheim Norway), **Patients' Choices and Perceptions after an Invitation to Participate in Treatment Decisions,** *Social Science and Medicine,* 1992, 34, 11, June, 1217-1225.

¶ Earlier research has indicated that patients who feel they have some control over their treatment have better treatment outcomes. Examined here are responses of 143 patients in a cardiovascular risk management clinic to an invitation to make a decision about their treatment. Ss' choices of the target behavior for their behavior-change treatment were highly predictable from their state of health, reasons for coming to the clinic, what behaviors they were told they were at risk from, & contacts with health workers. Their reported degree of control over the decision varied considerably, being negatively related to blood pressure & positively related to the degree of control they believed they had over their health in general. 4 Tables. Estermann, Josef (Abteilung Epidemiologie & Infektionskrankheiten Bundesamt Gesundheitswesen, CH-3097 Bern Switzerland), **Epidemien im Institutionalisierungsprozess des öffentlichen Gesundheitswesens** (Epidemics and the Institutionalization Process of the Public Health Sector), *Schweizerische Zeitschrift für Soziologie/Revue Suisse de sociologie,* 1992, 18, 2, 329-337. (GER)

¶ The roots of public health (PH) institutions are traced to early urban communities, where they consisted of quarantine & the setting of health norms for the general public. The process of PH institutionalization was driven by: (1) the public, as represented by mass media or community opinion; (2) public offices; & (3) political endeavors. Worldwide institutionalization of the PH sector was reached early in this century, based on two patterns: the catastrophic, & the integration models. The catastrophic model prevailed in the cholera epidemics of nineteenth-century Western Europe & even the 1963 salmonella typhi outbreak in Switzerland. On the other hand, the UK handled the 1931/32 cholera epidemic using an early integrational model. These models are considered in an analysis of reactions to the acquired immune deficiency syndrome epidemic in industrialized countries. It is concluded that there is a direct link between the degree of institutionalization & the recurrence of epidemics, but there is also a constant, which increases or stabilizes the degree of institutionalization in times without epidemics. 4 Figures, 8 References. Modified AA

Farquhar, Clare (Thomas Coram Research Unit U London, WC1E 7HU England), **Safer Teaching or Safer Sex? Primary Teaching in the Age of HIV/AIDS,** *Children & Society,* 1990, 4, 3, autumn, 293-303.

¶ Findings of a 1-year study conducted at the Thomas Coram Research Unit, London Instit of Education, England, in which observational & other data were obtained for students ages 8-11, their parents, & teach-

ers & administrators at 3 London schools (N of Ss not specified), are drawn on to examine the relevance of HIV/AIDS (human immunodeficiency virus/acquired immune deficiency syndrome) for primary-age children, their understanding of the disease, & the role of their parents & teachers in increasing this understanding. Results show that HIV/AIDS has become part of children's daily environment, through the media & through their own increasing vulnerability to infection. Children's understanding about HIV/AIDS, especially concerning means of transmission, varied widely, & tended to mirror that of adults. For primary teachers, two theoretical approaches to providing information about HIV/AIDS are discussed: proactive & reactive. However, teachers' roles in this process are limited by legislation, school policy, parents, & their own personal beliefs. Recommendations are made for supporting teachers in this effort. 14 References. Adapted from the source document.

Gallagher, Timothy J. & Petersen, James C. (Instit Social Research U Michigan, Ann Arbor 48106-1248), **Patterns of HIV-AIDS Knowledge and Attitudes among Michigan Adults: Implications for Public Health Education,** *Sociological Practice Review,* 1992, 3, 4, Oct, 251-257.

¶ Telephone survey data obtained in 1990 from a statewide sample of 2,395 Mich adults are used to explore the interrelationships of demographic variables & knowledge of & attitudes toward HIV/AIDS (human immunodeficiency virus/acquired immune deficiency syndrome). Bi- & multivariate analyses reveal that most demographic variables show significant patterns of relationship with both HIV/AIDS knowledge & attitudes. However, large inconsistencies are evident between knowledge & attitudes with subgroup risk, based on known rates of infection in those subgroups. It appears that education of the public with regard to HIV/AIDS has favored the majority group. Public health education implications are discussed. 5 Tables, 1 Appendix, 25 References. Adapted from the source document.

Garland, Michael J. (Center Ethics Health Care Oregon Health Sciences U, Portland 97201), **Justice, Politics and Community: Expanding Access and Rationing Health Services in Oregon,** *Law, Medicine and Health Care,* 1992, 20, 1-2, spring-summer, 67-81.

¶ An account of the process Ore has developed since 1989 for prioritizing health services to establish rational budgets for Medicaid & health insurance programs aimed at uninsured citizens. The relevance of Ore's effort to the issue of the US's move toward a universal guarantee of basic health care is discussed, & three recurrent ethical debates are investigated: the fairness of allocation policies that initially affect health care programs for the poor; the interplay of politics & ethics in the rationing of health services; & the role of community participation in shaping the ethics of complex public policy choices. Debate surrounding the justice of the Ore plan is reviewed, concluding that the plan's fairness lies in its being an intermediate step that provides a better immediate situation for the poor while forming a basis for wider, long-term health care reforms. 1 Table. Gerhardt, Uta (Alicenstr 6, D-6300 Giessen Federal Republic Germany), **Gegenwartsdiagnose als Thema soziologischer. Medizinkritik** (The Diagnosis of Present Time as a Sociological Theme. Critique of Medicine), *Schweizerische Zeitschrift für Soziologie/Revue Suisse de sociologie,* 1992, 18, 2, 285-310. (GER)

¶ An attempt to sensitize medical sociologists to the fact that their seemingly atheoretical approach to reality contains an implicit theory of modernity–one of cultural pessimism. It is likened to that of Karl Mannheim, whose sociology of knowledge as well as sociology of planning contained the diagnosis of the present as a crisis, & the idea that sociology could help to solve the crisis of modern society. With respect to four groups of writings & research in medical sociology, implicitly aligned with four paradigms of sociological theory, these aspects of the medical-sociological endeavor are shown. Readers are reminded tht cultural criticism against modern society was a part of the "politics of cultural despair" (Stern, Fritz, *The Politics of Cultural Despair,* New York: Anchor, 1961) anticipating German fascism in the 1920s & early 1930s. 63 References. Gillman, Ruth (School Social Administration Temple U, Philadelphia PA 19122), **From Resistances to Rewards: Social Workers' Experiences and Attitudes toward AIDS,** *Families in Society,* 1991, 72, 10, Dec, 593-601.

¶ Using questionnaire data for 353 social work practitioners in an East Coast city, professionals' attitudes, knowledge, & experiences with HIV/AIDS (human immunodeficiency virus/acquired immune deficiency syndrome) are investigated. Four attitudinal domains, including fear of persons with AIDS (PWAs), fear of homosexuals, negative attitudes toward intravenous (IV) drug users, & fear of death, were measured by Likert-type scales. Despite significant interest & concern by social workers about the subject of AIDS, the findings reveal that social workers have many fears & misconceptions about AIDS that might impede empathic & competent service delivery to clients. While the presentation of scientific facts in HIV/AIDS training is necessary, it is suggested that the participants should have an opportunity to examine & acknowledge their underlying fears & resistances. Training must also address discomfort about sexuality & homosexuality, negative attitudes about IV drug users, sensitivity to cultural differences, & awareness of the effects of countertransference issues. The results additionally emphasize the critical need for social workers to address their fears about death & their own mortality. 6 Tables, 21 References. Adapted from the source document.

Glantz, Leonard H., Mariner, Wendy K. & Annas, George J. (School Public Health Boston U, MA 02118-2394), **Risky Business: Setting Public Health Policy for HIV-Infected Health Care Professionals,** *The Milbank Quarterly,* 1992, 70, 1, 43-79.

¶ US Senate proposals regarding the mandatory HIV (human immunodeficiency virus) testing of health care professionals & subsequent disclosure of results to patients were provoked by the case of Kimberly Bergalis & four other patients apparently infected with HIV during the course of dental treatment. It is argued that these proposals resulted from an inability to evaluate appropriately the infinitesimal risk of HIV transmission from practitioner to patient. The proposals also resulted from an effort to create risk prevention policy without appreciating the distinction between regulating things or procedures, which have no human rights, & regulating people, who have rights that should not be infringed on without serious justification. It is concluded that the proposed restrictive policies are not justified because they do nothing to prevent the spread of HIV, & they cause unnecessary & substantial harm to health care practitioners. 50 References. Glass, Thomas A. & Maddox, George L. (School Medicine Yale U,

New Haven CT 06520), **The Quality and Quantity of Social Support: Stroke Recovery as Psycho-Social Transition,** *Social Science and Medicine,* 1992, 34, 11, June, 1249-1261.

¶ To examine psychosocial factors in recovery from stroke, 44 patients were followed for 6 months following first stroke. Growth-curve analysis was utilized to examine the impact of three types of social support: emotional, instrumental, & informational. While all were shown to be significantly related to recovery of functional capacity, substantial differences were found in the nature of those effects. The impact of social support did not appear during the first month of rehabilitation, indicating the importance of longitudinal designs. Patients reporting high levels of emotional support showed dramatic improvement, even those with the lowest baseline functional status. Instrumental support was most closely related to positive outcomes when provided in moderate amounts. The effect of informational support was mediated by disease severity. 5 Tables, 3 Figures. Green, Edward C. (2807 38th St NW, Washington DC 20007), **Sexually Transmitted Disease, Ethnomedicine and Health Policy in Africa,** *Social Science and Medicine,* 1992, 35, 2, July, 121-130.

¶ Sub-Saharan Africa has high prevalence rates of traditional sexually transmitted diseases (STDs), eg, gonorrhea & syphilis, & if accurate seroprevalence surveys were done, it would probably have the highest human immunodeficiency virus (HIV) seropositive incidence in the world. Unlike the pattern in the West, AIDS (acquired immune deficiency syndrome) is primarily a heterosexually transmitted disease in Africa, largely because of the prevalence of other untreated or improperly treated STDs. However, while lowering the incidence of STDs would curtail the spread of HIV infection, this goal is problematic because most STD cases are never presented at biomedical health facilities; rather, they are presented to traditional healers. Participant observation & interview data collected 1981-1985 from 20 herbalists & diviners in Swaziland are used to show that the ultimate cause of several common STDs is believed to be the violation of norms governing sexual behavior, requiring traditional rather than biomedical treatment. Traditional healers therefore need to be a central part of any scheme to lower the incidence of STDs. 1 Table, 52 References. Adapted from the source document. Harper, Phillip Brian (Harvard U, Cambridge MA 02138), **Eloquence and Epitaph: Black Nationalism and the Homophobic Impulse in Responses to the Death of Max Robinson,** *Social Text,* 1991, 28, 68-86.

¶ The AIDS (acquired immune deficiency syndrome)-related death of black network newsanchor Max Robinson is discussed to illuminate the discursive impediments to effective AIDS education in African-American communities. After first examining the discourse of the news media as deployed by Robinson & others to show how it simultaneously invokes & yet effectively suppresses black male sexuality as an element in Robinson's persona & as a factor in his success as newscaster, the operation in contemporary African-American culture of a powerful homophobia that derives from the black cultural nationalism of the 1960s is traced, & homophobia identified as a primary source of many black communities' resistance to discuss AIDS, which is strongly associated with male homosexual activity. Thus it is demonstrated that influential discursive practices in both the dominant news media & African-American communities overlap to suppress discussion of the full range of sexual activity engaged in by blacks, particularly black men, which undermines the efficacy of AIDS educational programs. The discursive practices that have shaped discussion of AIDS thus far must be reformulated to meet the urgent needs of African Americans. Harvey, Ian & Chadwick, Ruth (Coll Medicine U Wales, Cardiff CF1 3NW), **Compensation for Harm: The Implications for Medical Research,** *Social Science and Medicine,* 1992, 34, 12, June, 1399-1404.

¶ As a result of a minor modification in Jan 1990 of the UK's negligence-based system of medical compensation, government Health Authorities now accept full vicarious liability for the "negligent (but not other) actions" of employed clinicians. Bodies such as the Royal Coll of Physicians, however, have strongly influenced locally established research ethics committees toward favoring no-fault compensation for harm resulting from medical research. The conflict between these two approaches has caused considerable anxiety. There has been particular concern about the possible discouragement of non-commercially sponsored research. Compilation of data for research in this area is strongly recommended. 2 Tables, 13 References. Adapted from the source document.

93Z8660

Herpin, Nicolas & Paterson, Florence (49 rue Université, F-75009 Paris France), **La Greffe de rein en France: la communauté des transplanteurs comme acteur intégrateur** (Kidney Transplants in France: The Community of Transplant Surgeons as a Centralized Actor), UM *Sociologie du Travail,* 1992, 34, 3, 315-329. (FRE)

¶ French transplant surgeons are associated in France Transplant, a hegemonic organization that centralizes supply & demand of organs. Examined here is the special role of French transplant surgeons, who mediate between patients, families, donors, other physicians, & public authorities. The organization's mode of operation is described, & its performance is discussed, in reference to social equity exercised by transplanters, commitment to public service, treatment of medical tourism, & prioritization of transplant receivers according to medical criteria. Transplant procedures in the US & France are also compared, 1 Figure, 11 References. Adapted from the source document.

93Z8661

Howe, Lawrence (Division Humanities & Social Sciences California Instit Technology, Pasadena 91125), **A Text of the Times: The NAMES Project,** *Uncoverings,* 1991, 12, 11-31.

¶ Although not validated by the *Guinness Book of World Records,* the NAMES Project's AIDS (acquired immune deficiency syndrome) Memorial Quilt is, undeniably, the largest collective needlework project ever produced. More important than its striking physical dimensions, however, is the quilt's social textuality. The quilt, therefore, is discussed both from within & without in order to examine how it reflects, extends, departs from, & reinterprets the ideological assumptions of US traditions of quilting & representation. Questions considered include: why the memorial project takes the specific form of a quilt, how the project engages with the kinds of turmoil & insights it embodies, & how challenges that critics have raised about the responses & actions of viewers can be interpreted. In addition, the literal construction of the quilt is analyzed, ie, what materials are used & how to "read" the sentiments these materials imply. 4 Figures. M. Maguire

Hunte, Pamela A. & Sultana, Farhat (Dept Anthropology U Connecticut, Storrs 06268), **Health-Seeking Behavior and the Meaning of Medications in Balochistan, Pakistan,** *Social Science and Medicine,* 1992, 34, 12, June, 1385-1397.

¶ Health-seeking behaviors in the area of mother & child health were examined for villagers in northern Balochistan, Pakistan, including home-based, indigenous, & cosmopolitan. Analysis of survey data from 65 households indicates use of several care options for a single episode. Illness episodes shows that the majority of cases obtain treatment from different medical systems for a single episode. Interest in medications takes precedence over practitioners, & the meaning the villagers attach to such substances is explored. Long-established patterns of behavior relating to indigenous medicine continue even when cosmopolitan medicine is utilized. Findings help explain problems in utilization of cosmopolitan pharmaceuticals & delineate areas for future health program activity. 5 Tables, 3 Figures. Adapted from the source document.

Jacobson, Jeffrey M., Worner, Theresa M., Sacks, Henry S. & Lieber, Charles S. (Infectious Diseases Section Bronx Veterans Affairs Medical Center, 130 W. Kingsbridge Rd NY 10468), **Human Immunodeficiency Virus and Hepatitis B Virus Infections in a New York City Alcoholic Population,** UM *Journal of Studies on Alcohol,* 1992, 53, 1, Jan, 76-79.

¶ Alcoholics have previously been reported to have an increased susceptibility to hepatitis B virus (HBV) infection, as transmitted in a similar fashion as human immunodeficiency virus (HIV). Here, results of antibody testing & questionnaire data are used to examined HIV & HBV prevalence & associated risk factors among consecutive in- & outpatient alcoholics residing in New York City. Of these alcoholics, 19 (13%) individuals were HIV positive, 57 (40%) were HBV seropositive. Intravenous (IV) drug use & sexual contact with an IV drug user were the most important risk behaviors for HIV acquisition, with large numbers of partners & anal heterosexual intercourse being lesser factors. The only significant risk behavior determined for HBV infection was IV drug use. These high-risk behaviors did not appear to be related to episodes of alcoholic intoxication. However, it is conceivable that alcoholism may, in other ways, affect susceptibility to HIV infection. 4 Tables, 36 References. Adapted from the source document.

James, Nicky (Dept Nursing & Midwifery Studies U Nottingham, NG7 2RD England), **Care = Organisation + Physical Labour + Emotional Labour,** *Sociology of Health and Illness,* 1992, 14, 4, Dec, 488-509.

¶ Observation data at a hospice in GB are used to identify the component parts of carework as organization & physical & emotional labor. Specifically, it is shown how the interrelation & balance of the component elements of care differ between women's domestic carework & that of the hospice nurses. It is argued that family care has been a model for hospice care but that division of labor in hospices, which replicates hospital labor divisions, results in an inflexibility in hospice care that is incompatible with the family model. It is also suggested that emotional labor is likely to be increasingly recognized as part of health care but that the concept of "total care" needs to be questioned. 89 References. Jenks, Richard J. (Dept Sociology Indiana U Southeast, New Albany 47150), **Attitudes, Perceptions, and Risk-Taking Behaviors of Smokers, Ex-Smokers, and Nonsmokers,** *Journal of Social Psychology,* 1992, 132, 5, Oct, 569-575.

¶ An examination of attitudes & perceptions of cigarette smoking & risk-taking behaviors of smokers, nonsmokers, & exsmokers, based on analysis of questionnaire data collected from 479 US adults. Satisfaction with life & health was also explored. Results show that smokers were greater risk-takers, perceived their smoking as physical & psychological addiction, & expressed less satisfaction & control than non- & exsmokers. Smokers who denied the health risks of smoking did not differ from non- & exsmokers on satisfaction or control [illegible]tions. 3 Tables, 11 References. Adapted from the source document.

Kaskutas, Lee & Greenfield, Thomas K. (Medical Research Instit San Francisco, 2000 Hearst Ave Berkeley CA 94709-2176), **First Effects of Warning Labels on Alcoholic Beverage Containers,** *Drug and Alcohol Dependence,* 1992, 31, 1, Oct, 1-14.

¶ An investigation of public awareness of health warning labels on alcoholic beverage containers, required in the US since 1989, & subsequent changes in relevant knowledge, attitudes, & behavior. Telephone interview data from random samples of adults nationwide 6 months prior to & 6 months after the enactment of the warning label law (total N = 4,

006 respondents (Rs)) reveal that 20+% of Rs report having seen the labels 6 months after their introduction. Greater proportions of key target groups, eg, heavy drinkers & young men at risk for drunk driving, reported seeing the warnings. No statistically significant changes in knowledge of alcohol-related health risks were reported, save for knowledge about 2 risks not included on the warning labels. After controlling for demographics & alcohol consumption, Rs who saw the warning labels were significantly more likely to report several behaviors indicative of heightened awareness of, & caution regarding, the hazards of drinking & driving & of drinking during pregnancy, both of which are specified on the warning labels. 3 Tables, 2 Figures, 21 References. Kirchgaessler, K. U. (Medical School Justus-Liebig-U Giessen, D-6300 Federal Republic Germany), **Illness Theory and Illness Identity: Explaining Compliance Behavior of Epileptic Patients,** *Research in Community and Mental Health*, 1992, 7, 201-235.

¶ Concepts of "illness theory" & "illness identity" were utilized to study compliance with a medical therapy regime for 9 female & 7 male idiopathic epileptic outpatients at a West German clinic, determined by interview data & medical records. The patients were interviewed twice, 6 months apart, & their discourse sociologically interpreted. From their single cases, medical & life-world illness theory types, & central & peripheral illness identities were developed. Patients fell largely into two groups: one espoused a formal medical theory about the epilepsy, which was central to their self-identity, & had high compliance with their medical regime; the other held theories in which the illness was peripheral to their self-identity, & had low compliance with their medical regime. The former were more educated & urban, & the latter less educated & rural. How the type of patient interacts with the physician's treatment of the case is discussed. 6 Figures, 1 Appendix, 34 References. M. Pflum

Koifman, Rosalina Jorge, Quinhões, Eleonora Pati, Monteiro, Gina Torres Rego, Rodrigues, Regina & Koifman, Sergio, AIDS em mulheres adultas no município do Rio de Janeiro (AIDS in Adult Women in the Municipality of Rio de Janeiro), *Cadernos de Saúde Pública*, 1991, 7, 2, Apr-June, 232-250. (POR)

¶ A study is presented of the epidemiological characteristics of AIDS (acquired immune deficiency syndrome) among women in Rio de Janeiro, Brazil, based on questionnaire data from victims (N = 180, ages 14+). Of the 3,807 reported cases of AIDS as of 30 May 1990, 429 were women. A comparative analysis of data from Rio, the whole of Brazil, & Canada shows that, in Brazil, AIDS transmission in females occurs primarily through intravenous drug usage & contaminated blood transfusions, while in Canada, transmission is more common through sexual contact. Within Rio, the highest incidence of AIDS is in the neighborhoods of Portuaria & Praça da Bandeira. The most common symptoms include candida, tuberculosis, pneumonia, toxoplasmosis, cytomegalovirosis, & herpes. Questions of AIDS control are discussed. 11 Tables, 1 Graph, 23 References. Adapted from the source document.

Kokkedee, William (De Brauw Blackstone Westbroek Strawinskylaan 3115, NL-1077 ZX Amsterdam Netherlands), **Kidney Procurement Policies in the Eurotransplant Region,** *Social Science and Medicine*, 1992, 35, 2, July, 177-182.

¶ In the five countries (Belgium, Netherlands, Luxembourg, Germany, & Austria) cooperating in Eurotransplant (the largest transplant agency in Europe), systems of both "opting in" (OI) & "opting out" (OO) kidney procurement policies have been implemented. The OI system requires consent from either the donor or the next of kin; the OO system permits organ retrieval unless the donor has objected. Here, the relation between these procurement policies & kidney availability in the Eurotransplant region is examined. The OO system appears to be more favorable to kidney procurement than the OI system. Approaching the next of kin is an important barrier for kidney procurement in the OI system, but fails to appear under OO. Also considered is the introduction of the OO system in countries now applying OI. 1 Table, 2 Figures, 16 References. Adapted from the source document.

Lachmund, Jens (U Bielefeld, D-4800 Federal Republic Germany), **Die Erfindung des ärztlichen Gehörs. Zur historischen Soziologie der stethoskopischen Untersuchung** (The Invention of the Physician's Ear: On the Historical Sociology of the Stethoscopic Examination), *Zeitschrift für Soziologie*, 1992, 21, 4, Aug, 235-251. (GER)

¶ Proceeding from a sociological conception of culture, the introduction of stethoscopic medical diagnosis is examined in the context of changes in local medical practices. The first primitive stethoscope was introduced by Laennec in Paris, France, in 1818. By the late nineteenth century, use of the stethoscope had replaced "bedside medicine" diagnosis based almost entirely on interpreting the patient's discourse; the stethoscope advanced the emergence of modern hospital medicine, in which data provided by diagnostic tests replaced patient discourse as the chief source of information about symptoms of illness. The institutionalization of the stethoscopic examination as a generalized professional practice redefined the nature of illness & broadened the social scope of medicine. 73 References. Lambright, W. Henry & O'Gorman, Mark J. (Syracuse U, NY 13244), **New York State's Response to AIDS: Evolution of an Advocacy Agency,** *Journal of Public Administration Research and Theory*, 1992, 2, 2, Apr, 175-198.

¶ The creation of the state-sponsored AIDS (acquired immune deficien-

cy syndrome) Instit (AI) in New York City in 1983 as an organizational innovation for response to the AIDS crisis is examined, particularly its evolution from an extension into government by the gay community to a multifocused enterprise serving the many communities that are victims of this disease. It is suggested that the AI reflected the changing face of the epidemic nationally, beginning with gays as the principal victims, whose plight was largely ignored by government. The AI was eventually absorbed into the mainstream governmental health establishment, which could more effectively respond to the enormity of the epidemic. It is concluded that the AI exemplifies a generic entity in public administration, & that its weaknesses as an advocacy organization also reveal the limits of bureaucratic entrepreneurship. 31 References. Larson, James S. (U Arkansas, Little Rock 72204), **Predictors of International Health Status,** *Evaluation & the Health Professions,* 1992, 15, 3, Sept, 299-312.

¶ The Health Status Scale (HSS) is presented. Composed of three indicators measuring adult mortality & two measuring mental & social health, the HSS was created to conform to the World Health Organization definition of health as including physical, mental, & social components. It can be used as the dependent variable in a regression equation, using common predictors of health status related to health personnel, nutrition, & health facilities. Results of a regression analysis using the HSS & international health data indicate that health facilities are the most significant predictors of health status. Their significance may be due to the relationship between adult mortality & the absence of facilities to treat chronic disease in adults. 2 Tables, 33 References. Adapted from the source document. Lieban, Richard W. (Dept Anthropology U Hawaii, Honolulu 96822), **From Illness to Symbol and Symbol to Illness,** *Social Science and Medicine,* 1992, 35, 2, July, 183-188.

¶ Two aspects of the relationship between illness & social symbols are explored: symbolic features of illness conveying social meaning, & social symbol as factors that produce illness. Illness is discussed as a symbol of social beliefs, attitudes, norms, values, & other social phenomena conceptualized in relation to them. This symbolization is analyzed as it relates to various dimensions of illness that lend themselves to figurative thinking. Considered is how social symbols may attract people to behavior that puts their health at risk. Also included is an analysis of how the development of illness may be affected by the relationship between social symbols & somatization. 49 References. Adapted from the source document. Lo, Bernard (Program Medical Ethics U California, San Francisco 94143), **Ethical Dilemmas in HIV Infection: What Have We Learned?,** UM *Law, Medicine and Health Care,* 1992, 20, 1-2, spring-summer, 92-103.

¶ Current ethical & public policy challenges of the acquired immune deficiency syndrome (AIDS) crisis are discussed, including testing, using promising new therapies to treat human immunodeficiency virus infection, & protecting the partners of seropositive persons. The AIDS epidemic has rendered strict regulation of prescription drugs ineffective & stringent control over other public health measures unproductive. In addition, laypeople have proven able to master clinical research & have made explicit the value judgments that inform technical research issues. Finally, AIDS victims & advocates have helped improve clinical research & health care techniques. The AIDS crisis has heightened social awareness of medical ethics & critically challenged prevailing social assumptions about morality & justice. M. Maguire (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Long, John C. (Dept Anatomic Pathology William Beaumont Hospital, 3601 West 13 Mile Rd Royal Oak MI 48072), **Foucault's Clinic,** *The Journal of Medical Humanities,* 1992, 13, 3, fall, 119-138.

¶ It is contended that for Michel Foucault, the clinic is a mode of perception & enunciation that allows us to see & name disease & to place statements about illness among statements about birth & death (*The Birth of the Clinic: An Archeology of Medical Perception,* New York: Vintage Books, 1975). Within the clinic resides understanding of disease visible on the surface, yet hidden within the tissual depths, of an ailing patient. Foucault shows that, by the early nineteenth century, medicine was no longer a two-dimensional reading of symptoms, but a three-dimensional probing from symptomatic surface into diseased interior. The anatomical site of disorder is visible to the scrutiny of pathologist, endoscopist, or radiologist. The truth of disease, & placement of that truth in a general plan of the world are explored through consideration of the depiction of the clinic in poetry & art. Foucault's clinic is where knowledge & sickness come together in the modern period. 1 Table, 8 Figures, 28 References. AA (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Long, Patricia & Gelfand, Gloria (School Nursing State U New York, Stony Brook 11794), **Alcohol Education as Primary Prevention in Health Care,** UM *Journal of Studies on Alcohol,* 1992, 53, 2, Mar, 101-105.

¶ Designed to detect how much nurses know about the biophysiological & psychosocial components of alcohol & its pharmacological effects, survey data were collected from 298 nurses practicing at community hospitals that lack detection measures & treatment programs for chemical dependency. The findings indicate that 66% of the nurses answered demographic questions about alcoholism incorrectly & that 93% demonstrated inadequate understanding of alcohol's pharmacological properties. Because faulty knowledge about alcohol & chemical abuse can inhibit the ability of nurses to identify & assess patients at risk, recommendations for improving nursing education & practice are advanced. The need for improved basic education & continuing education programs is highlighted. 2 Tables, 13 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Martínez Salgado, Carolina, Córdova Córdova, Alejandro & Leal Fernández, Gustavo (Dept Atención Salud U Autónoma Metropolitana Xochimilco, CP-04960 Mexico), **Un acercamiento a la problemática de salud en México a fines de los ochenta** (An Approach to the Problems of Health in Mexico at the End of the Eighties), *Estudios Sociológicos*, 1991, 9, 26, May-Aug, 253-277. (SPA)

¶ Data from the first National Health Survey carried out in the 32 states of the Mexican Republic in 1986/87 are drawn on to examine the regional distribution of some indicators that characterize the socioeconomic & demographic context of the country's population at the end of the 1980s, comparing findings to those of the 1980 census. It is hypothesized that the frequency & type of pathology suffered by a population is linked to the risk factors derived from the environment & the resources available to combat diseases arising from such risks. Cluster analysis is used to construct maps of: (1) socioeconomic conditions for health; (2) the prevalence of four kinds of pathology (acute infections, chronic pathology, perinatal diseases, & violent injuries); & (3) the hospital infrastructure & the use that the population makes of it. Important regional inequalities are observed in the conditions for health, with the southern & central states being in less favorable situations than the northern states & the valley surrounding Mexico City. The most prevalent pathological conditions are acute infections, particularly respiratory ones. Analysis of the regional distribution of the four kinds of diseases shows a clear relationship to spatial location–a synthesis of geographical & cultural features–than to conditions for health. The distribution & utilization of hospital resources show a pattern that is approximately the opposite of that necessary for the conditions of health, with a low endowment & a meager utilization in the regions with the worst conditions, & more important resources & utilization in the regions with better conditions. A call is made for more efforts in the elucidation of three hidden causes in relation to the social problem of health: (A) how the relationship between risks & damages to health is modified by the socioeconomic, demographic, ecological, & psychosocial framework; (B) the real possibilities of the health sector in developing countries, immersed in countless economic pressures & international politics, to effectively face these problems; & (C) the role of the medical institution as an interpreter of these problems & as an advisor to the public administration in its search for solutions. 4 Maps, 17 References. Martins, Dulcéa Machado, Amaral, Josinéa Lima do, Dourado, Marli T. Lisboa & Gomes, Norma Cali de C., Consulta coletiva: o espaço da mulher (Group Consultation: A Space for Women), *Cadernos de Saúde Pública*, 1991, 7, 2, Apr-June, 267-283. (POR)

¶ A new method was developed to administer the Pap smear test to women at a gynecological clinic in Rio de Janeiro, Brazil, in 1988 & tested among 630 women by a 4-member team including a social worker, a nutritionist, a nurse, & a gynecologist. Strategies included an exam before each smear, evaluation of the smear result & its treatment, & group discussions about the results & topics mentioned by patients. By the end of the experiment, requests for first-time Pap smears had increased 42.7%. Additionally, there was better screening for venereal disease & an increased understanding of integral health care for women, both in terms of their own understanding of their individual state of health as well as their evaluation of the medical system. 2 Tables, 1 Appendix, 7 References. May, Carl (Dept Psychiatry U Edinburgh, EH8 9YL Scotland), **Nursing Work, Nurses' Knowledge, and the Subjectification of the Patient**, *Sociology of Health and Illness*, 1992, 14, 4, Dec, 472-487.

¶ Employing the work of Michel Foucault to understand nursing practices, the ways that nurses' accounts of their work & relationships with patients reflect a discourse of the social is explored through empirical data collected from 22 staff nurses working on acute medical & surgical wards of a general hospital in Scotland. While these accounts reflect a thoroughgoing accommodation of the importance of knowing the patient as more than an object of clinical practice & procedure, they also reveal the practical problems that must be negotiated in attempting to do so. Foucault's notion of the clinical gaze is deployed in interpreting these accounts, & the question of power & resistance in nursing work is discussed. 32 References. Adapted from the source document. McGrath, Janet W., Schumann, Debra A., Pearson-Marks, Josnie, Rwabukwali, Charles B., Mukasa, Rebecca, Namande, Barbara, Nakayiwa, Sylvia & Nakyobe, Lucy (Dept Anthropology Case Western Reserve U, Cleveland OH 44106), **Cultural Determinants of Sexual Risk Behavior for AIDS among Baganda Women**, *Medical Anthropology Quarterly (New Series)*, 1992, 6, 2, June, 153-161.

¶ Questionnaire data collected from 65 Baganda females (Fs) who tested positive for the HIV (human immunodeficiency virus) antibody & 65 who tested negative in Kampala, Uganda, are used to explore cultural rules & norms for sexual behavior & HIV-specific risk behaviors. Traditional Baganda rules for sexual behavior prohibit sex for Fs outside of marriage except in certain ritual (eg, after the birth of twins, at funerals & weddings) or economic circumstances, although males (Ms) may have multiple partners. Although Fs were found to be complying with risk reduction advice to only have 1 sexual partner, fear of AIDS (acquired immune deficiency syndrome) remains high because they fear that their partners have not reduced their sexual contacts. While the potential for risk reduction is high for Fs, cultural norms permitting Ms to have multiple partners limit Fs' ability to reduce risk by modifying their own behavior. 4 Tables, 36 References. Mechanic, David (Instit Health/Health Care Policy/Aging Research Rutgers U, New Brunswick NJ 08903), **Health and Illness Behavior and Patient-Practitioner Relationships**, *Social Science and Medicine*, 1992, 34, 12, June, 1345-1350.

¶ Since health is a product of culture & social structure, nonhealth motives in constructing health need to be considered. The routine organization & constraints of everyday settings, which are affected by variables such as socioeconomic status & education, shape health as much as do physical parameters. Education conditions illness behavior, ie, the perceptions & appraisal of symptoms & the presentation of illness to medical personnel. Physicians (MDs) who utilize a physical diagnosis model often find themselves stymied by patients who somaticize emotional problems, eg, depression. The presentation of depression as a psychologi-

cal, vs a somatic, complaint depends on the psychological, cultural, & social characteristics of the patient. The MD's own personal inclination & educational background affect whether he/she recognizes the depression, & whether the response to somatization is viewed as challenging or burdensome. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Mendes de Leon, Carlos F. (School Medicine Yale U, New Haven CT 06510), **Anger and Impatience/Irritability in Patients of Low Socioeconomic Status with Acute Coronary Heart Disease,** *Journal of Behavioral Medicine,* 1992, 15, 3, June, 273-284.

¶ The relationship between anger & impatience/irritability & acute coronary heart disease (CHD) among middle-aged men of low socioeconomic status (SES) is investigated, drawing on questionnaire & scale data from patients with myocardial infarction (MI) (N = 31) or unstable angina (AP) (N = 26), who were compared with 26 controls at a hospital in southeastern Tex. Multivariate analyses reveal that MI is associated with scales assessing "anger-out" & "impatience/irritability," particularly among patients with no previous MI. The same factors are associated with AP, but only when not preceded by a MI. No relationship is found between "trait-anger" & "anger-in" & either acute ischemic outcome. It is concluded that the overt behavioral expression of anger is related to CHD in low SES patients, & that the behavioral factors associated with acute CHD are similar for low- & high-SES men. 3 Tables, 29 References. Ortiz, Danilo, Alveiro Pedreros, J. & Melak, Sonia (Diag 49 No. 13 39, Cali Colombia), **Efectos de un taller de prevención del SIDA en u grupo de adolescentes** (The Effects of an AIDS Prevention Worksho on a Group of Adolescents), *Revista Latinoamericana d Sexología,* 1991, 6, 2, 137-150. (SPA)

¶ The effectiveness of a workshop designed to promote the prevention o acquired immune deficiency syndrome (AIDS) infection among adoles cents, using pre- & posttest questionnaire data collected from 50 work shop participants & a control group of 50 respondents in Cali, Colombia Results indicate that the workshop participants' attitudes toward AIDS prevention were significantly improved following the workshop. Th strongest barrier to improvement was denial of the seriousness of AIDS as an illness. Further research on behavior change & on the long-tern effects of such workshops is urged. 4 Tables, 6 References. Adapted fron the source document. Osborne, Thomas (Brunel U, Uxbridge Middlesex UB8 3PH England), **Medicine and Epistemology: Michel Foucault and the Liberality of Clinical Reason,** *History of the Human Sciences,* 1992, 5 2, May, 63-93.

¶ An attempt is made to rehabilitate the approach to medical rationality developed by Michel Foucault in *The Birth of the Clinic* (Sheridan-Smith, A. M. (Tr), London: Tavistock, 1973 (1963)), by connecting Foucault's analysis to the work of his teacher, Georges Canguilhem. It is contended that Foucault's book has been misinterpreted as a species of what is termed here "antimedicine," & an attempt is made to reconstruct some contemporary import from Foucault's analysis by connecting clinical reason to the political rationality of liberalism. Also, the "antimedical" culture itself is criticized, as manifested in various historical & sociological writings, arguing that the tasks of medical politics are not aided by totalizing responses to the varied evolution of medical reason 77 References. Pearsol, James A. (Ohio State U, Columbus 43212), **A Formative Audit of the ECAETC Year 1 Evaluation: The Evaluator's Response,** *Evaluation and Program Planning,* 1992, 15, 1, 91-93.

¶ A report on the first-year evaluation of an acquired immune deficiency syndrome (AIDS) program–the East Central AIDS Education & Training Center (ECAETC) project, a four-state federally funded project, providing AIDS education & training for health professionals. The evaluator's responses to key issues raised by the formative evaluation audit are outlined. Project complexity, evaluation methods & reporting, & the evaluator's role are all reviewed by the evaluator. Special emphasis is given to constraints raised by the evaluator's internal role & dilemmas concerning the importance of evaluation. The formative audit confirmed the evaluator's own experiences during the year one ECAETC evaluation, although it did not lead directly to improvements or changes in the second & third years. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Polednak, Anthony P., Flannery, John T. & Janerich, Dwight T. (Dept Epidemiology & Public Health Yale School Medicine, New Haven CT 06510), **Cervical Cancer Rates by Population Size of Towns: Implications for Cancer Control Programs,** UM *Journal of Community Health,* 1991, 16, 6, Dec, 315-323.

¶ Data from the population-based Connecticut Tumor Registry are drawn on to investigate incidence rates & standardized incidence ratios (SIRs) for invasive & in situ cervical cancers diagnosed 1982-1987, analyzed as a function of the total population size of 148 towns. Multiple regression analysis indicates that increases in SIRs for both types of cancers from medium-sized to large towns can be explained by differences in poverty prevalence or other sociodemographic variables. Nevertheless, prevention-oriented cancer screening programs could be targeted to some extent on the basis of town size category, because larger towns include large numbers of poorer & minority women with higher rates of invasive cervical cancer. SIRs for in situ cancer were significantly elevated in the largest towns (100,000+ population), & primary prevention programs could target these larger towns with a higher prevalence of poverty. 2 Tables, 23 References. Price, Laurie J. (Dept Anthropology Northern Arizona U, Flagstaff 86011), **A Medical Anthropologist's Ruminations on NIH Funding,** *Medical Anthropology Quarterly (New Series),* 1992, 6, 2, June, 128-146.

Comments, 147-152.

¶ In an examination of the National Instit of Health's (NIH) impact on anthropological investigations of illness, the social processes that shape NIH proposals at the university level are delineated. A case study of an NIH-funded university research center is used to examine physician-patient relationships in a low-income rural setting, measuring how cognitive models of illness influence those relationships. It is concluded that medical anthropology should strive to reorient federal funding so that the research program genuinely addresses social & economic factors in illness, prevention, & treatment. In **Power and Patronage in Medical Research,** Nigel Paneth (Michigan State U, East Lansing) observes that NIH should aim for an integrated view of disease & health, one that sees the role of cellular mechanisms, epidemiologic distribution, & psychosocial contexts in properly understanding disease. In **Ruminations on "A Medical Anthropologist's Ruminations on NIH Funding,"** Cheryl Ritenbaugh (U of Arizona, Tucson) contends that medical research could benefit from anthropologists' knowledge of language, culture, & biology of minority populations. In **When Social Science Confronts Medicine: "A Medical Anthropologist's Ruminations on NIH Funding,"** Barbara Cohn (Center for Research on Women & Children's Health, 1683 Shattuck Ave, Ste. B, Berkeley, Calif 94709) & Theodore Cohn argue that Price documents the tragedy of overspecialization in both the medical & the social sciences, & that her bias reflects the failure of undergraduate education perpetuated at the graduate & professional levels. 1 Table, 43 References. Quadagno, David, Harrison, Dianne F., Wambach, K. G., Levine, Philippa, Imershein, Allen, Byers, Joseph & Maddox, Kim (Dept Biological Sciences Florida State U, Tallahassee 32306), **Women at Risk for Human Immunodeficiency Virus,** *Journal of Psychology and Human Sexuality,* 1991, 4, 3, 97-110.

¶ The knowledge, attitudes, & behaviors of women at risk for contracting human immunodeficiency virus (HIV), & transmitting it through both vertical (childbearing) & lateral (sexual partner or intravenous [IV] drug usage) modes, are investigated, utilizing survey data on a sample of 620 adult nonpregnant women (50.6% black, 28.7% Caucasian, 13.4% Hispanic, & 5% Haitian) in southern Fla. Results indicate that these women had an adequate knowledge of HIV & AIDS (acquired immune deficiency syndrome), but were at high risk due to: unprotected sexual intercourse with high-risk men, IV drug usage, the practice of prostitution, & the use of various non-IV drugs that impair judgment & lower sexual inhibitions. Further analysis shows that race/ethnicity, site of recruitment, age, education level, & participation in prostitution account for only slightly more than 10% of the variation in HIV status & condom usage; thus, almost 90% of the variance remains unexplained. 1 Table, 27 References. Adapted from the source document.

Range, Lillian M. & Starling, Linda M. (Dept Psychology U Southern Mississippi, Hattiesburg 39406-5025), **Is AIDS Stigma Related to Knowledge, Gender, or Sexual Orientation?,** UM *College Student Journal,* 1991, 25, 4, Dec, 427-431.

¶ Data obtained via an evaluation scale & knowledge test from 274 introductory psychology students at a southeastern university are used to determine if AIDS (acquired immune deficiency syndrome) stigma is related to knowledge of AIDS risk behaviors, gender of a hypothetical infected person ("Pat") or respondent, or sexual orientation of "Pat." Analysis indicates that students have a moderately high knowledge of AIDS risk behaviors & a moderately low level of stigma. Significant univariate main effects indicate more stigma when (1) Pat is male (M) vs female (F), (2) respondents (Rs) are Ms vs Fs, & (3) knowledge is relatively lower. Low knowledge Rs have the most AIDS stigma toward homosexual Ms, & high knowledge Rs have the least AIDS stigma toward homosexual Fs. Increasing knowledge of AIDS risk behaviors may help diminish stigma toward AIDS victims, & Ms, since they have the most stigma, need to be the targets of educational efforts, more so than Fs. 1 Table, 15 References. Rodin, Mari (Impact Assessment Inc, 2160 Avenida De La Playa #A La Jolla CA 92037), **The Social Construction of Premenstrual Syndrome**, *Social Science and Medicine*, 1992, 35, 1, July, 49-56.

¶ It is argued that the inconclusiveness surrounding premenstrual syndrome (PMS) is symptomatic of the persistence of cultural beliefs in the production (& reproduction) of medical knowledge. The roots of these beliefs & their "naturalness" are explored in the context of Western ideas about reason, rationality, & women. Then, discussed is the ubiquity of these same cultural beliefs in contemporary scientific research on PMS & in the controversy surrounding the proposed psychiatric diagnostic category of late luteal phase dysphoric disorder. A new, anthropologically & sociologically informed approach to understanding PMS is suggested. 1 Figure, 38 References. Adapted from the source document. Rodning, Charles B. (2451 Fillingim St, Mobile AL 36617), **Coping with Ambiguity and Uncertainty in Patient-Physician Relationships: I. Leadership of a Physician**, *The Journal of Medical Humanities*, 1992, 13, 2, summer, 91-101.

¶ In a patient-physician (MD) relationship, the MD is frequently perceived in a leadership role. The patient's belief in the primary care MD (PCMD) as an authority means that the patient's loyalty will be earned only if the PCMD accepts the responsibility, duty, & obligation for continuity of care. However, in this era of technological advances in the delivery of medical care, the PCMD cannot possibly provide total care to a patient. He/she coordinates the involvement of a succession of specialists & subspecialists & renders the medical, ethical, & legal decisions. This responsibility is similar to that in a triage situation, except that the PCMD generally possesses a broader view of a patient's situation. With the PCMD responsible for continuity of care, ambiguity & uncertainty are mitigated. 4 Figures, 23 References. Adapted from the source document. Rosser, B. R. Simon (Dept Family Practice & Community Health U Minnesota, Minneapolis 55454), **The Effects of Using Fear in Public AIDS Education on the Behaviour of Homosexually Active Men**, *Journal of Psychology and Human Sexuality*, 1991, 4, 3, 123-134.

¶ Questionnaire data are used to explore the safe sex practices of 2 groups of male (M) homosexually active volunteers: 77 South Australian Ms exposed to a fear-based "Grim Reaper" public education AIDS (acquired immune deficiency syndrome) campaign, & 159 New Zealand Ms exposed to a variety of gay-sensitive, sexually positive material. At baseline, approximately 75% of both groups reported engaging exclusively in safer sex behavior. At follow-up, those exposed to the gay-sensitive material showed a significant increase to 83% in practicing safe sex behavior, while the prevalence of safer sex among those who experienced the fear-based campaign decreased dramatically to 47%. Implications of these findings for AIDS education indicate that: not all AIDS education is beneficial; campaigns directed at the general public must also impact those at highest risk; fear as an education strategy to motivate safer sex is counterproductive; & all AIDS education should be behaviorally researched & tested. It is argued that, far from assisting AIDS prevention, fear-based education campaigns are instead capable of increasing the spread of AIDS. 2 Tables, 1 Figure, 9 References. 93Z8713

Russell, John (Cornell U, Ithaca NY 14853), **Access to Experimental Therapies and AIDS**, *Dialogue*, 1991, 30, 3, summer, 399-418.

¶ The political forces generated by the AIDS (acquired immune deficiency syndrome) epidemic have created an opportunity for the review of policies & practices regarding access to experimental therapies by the terminally ill. It is argued that many recent proposals to enhance access rest on philosophically unsupportable grounds, & pose an unjustifiable threat to the public interest in finding safe & effective therapies for terminal illnesses. The analysis focuses on the work of philosopher & civil liberties activist John Dixon, whose book *Catastrophic Rights: Experimental Drugs and AIDS*, (Vancouver: New Star Press, 1990) aims to establish that patients suffering a terminal illness for which there is no generally effective treatment have a "catastrophic right" to nonvalidated experimental medical therapies; persons with symptoms indicating the near onset of an AIDS-related illness should be entitled to exercise that right. It is contended that Dixon's arguments should be viewed with some skepticism; more restraint than he acknowledges is needed in amending access to experimental therapies. S. Millett (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Rutten-Van Mölken, Maureen P. M. H., Van Doorslaer, Eddy K. A. & Rutten, Frans F. H. (Dept Health Economics U Limburg, NL-6200 MD Maastricht Netherlands), **Economic Appraisal of Asthma and COPD Care: A Literature Review 1980-1991**, *Social Science and Medicine*, 1992, 35, 2, July, 161-175.

¶ A detailed summary of the cost-effectiveness evidence revealed in twenty economic appraisals of asthma & chronic obstructive pulmonary disease care published 1980-1991 is provided, along with a discussion of relevant methodological issues. The studies comparing program costs of devlivery methods for oxygen & for aerosol bronchodilator drugs provide the most straightforward evidence in favor of the concentrator & the metered dose inhaler respectively. There also seems to be evidence in favor of hospital-based as compared to community-based home care programs Health education, especially directed at asthmatic children, seems to reduce health care costs & improve attitude, compliance behavior, & self-management skills. Information on the cost-effectiveness of pharmacotherapy & diagnostic technologies, both important interventions, was found to be totally lacking. 1 Table, 50 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z8715

Saillant, Francine (U Laval, Quebec G1K 7P4), **Les Soins en péril: entre la nécessité et l'exclusion** (The Precarity of Care Practices. Between Necessity and Exclusion), *Cahiers de Sociologie Economique et Culturelle, Ethnopsychologie*, 1992, 17, June, 55-77 (FRE)

¶ Care practices are defined in relation to their content & their diverse expressions (domestic or professional), & the articulation of them to the social production of health. Above their content, caring practices imply values & attitudes showing the importance of affective engagement & protection. As practices conceptualized as system of knowledge, the weak social recognition of caring practices is observed, in spite of anthropological evidence of their richness & their weight in the survival capacity of population. Finally, the social crisis of care practices is discussed. The analysis draws on international writings about the caring phenomena within the nursing, feminist, & social scientist perspectives. 42 References. Salzberg, Allan M., Dolins, Stanley L. & Salzberg, Carol (Dept Veteran Affairs Medical Center, Bath NY 14810), **A Multiperiod Compartmental Model of the HIV Pandemic in the United States**, *Socio-Economic Planning Sciences*, 1991, 25, 3, 167-178.

¶ A report on a time-dependent preferred risk model (which does not include potential effects of the drug AZT) with eight closed interacting populations that contract & transmit human immunodeficiency virus (HIV) that predicts the progression of the pandemic in the US. Time intervals of 1976-1982 & 1983-1986 are employed in parametric analysis of Centers for Disease Control data to estimate the course of the pandemic to the year 2000. It is found that the initial driving force was the

spike effect of higher infectivity; by 1981 the driving force was lower average infectivity coupled with a 10-year incubation period. The future course will be driven by low average infectivities & a longer duration of infectivity, which can be ameliorated by intensive efforts to identify cases, & provide education & appropriate antiretroviral therapy. 1 Table, 7 Figures, 22 References. Adapted from the source document.

Sandiford, Peter, Annett, Hugh & Cibulskis, Richard (Liverpool School Tropical Medicine, L3 5QA England), **What Can Information Systems Do for Primary Health Care? An International Perspective,** *Social Science and Medicine*, 1992, 34, 10, May, 1077-1087.

¶ The need to reform computer information systems as a way to improve health care delivery is examined. Problems associated with improved information systems are explored, including the lack of rational decision making, the expense of conventional approaches, & the slow rate of organizational evolution. Information systems can be used effectively for disease surveillance, program monitoring, & evaluation. However, what is needed is not more information, but more effective use of existing information. Adapted from the source document.

93Z8718

Schear, Stuart, AIDS in Africa, UM *Dissent*, 1992, 39, 3(168), summer, 397-398.

¶ Citing statistics compiled by the World Health Organization, the gravity of the AIDS (acquired immune deficiency syndrome) crisis in Africa is revealed. Because its spread is strongly associated with the movement of men–who, according to traditional cultural patterns, are free to have sexual relations with numerous partners–the disease among women & children is increasing dramatically. It is argued that prevention is the short-term answer to the problem; men must be convinced to wear condoms via public education campaigns & distribution efforts like those in Zaire. However, a comprehensive long-term plan for dealing with AIDS victims must also be developed & implemented as soon as possible. M. Maguire

93Z8719

Schneider, David E. & Tucker, Raymond K. (Dept Communication & Theatre Saginaw Valley State U, University City MI 48710), **Measuring Communicative Satisfaction in Doctor-Patient Relations: The Doctor-Patient Communication Inventory,** *Health Communication*, 1992, 4, 1, 19-28.

¶ Described is a valid & reliable tool that researchers & practitioners can use to evaluate doctor (MD)-patient communication, the Doctor-Patient Communication Inventory (DPCI). The DPCI's development is outlined, & results are presented of its testing with 199 college students, 222 heterogeneous adults, & 6 MDs. The DPCI factors include: relationship maintenance, professional competence, waiting time, & social etiquette. Factor structures are examined & challenges for future researchers suggested. 2 Tables, 41 References. Adapted from the source document.

Schwab, Michael, Neuhauser, Linda, Margen, Sheldon, Syme, S. Leonard, Ogar, Dale, Roppel, Charles & Elite, Anthony (School Public Health U California, Berkeley 94720), **The Wellness Guide: Towards a New Model for Community Participation in Health Promotion,** *Health Promotion International*, 1992, 7, 1, 27-36.

¶ A description of the role of community participation in developing the Wellness Guide Project, a major health promotion initiative of the State of Calif. The Guide was intended to provide information on how to stay well & where to find help on health-related topics; also, the Guide was to be sensitive to the needs of people of all ethnic & social backgrounds, & hence suitable for distribution to all Calif households. The metamorphosis of the Guides is described, from early drafts, prepared by health & welfare specialists & covering traditional behavioral risk factors, to the final product, a large-format, illustrated 80-page book, written with diverse community involvement, & addressing a wide range of personal & social topics. Telephone companies & information & referral services participated in developing a cross-referral system from the Guide to new "Community Services" listings in phone directories throughout the state. The project outcomes–a unique health education document, a noval referral system, & the beginnings of a new model for community participation in health promotion–are discussed. 5 Figures, 41 References. Adapted from the source document.

Steudler, François (Instit sociologie U sciences humaines Strasbourg, F-67084 Cedex France), **Genèse et développement de la sociologie de la santé** (Genesis and Development of the Sociology of Health), *Schweizerische Zeitschrift für Soziologie/Revue Suisse de sociologie*, 1992, 18, 2, 265-284. (FRE)

¶ It is contended that a historical dialogue has existed between sociology & medicine. Examined here is the role that the medicosocial perspective played in the birth of modern sociology, based on writings from the eighteenth & nineteenth centuries. It is suggested that the origins of sociology may be traced also in medico-administrative works & in theoretical reflections of the medical & biological model. The influence of biology & medicine on the development of sociology in the nineteenth century & on the emergence of medical sociology is discussed, focusing on the organicist analogy, evolutionary theories, & the development of public hygiene. Recent technical, scientific, & organizational transformations in the medical sciences have led to expanding research in the sociology of health, particularly in Anglo-Saxon countries. I. Shagrir

93Z8729

Stimson, Gerry V. (Centre Research Drugs & Health Behaviour, London England), **Drug Injecting and HIV Infection: New Directions for Social Science Research,** *The International Journal of the Addictions*, 1992, 27, 2, Feb, 147-163.

¶ An overview of research on the relationship between intravenous (IV) drug use & human immunodeficiency virus (HIV) infection. Infection patterns & risk factors associated with the spread of HIV among IV drug users are considered, along with factors influencing the adoption of behavior changes intended to reduce risk. It is concluded that public health prevention strategies, eg, syringe distribution & exchange programs & acquired immune deficiency syndrome outreach work, have fostered decreases in HIV-related risks among IV drug users, although the effectiveness of methadone maintenance programs remains uncertain. It is suggested that future research agendas should include work on prevention strategies & treatment. Social scientists need to address the fact that drug use patterns reflect structural factors such as poverty, unemployment, & poor housing conditions. 67 References. Strang, John, Stimson, Gerry V. & Des Jarlais, Don C. (National Addiction Centre, 4 Windsor Walk London SE5 8AF England), **What Is AIDS Doing to the Drug Research Agenda?,** *British Journal of Addiction*, 1992, 87, 3, Mar, 343-346.

¶ An introduction to a special journal issue (see related abstracts in SA 41:2) reviews the contributions of various scholars exploring the effects of human immunodeficiency virus/acquired immune deficiency syndrome (HIV/AIDS) on drug abuse research. The reprioritization of the hierarchy of research topics has allowed the reexamination of inquiries into various areas, eg, the mechanics of injecting & other risk behaviors. Social interventions against AIDS involve a number of help-seeking & therapeutic processes that also need to be studied from an interdisciplinary perspective. New areas of inquiry include relationships among drug use, sexual behavior, & HIV infection. 1 Reference. J. Sadler

Street, Richard L. (Instit Health Care Evaluation Texas A&M U, College Station 77843-4234), **Communicative Styles and Adaptations in Physician-Parent Consultations,** *Social Science and Medicine*, 1992, 34, 10, May, 1155-1163.

¶ In an investigation of pediatrician-parent communications, audiotapes from 115 consultations at a large clinic in the southwestern US were analyzed. Findings reveal that parents who were more: (1) educated asked more questions, offered more opinions, & received more verbal support from physicians (MDs); (2) worried were also more affectively expressive; & (3) verbally active received more information & directives from MDs. It is concluded that medical consultations involve personal & interactive influences that unfold according to individual characteristics & to how the parties adapt their communication style to one another. 4 Tables. Taylor, D. Wayne & Henderson, Katherine (Faculty Business McMaster U, Hamilton Ontario L8S 4M4), **AIDS and Ontario's Public Education Campaign: A Social Marketing Calamity,** *Revue Canadienne des Sciences de l'Administration/Canadian Journal of Administrative Sciences*, 1992, 9, 1, Mar, 58-65.

¶ Prevention of the spread of acquired immune deficiency syndrome (AIDS) requires changes in behavior that in turn require public education. Borrowing from the administrative sciences, the principles of social marketing are introduced as a model for behavior modification through information dissemination. Two separate public education campaigns are measured against this model: the Ontario Ministry of Health's campaign & the AIDS Committee of Toronto's campaign. Potential effects & shortcomings of each campaign are identified, & recommendations are made to improve the public education component of the war against AIDS. 11 References. Terry, Deborah J. (Psychology Dept U Queensland, 4072 Australia), **Stress, Coping and Coping Resources as Correlates of Adaptation in Myocardial Infarction Patients,** *The British Journal of Clinical Psychology*, 1992, 31, 2, May, 215-225.

¶ Patients' psychosocial adaptation to myocardial infarction is discussed, hypothesizing that high levels of perceived stress associated with the heart attack & reliance on emotion-focused coping strategies would result in poor adaptation, while high levels of self-efficacy, access to appropriate personal & social coping resources, & problem-focused coping strategies would result in more successful adaptation. Longitudinal scale data collected just after hospital discharge & again 3 months later from 40 patients in Canberra, Australia, find: some support for the proposed effects of self-efficacy, emotion-focused coping strategies, & personal coping resources; little support for the proposed effects of perceived stress; & no support for the proposed effects of problem-focused coping strategies. 1 Table, 35 References. Adapted from the source document.

Tikkanen, Jorma & Koskela, Kaj (National Agency Welfare & Health, PL 220 SF-00531 Helsinki Finland), **A Five Year Follow-Up Study of Attitudes to HIV Infection among Finns,** *Health Promotion International,* 1992, 7, 1, 3-9.

Changes from 1986 to 1990 in knowledge, attitudes & behavior among Finnish people toward HIV (human immunodeficiency virus) infection are investigated, based on intrview & questionnaire data obtained in 1986 from a sample of 1,013 Finns ages 15-64 chosen at random from the entire population, & from samples of approximately 1,900 Ss obtained annually, 1987-1990. Throughout the period, knowledge was good about modes of HIV transmission, as well as diagnostic methods & location of test facilities. There appeared to be improvements in awareness about some aspects of transmission. Support for compulsory population screening declined, while the proportion in favor of voluntary testing grew. Opinions were stable over the need for screening certain special groups. Perceptions of the personal threat of HIV also remained constant, & there were no significant alterations in sexual behavior due to the risk of HIV infection. It is concluded that perceptions among Finns toward issues of HIV infection did not change markedly 1986-1990, & may thus have stabilized. 5 Tables, 1 Figure, 25 References. Tudiver, Fred, Myers, Ted, Kurtz, Ruth G., Orr, Kevin, Rowe, Cheryl, Jackson, Edward & Bullock, Sandra L. (Sunnybrook Health Science Centre, 2075 Bayview Ave Toronto Ontario M4N 3M5), **The Talking Sex Project: Results of a Randomized Controlled Trial of Small-Group AIDS Education for 612 Gay and Bisexual Men,** *Evaluation & the Health Professions,* 1992, 15, 1, Mar, 26-42.

¶ An evaluation of the effectiveness of 2 different kinds of AIDS (acquired immune deficiency syndrome) risk reduction programs for gay & bisexual men (N = 612) in Toronto, Ontario. After completing questionnaires measuring knowledge of AIDS risk, attitudes toward AIDS & sexual practices, & sexual behavior, Ss were randomly assigned to either: (1) single-session groups led by trained volunteer peers, (2) four-session groups led by paid counselors, or (3) waiting-list control groups. Questionnaires were readministered 3 months postintervention. Results indicate an overall shift toward safer sex over time, which was strongest for the single-session group, but the effect was not related to group assignments. The changes in knowledge of AIDS risk & the attitudes toward condom efficacy were significantly higher for individuals in the two treatment groups than for the controls. 2 Tables, 3 Figures, 36 References. Van Knippenberg, F. C. E., Out, J. J., Tilanus, H. W., Mud, H. J., Hop, W. C. J. & Verhage, F. (Dept Medical Psychology & Psychotherapy Erasmus U Rotterdam, NL-3000 DR Netherlands), **Quality of Life in Patients with Resected Oesophageal Cancer,** *Social Science and Medicine,* 1992, 35, 2, July, 139-145.

¶ Questionnaire data collected from 62 patients at Erasmus U Hospital in the Netherlands 1984-1987 before & after surgery to treat esophageal cancer indicate that the main discomforts had been adequately treated in most cases, resulting in less pain & fewer problems during swallowing. However, when other physical symptoms & the effect on activity level were taken into account, patients were left with a seriously deteriorated overall quality of life. It is contended that these patients probably accept a great deal of physical discomfort in exchange for gaining potentially longer life. 5 Tables, 30 References. Adapted from the source document.

Verhaak, Peter F. M. & Tijhuis, Marja A. R. (Netherlands Instit Primary Care, PO Box 1568 NL-3500 BN Utrecht), **Psychosocial Problems in Primary Care: Some Results from the Dutch National Study of Morbidity and Interventions in General Practice,** *Social Science and Medicine,* 1992, 35, 2, July, 105-110.

¶ The treatment & natural course of psychological problems in general practice are described, using data collected for 103 general practices in the Netherlands. Two cohorts of patients from 9 of these practices cooperated in a longitudinal follow-up study (N = 397); one cohort presented psychosocial reasons for encounter & the other somatic reasons. Objective needs for mental help of patients in both cohorts were assessed by the General Health Questionnaire. Findings suggest that, while many patients with a probable mental illness present only physical symptoms, the severity of their distress appears to be less than that of patients with a probable mental illness who do express their psychological distress overtly. Patients with psychological symptoms appear to receive more therapeutic intervention than those with somatic symptoms, assessed primarily as psychosocial in nature. The majority of patients with mental health problems did not present psychosocial or psychosomatic complaints after a 6-month period, & recovery was higher for patients with psychological symptoms. 4 Tables, 24 References. Adapted from the source document.

Vlassoff, Carol & Tanner, Marcel (World Health Organization, CH-1211 Geneva 27 Switzerland), **The Relevance of Rapid Assessment to Health Research and Interventions,** *Health Policy and Planning,* 1992, 7, 1, Mar, 1-9.

¶ An introduction to this special journal issue (see related abstracts in SA 41:2) on rapid assessment methods (RAMS) for tropical disease research, highlighting disease control problems that the combined skills of social & biomedical scientists must address, as well as problems hampering multidisciplinary research. Since traditional social science & epidemiological methods are often too time-consuming to address the immediate & urgent needs of disease control programs, RAMS to provide information on health status, impact, services, & behavior are essential. A distinction is made between the efficacy of disease control tools as applied at the community level, & the potential for RAMS to improve community effectiveness is emphasized. The development & validation of RAMS is also considered. 1 Table, 1 Figure, 5 References. Adapted from the source document.

Waitzkin, Howard (U California, Irvine 92717), **Text, Social Context, and the Structure of Medical Discourse,** *Current Research on Occupations and Professions,* 1991, 6, 117-146.

¶ Transcripts of medical encounters are drawn on to examine whether medical discourse (MD) can be read as a text, whether it conveys a typical underlying structure, & how patients & doctors deal with contextual problems. Following a critique of previous attempts at conversation analysis of MD, a new theoretical approach to MD is offered that includes aspects of structuralist & poststructural literary criticism. A deeper structure in discourse is explored that may have little relation with patients' & professionals' conscious thoughts about what they are saying & doing. It is suggested that such an approach takes into account the weaknesses of structuralism by looking for underlying structures as historically specific parts of current MD, rather than as universal or invariant structures. 3 Figures, 45 References. Adapted from the source document.

Whitaker, Rupert E. D. & Edwards, Richard K. (Midwest AIDS Biobehavioral Research Center U Michigan, Ann Arbor MI 48109), **A Model-Based Approach to US Policy on HIV-1 Infection and Immigration,** *AIDS & Public Policy Journal,* 1991, 6, 1, spring, 3-24.

¶ The adequacy of techniques & methods for screening immigrants to the US for human immunodeficiency virus were assessed using statistics on AIDS (acquired immune deficiency syndrome) & population data collected from all countries with reported AIDS cases; information on immigration & foreign tourism in the US were obtained from secondary sources. Estimates of seroprevalence of HIV-1 were computed for a given continental population, & the % of true- & false-positive & negative antibody test results (for Western blot & enzyme-linked immunosorbent assays, or ELISA tests) were estimated for each continent's immigrants. Best- & worst-case scenarios of the number of positive & negative results for each continent were derived. These scenarios showed Asia/Oceania with the highest source of US immigrants, but the lowest seroprevalence of all the regions; the Caribbean as the next largest immigrant group, but with the highest estimated seroprevalence; & Africa with the third highest seroprevalence, but as the region contributing the fewest immigrants. Discussed are: the precision of the estimates, given the uncertain recording of AIDS cases; the variable performance of the diagnostic tests with different populations; & the lack of information on immigration from the primary source, the US Immigration & Naturalization Service. It is concluded that the screening program is highly inefficient, & as the epidemic grows, it will become more inefficient. This program should be eliminated. 7 Tables. M. Wilson, David, Mparadzi, Albertina & Lavelle, Susu (Psychology Dept U Zimbabwe, Mount Pleasant Harare), **An Experimental Comparison of Two AIDS Prevention Interventions among Young Zimbabweans,** *Journal of Social Psychology,* 1992, 132, 3, June, 415-417.

¶ To determine whether information-based, factual interventions or skill-based, participative interventions are a more effective response to the acquired immune deficiency syndrome (AIDS) crisis in Africa, 84 Zimbabwean student teachers completed an initial questionnaire, were randomly assigned to 1 of 2 experimental conditions (information or skill training), & completed a second questionnaire several months later. The posttest was used to calculate knowledge & behavioral differences between the 2 groups. Participants who attended the skill-based training were more knowledgeable about condoms & condom use, perceived fewer barriers to use of condoms, rated higher in self-efficacy, & reported fewer sexual partners & coital acts without condoms in the previous month. Results suggest that participative, skill-based training is better able to increase knowledge & alter behaviors than information-based training–& therefore is the more effective response to the AIDS crisis. 7 References. ——, **AIDS: A Problem for Sociological Research,** *Current Sociology/La Sociologie Contemporaine,* 1992, 40, 3, winter, vii-134.

¶ This journal issue, prepared by a special commission created in 1988 by the French government, presents a trend report on AIDS (acquired immune deficiency syndrome) & the problems it presents for sociological research. Contributors include: Michaël Pollak, Geneviève Paicheler, & Janine Pierret (Centre national de la recherche scientifique, Paris, France). Issues relevant to the West European situation are considered, with attention to: the shaping of social representatives; public attitudes in terms of class, education, age, & cultural background; theoretical problems specific to AIDS management; the role of human immunodeficiency virus-positive people & people with AIDS; & changes in sexual behavior. Also considered are topics relevant to prevention, eg: the visibility of AIDS; the social extent of the pandemic in Africa & the Third World; the emergence of various kinds of AIDS expertise in science, medicine, public health, & politics; & the search for scapegoats for the disease. The stigma attached to AIDS is addressed, & it is contended that restrictive legislation & discriminatory attitudes should be considered in relationship to attitudes & beliefs that support or oppose them & that shape adversarial opinions about the management of the epidemic. A preliminary typology of reactions to AIDS, based on questionnaire data & interviews with participants in 22 focus groups in 5 US cities, is presented, along with results of survey research in France. Social mobilization associated with AIDS is also considered, focusing on how Western governments organized their responses to the epidemic, how they coordinated actions with nongovernmental organizations, & whether they succeeded in maintaining a favorable political climate & consensus. Problems related to coping with AIDS are examined, along with methodological & theoretical problems in studying the transmission of AIDS. It is concluded that, despite sociology's rather slow start in AIDS research, a great deal of work is now in progress. Future studies must combine quantitative & qualitative approaches to permit a better understanding of the processes at work, & develop a sensitive analysis at the microsocial level to consider the complexity of the phenomena. Agras, W. Stewart (Dept Psychiatry & Behavioral Sciences School Medicine Stanford U, CA 94305), **Treatment of Social Phobias,** *The Journal of Clinical Psychiatry,* 1990, 51, 10(supplement), Oct, 52-55.

¶ An up-to-date review is presented of the nature & treatment of social phobia. The epidemiology, symptoms, different diagnosis, & complications of social phobia, eg, a high rate of alcohol use & alcohol dependence, are delineated, & the relationship between avoidant personality disorder & social phobia is discussed. The existing controlled pharmacologic & psychosocial treatment studies are reviewed & their clinical implications considered. Of the pharmacological agents studied, monoamina oxidase inhiitors & beta blockers appear effective. The monoamine oxidase inhibitors may be more effective in generalized social phobia, while the beta blockers seem more effective in specific (one avoidance situation) social phobias. A combination of exposure to the feared situation & cognitive therapy aimed at overcoming unrealistic self-defeating thinking appears to be the most useful of the psychosocial treatments, although social skills training may be helpful in the avoidance personality. No controlled studies of combined psychosocial & pharmacologic treatments have appeared, although it would seem appropriate to use such combinations clinically. Some remaining research questions are briefly outlined. 15 References. AA (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Bijl, Rob V. (Netherlands Instit Mental Health, NL-3502 JC Utrecht (Tel: 030-93-51-41; Fax: 030-96-1020)), **Delphi in a Future Scenario Study on Mental Health and Mental Health Care,** *Futures,* 1992, 24, 3, Apr, 232-250.

¶ Methodological issues of futures research on mental health care are examined through a projected analysis of mental health & mental health care in the Netherlands over the next two decades. Due to the limitations of quantitative psychiatric epidemiology for developing future scenarios, it is suggested that qualitative methods be used to assess the opinions of professionals in the field, the impact of future interventions & policies, & shifts in the balance of power between professionals, institutions, insurance companies, patient organizations, & local & national governments. The Delphi method, with its main characteristics of anonymity, iteration, & feedback to participants, is a suitable method. Its strengths lie in its capacity to generate new options for intervention & to enhance consciousness of the future in order to reinforce rationality of decision processes. In using the Delphi method, clarification of dissensus on the issues under study is as relevant as elucidation of consensus. 1 Table, 1 Figure, 1 Appendix. Adapted from the source document. Böker, Heinz, Ethnopsychiatrische Beobachtungen in einem psychiatrischen Krankenhaus im Kathmandutal (Nepal): Seelische Krankheit im Spannungsfeld traditioneller und wissenschaftlicher Krankheitskonzepte (Ethnopsychiatric Observations in a Psychiatric Hospital in Katmandu Valley (Nepal): Mental Illness in the Conflictual Area between Traditional and Modern Scientific Concepts of Sickness), *curare,* 1990, 13, 4, 225-240. (GER)

¶ To investigate the relationship between local traditional & modern Western approaches to mental illness in Nepal, interview data were obtained from families of 110 psychiatric patients in the Katmandu valley. Analysis reveals that respondents chose the hospital to assist with severe irritation, anxieties, & eating & sleeping maladies. However, they still think in terms of traditional healing practices for their long-term strategies. The ability of the traditional approaches to guarantee maintaining a communal living situation with the patient can still be jeopardized by a breach of social or religious rules. It is expected that additional ethnopsychiatric studies will stimulate criticism of descriptive psychiatric paradigms in developing countries. 17 Tables, 27 References. Boutté, Marie I. (Dept Anthropology U Nevada, Reno 89557), **Discredited Inheritance: Machado-Joseph Disease and Family Dynamics in the Azores,** UM *Human Organization,* 1992, 51, 2, summer, 144-150.

¶ Machado-Joseph disease is a dominantly inherited disorder that has been present among families of the Azores Islands since at least the mid-1800s. As a unique form of inheritance, it has influenced not only dynamics & identities within the nuclear family, but within kinship networks in general, & in interactions with the larger island community. Here, using Machado-Joseph disease as a case study, & drawing on data collected during fieldwork on Marinhos in 1985 & 1989, the cultural construction of genetic threat is explored in the context of the family & the community in which families carry on their life activities. 1 Table, 25 References. Chuang, Henry T., Jason, Gregor W., Pajurkova, Eva M. & Gill, M. John (Dept Psychiatry Foothills Hospital, 1403-29 St NW Calgary Alberta T2N 2T9), **Psychiatric Morbidity in Patients with HIV Infection,** UM *Canadian Journal of Psychiatry/Revue Canadienne de Psychiatrie,* 1992, 37, 2, Mar, 109-115.

¶ Interview & medical history data are used to investigate psychiatric morbidity in all stages of HIV (human immunodeficiency virus) infection in a Canadian sample of 144 HIV-positive patients referred for psychiatric assessment, & a control group of 29 at-risk seronegative respondents (Rs). HIV patients were found significantly older than seronegative Rs. Employment was highest among seronegative Rs, decreasing through successive stages of HIV. A higher degree of psychiatric morbidity was found among HIV-positive Rs, with adjustment disorder the most common diagnosis. Clinical signs of organic mental disorder were highest in HIV patients. Substance abuse was high in all Rs, with no significant differences among groups. 4 Tables, 1 Figure. I. Shagrir (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Dolan, Bridget, Polley, Kevin, Allen, Ruth & Norton, Kingsley (Saint George's Hospital Medical School, London SW17 0RE England), **Addressing Racism in Psychiatry: Is the Therapeutic Community Model Applicable?,** *The International Journal of Social Psychiatry,* 1991, 37, 2, summer, 71-79.

¶ It is argued that the therapeutic community (TC) model of treatment for mental illness provides a potential for a less racist service. Pioneered in the 1940s & 1950s, TC treatment emphasizes a collaborative style of staff behavior & active participation of patients in their own treatment. Drawing on the experiences of GB's Henderson Hospital TC, it is maintained that while the TC approach can better meet the mental health needs of blacks & other minorities, the Henderson Hospital TC is not fulfilling its role in providing therapy for black clients. Possible explanations for Henderson's inadequacies are discussed, & suggestions regarding how Henderson Hospital can meet the needs of clients in a multicultural GB are offered. 39 References. Drake, Miles E., Jr. (1654 Upham Dr, Columbus OH 43210), **Medical and Neuropsychiatric Aspects of Lycanthropy,** *The Journal of Medical Humanities,* 1992, 13, 1, spring, 5-15.

Response, 17-19.

¶ Medical explanations for the perceived metamorphosis of human beings into werewolves–lycanthropes–are considered. While some scholars have suggested that lycanthropes suffer from schizophrenia, hysteria, affective disorders, or the effects of ingesting hallucinogens, henbane, or nightshade, two alternative explanations are offered: porphyria & epilepsy. Porphyria would explain discoloration of teeth & urine, deviant behavior, nocturnal wandering, & changes in skin & hair. Complex partial seizures would explain altered consciousness, depersonalization, derealization, acute anxiety & other preoccupations, & compulsive behaviors. Finally, it is suggested that the persecution of werewolves & the clinical descriptions of the illness are part of the larger transformation of Renaissance medicine from the Galenic past to the scientifically-based future. In **Why Not a Werewolf? The Wandering Epileptic: Response to Miles E. Drake, Jr., M.D., "Medical and Neuropsychiatric Aspects of Lycanthropy,"** Irma Jacqueline Ozer (38 Gramercy Park, New York, NY), who has studied portrayals of epileptics in film & literature, suggests how media portrayals of illness have an impact on society & adds to the list of possible medical explanations of lycanthropy. 27 References. Eker, Doğan & Arkar, Haluk (Dept Psychology Middle East Technical U, TR-06531 Ankara Turkey), **Experienced Turkish Nurses' Attitudes towards Mental Illness and the Predictor Variables of Their Attitudes,** *The International Journal of Social Psychiatry,* 1991, 37, 3, autumn, 214-222.

¶ Predictors of attitudes toward mental illness were investigated among 91 experienced female Turkish nurses, who responded to questionnaires & 2 vignettes exploring attitudes on psychotherapy, drug treatment, organic & psychological causes of mental illness, & prognosis. Nurses accepted both psychological & organic reasons for mental illness, accepted both psychotherapy & drug treatments, & felt positively about recovery. However, nurses were more favorably disposed toward psychological causation & psychotherapy; the vignette dealing with paranoid schizophrenia was received more negatively than the vignette dealing with anxiety neurosis/depression. Stepwise multiple regression analysis showed that university education was related to lower acceptance of psychotherapy & the possibility of recovery, & that older age predicted more social distance between the nurse & the anxiety vignette character. Findings are compared to vignettes with Turkish students & those from other countries. 3 Tables, 20 References. Adapted from the source document. Fabrega, Horacio, Jr. (School Medicine U Pittsburgh, PA 15213), **The Role of Culture in a Theory of Psychiatric Illness,** *Social Science and Medicine,* 1992, 35, 1, July, 91-103.

¶ While medical theories of psychiatric phenomena rely on concepts & seek explanations that pertain to the concerns of biomedicine, a social theory of the psychiatric needs concepts & explanations pertaining to the social & cultural sciences. Some of the requirements of such a social theory are outlined here, focusing on why & how the concept of culture is important. It is argued that the Western medical bias of psychiatric illness needs to be faced, as well as the problem of cultural relativism. The heuristic usefulness of a concept of human behavioral breakdowns is assessed, & ways that culture influences the knowledge & practice of biomedical psychiatry are examined critically. 101 References. Fava, Maurizio & Rosenbaum, Jerrold F. (Clinical Psychopharmacology Unit Massachusetts General Hospital, Boston 02114), **Suicidality and Fluoxetine: Is There a Relationship?,** *The Journal of Clinical Psychiatry,* 1991, 52, 3, Mar, 108-111.

¶ In light of a report by M. H. Teicher, C. Glod, & J. O. Cole ("Emergence of Intense Suicidal Preoccupation during Fluoxetine Treatment," *American Journal of Psychiatry,* 1990, 147, 207-210) of 6 depressed patients who developed intense, violent suicidal preoccupation after 2-7 weeks of fluoxetine treatment, questionnaires were administered to 27 psychiatrists in Boston, Mass, who treated 1,017 depressed outpatients with antidepressants during 1989. None, however, reported intense suicidal thoughts of the degree described in the previously reported 6 cases. The difference in incidence of suicidal ideation occurring only after initiation of treatment was not significant between patients treated with fluoxetine alone & those receiving other antidepressant treatments. 1 Table, 13 References. Fido, Abdullahi A., Razik, M. Abdel, Mirza, Iman & El-Islam, M. F. (Faculty Medicine Kuwait U, 13110 Safat), **Psychiatric Disorders in Prisoners Referred for Assessment: A Preliminary Study,** UM *Canadian Journal of Psychiatry/Revue Canadienne de Psychiatrie,* 1992, 37, 2, Mar, 100-103.

¶ Case material is used to explore the relation between mental illness, particularly schizophrenia, & criminal behavior, among a Kuwaiti sample of 69 male & female prisoners referred by the Kuwait central prison to a psychiatric hospital for assessment. Official data were supplemented by interviews conducted with relatives, social workers, & prison officers. Over 33% of Ss had major psychiatric disorders, & 50+% had minor disorders. Major psychiatric disorders were correlated with major offenses. It was found that schizophrenics with active symptoms are more likely to commit serious crimes than symptom-free schizophrenics. A community-based psychiatric approach is suggested for treatment. 6 Tables. I. Shagrir (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Filteau, Marie-Josée, Baruch, Philippe & Vincent, Pierre (Dépt psychiatrie Hôpital Enfant-Jésus, Quebec City Quebec), **Le Jeu pathologique: une revue de la littérature** (Pathological Gambling: A Review of Literature), UM *Canadian Journal of Psychiatry/Revue Canadienne de Psychiatrie,* 1992, 37, 2, Mar, 84-90. (FRE)

¶ A review of the literature reveals that only in the early twentieth century did psychiatrists began to study pathological gambling; among the early works was Sigmund Freud's study of Fyodor Dostoyevsky. In 1980 pathological gambling was included in *DSM-III*. Briefly reviewed here is an epidemiological study (Custer, R. L., "Profile of the Pathological Gambler," *Journal of Clinical Psychiatry,* 1984, 45, 35-38) that identified three phases of gain, loss, & despair in the pathological process. Also reviewed are the descriptions of pathological gambling in psychoanalysis, theories of substance dependence, theories of affective disorders, & psychobiological studies. Clinical evalution techniques & treatment strategies are indicated. I. Shagrir (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Fisher, Gene A., Tessler, Richard C., Manderscheid, Ronald W. & Sommers, Ira B. (John Jay Coll Criminal Justice, New York NY 10019), **Sheltering the Severely Mentally Ill in the Community: A Sequential Decision Model,** *Research in Community and Mental Health,* 1992, 7, 155-176.

¶ Data on sociodemographic variables, clinical characteristics, & social & community adjustment were collected from 1,053 severely mentally ill persons receiving Community Support Program services, sponsored by the National Instit for Mental Health, in 16 states. Sequential logistic regression analysis yielded profiles of these clients according to their residential living arrangement: professional treatment facilities, supervised housing, nonsupervised housing (foster care homes), or with family of origin, or of procreation (spouse &/or children). If the mentally ill person, especially a female, had a family of procreation, he/she was very likely to be living there. These clients tended to be younger, to have spent less time in institutions, & to be less impaired than those without the skills to remain married &/or care for children, & thus, forced to live independently. The number of months of hospitalization predicted the degree of supervision needed for those living outside of families of procreation. In addition, community living skills, a diagnosis of major affective disorder rather than schizophrenia, drug & alcohol abuse, more than a high school education, & having employment or disability benefits made an unsupervised setting more likely than a supervised one. Those with higher impairment & needing professional supervision tended to be younger & have spent less time in hospitals. The family of origin provided an alternative source of housing, but was used mainly by less chronically ill individuals, & those who could live independently except that acceptable housing was unavailable at the time. 1 Table, 1 Appendix, 34 References. Friedman, Lois C., Nelson, David V., Baer, Paul E., Lane, Montague, Smith, Frank E. & Dworkin, Rosalind J. (Dept Psychiatry & Behavioral Sciences Baylor Coll Medicine, Houston TX 77030), **The Relationship of Dispositional Optimism, Daily Life Stress, and Domestic Environment to Coping Methods Used by Cancer Patients**, *Journal of Behavioral Medicine*, 1992, 15, 2, Apr, 127-141.

Scale data are used to investigate the relationship between active & avoidance coping strategies practiced by cancer patients (N = 94) in a Tex outpatient clinic & patients' dispositional optimism, daily life stress, & domestic environment. Findings reveal that dispositional optimism & domestic environment were found to significantly predict avoidance coping, while dispositional optimism, alone was found to significantly predict active-behavioral coping. Moreover, a positive correlation was established between active-behavioral coping & dispositional optimism & between avoidance coping & both daily stress & domestic environment; an inverse correlation was established between avoidance coping & dispositional optimism. Gender & disease-related variables failed to predict coping methods. 5 Tables, 49 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Gaines, Atwood D. (Dept Anthropology Western Reserve U, Cleveland OH 44106), **From *DSM-I* to *III-R*; Voices of Self, Mastery and the Other: A Cultural Constructivist Reading of U.S. Psychiatric Classification**, *Social Science and Medicine*, 1992, 35, 1, July, 3-24.

¶ The history of psychiatric classification of mental disorder in the US is examined from a cultural constructivist perspective. It is contended that the American Psychiatric Assoc's Diagnostic & Statistical Manuals (DSMs), as cultural constructions, evidence a particular cultural voice & an implicit standard of normality that is of Northern Germanic ethnic origin. The discussion considers the development of & conceptual changes in professional psychiatric nosologies in the US since the first DSM in 1952, describes two dominant ethnopsychologies in the West that reflect cultural constructions. It is contended that DSMs classify not natural, universal psychiatric diseases, but historical & cultural creations. They provide standards to live up & measures for assessing culturally constructed selves in their changing life worlds. 152 References. Adapted from the source document. Gibney, Paul (121 Wickham Tce, Brisbane 4000 Australia), **Is There a Place for Psychiatric Diagnosis in Family Therapy?**, *The Australian and New Zealand Journal of Family Therapy*, 1990, 11, 4, Dec, 229-237.

¶ The process of psychiatric diagnosis is contrasted with the practice of family therapy, with attention to organizing metaphors. The "mental illness" metaphor of psychiatric diagnosis is critiqued on the grounds that: it obscures issues of class, gender, & power; it deletes the clinician's role in the development of diagnoses; & its overall schemata contains serious philosophical & methodological insecurities. Reasons why practitioners nonetheless continue to cling either to diagnoses or to technique are also discussed. It is contended that contextual analysis & individual pathology belong to different stories & quests, & that there indeed is no place for psychiatric diagnosis in family therapy. Family therapy, therefore, should be valued not for any illusion of certainty that it briefly offers, but for the challenging uncertainty that keeps theory, practice, & the moral-ethical-aesthetic in the same continuing dialogue. 39 References. Goldberg, David (Mental Illness Research Unit U Manchester, M60 1QD England), **A Classification of Psychological Distress for Use in Primary Care Settings**, *Social Science and Medicine*, 1992, 35, 2, July, 189-193.

¶ In a discussion of three ways of conceptualizing emotional distress in general medical settings--screening tests, family doctor (MD) diagnoses, & standardized research diagnoses--it is shown that distress as measured by screening test is very much more prevalent than research diagnosis. Here, a classification is proposed for MDs working in general medical settings to conceptualize disorders that is based on the patient's need for intervention, & that distinguishes the few who need to be thought of as having a formal mental disorder from the many who do not. This classification takes account of what is known about labeling & compliance, & is linked to the skills needed by primary care workers. The largest group consists of those whose emotional distress needs recognition & discussion; the next group also needs social interventions; & the final group benefits from recognition of a mental disorder that necessitates a medical or psychological treatment. 2 Tables, 20 References. Gondolf, Edward W. & McWilliams, Joyce (Indiana U, PA 15705), **Identification of Violence in Psychiatric Case Presentations**, *Clinical Sociology Review*, 1992, 10, 137-150.

¶ A contextual analysis of the case presentations of 77 recently violent psychiatric patients for instances of violence mentioned by psychiatric staff revealed 4 categories of identification: violence as part of the primary problem, as a psychiatric disorder, as an unrelated incident, or not mentioned at all. In nearly 66% of the case presentations, the violence was not identified as part of the primary problem. The findings & case examples substantiate the assertion that social problems are neglected, minimized, or medicalized in medical discourse. Results also suggest that clinical protocol should be established to ensure more extensive consideration of the dangerousness implied by reported violence. 22 References. Guarnaccia, Peter J., Guevara-Ramos, Luz M., Gonzales, Gloria, Canino, Glorisa J. & Bird, Hector (Instit Health/Health Care Policy/Aging Research Rutgers U, New Brunswick NJ 08903), **Cross-Cultural Aspects of Psychotic Symptoms in Puerto Rico**, *Research in Community and Mental Health*, 1992, 7, 99-110.

¶ Difficulties in recognizing culturally appropriate experiences that may be characterized as abnormal in other cultures were identified via responses to the Diagnostic Interview Schedule (DIS) of 1,551 adults in Puerto Rico; 9% of the interviews (those with psychotic symptom codes) were reviewed by Puerto Rico Adult Psychiatric Epidemiology Project psychiatrists, who took into account the interviewer's observations of the S's psychotic behavior during the interview. Two cases in which the psychiatrists recorded symptoms due to the interviewer's observational notes & the reviewers' cultural knowledge are presented. It is recommended that cultural information be used in assessing symptom reports with structured diagnostic instruments like the DIS, especially to avoid misclassification of dysthymia as schizophrenia. 37 References. Jackson, Stanley W. (Yale U School Medicine, New Haven CT 06510), **The Listening Healer in the History of Psychological Healing,** IM *The American Journal of Psychiatry*, 1992, 149, 12, Dec, 1623-1632.

¶ The significance of listening in psychological healing & a range of mental, psychic, & psychological interventions are historically examined in medical, religious, & philosophical sources from antiquity to the present. An increased recognition of the importance of healing in the twentieth century is noted. Components of valuable listening are briefly indicated, eg, interest in people, curiosity, & capacity for caring. The natural tension between looking & listening as methods of knowing is discussed in the context of the tension between scientific & humanistic modes of gaining knowledge about sufferers. It is concluded that empathic listening is crucial to the caring & curing process. 47 References. I. Shagrir (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Jilek, Wolfgang G. & Jilek-Aall, Louise, The Mental Health Relevance of Traditional Medicine and Shamanism in Refugee Camps of Northern Thailand, *curare*, 1990, 13, 4, 217-224.

¶ In 1988/89 about 107,600 refugees from Cambodia, Vietnam, & Laos were cared for in UN camps in Thailand. The biggest group consisted of 58,000 Laotians, primarily of Hmong ethnicity from the mountainous regions. Most Laotians adhered to their own culture, including a traditional healing system with special herbs & ceremonies. At first, the traditional healing practices were used somewhat clandestinely, but later they moved into an organized primary health care center. Special attention is given to shamanism & the Hmong concepts of illness & death. The impact of Western medicine can be negative on the Hmong, leading to stress symptoms on the individual level & to Messianic, nativistic, & syncretistic strategies on the group level. Also discussed are new techniques of blending modern drug addiction therapy with Hmong ceremonies. Adapted from the source document. Johnson, Colleen L. & Johnson, Frank A. (Medical Anthropology Program U California, San Francisco 94143), **Psychological Distress among Inner-City American Elderly: Structural, Developmental, and Situational Contexts,** *Journal of Cross-Cultural Gerontology*, 1992, 7, 3, July, 221-236.

¶ Focused interview data are drawn on to investigate the prevalence of psychological distress & factors associated with it among a sample of 200 inner-city residents in San Francisco, Calif, 65% of whom are African Americans, culled from patient lists at general medical clinics. Analysis indicates that women & African Americans are less likely to be distressed. Distress, however, is significantly associated with poorer health & fewer social & economic resources. A model depicting pathways to distress is used in a case study analysis of the most distressed respondents, & illustrates how developmental vulnerabilities in childhood, limited opportunities in adulthood, & current provoking agents interact & undermine well-being. It is proposed that a leveling process may occur in later life when these factors converge, resulting in distress irrespective of cultural differences. 2 Tables, 1 Figure, 24 References. Joseph, Stephen C. (School Public Health U Minnesota, Minneapolis MN 55455), **AIDS and Adolescence: A Challenge to Both Treatment and Prevention,** *Journal of Adolescent Health*, 1991, 12, 8, Dec, 614-618.

¶ Current statistics on AIDS (acquired immune deficiency syndrome) in the adolescent population are misleading, because of the long time lag between infection with HIV (human immunodeficiency virus) & diagnosis of AIDS, & because counting of AIDS cases underrepresents the presence of infection. Recalculation of the AIDS infection rate among adolescents in New York City (NYC) yields a 0.5%-1.0% prevalence of infection, a higher rate than currently seen. Those infected are clustered in certain areas, & tend to be heterosexual poor & minority adolescents. Adolescence is normally a highly sexually active period, & one in which experimentation with sex & drugs takes place; the adolescent illusion of invulnerability to disease makes uninformed & unprotected sex a likely occurrence. In NYC, the populations of adolescent runaways, prisoners, & street children are even more likely than normal adolescents to be exposed to AIDS through drug involvement. The NYC pattern of increasing adolescent AIDS cases may be repeated in other urban areas in which AIDS is already highly prevalent. This pattern implies that public policy should stress universal AIDS, drug, & sex education in the schools, community programs for out-of-school youth, early identification & entry into clinical care for adolescents, & tailoring of care services for adolescents. Kohn, Paul M. & Macdonald, Jennifer E. (Graduate Programme Psychology York U, North York Ontario M3J 1P3), **The Survey of Recent Life Experiences: A Decontaminated Hassles Scale for Adults,** *Journal of Behavioral Medicine*, 1992, 15, 2, Apr, 221-236.

¶ Data obtained from 100 Ss at a museum in Toronto, Ontario, are used to compare the validity of a Survey of Recent Life Experiences (SRLE), developed here to provide a decontaminated measure of hassles in adult life, & the Perceived Stress Scale (see SA 32:2/84N7330). The alpha reliability of these 2 measures proved high & the SRLE itself proved reliable & valid with respect to gender. Factor analysis reveals 6 interpretable hassle subscales–social & cultural difficulties, work, time pressures, finances, social acceptability, & social victimization–which remain valid against the criterion of self-appraised stress because intercorrelation among the 6 subscales is low. A separate sample of 136 Ss cross-replicated these findings. 3 Tables, 1 Appendix, 51 References. Adapted from the source document. Kuch, Klaus & Swinson, Richard P. (U Toronto, Ontario M5S 1A1), **Agoraphobia: What Westphal Really Said,** UM *Canadian Journal of Psychiatry/Revue Canadienne de Psychiatrie*, 1992, 37, 2, Mar, 133-136.

¶ Excerpts relevant to the diagnostic classification of anxiety disorders are translated from the writings of C. Westphal & E. Cordes (see, respectively: "Die Agoraphobie" [On Agoraphobia], & "Die Platzangst [Agoraphobie]" [On Agoraphobia], *Archive für Psychiatrie*, 1872, 3, 138-161 & 521-574). Differences between Westphal's & Cordes's definitions of agoraphobia are examined, & compared with *DSM-III-R* criteria. It is noted that, while the symptoms described by Westphal–eg, panic attacks, panic anticipatory anxiety, & phobic avoidance–have not changed, some researchers see a need for further clarification of the disorder. Also, only one of Westphal's & Cordes's patients was female, while current epidemiological data indicate that more females than males suffer from agoraphobia. I. Shagrir (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Labelle, Paul (Dept Sociology & Anthropology Carleton U, Ottawa Ontario K1S 5B6), **La Folie au déclin du Moyen Age** (Madness in the Declining Years of the Middle Ages), *Alternate Routes*, 1992, 9, 82-89. (FRE)

¶ Presented is an outline of a thesis that examines the emergence of the notion of mental illness in the modern Western world. The changes in the discursive practice of the clergy regarding deviant behavior in general & madness in particular that occurred at the end of the Middle Ages are situated & described. At this point in history, it was widely believed that a relationship existed between witchcraft & madness. It is noted that when the clergy began to attribute madness to witchcraft (beginning in the fourteenth century), the perception of madness in the Western world was greatly influenced. The Western view of madness began to shift in the sixteenth & seventeenth centuries, as the Protestant Reformation started to eclipse the authority of the Roman Catholic church, & new applications of human reason were valued; this process continued in the nineteenth century, when medical & scientific explanations for mental illness were consolidated. Leiber, Michael J. (Dept Sociology & Anthropology U Northern Iowa, Cedar Falls 50614), **Interactions between Civil Commitment and Protective Placement: An Empirical Assessment,** *International Journal of Law and Psychiatry*, 1992, 15, 3, summer, 265-281.

¶ Past research has suggested that methods lacking due process safeguards may be used to detain nondangerous persons in an effort to alleviate pressure caused by changes in civil commitment law that require a higher standard of dangerousness. Explored here are the patterns, pressures, & interactions between civil commitment & protective placement in Dane County, Wisc, drawing on case file data for the persons detained in civil commitment before & after a 1975 reform & those transferred to protective placement proceedings (total N = 600). HILOGLINEAR statistical procedures demonstrate evidence of misplaced processing, ie, individuals are transferred to protective placement on criteria similar to that of the prereform civil commitment law, criteria believed to be vague & arbitrary. Implications for protecting personal freedom & delivering needed care & treatment services are discussed. 3 Tables, 62 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Leserman, Jane, Perkins, Diana O. & Evans, Dwight L. (School Medicine U North Carolina, Chapel Hill 27599-7160), **Coping with the Threat of AIDS: The Role of Social Support,** UM *The American Journal of Psychiatry*, 1992, 149, 11, Nov, 1514-1520.

¶ The relationship between social support & adaptive coping styles among human immunodeficiency virus (HIV)-infected homosexual men is examined, using survey data from 52 asymptomatic HIV-positive men & a comparison group of 53 HIV-negative men. Results indicate that homosexual HIV-positive men can be characterized as coping with the threat of acquired immune deficiency syndrome (AIDS) by adopting a fighting spirit, reframing stress to maximize personal growth, planning a course of action, & seeking social support. Ss generally scored low on denial & helplessness, & most did not have noteworthy depressive symptoms or current major depression. Consistent with previous research, findings show that being satisfied with one's social support networks & participating in the AIDS (acquired immune deficiency syndrome) community are related to more healthy coping strategies. 4 Tables, 26 References. S. Millett (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Lidz, Charles W., Mulvey, Edward P., Apperson, L. Joy, Evanczuk, Karen & Shea, Shawn (Western Psychiatric Instit & Clinic U Pittsburgh, PA 15213), **Sources of Disagreement among Clinicians' Assessments of Dangerousness in a Psychiatric Emergency Room,** *International Journal of Law and Psychiatry*, 1992, 15, 3, summer, 237-250.

¶ The legal & clinical need to assess & manage potentially violent patients persists in spite of previous research findings that question the ability of clinicians to predict accurately which psychiatric patients will be violent to others. It is suggested that such assessments can be improved by considering professionals' disagreements about whether a patient is likely to be violent. Here, qualitative & quantitative data obtained via observation, patient interviews & charts, & scales completed by nurse clinicians & psychiatrists at an urban psychiatric emergency room reveal that disagreements arise primarily from differences in the amount of experience that staff members have with this task & from structural features of the procedure used to evaluate the cases. Ways of improving psychiatric emergency room assessments of patients' potentials for violence are suggested. 17 References. Mellman, Thomas A., Randolph, Charles A., Brawman-Mintzer, Olga, Flores, Linda P. & Milanes, Fernando J. (VA Medical Center, 1201 NW 16th St Miami FL 33125), **Phenomenology and Course of Psychiatric Disorders Associated with Combat-Related Posttraumatic Stress Disorder,** UM *The American Journal of Psychiatry,* 1992, 149, 11, Nov, 1568-1574.

¶ The phenomenology & course of posttraumatic stress disorder (PTSD) comordibity is examined to determine whether comorbid symptoms appear specific to PTSD & trauma, & whether there is a characteristic course for their emergence. A clinical sample of 60 veterans of high war zone stress underwent psychiatric evaluation & a follow-up interview. Consistent with previous studies, a high frequency of typically persistent anxiety & affective symptoms in association with PTSD were found. While findings suggest that these psychiatric conditions phenomenologically overlap other clinical populations, the pattern of occurrence of some specific symptoms also suggests a relationship to trama. It is suggested that panic & depression, as they occur with PTSD, can represent secondary complications & manifestations of illness progression. Conversely, the relatively early emergence of generalized anxiety disorder suggests that symptoms of the disorder, like PTSD, may present a primary response to trauma. Implications of the findings for treatment response are discussed. 1 Table, 25 References. S. Millett (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Mermann, Alan C. (Yale School Medicine, New Haven CT 06510-8020), **Vincent: Is This Madness?,** *The Journal of Medical Humanities,* 1992, 13, 1, spring, 31-47.

¶ Vincent van Gogh has fascinated art critics, historians, psychoanalysts, toxicologists, theologians, & biographers in their efforts to explain the grandeur & breadth of his paintings. A common question underlying studies of this eccentric artist is, "What was the matter with him?" A look is taken at his life to find out how this conflicted & suffering man became such a triumphant painter. Vincent was a genius, an extraordinarily talented painter who lived out a short & tortured life of ecstasy & despair, of hope & disillusionment, of sensuality & guilt. His work shows not the creation of a madman but, rather, the heights to which humanity can aspire in spite of near-overwhelming handicaps. 12 References. Mullins, Larry C., Sheppard, Harold L. & Andersson, Lars (Dept Gerontology U South Florida, Tampa 33620), **Loneliness and Social Isolation in Sweden: Differences in Age, Sex, Labor Force Status, Self-Rated Health, and Income Adequacy,** *Journal of Applied Gerontology,* 1991, 10, 4, Dec, 455-468.

¶ Emotional & social isolation are investigated with respect to age, sex, labor force status, perceived health status, & adequacy of income among a representative sample of 1,005 persons ages 16+ in Sweden. Cross-tabular analysis & analysis of variance of data obtained via telephone interviews in 1986 reveal that: (1) persons living alone are significantly more lonely; (2) those age 65+ & retired are more socially isolated, but not necessarily more lonely; & (3) those who perceive their health as problematic & their income as inadequate are more lonely, but not necessarily more socially isolated. No gender differences in these relationships are demonstrated. Findings are discussed in light of previous research in both Sweden & the US. 3 Tables, 20 References. Adapted from the source document. Neugebauer, Richard, Rabkin, Judith G., Williams, Janet B. W., Remien, Robert H., Goetz, Raymond & Gorman, Jack M. (Dept Epidemiological Developmental Brain Disorders New York State Psychiatric Instit, New York 10032), **Bereavement Reactions among Homosexual Men Experiencing Multiple Losses in the AIDS Epidemic,** UM *The American Journal of Psychiatry,* 1992, 149, 10, Oct, 1374-1379.

¶ A sample of 270 adult male homosexuals in New York City completed standardized depression instruments to determine how bereavement reactions, due to the deaths of friends/lovers through acquired immune deficiency syndrome, contributed to depression. ANOVAs revealed an association between the number of losses since 1981 & depressing thoughts, but not between the number of losses & full-blown depressive syndromes. The number of losses in the last 6 months was not related to any of the depression measures, nor did the association between the number of losses & the depression measures vary by human immunodeficiency syndrome status or by the closeness of relationship with the deceased. Given that these results do not support commonsense hypotheses, the normalization of untimely death & political mobilization/group support systems may have worked to buffer these men from depression. 2 Tables, 36 References. Newmann, Joy Perkins & Watson, Dorothy (School Social Work U Wisconsin, Madison 53706), **Gender, Marital Status, and Depression,** *Research in Community and Mental Health,* 1992, 7, 125-152.

¶ Marital status as a variable in depression was investigated among 420 males (Ms) & 524 females (Fs), ages 18+, in Wisc, who completed the Psychiatric Evaluation Research Interview Depression Scale. A 4-factor measurement model was derived using LISREL VII, which included depressive syndrome, sadness, guilt, & suicidal ideation factors. Divorced/separated Ms & Fs had higher depressive syndromes than their married counterparts. Analyzing unmarried group by status (never-married, divorced, & widowed), Ms & Fs did not differ significantly on the symptom categories. Married Fs exhibited higher depressive syndrome & sadness levels than married Ms, but lower levels of guilt & suicidal ideation. Ms in general were at greater risk for guilt than Fs. Results indicate that Fs are at greater risk of depression than Ms, especially married Fs; this phenomenon could be linked to the chronic health problems of married Fs more than work role strain. 3 Tables, 5 Figures, 71 References. Nicole, Luc (Centre hospitalier Robert-Giffard, 2601 de la Canardière Beauport Quebec G1J 2G3), **Schizophrénie: différences selon le sexe** (Schizophrenia: Gender Differences), UM *Canadian Journal of Psychiatry/Revue Canadienne de Psychiatrie,* 1992, 37, 2, Mar, 116-120. (FRE)

¶ Based on a literature review, gender differences in the onset, evolution, & mortality of schizophrenics are identified. Examined are: definition of schizophrenia, epidemiological data, illness evolution, clinical parameters (eg, number & duration of hospitalizations, response to treatment), social adjustment, & mortality. The main findings show: (1) equal incidence for both genders or a slightly higher incidence among males (Ms); (2) earlier age at onset among Ms; (3) longer & more frequent hospitalizations, & weak response to treatment, among Ms; & (4) more difficult social adjustment & increase in suicide among Ms. 1 Table. Novak, Peter (Psychosoziales Zentrum U Ulm, D-7900 Federal Republic Germany), **Community-Oriented Rehabilitation of Mental Patients in West Germany: Case Studies,** *Research in Community and Mental Health,* 1992, 7, 237-262.

¶ A discussion of federal government efforts to establish standard areas of mental health care throughout Germany for each 150,000-300,000 citizens, including psychiatric hospitals, outpatient care, & rehabilitative services, eg, social-psychiatric services, transitional homes, & sheltered living groups. In this context, three community-centered institutions were investigated via narrative interview (N not specified), participant observation, & content analysis of medical documents. The primary aim was to examine the relationship between the self-formulated claims of each institution & its actual services, & to investigate the organizational & interactional structures & functions of these institutions in relation to their goals within the context of legislation & social politics. Negotiating between adaptive & integrative goals of rehabilitation was revealed as the most important problem of the transitional homes, & coping with isolation as that of sheltered living groups. Findings show that the care system at present does not meet its goals. 52 References. Modified AA (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Nuckolls, Charles W. (Dept Anthropology Emory U, Atlanta GA 30322), **Toward a Cultural History of the Personality Disorders,** *Social Science and Medicine,* 1992, 35, 1, July, 37-47.

¶ The diagnostic category within modern psychiatry called personality disorders is discussed, focusing specifically on antisocial & histrionic disorders & their relationship to gender. It is argued that these personality disorders have cultural histories, representing values & attitudes strongly congruent with cultural stereotypes, eg, the independent male & the dependent female. The cultural histories of these stereotypes is traced to an "ideal self," a construct similar to the ideal type described by Max. Weber. It is contended that the behaviors of antisocial men & histrionic women follow logically from the strategies they use in an attempt to conform to values associated with their culturally stereotypic roles. 33 References. Pfeiffer, Wolfgang M., **Konflikte, psychoreaktive und psychosomatische Störungen auf Nias (Indonesien)** (Conflicts, Psychoreactive and Psychosomatic Disturbances in Nias [Indonesia]), *curare,* 1990, 13, 4, 187-216. (GER)

¶ To investigate the types of mental illnesses experienced by people living in an isolated culture, psychiatric profiles were obtained from patients (N = 57) on the Indonesian island of Nias in 1971. Analysis showed patterns identical to those found in Europe: schizophrenia, manic depression, somatic psychoses, reactive depression, anxieties, impaired mobility, mild obsession, & psychovegetative states. Lower educational levels corresponded to corporal ailments. Additionally, there was a high incidence of hysteria, stuttering, & suicide. However, homosexuality & alcoholism were almost nonexistent. Reaction conflicts arise from the striving for honor & the avoidance of disgrace as well as from conflicts between the individual & the group. The impact of the first wave of modern cultural innovations is assessed. Special attention is given to insights from the lyrics of Indonesian songs. 3 Tables, 58 References. Rakoff, Vivian M. (Clarke Instit Psychiatry, 250 College St Toronto Ontario M5T 1R8), **The Psychiatrist and the Myth of the Healer,** *Canadian Journal of Psychiatry/Revue Canadienne de Psychiatrie,* 1992, 37, 2, Mar, 77-83.

¶ Myths may not be rational, but they constitute profound shapers of identity for large entities, eg, nations, as well as for ancient social roles, eg, the healer. Although the role of the healer has been associated with the priestly role (eg, ancient Greece & Egypt), the physician (MD) component has developed separately. The specific difference between MD & priest was that the MD response carried with it the explicit rejection of moral judgment of the sufferer-patient, & physical treatments of all kinds were incorporated into the knowledge base. However, the social authority of the healer-MD, in the absence of effective physical cures, constituted the major therapeutic power of the MD until modern times. With the development of scientific remedies, the positivist side of the healer identity emerged more clearly, & the magical, shamanistic component became suspect. Within psychiatry, Freudian psychoanalysis gave psychiatrists an active therapeutic role, reintroducing the wise-man healer into medical practice in the form of the psychoanalyst. Psychoanalysis for some time exercised a virtual hegemony over psychiatric theory & practice, particularly in North America. However, with the rapid development of psychoactive drugs, increasing knowledge of genetics & somatic causes of mental illness, & increasing research on mental illness, psychoanalysis has lost much of its medical authority. At the same time psychoanalytic theory & practice have widely influenced the nonmedical healing professions, & entered the faculties of humanistic studies. A dangerous schism has resulted: the psychotherapeutic aspect of psychiatric practice is being devalued in favor of a somatically manipulative reductionist medical definition of psychiatric care. However, psychotherapy, physicianly compassion, & nonrational medical authority remain important components of healing. It is argued that both psychiatry & society stand to lose if psychiatry does not actively confirm the nonrational relationship-oriented component of its identity, while it pursues scientifically generated knowledge of cause & treatment of mental illness. 7 References. Schellenberg, E. Glenn, Wasylenki, Donald, Webster, Christopher D. & Goering, Paul (c/o Wasylenki–Clarke Instit Psychiatry, 250 College St Toronto Ontario M5T 1R8), **A Review of Arrests among Psychiatric Patients,** *International Journal of Law and Psychiatry,* 1992, 15, 3, summer, 251-264.

¶ An overview of research conducted since 1980 regarding arrest rates among the mentally ill suggests that the % of patients with previous arrests varies from 8%-76%. Of these, 4%-9% are arrested during the first year after admission; that rate decreases as the time since admission increases. The most common arrests for violence involve the commission of violent crimes; the variance among results is partially due to differences in criteria used in defining crime as violent. The most consistent predictor of arrests is number of prior arrests, suggesting that it is not mental illness per se that leads to criminal behavior. No conclusions can be made about the significance of demographic variables in relation to arrests or arrestable behavior for psychiatric patients vs the general public, nor about the contribution of homelessness to arrests of the mentally ill. 36 References. Shokoohi-Yekta, Mohsen & Retish, Paul M. (Coll Education U Iowa, Iowa City 52242), **Attitudes of Chinese and American Male Students towards Mental Illness,** *The International Journal of Social Psychiatry,* 1991, 37, 3, autumn, 192-200.

¶ Attitudes toward mental illness of 41 American & 42 Chinese-origin male graduate students in the midwestern US were measured via the Opinion about Mental Illness Scale (OMIS). T-tests with the OMIS scales showed that Americans vs Chinese were less authoritarian, less socially restrictive, & more benevolent toward the mentally ill. Chinese students residing in the US 3+ years were more similar in attitudes to US residents than to Chinese students with shorter residences. Per the interpersonal etiology subscale of the OMIS, Chinese, more than American students, believed that mental illness arises from deprivation of parental love during childhood. The different patterns of results suggest that cultural biases should be considered in providing health services. 4 Tables, 28 References. Adapted from the source document.

Spiegel, Allen D. & Spiegel, Merrill S. (c/o Merrill S. Spiegel–428 Cannon House Office Building, Washington DC 20515-4609), **Not**

Guilty of Murder by Reason of Paroxysmal Insanity: The "Mad" Doctor vs. "Common-Sense" Doctors in an 1865 Trial, *Psychiatric Quarterly,* 1991, 62, 1, spring, 51-66.

¶ The first time in a US courtroom that expert medical testimony supported a plea of paroxysmal (temporary) insanity in a murder defense occurred in 1865 in the trial of Mary Harris. The medical expert ("mad doctor") was pitted against "common-sense" physicians. It is argued that the forensic rationales & societal reactions of the 1860s are remarkably similar to those of the 1990s. By merely changing the antebellum language, the arguments & ripostes can easily be recycled into current temporary insanity confrontations. Sociocultural aspects of this murder case may yield clues as to the persistence of the forensic & attitudinal stances toward temporary insanity pleas by the mass media, physicians, the legal profession, & the public. 45 References. Staton, Dennis (School Medicine U North Dakota, Fargo 58102), **Psychiatry's Future: Facing Reality,** *Psychiatric Quarterly,* 1991, 62, 2, summer, 165-176.

¶ In the US, public & private health care costs, including those for mental health treatment, continue to rise annually at unacceptably high rates. "Basic" health insurance plans presently being developed in response to this crisis include: (1) severely limited coverage for psychiatric care, & (2) coverage for specific categories of serious mental illness. As such, psychiatrists must develop cost-effective goals & treatment standards that achieve satisfactory outcomes for these high-priority conditions & are compatible with economic reality. Psychiatry as a profession must accept cost-effective treatment responsibility for society's most seriously mentally ill individuals. Training must become biologically-, crisis-, & rehabilitation-oriented to be effective within society's treatment expectations & funding constraints. 23 References. Adapted from the source document.

Takeuchi, David T. & Adair, Russell K. (School Social Work U Hawaii, Honolulu 96822), **The Exposure and Vulnerability of Ethnic Minorities to Life Events,** *Research in Community and Mental Health,* 1992, 7, 111-124.

¶ An exploration of the effects of life events on psychological distress among four ethnic groups: Japanese Americans, Filipino Americans, Native Hawaiians, & Caucasians, based on secondary analysis of survey data from 1,856 adults in Hawaii. Two hypotheses are examined: the exposure hypothesis contends that ethnic groups will have similar levels of distress when life events are controlled; & the vulnerability hypothesis argues that some minorities are more vulnerable than others to the effects of life events. Analyses support the latter; the relationship between life events & psychological distress varies among ethnic groups. It is concluded that a more detailed differentiation of minority groups may better describe the correlates of psychological distress in minority communities. Simply categorizing ethnic groups as minority or nonminority is not sufficient to explain how they respond to negative life events & how these responses may affect distress. 5 Tables, 43 References. Tausig, Mark, O'Brien, David J. & Subedi, Shubhasree (Dept Sociology U Akron, OH 44325), **Caregiver Network Structure and Access to Informal Support for the Mentally Ill,** *Research in Community and Mental Health,* 1992, 7, 177-199.

¶ It is argued that structural characteristics of the personal networks of family caregivers can affect the degree to which caregivers perceive themselves to have adequate access to supportive resources. Measures for a sample of 83 family caregivers to home-based clients of a community mental health center, on the size, heterogeneity, & density of personal discussion networks are related to support access. Findings indicate that access to emotional, instrumental, & bridging resources are directly related to network structural properties, though in complex ways that require one to assess multiple dimensions of the network simultaneously. Moreover, since mentally ill family members have different needs, no single network structure will be ideal for all cases. Working with the structures of social networks of caregivers may have important effects on care recipients by providing access to the supportive resources required by the caregiver to deliver informal care. 4 Tables, 45 References. Tessler, Richard C. & Dennis, Deborah L. (Social & Demographic Research Instit U Massachusetts, Amherst 01003), **Mental Illness among Homeless Adults: A Synthesis of Recent NIMH-Funded Research,** *Research in Community and Mental Health,* 1992, 7, 3-53.

¶ Results of the National Instit of Mental Health studies on the relationship between mental illness & homelessness, conducted in 8 large US cities, are synthesized, & operationalization of concepts, sampling methods, & analysis methods compared. Findings indicate that the homeless population differed from the local domiciled population in that the majority of the homeless studied were males, median age 29-38, & minorities were overrepresented. Many homeless were in poor physical & mental health, & up to 33% had substance abuse problems. In comparison to the nonmentally ill homeless, the mentally ill were likely to be homeless for longer periods of time, have less contact with family & friends, have poorer health, & have more contact with the legal system. Their need for housing was obvious, & those with serious psychiatric problems were not receiving mental health services. Policy implications are that mental health & housing services should go hand-in-hand, but due to the diversity of the population, no one housing initiative will meet all needs. Nontraditional mental health services & case management should be made available, & preventive policies be developed at the local, state, & federal levels. 5 Tables, 69 References. M. Pflum

Turner, R. Jay & Avison, William R. (U British Columbia, Vancouver V6T 1W5), **Sources of Attenuation in the Stress-Distress Relationship: An Evaluation of Modest Innovations in the Application of Event Checklists,** *Research in Community and Mental Health,* 1992, 7, 265-300.

¶ The traditional checklist method for measuring the relationship between stressful life events & psychological distress was evaluated by incorporating modest probes regarding the desirability of the experienced effects following the event, the timing of the occurrence of each event, events concurrent with the targeted event, & the person to whom the event happened. Data were obtained from 731 physically disabled Ontario residents & 850 matched nondisabled residents via questionnaire, a 31-event checklist with probes, & the Center for Epidemiological Studies Depression Scale. For both genders, the number of events noted for the first month of the reporting period 12 months prior to the interview was proportionately greater than that for other months distal to the interview, suggesting that events of longer duration [illegible] associated with chronic strain originated before the 12-month reporting period, but "telescoped" into the twelfth month. Regression analysis showed that both discrete events & chronic strain contributed to the stress burden at any given time. Events deemed "significant" had greater effects on the stress burden than did the overall number of events. The findings show that the added probes generated useful contextual information with little additional time or cost. 8 Tables, 2 Figures, 1 Appendix, 61 References. M. Pflum

Williams, Paula G., Wiebe, Deborah J. & Smith, Timothy W. (c/o Wiebe--Dept Psychology U Utah, Salt Lake City 84112), **Coping Processes as Mediators of the Relationship between Hardiness and Health,** *Journal of Behavioral Medicine,* 1992, 15, 3, June, 237-255.

¶ Data obtained via a battery of standardized scales, questionnaires, & checklists from a sample of 139 undergraduates are used to explore the relationship among hardiness (H), coping, & illness. An attempt is made to respond to recent criticisms of the H literature, including the potential

overlap with neuroticism, whether H is a unitary construct, & the predominant use of male (M) samples. Results indicate that H is positively related to adaptive coping variables & negatively related to maladaptive coping variables. Problem-focused, support-seeking, & avoidant coping mediate the H-illness relationship. Although these H-coping relationships are partially independent of the influence of neuroticism, the relationship of both coping & H with self-reported illness appears to result from the common influence of neuroticism. Consistent with previous research, the commitment & control components correlate most consistently with coping variables, & predict H effects are most consistently demonstrated for Ms. 4 Tables, 1 Figure, 37 References. Bentler, Peter M. (Dept Psychology U California, Los Angeles 90024-1563), **Etiologies and Consequences of Adolescent Drug Use: Implications for Prevention,** *Journal of Addictive Diseases,* 1992, 11, 3, 47-61.

¶ Data are presented from an ongoing longitudinal study of drug use etiologies & consequences in a sample of 654 students who first completed questionnaires when they were in grades 7-9 at 11 schools in Los Angeles County, Calif, in the mid-1970s. Early- & mid-adolescent drug use patterns, personality, & behavioral correlates are described, controlling for related tendencies, eg, lack of social conformity & deviant friendship networks. Results suggest that teenage drug use disrupts many critical developmental tasks of adolescence & young adulthood. Tendencies to use many different drugs as an adolescent led in young adulthood to increased drug crime involvement, decreased college involvement, increased job instability, income, psychoticism, & stealing episodes. Intervention efforts should be directed not only toward decreasing drug use, but also toward improving personal maturity, social skills, & economic opportunities. 2 Tables, 21 References. Brown, Charles, Tucker, Earnestine & Brandon, Coress (U Alabama, University 35486), **Freshman Residence Perception of an Alcohol Education Class,** UM *College Student Journal,* 1991, 25, 4, Dec, 451-456.

¶ Previous research on campus-based alcohol education programs developed over the past 25 years indicates that they do not change, or have very little influence on, student drinking patterns. Here, students' perceptions of the value of these programs are assessed, drawing on mail questionnaire data from 108 students enrolled in a mandatory alcohol education class during their previous freshman year. The class was designed to be interactive & participatory, including role-playing, peer presentations, & lectures/discussions. In general, students felt that the class was useful & informative, but only a minority (15%) reported that they subsequently changed their drinking behavior. 3 Tables, 15 References. Adapted from the source document.

93Z8817

Bryan, Marguerite E., Intervention among Children of Substance Abusers and School Success, *Clinical Sociology Review,* 1992, 10,

0038-0202/93 $1.50

118-129.

¶ Findings from the substance abuse prevention literature indicate that children who grow up in households where there is alcohol & other drug abuse are much more likely to exhibit problematic, dysfunctional behavior, eg, delinquency, drinking, & drug use. Here, the applicability & effectiveness of intervention among African-American children of substance abusers in New Orleans, La, particularly in terms of school achievement, is assessed, using data obtained from school records & counselor ratings. Focus is on the impact of number of times the student participated in the counseling program on fourth-quarter grade point average & absenteeism as documented in final report cards. The results indicate that this intervention technique of socialization of at-risk youth toward alcohol & other drugs & toward coping with addiction in one's family improves academic performance among African-American youths. 2 Tables, 26 References. Adapted from the source document.

Cole, Galen, Timmreck, Thomas C., Page, Randy & Woods, Sara (c/o Timmreck–Dept Health Science & Human Ecology California State U, San Bernardino 92407), **Patterns and Prevalence of Substance Use among Navajo Youth,** *Health Values*, 1992, 16, 3, May-June, 50-57.

¶ Substance use prevalence & patterns among a group of 205 Navajo high school students were examined via self-report questionnaire, & the results contrasted with those of comparable studies. A substantial amount of substance use was found, with alcohol, in the form of beer, as the drug of choice. For each grade level, the reported frequency of alcohol use was strikingly similar to the number of times the students reported getting drunk each month. Analysis of multiple drug use revealed a negative pattern, suggesting that alcohol & marijuana serve as gateway substances that are intermediate to the use of more potent substances. 3 Tables, 11 References. Adapted from the source document.

Dance, Phyll & Mugford, Stephen (National Centre Epidemiology & Population Health Australian National U, Canberra ACT 2601), **The St. Oswald's Day Celebrations: "Carnival" versus "Sobriety" in an Australian Drug Enthusiast Group,** *Journal of Drug Issues*, 1992, 22, 3, summer, 591-606.

¶ St. Oswald's Day, a light-hearted event invented a decade ago by a group of illicit drug users in Australia & celebrated each Nov in Canberra, is described. The drug users are referred to as drug enthusiasts since they are neither dependent users nor mere recreational dabblers. The celebration centers around the use of intoxicating drugs &, while not officially recognized, is well organized. It is contended that by its very existence, the group challenges some common accounts of drug users & drug use. Drawing on interview data collected from 27 "Oswaldians" & participant observation, it is shown that the group, while unconventional, exhibits social solidarity & organization, in contrast to conventional accounts that have emphasized anomie, disorganization, & pathology among drug users. How the St. Oswald's Day celebration confronts the "sobriety" of modern society with an image of "carnival" is discussed. It is concluded that a much wider perspective on drug taking is needed, one that examines organization & disorganization, cooperation & selfishness, & normality & pathology. 20 References. Darke, Shane, Baker, Amanda, Dixon, Julie, Wodak, Alex & Heather, Nick (National Drug & Alcohol Research Centre U New South Wales, Kensington 2033 Australia), **Drug Use and HIV Risk-Taking Behaviour among Clients in Methadone Maintenance Treatment** *Drug and Alcohol Dependence*, 1992, 29, 3, Feb, 263-268.

¶ Data were obtained via various measures & blood tests to examine current drug use & HIV (human immunodeficiency virus) risk-taking behavior among 95 methadone maintenance clients who had been in treatment for an average of 70.9 weeks. Findings show that: 66+% of the Ss had injected heroin, & 82% a street drug, in the previous month; 20+% had shared a needle; those who had injected cocaine prior had significantly higher levels of injecting & risk-taking behavior; & condom use was low. While Ss' knowledge concerning HIV was high, no relationship was found between level of knowledge & actual behavior. 1 Table, 39 References. Adapted from the source document.

Des Jarlais, Don C. (Beth Israel Medical Center, 1st Ave & East 16th St New York NY 10013), **The First and Second Decades of AIDS among Injecting Drug Users,** *British Journal of Addiction*, 1992, 87, 3, Mar, 347-353.

¶ To project prospects for the next decade, findings & trends from the first decade of research on acquired immune deficiency syndrome (AIDS) among injecting drug users (IDUs) are examined. One of the most disturbing aspects of AIDS & human immunodeficiency virus (HIV) infection among IDUs that emerged in the first decade is the globalization of the problem. Further geographic spread can be expected, particularly in developing countries. Rapid spread of HIV among IDUs has occurred in large part due to a lack of AIDS awareness & mechanisms for efficient mixing of the at-risk population. IDUs have modified their behavior in response to a wide variety of AIDS prevention programs. No single type of prevention program should be viewed as a panacea, & a comprehensive system of programs will undoubtedly be needed. Changing sexual risk behavior has proven to be considerably more difficult than changing drug injection risk behavior. 2 Tables, 1 Appendix, 3 References. Adapted from the source document.

Des Jarlais, Don C., Casriel, Cathy, Friedman, Samuel R. & Rosenblum, Andrew (NDRI 11 Beach St, New York NY 10013), **AIDS and the Transition to Illicit Drug Injection–Results of a Randomized Trial Prevention Program,** *British Journal of Addiction*, 1992, 87, 3, Mar, 493-498.

¶ A sample of 104 Ss living in New York City who were using heroin intranasally ("sniffing") were used to study the transition to drug injection. Ss were randomly assigned to a 4-session social-learning-based acquired immune deficiency syndrome (AIDS)/drug injection prevention program or a control condition. Of the 83 Ss who were successfully followed at a mean time of 8.9 months, 20 (24%) of them reported, through interviews, injecting illicit drugs during the follow-up period. Drug injection during follow-up was associated with being in the control group, intensity of noninjected drug use, prior injection, & having close personal relationships with current intravenous drug users. 3 Tables, 8 References. Adapted from the source document.

Donoghoe, Martin C. (Centre Research Drug & Health Behaviour Charing Cross & Westminster Medical School, 200 Seagrave Rd London SW6 1RQ England), **Sex, HIV and the Injecting Drug User,** *British Journal of Addiction*, 1992, 87, 3, Mar, 405-416.
¶ A literature review on sexual risk behavior in injecting drug users focuses on the following major areas of concern: HIV (human immunodeficiency virus) prevalence among drug injectors, sexual risk behavior, the potential for heterosexual transmission, condom use, sexual risk & women, pregnancy, male homosexual activity & drug use, & the effect of drugs on sexual behavior & prostitution. It is demonstrated that, though there is considerable evidence that drug injectors are reducing their HIV risk, changes in syringe sharing behavior have been greater than those in sexual risk behavior. The difficulties in changing sexual risk behavior are considered, & some ways forward for intervention & prevention are suggested. 105 References. Adapted from the source document. Dorn, Nicholas & Murji, Karim (c/o Murji–Dept Applied Social Studies Nottingham Polytechnic, NG1 4BU England), **Low Level Drug Enforcement,** *International Journal of the Sociology of Law*, 1992, 20, 2, June, 159-171.
¶ Following an overview of the general structure of drug enforcement, the trend toward low-level policing of drug users & suppliers at the street or retail level in the US & GB is described in the context of six conceptual themes. Ways that low-level drug enforcement (LLDE) attempts to separate drug retailers from their customers (& vice versa) are identified. It is suggested that, while LLDE strategies mesh well with the current politically favored strategy of demand reduction, a number of political & ethical considerations might restrict its development. LLDE activity at the local level suggests a negotiated element that could produce many approaches & compromises. Implications for further research are discussed. 21 References. S. Francis, Leslie J. & Bennett, Gerald A. (Trinity Coll, Carmarthen Dyfed SA31 3EP Wales), **Personality and Religion among Female Drug Misusers,** *Drug and Alcohol Dependence*, 1992, 30, 1, Apr, 27-31.
¶ Female drug misusers (N = 50) completed both the Eysenck Personality Questionnaire & the Francis scale of attitudes toward Christianity on admission to a Christian drug rehabilitation program. Results confirm the deviant personality profile of drug misusers, who score high on psychoticism & neuroticism & low on extraversion & the lie scale. Findings relating religious attitudes to Eysenckian personality dimensions in normal populations also hold true for this sample. It is suggested that these data confirm that psychoticism is fundamental to religiosity, while neuroticism & extraversion are not. Implications of these findings for religious rehabilitation programs are discussed. 1 Table, 48 References. Adapted from the source document. Friedman, Samuel R., Neaigus, Alan, Des Jarlais, Don C., Sotheran, Jo L., Woods, Joycelyn, Sufian, Meryl, Stepherson, Bruce & Sterk, Claire (Narcotic & Drug Research Inc, 11 Beach St New York NY 10013), **Social Intervention against AIDS among Injecting Drug Users,** *British Journal of Addiction*, 1992, 87, 3, Mar, 393-404.
¶ It is argued that social interventions be implemented to complement the inadequate public health programs currently used to prevent drug injectors from engaging in behaviors that lead them to become infected with human immunodeficiency virus. Evidence that social factors, eg, peer pressure & the social relations of race, affect risk behavior is presented. Social interventions that are discussed include organizing drug injectors against acquired immune deficiency syndrome (AIDS) in ways analogous to those that gays organized against the epidemic; & finding ways to change large-scale social relationships that predispose people to inject drugs. 101 References. 93Z8829
Gill, Kathryn, Nolimal, Dusan & Crowley, Thomas J. (U Colorado, Denver 80262), **Antisocial Personality Disorder, HIV Risk Behavior and Retention in Methadone Maintenance Therapy,** *Drug and Alcohol Dependence*, 1992, 30, 3, Aug, 247-252.
¶ The relationship between antisocial personality disorder (ASPD), HIV (human immunodeficiency virus) risk behavior, & retention in methadone maintenance therapy is examined. Of 55 consecutive methadone maintenance admissions at a clinic, 42% were diagnosed with ASPD using the National Instit of Mental Health Diagnostic Interview Schedule; an HIV risk behavior interview was also administered to each of the 55 admissions. The findings reveal that individuals with ASPD exhibited greater risk for HIV infection. Data obtained from the same cohort, at a 1-year follow-up, reveal no significant differences between the ASPD & non-ASPD groups with regard to demographics, drug abuse history, outcome, & retention in treatment. It is concluded that ASPD patients who drop out of treatment could be at higher risk for contracting & spreading HIV within the intravenous drug-using population; & that, in the population studied, the diagnosis of ASPD using primarily behavioral traits has little utility in predicting treatment outcome. 3 Tables, 1 Figure, 26 References. Goldstein, Marc B. & Engwall, Douglas B. (Dept Psychology Central Connecticut State U, New Britain 06050), **The Politics of Prevention: Changing Definitions of Substance Use/Abuse,** *Journal of Health & Social Policy*, 1992, 3, 3, 69-83.
¶ Documented is the shift between 1975 & 1987 in the language used by the Reagan & Bush administrations in the fight against youthful drug abuse. It is argued that this shift reflects a change both in the moral climate as well as a reconceptualization of the appropriate way to confront the issue–ie, the "just say no" philosophy. Following a brief sociological overview of the emergence of adolescent drug use as a major social problem, government documents are examined to describe the changes in conceptual focus that have occurred & consider some of the potential negative consequences of these changes for drug education. 1 Table, 1 Figure, 23 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Griffiths, Mark D. (Dept Psychology U Exeter, EX4 4QG England), **The Acquisition, Development, and Maintenance of Fruit Machine Gambling in Adolescents,** UM *Journal of Gambling Studies*, 1990, 6, 3, fall, 193-204.
¶ Among adolescents in the UK, the major commercial gambling activity is playing slot machines (commonly known as "fruit" machines). Various helping organizations (eg Gamblers Anonymous) & the national press have reported negative consequences of "addiction" to this activity, including allegations of attempted murder, suicide, prostitution, & petty crime. Here, factors in the acquisition, development, & maintenance of this gambling behavior are explored, drawing on interview & questionnaire data from 50 adolescent fruit machine players in Exeter, England. Nine males were deemed to be pathological gamblers in accordance with *DSM-III-R* diagnostic criteria, & they reported a number of serious consequences of their activity, including gambling debts, truancy, & stealing. 4 Tables, 15 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z8833
Griffiths, Mark D. (Dept Psychology U Exeter, EX4 4QG England), **Addiction to Fruit Machines: A Preliminary Study among Young Males,** UM *Journal of Gambling Studies*, 1990, 6, 2, summer,

113-126.

¶ Qualitative data obtained via informal discussions & observations are used to explore adolescent gambling among 8 English males (mean age 19) addicted to playing & gambling on coin-in-the-slot machines (commonly known as "fruit machines"). Factors involved in the onset of fruit machine playing are examined, along with alternative gambling activities & associated problems. The role of skill & excitement components in persistent playing are also discussed. 1 Table, 32 References. Adapted from the source document.

Griffiths, Paul, Gossop, Michael, Powis, Beverly & Strang, John (National Addiction Centre, 4 Windsor Walk Camberwell London SE5 8AF England), **Extent and Nature of Transitions of Route among Heroin Addicts in Treatment–Preliminary Data from the Drug Transitions Study,** *British Journal of Addiction,* 1992, 87, 3, Mar, 485-491.

¶ In an examination of drug transitions in the UK, 2 data sets are used: (1) interviews with 264 heroin addicts, & (2) questionnaires administered to 75 heroin users in treatment programs. These data support the contention that differences in route of administration are likely to be reflected in differing patterns of drug use, & associated with differing health risks for the individual drug user. Heroin "chasers" were found to have robust & long-term patterns of heroin use & could not merely be considered as preinjectors. No differences were found in the typical daily doses prior to entering treatment between chasers & injectors. Ss who usually "chased the dragon" but who would also inject were less likely to have shared injecting equipment. Although transitions between different routes of use were found in most directions, changes from chasing to injection were most common. Year of initiation into heroin use was also related to initial route of use. 1 Figure, 19 References. Adapted from the source document.

Grund, Jean-Paul C., Stern, L. Synn, Kaplan, Charles D., Adriaans, Nico F. P. & Drucker, Ernest (Addiction Research Instit Erasmus U Rotterdam, NL-3000 DR Netherlands), **Drug Use Contexts and HIV-Consequences: The Effect of Drug Policy on Patterns of Everyday Drug Use in Rotterdam and the Bronx,** *British Journal of Addiction,* 1992, 87, 3, Mar, 381-392.

¶ Observational & other empirical data collected 1985-1989 are drawn on to compare patterns of intravenous drug use, the sharing of injecting equipment, & natural support systems among users in the Bronx (NY) with those in Rotterdam (Netherlands) to understand the dynamics of human immunodeficiency virus (HIV) transmission in user populations. The microsettings of everyday drug use in both locations contextualizes the positive & negative social behavior of addicts, characterized by sharing & helping, but also stealing. Differences in drug policies in both cities affect the social & personal behavior of addicts. Dutch society is socially responsible in drug policy, while repressive drug policies in the Bronx encourage more stereotypical negative behaviors linked to substance abuse. Such a harsher environment, & widely varying purity of drugs available, lead to more needle-sharing behavior in the Bronx, placing the user at a higher risk for HIV. 66 References. Adapted from the source document.

93Z8836

Gardin, J. Barry, Using Sociology to End Chemical Dependency, *Clinical Sociology Review,* 1992, 10, 90-106.

¶ The use of sociology in treating addictions to heroin & other drugs is explored, drawing on participant observations & interventions while counseling 160 heroin addicts over a 2-year period. Important historical changes have brought about new conflicting viewpoints within the methadone maintenance clinic, where acupuncture & Chinese herbal treatments are now available alongside Western medicine. Sociologists have tended to support methadone maintenance, which has been demonstrated to stem crime & human immunodeficiency virus, among other socially beneficial ends. Clinical sociologists can resocialize addicts to mentally healthful social solidarities, demystify the socially destructive effects of drugs, & criticize ineffective, dehumanizing treatment techniques & ideologies. 47 References. Holmila, Marja (Social Research Instit Alcohol Studies, Kalevankatu 12 A SF-00100 Helsinki Finland), **Social-Control Experienced by Heavily Drinking Women,** *Contemporary Drug Problems,* 1991, 18, 4, winter, 547-571.

¶ Social control of women's drinking is examined, based on data obtained in a postal survey (N = 6,000) conducted in the Helsinki (Finland) region, supplemented by qualitative interviews with 88 volunteers who were drinking heavily. The respondents' (Rs') descriptions of the social control of drinking & their own reactions to it can be seen as a way of negotiating their own deviance as women. Much of the social control imposed on women is so internalized that it is unquestioned: images of women's drinking are gender-specific, & are connected with being evil or ugly or sexually promiscuous. Family ties are the major source of social control of women's drinking. Usually, control by significant others, whether in the form of quarrels, advice, or threats, was accepted by Rs. Those Rs who lived with partners drinking even more than themselves often reported lack of control, which was interpreted as lack of consideration & love rather than as lack of power or discipline. 3 Tables, 1 Figure, 17 References. Homel, Ross, Tomsen, Steve & Thommeny, Jennifer (Griffith U, Nathan Queensland 4111 Australia), **Public Drinking and Violence: Not Just an Alcohol Problem,** *Journal of Drug Issues,* 1992, 22, 3, summer, 679-697.

¶ An examination of possible links between aspects of the environment of public drinking & the occurrence of violence, drawing on unstructured observations in 23 licensed premises in Sydney, Australia, & semi-structured interviews with licensing & general duties police, chamber magistrates, & security personnel (N not provided). It is hypothesized

that there is a complex relation between violence & public drinking that is imbedded in Australian history & culture & reproduced in institutional arrangements & regulatory & police practices regarding drinking. Based on the findings, it is argued that the regulatory system is undergirded by notions of the deserved misfortune of victims of pub violence, which is partly responsible for the historic failure in Australia to recognize violence involving licensed premises as a major societal problem & has led to inadequate legislation & police regulation. It is concluded that regularly violent venues should have their licenses cancelled, that police should enforce laws regulating bouncers, & that promotions that cause mass intoxication should be banned. 33 References. Isralowitz, Richard E. (Hubert H. Humphrey Instit Social Ecology Ben-Gurion U Negev, IL-84105 Beersheva Israel), **Licit and Illicit Drug Patterns and Problems among Kibbutz Young Adults**, *Journal of Adolescent Health*, 1991, 12, 6, Sept, 421-426.

¶ Questionnaire data from 240 Israeli young people ages 18-25 residing in 7 kibbutzim are drawn on to explore trends in their use of alcohol, illegal drugs, & cigarette smoking. A minority (26%) reported having ever used an illegal substance, mostly hashish or marijuana. Of the 67% who drank beer, approximately 50% did so at least once a week; wine & hard liquor were also used by about 50%. Cigarette smoking, mostly daily, was reported by 41%. Chi-square analyses showed that illicit drugs were more likely to be used if parents were divorced, if the user had a steady heterosexual relationship, & if peer relations were negative; these relationships interacted with gender of user. Parents' smoking & drinking behavior & the youth's marital/dating status related to the use of licit drugs. Results point to the importance of positive peer relations in the kibbutz setting. 4 Tables, 20 References. M. Pflum

Jones, Diane Carlson & Houts, Renate (Coll Liberal Arts Texas A&M U, College Station 77843-4235), **Parental Drinking, Parent-Child Communication, and Social Skills in Young Adults**, UM *Journal of Studies on Alcohol*, 1992, 53, 1, Jan, 48-56.

¶ Questionnaire data obtained from 338 introductory psychology students are used to examine relationships between: (1) parent-child communication & level of alcoholic problems within the family; & (2) problem drinking, family communication, & the self-reported social skills of the young adult child. Findings indicate that young adults who have memories of regular problem drinking within the family perceive less positive regard & a greater denial of or inattention to their feelings by the parents. Problem-drinking level interacted with either criticism or denial of feelings or emotional support to parents to predict primarily nonverbal social skills, eg, decreased emotional expressivity & increased sensitivity to the emotional cues of others. The results indicate that the effect of parental alcoholism on social skills of the young adult child must be considered in conjunction with specific types of family communication. 6 Tables, 1 Appendix, 22 References. Adapted from the source document.

Kallen, David J., Griffore, Robert J. & Friedman, Laurie L. (Dept Pediatrics & Human Development Michigan State U, East Lansing 48824-1317), **Substance Abuse and Sexual Behavior: A Theoretical Schema of Risk-Taking and Reconstruction of Social Reality**, *Sociological Practice Review*, 1992, 3, 4, Oct, 179-188.

¶ It is unclear whether perceptions of risks associated with substance abuse & sexual behavior tend to be situation- & behavior-specific, or whether they are generalizable from one situation/behavior to others. Nor is there clear evidence that successful treatment for substance abuse is likely to result in changes in sexual risk-taking behavior. Here, the perspective of the social construction of reality is used to develop a schema that demonstrates theoretical relationships among the dynamics of risk-taking related to substance abuse, to sexual behavior, & to risking-taking behavior for AIDS (acquired immune deficiency syndrome). Suggestions are made for future research. 2 Figures, 46 References. Adapted from the source document.

Kitano, Harry H. L., Chi, Iris, Rhee, Siyon, Law, C. K. & Lubben, James E. (School Social Welfare U California, Los Angeles 90024-1452), **Norms and Alcohol Consumption: Japanese in Japan, Hawaii and California**, UM *Journal of Studies on Alcohol*, 1992, 53, 1, Jan, 33-39.

¶ Data obtained in an interview survey are used to compare age/sex norms & alcohol consumption of a sample of Japanese from Japan (N = 1,225) & Japanese Americans in Hawaii & Calif (N = 514 in each state). Analysis reveals significant differences in norms across the sites, with the Japanese in Japan holding the most tolerant views of heavier drinking for men, followed by Calif & Hawaii. The Japanese-American samples were more tolerant of female drinking than were the Japanese. There was a high degree of similarity between Hawaii & Calif, whereas Japanese respondents in Japan differed in their responses. A correlation between drinking & norms by site indicated a high degree of congruence between drinking & more tolerant norms for drinking in all of the samples: those who drank the most also had the most permissive norms to-

0038-0202/93 $1.50

ward drinking. The differences in norms between Japanese in Japan & Japanese Americans are explained in terms of enculturation & acculturation. 6 Tables, 16 References. Adapted from the source document.

Klee, Hilary (Dept Psychology Manchester Polytechnic, M13 0JA England), **A New Target for Behavioural Research–Amphetamine Misuse,** *British Journal of Addiction,* 1992, 87, 3, Mar, 439-446.

¶ In the social research into drug misuse that has occurred in the wake of the acquired immune deficiency syndrome pandemic, younger, non-opiate, nonagency samples would be more representative of national patterns of illicit drug use, but have been relatively neglected in favor of older opiate users receiving treatment from drug agencies. Amphetamine misuse illustrates the dangers of such sampling bias. In comparing the human immunodeficiency virus (HIV)-related risk behavior of 100 amphetamine injectors with that of 132 heroin injectors, it is shown that amphetamine misuse is associated with patterns of behavior that have serious implications for the transmission of HIV infection. 21 References. Krahn, Dean D., Nairn, Karen, Gosnell, Blake A. & Drewnowski, Adam (Medical Center U Michigan, Ann Arbor 48109-0116), **Stealing in Eating Disordered Patients,** *The Journal of Clinical Psychiatry,* 1991, 52, 3, Mar, 112-115.

¶ Standardized survey, inventory, & other data, together with information obtained during clinical interviews with 181 female patients evaluated at the U of Michigan's eating disorders program, are drawn on to compare the eating & purging behavior, levels of psychological symptomatology, & alcohol use of patients with & without a history of stealing. Overall, the patients with a history of stealing reported significantly more psychological distress, including more depression, interpersonal sensitivity, obsessive compulsive behavior, & hostility. It is concluded that stealing behavior should be assessed in patients with eating disorders as a history of such may indicate more severe impairment. 2 Figures, 17 References. Lang, Alan R., Winiarski, Mark G. & Curtis, Lisa (Dept Psychology Florida State U, Tallahassee 32306), **Person Perception as a Function of Drinking Behavior, Gender and Sex Role Stereotypes,** IM *Journal of Studies on Alcohol,* 1992, 53, 3, May, 225-232.

¶ Sex-role stereotypic perceptions of drinking behavior were investigated in an experiment in which the level of drinking & gender of the protagonist in 8 vignettes were systematically varied to examine the effects of these variables on the inferences drawn by 400 undergraduates about the drinkers' personal attributes & future. Results showed that alcohol-related behaviors influenced perceptions of character more strongly than did gender. Abstainers of either sex were also viewed more positively than comparison groups of drinkers on most measures. Raters' own drinking habits had more impact on judgments than did their sex bias: eg, heavier drinkers tended to rate behaviors related to heavier drinking more favorably than did lighter drinkers. Implications of these results for prevailing theories about norms & evaluations regarding drinking are discussed. 2 Tables, 16 References. Adapted from the source document.

Lee, Rensselaer W., III (Global Advisory Services, Alexandria VA 22314), **Dynamics of the Soviet Illicit Drug Market,** IM *Crime, Law and Social Change,* 1992, 17, 3, May, 177-233.

¶ It is argued that the demise of communism, Westernization, internal economic reform, & the disintegration of the Soviet state will combine in the 1990s to create a situation conducive to the proliferation of drug abuse & drug trafficking in the former USSR. Rates of drug abuse soared during the 1980s, & organized, interregional drug mafias have emerged to serve a rapidly expanding illegal drug market. It is speculated that: convertibility of the ruble could result in a large influx of Western drugs, eg, cocaine, heroin, or crack, into European Russia; a rapid expansion of trade, travel, & economic ties with Western countries is likely to increase the availability of drugs; & if current trends continue, former Soviet Central Asia could become a significant world supplier of hashish & opium products in the 1990s. Also discussed is the Soviet approach to fighting drugs. 11 Tables, 1 Figure, 2 Appendixes, 388 References. Adapted from the source document.

Lemmens, Paul, Tan, E. S. & Knibbe, R. A. (Dept Medical Sociology U Limburg, NL-6200 MD Maastricht Netherlands), **Measuring Quantity and Frequency of Drinking in a General Population Survey: A Comparison of Five Indices,** IM *Journal of Studies on Alcohol* 1992, 53, 5, Sept, 476-486.

¶ Five indices of alcohol consumption are compared in a 1985 survey of the general population (N = 918 respondents [Rs] ages 16-70) in the Netherlands. Self-reports of quantity & frequency of consumption were obtained using a prospective diary, a retrospective 7-day recall method & three summary measures. The coverage of sales data appeared highest for the diary (67%), suggesting a higher validity. Diary underreporting was generally higher in the frequency than in the quantity domain. This result, together with the finding from longitudinal studies that intraindividual variation is also higher for drinking frequency, leads to the conclusion that: (1) forgetting is a potent source of undercoverage in surveys, & (2) large differences in overall drinking pattern between populations may account for the large differences in coverage rates of sales data. Furthermore, the subjectivly assessed probability of drinking by means of a "usual" frequency question appeared a poor predictor of (diary) drinking frequency for Rs reporting a low or moderate frequency; for Rs claiming a high drinking frequency, a reasonable correspondence between diary & summary measures was found. This mitigates the fear often expressed that heavy drinkers particularly underreport their consumption. 4 Tables, 7 Figures, 24 References. Adapted from the source document.

Lundberg, Olle & Östberg, Viveca, Klass och alkohol. Bidrar klasskillnader i alkoholrelaterad dödlighet till dödlighetsskillnaderna i Sverige? (Class and Alcohol. Do Differences in Alcohol-Related Mortality Contribute to the Overall Mortality Gradient in Sweden?), *Alkoholpolitik,* 1990, 7, 4, 196-204. (SWE)

¶ Data from a registry composed of statistics from the 1980 census & 1981-1986 mortality records in Sweden are drawn on to explore the contribution of alcohol consumption to social class differences in mortality. After verifying the presence of a class gradient in alcohol-related mortality, overall mortality is compared to alcohol-related deaths across 7 social classes, controlling for age-related risks. Analysis reveals that the class gradient in alcohol-related mortality is steeper than that for overall mortality, though overall mortality remains unchanged when alcohol-related deaths are eliminated. Results change only slightly if accidents, suicide, poisoning, & violence are included in the analysis. It is concluded that differences in health-related behaviors are less important than previously suspected in explaining class differences in health & mortality. 4 Tables, 1 Appendix, 20 References. Mattson, Margaret E. & Allen, John P. (National Instit Alcohol Abuse & Alcoholism, 5600 Fishers Lane Room 14C20 Rockville MD 20857), **Research on Matching Alcoholic Patients to Treatments: Findings, Issues, and Implications**, *Journal of Addictive Diseases*, 1991, 11, 2, 33-49.

¶ The optimum alcoholism treatment program must correspond to needs of individual problem drinkers. Three models of interactions between patient characteristics & clinical interventions are discussed. In the first, patient characteristics predict treatment outcome. The second model exemplifies true patient-treatment matching, in which the presence of a patient characteristic makes one treatment more effective than another. The third model describes the inverse of the second model, ie, that a characteristic's level will favor the effectiveness of one treatment but prevent the effectiveness of another. After a brief review of secondary experimental results supportive of matching strategies, practical issues central to developing a consistent research methodology are discussed, along with the pros & cons of treatment matching in clinical settings. 1 Table, 3 Figures, 34 References. May, Philip A. (Center Alcoholism/Substance Abuse/Addictions U New Mexico, Albuquerque 87131), **Alcohol Policy Considerations for Indian Reservations and Bordertown Communities**, *American Indian and Alaska Native Mental Health Research*, 1992, 4, 3, 5-59. **Comments**, 60-125, **Response**, 126-132.

¶ Based on a review of the literature, alcohol abuse problems on Indian reservations in the US & options for addressing them are described, & the implications for policy considered. Focus is on: controlling the supply of alcoholic beverages through statute & regulation; influencing drinking practices directly; & reducing physical & environmental risks. It is cautioned that methods described here should be carefully evaluated for their appropriateness for specific communities. In **Native Alcohol Policy Options. You've Been Given a Map: Blazing a Trail Is Up to You**, Ron Peters praises the wealth of information provided by the study & concurs with the idea that local needs assessment is essential to ensure success. In **Alcohol Policy Considerations in American Indian Communities: An Alternative View**, Dwight B. Heath (Brown U, Providence, RI) criticizes May's emphasis on controlling alcoholic beverages, & stresses the importance of value & behavioral shifts in the target population. In **Commentary on "Alcohol Policy Considerations for Indian Reservations and Bordertown Communities,"** Aron Wolf (Langdon Clinic, 4001 Dale St #101, Anchorage, Alaska) relates May's work to the situation of Native Americans in Alaska, describing current alcohol policy there. In **The Need for Community Consensus as a Condition of Policy Implementation in the Reduction of Alcohol Abuse on Indian Reservations**, Fred Beauvais (Colorado State U, Fort Collins) stresses the importance of community consensus in alcohol policy & describes the process by which it can be achieved on Indian reservations. Also discussed is the prevalence of alcoholism on reservations. In **Community Development as Context for Alcohol Policy**, Norman Dorpat (Northwest Indian Coll, Tacoma, Wash) argues that, while May emphasizes the importance of primary social groups in the development & implementation of alcohol policy, he does not describe many policy options that target them, focusing rather on the judiciary & other government entities. It is concluded that the development of a sense of community must precede policy development; steps for this process are outlined. In **The Next Twenty Years of Prevention in Indian Country: Visionary, Complex, and Practical**, Candace M. Fleming (U of Colorado Health Science Center, Denver) praises May's work & urges its dissemination among Indian communities. His principles of alcohol policy development are compared with those of the Office for the Prevention of Substance Abuse, & publications of that office are listed. In **Much Remains to Be Done**, Delores Gregory (Indian Health Service, 1220 SW 3rd Ave Room 476, Portland, Ore) notes that May's characterization of alcohol abuse on Indian reservations reflects the pre-1986 period: alcohol abuse prevention policies have been successfully implemented in many Indian communities since then, but intravenous drug use has risen, with a subsequent increase in acquired immune deficiency syndrome infection (AIDS). Public policy responses are described, & future needs outlined. In **Commentary**, Jerrold E. Levy discusses how data on Indian drinking influence how the problem is perceived, reducing changes for success of community-based prevention & treatment programs. In **An Emphasis on Solutions Rather Than Problems**, Carol Chiago Lujan (Bureau of Indian Affairs, 1849 C St NW Mail Stop 3-SIB, Washington, DC) highlights several themes, including: communities need to develop a comprehensive & clearly defined alcohol prevention policy, & value & attitude changes must occur in primary social groups. In **Do We Care Enough to Attempt Change in American Indian Alcohol Policy?**, Patricia D. Mail (Alcohol, Drug Abuse, & Mental Health Administration, 22 Monroe St, Suite 301, Rockville, Md) comments that the behavior & attitudes of Indian nondrinkers or social drinkers should be studied & lists community approaches to prevention. In **Alcohol Policy Considerations for Indian People**, James W. Thompson (U of Maryland, Baltimore) argues that May's public health approach may not be appropriate for all alcohol misuse, & that May's definitions of alcohol problems are confusing. In **Alcoholic Beverage Control Policy: Implementation on a Northern Plains Indian Reservation**, Mark C. Van Norman (Greene, Meyer, & McElroy, P. C., 1007 Pearl St, Suite 240, Boulder, Colo) describes federal regulation of liquor traffic & Indian tribes' control over this traffic, with focus on the Cheyenne River Sioux Tribe's 1987 legislation. In **Let the Debate, Study, and Action Continue: Response to Twelve Critiques**, May addresses these comments. 4 Tables, 3 Figures, 168 References. J. Taylor (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

McFall, Miles E., Mackay, Priscilla W. & Donovan, Dennis M. (Veterans Administration Medical Center Psychology Service, 1660 South Columbian Way Seattle WA 98108), **Combat-Related Posttraumatic Stress Disorder and Severity of Substance Abuse in Vietnam Veterans**, UM *Journal of Studies on Alcohol*, 1992, 53, 4, July, 357-363.

¶ Combat-exposed Vietnam-theater veterans (V-tVs) & Vietnam-era veterans (V-eVs) without war zone duty (N = 108 & 151, respectively) seeking treatment for substance abuse disorders in Seattle, Wash, were administered a battery of psychometric assessment measures, including one for posttraumatic stress disorder (PTSD). Analysis yielded no significant differences between V-tVs & V-eVs on alcoholism & drug abuse problems, but V-tVs suffering from PTSD scored significantly higher than non-PTSD V-tVs on several scales, & were at greater risk for concurrent alcohol & drug abuse disorders. The overall severity & ideational reexperiencing symptoms of PTSD were more strongly associated with drug than alcohol abuse, while the reverse was true for physiological arousal symptoms. These results confirm the hypothesis that substance abuse severity is associated more specifically with PTSD than with combat duty per se. Substance abuse becomes a maladaptive means of dealing with the cognitive & physiological symptoms of PTSD. 2 Tables, 30 References. Adapted from the source document. McGee, Zina T. (Dept Sociology Tulane U, New Orleans LA 70118-5698), **Social Class Differences in Parental and Peer Influence on Adolescent Drug Use**, UM *Deviant Behavior*, 1992, 13, 4, Oct-Dec, 349-372.

¶ Questionnaire data from the 1985 Monitoring the Future Study (N = 16,502 US high school seniors) are drawn on to test the hypothesis that the effects of parental & peer influence on adolescent drug use differ significantly by social class. Using variables derived from the social control, social learning, & strain theories of delinquency, strongest support is found for the social learning perspective: peer influence has the greatest effect on adolescent drug use, particularly among the middle class, & the effect of parental influence is insignificant. Support is also found for social control theory in that significant class differences exist with regard to the effects of belief, commitment, & religious/school attachment on drug use. No support is found for strain theory in that the effects of expected college & career success on drug use are insignificant. Implications for integrating stratification research with the delinquency literature are discussed to provide a more precise explanation of the class-delinquency relationship. 3 Tables, 58 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Monto, Martin A., Newcomb, Michael D., Rabow, Jerome & Hernandez, Anthony C. R. (Dept Sociology U California, Los Angeles 90024-1551), **Social Status and Drunk-Driving Intervention,** 𝕸 *Journal of Studies on Alcohol,* 1992, 53, 1, Jan, 63-68.

¶ The decision to intervene to prevent an inebriated peer from driving drunk is examined, using questionnaries completed by 303 students who had been in a situation in which someone was too drunk to drive, of whom 65% reported having intervened. Differences in the likelihood of intervention are examined through a loglinear analysis of the age, race, & sex of the respondent & the potential drunk driver. The decision to intervene is seen as a naturally occurring form of helping behavior. Analysis reveals that persons are much more likely to experience drunk-driving situations in which the potential driver is similar to them in terms of age, race, & sex than situations in which the driver is different. However, neither status differences nor similarity affects the likelihood of intervention. 2 Tables, 27 References. Adapted from the source document.

Moss, A. R. & Vranizan, K. (Dept Epidemiology & Biostatistics U California, San Francisco 94143), **Charting the Epidemic: The Case Study of HIV Screening of Injecting Drug Users in San Francisco, 1985-1990,** *British Journal of Addiction,* 1992, 87, 3, Mar, 467-471.

¶ A case study is presented of San Francisco's (Calif) 1985 implementation of human immunodeficiency virus (HIV) screening for drug users in treatment. This was followed by street screening, community outreach, bleach distribution, & other intervention programs. The HIV seroconversion rate fell from 4.5% per year in 1985/86 to 1.7% per year in 1987/88 & has remained stable at about 2% per year since 1988. While this decline cannot be attributed to specific programs, the broad spectrum of interventions in San Francisco appears to be keeping the new infection rate low. Future programs should aim at: reducing heterosexual HIV transmission, intervening with multiply diagnosed drug users, & providing service to homeless & other very poor drug-using groups. 16 References. Adapted from the source document.

Narusk, Anu (Dept Sociology Estonian Academy Sciences, Pst 7 20001 Tallinn), **Transmission of Drinking Habits within the Family,** *Contemporary Drug Problems,* 1991, 18, 4, winter, 645-671.

¶ Explored is the role of the family in adolescent socialization, focusing on the transmission of drinking patterns, based on questionnaire data obtained from parents & adolescents in a random sample of 538 urban & rural families in Estonia. Analysis addresses four levels of influence: (1) direct familial effect; (2) indirect parental influence; (3) indirect extrafamilial effects; & (4) impact of society's ideological, socioeconomic, & cultural-ecological context. Results indicate that mother's modeling has a statistically higher effect than father's on adolescent behavior. Parental modeling in intact families is stronger for male than female adolescents. Also, the influence of family on adolescents is dependent on the broader social context of drinking. 4 Tables, 3 Figures, 24 References. I. Shagrir

Niemelä, Jorma, Viinasta vapautuminen ja retkahdusten torjuntakeinot uskoon tulleilla alkoholisteilla (How Converted Alcoholics Seek to Lead a Liquor-Free Life and Avoid Backsliding) *Alkoholipolitiikka,* 1990, 55, 6, 303-308. (FIN)

¶ Analysis of interviews conducted with 34 former alcoholics who had overcome their obsession with alcohol through a religious conversion reveals that religion: (1) compensated for their need to drink by offering them something meaningful, & (2) gave them a feeling of being cleansed from the guilt that had plagued many of them. Although religion was viewed as a solution to drinking & other problems, the Ss regarded it primarily as an end in itself. Ss who had not completely overcome their urge to drink reported using such techniques as concentrating on prayer & Bible reading, viewing their daily activities in a religious context, & turning to church friends for support. 16 References. Perkins, H. Wesley (Dept Anthropology & Sociology Hobart & William Smith Colls, Geneva NY 14456), **Gender Patterns in Consequences of Collegiate Alcohol Abuse: A 10-Year Study of Trends in an Undergraduate Population,** 𝕸 *Journal of Studies on Alcohol,* 1992, 53, 5, Sept, 458-462.

¶ After reviewing problems in earlier research, gender differences & trends in several types of negative consequences of student drinking are reported, drawing on data from 4 surveys conducted 1979-1989 with undergraduates at a small liberal arts college in NY (total N = 3,875) Results do not support an overall "convergence hypothesis," as men remained much more problematic in several types of alcohol-related consequences–especially abuse problems that are public, involve legal repercussions, or that endanger others. Consequences that are more personal or less prone to provoke public response reveal little or no gender differences, however. Suggestions for additional gender research on alcohol problems in the campus context are offered. 2 Tables, 20 References Adapted from the source document.

Piispa, Matti, Alkoholiliberalismin suuri linja (The Trend in Alcohol Liberalism), *Alkoholipolitiikka,* 1990, 55, 6, 277-283. (FIN)

¶ On the basis of a qualitative survey of the treatment of alcohol policy in the Finnish print media, the following issues are discussed: (1) shifts over time in attitudes regarding alcohol policy, (2) the prevalence of liberal opinions on this subject, & (3) the independent role of the press in relation to alcohol policy. The prevailing liberal attitude in Finland is attributed to social & cultural factors, as opposed to economic ones, & to reflect the belief that alcohol is a part of modern life. The attitude of the media regarding alcohol is found to be consistently liberal, assuming that individuals possess the responsibility & common sense necessary for dealing with alcohol consumption. 21 References. Adapted from the source document.

Platt, Stephen & Robinson, Andrew (MRC Medical Sociology Unit, 6 Lilybank Gardens Glasgow G12 8QQ Scotland), **Parasuicide and Alcohol: A 20 Year Survey of Admissions to a Regional Poisoning Treatment Centre,** *The International Journal of Social Psychiatry,* 1991, 37, 3, autumn, 159-172.

¶ The association between alcohol dependency & nonfatal suicide (para-

suicide) is examined using 1968-1987 medical record data for 2,189 male (M) & 3,102 female (F) patients (ages 16+) from the Regional Poisoning Treatment Center in Edinburgh, Scotland. Across this period, alcohol abuse (chronic or severe alcoholism) was present significantly more often in M (15%) than F (6%) parasuicides, but the proportion of alcohol-dependent F suicides increased in the second decade. Chi-square tests on demographics show that the alcohol-dependent group was significantly older, more likely to be divorced, & more likely to be unemployed than the non-alcohol dependent group. Adverse family features were more characteristic of alcohol-dependent than non-alcohol dependent Fs. In terms of clinical variables, alcohol-dependent Ss were more likely to have had previous suicide attempts & to have received psychiatric treatment in the past year. In general, some of the social processes involved in alcohol dependency & parasuicide for Fs may be different than for Ms. More attention to aftercare for the alcohol-dependent group of parasuicides is recommended. 7 Tables, 3 Figures, 31 References. Adapted from the source document.

Rosenqvist, Pia (Nordic Council Alcohol & Drug Research, Annankatu 29 A 23 SF-00100 Helsinki Finland), **AA, Al-Anon and Gender,** *Contemporary Drug Problems,* 1991, 18, 4, winter, 687-705.

¶ An investigation of gender relations in the AA (Alcoholics Anonymous) movement & Al-Anon, the support movement for those living close to alcoholics, in Finland, based on survey data, observations of meetings, & interviews with individual AA & Al-Anon members (Ns not specified). It is suggested that the AA movement does not differ from the surrounding society in that most drinkers are men, & most drinking is done by men; however, compared to their numbers among the heavy drinking population, women are fairly well-represented in AA. With respect to division of labor & power, AA reproduces the social gender structure, although some elements of the AA program & functioning seem to counteract the more traditional sex division, eg, taking turns in sharing the experiences at meetings. All-women's groups are rare in Finland, suggesting that the experience of alcoholism is enough of a common experience for uniting the genders in joint meetings. Moreover, the indifferent & sometimes negative attitude among both women & men in AA toward all-women's groups illustrates the separation of female alcohol use & abuse from traditional feminine living surroundings. Al-Anon is still composed almost exclusively of women. 31 References. Modified AA

Ruggiero, Vincenzo & Vass, Antony A. (Middlesex Polytechnic, London N11 2NQ England), **Heroin Use and the Formal Economy: Illicit Drugs and Licit Economies in Italy,** *British Journal of Criminology,* 1992, 32, 3, summer, 273-291.

¶ An examination of relationships between the formal economy & the illicit drugs (heroin) economy in three Italian cities–Naples, Verona, & Turin–based on ethnographic fieldwork, analysis of judicial documents, & interviews (N = 45 habitual & occasional users in Naples & 64 abusers, users, distributors, couriers, social workers, & psychologists in Turin). It is argued that the economy of illicit drugs is extremely flexible, as it is capable of adapting to the legal business in Naples, where the features of a so-called hidden economy prevail. Also analyzed is how the economy of illicit drugs has entered Verona, characterized by the presence of healthy, competitive, midrange industries, as well as Turin, typified by the prevalence of monopolistic firms. 106 References. 93Z8876

Salomaa, Jukka, **Alkoholin kulutus OECD-maissa: Miksi kulutus on kasvanut Suomessa mutta ei muualla?** (Alcohol Consumption in OECD Countries: Why Has Consumption Grown in Finland but Not in Other Countries?), *Alkoholipolitiikka,* 1990, 55, 6, 284-291. (FIN)

¶ An attempt is made to explain changing rates of alcohol consumption in OECD (Organization for Economic Cooperation & Development) countries, based on linear demand models. Income, prices, & population structure were determined to be the most significant factors in shifts in alcohol consumption. In Finland, a rise in income correlates more strongly with increased alcohol consumption than in other countries surveyed & also positively affects the amount of alcohol consumed in restaurants. Prices are found to be relatively inflexible. A strong decline in alcohol consumption due to a rise in real prices was found for Finland, whereas for other countries (eg, Norway, Sweden, Ireland, & Canada), this decline was due to changes in attitudes & population structure. 5 Tables, 6 References. Adapted from the source document.

Schuster, Charles R. (National Instit Drug Abuse, 5600 Fishers Ln

0038-0202/93 $1.50

Rockville MD 20857), **Drug Abuse Research and HIV/AIDS: A National Perspective from the US,** *British Journal of Addiction,* 1992, 87, 3, Mar, 355-361.

¶ In the US, the National Instit on Drug Abuse (NIDA) researches strategies for stopping the transmission of human immunodeficiency virus (HIV) related to the abuse of illicit drugs. While NIDA targets the drug-abuse behavior most likely to spread HIV–the sharing of contaminated needles for intravenous drug injection–it also considers viral transmission between abusing sexual partners. NIDA is developing: new medications-based therapies for drug dependence treatment; alternative treatments for drug abusers not responsive to common therapies; research teams for treatment effectiveness studies; & prenatal substance abuse prevention programs. NIDA is particularly concerned with building an effective communication network to spread their findings. Adapted from the source document.

Stimson, Gerry V. & Power, Robert (Centre Research Drugs & Health Behaviour Charing Cross & Westminster Medical School, 200 Seagrave Rd London SW6 1RQ England), **Assessing AIDS Prevention for Injecting Drug Users; Some Methodological Considerations,** *British Journal of Addiction,* 1992, 87, 3, Mar, 455-465.

¶ It is argued that rigorous, flexible, & comparative evaluation be applied to newly-developed strategies aimed at reducing the spread of human immunodeficiency virus (HIV) infection among injecting drug users. To achieve this, the basic principles of evaluation, both in terms of service delivery & process evaluations, as well as outcome measures, must be examined. In the evaluation task, it is important to distinguish clearly between implementation & impact, aims & objectives. At the practical level, researchers need to give due consideration to liaison with agency staff. Methodologically, issues such as demonstrating impact & rival explanations must be addressed. A model for evaluation is proposed that has particular relevance to community-based initiatives aimed at reducing the spread of HIV infection. 3 Tables, 33 References. Strang, John, Des Jarlais, Don C., Griffiths, Paul & Gossop, Michael (c/o Des Jarlais–Narcotic & Drug Research Inc, 11 Beach St New York NY 10013), **The Study of Transitions in the Route of Drug Use: The Route from One Route to Another,** *British Journal of Addiction,* 1992, 87, 3, Mar, 473-483.

¶ Transitions in route of drug self-administration are analyzed along with the risks of certain routes for acquiring human immunodeficiency virus, in attempt to devise approaches to prevent the spread of acquired immune deficiency syndrome. Drawing on research detailing route transitions in heroin users in London, England & New York City, it is found that heroin users were either sniffers, chasers, or injectors, with typical behavioral correlates. Although politically expedient to assume a simple relationship between availability of paraphernalia & use of injectable drugs, repressive measures do not always produce changes in route patterns. Other questions pertaining to relapse into injecting behavior, frequency & reversibility of transitions, & the efficiency of various modes of administration are discussed. 50 References. Adapted from the source document.

Teck-Hong, Ong (Dept Social Work & Psychology National U Singapore, 0511 Singapore), **The Behavioural Characteristics and Health Conditions of Drug Abusers: Some Implications for Workers in Drug Addiction,** *International Social Work,* 1992, 35, 1, Jan, 7-17.

¶ To examine aspects of drug abusers' misconduct, usual activities, & health conditions before their drug abuse experience, questionnaire & interview data were obtained from 96 male & 4 female drug abusers (most ages 18-29) in Singapore registered with voluntary organizations for treatment & rehabilitation, & from 100 nonabuser controls matched for gender, age, ethnic group, education, & neighborhood. The findings show that, compared with nonabusers, significantly fewer drug abusers helped with family responsibilities, participated in games or sports, pursued hobbies, listened to radio or watched TV, or visited friends. Significantly more drug abusers reported gambling or hanging around in the streets, seeing movies, & staying at home doing nothing. Thus, even before their involvement with drugs, abusers had not participated in helpful, healthy, positive, & group functions. Implications for workers in the area of drug addiction are discussed. 5 Tables, 24 References. Adapted from the source document.

Thompson, Becky Wangsgaard (Afro-American Studies Program Princeton U, NJ 08544-1017), **"A Way Outa No Way": Eating Problems among African-American, Latina, and White Women,** *Gender & Society,* 1992, 6, 4, Dec, 546-561.

¶ A feminist theory of eating problems (anorexia, bulimia, extensive dieting, & binging) is developed, based on life-history interviews with 5 African-American, 5 Latina, & 8 white women. Findings show that eating problems begin as strategies for coping with various traumas, eg, sexual abuse, racism, classism, sexism, heterosexism, & poverty. Identifying eating problems as survival strategies shifts the focus from portraying them as issues of appearance. 46 References. Adapted from the source document.

Werch, Chudley E., Meers, Betty W. & Hallan, Jerome B. (Coll Health U North Florida, Jacksonville 32224), **An Analytic Review of 73 College-Based Drug Abuse Prevention Programs,** *Health Values,* 1992, 16, 5, Sept-Oct, 38-45.

¶ A multiple levels-of-effect analysis was conducted to determine the impact of 73 federally funded college-based drug prevention programs in the US. Data from each program's final report reveal that the majority did not identify an underlying prevention philosophy (75%) or theory (89%); however, most reported program purposes (67%) & objectives (95%). The average program provided over 206 total program offerings, reaching 19,361 individuals. The majority of programs reported at least a limited degree of institutionalization (41%), & most reported significant policy changes (56%). Recommendations for future drug prevention efforts on college campuses are provided. 3 Tables, 20 References. Adapted from the source document.

Williams, Robert J. & Wortley, Richard K. (School Social Science Charles Sturt U, Bathurst New South Wales 2795 Australia), **Sex Differences in the Interaction of Drinking, Positive Expectancies and Symptoms of Dependence in Young Adults,** *Drug and Alcohol Dependence*, 1991, 29, 1, Dec, 63-68.

¶ Assuming that alcohol users seek to balance positive expectancies for intoxication with negative consequences, it was posited that heavier drinkers would rate the likelihood of having positive effects higher, while trivializing negative consequences. Responses of 198 Australian college students to the Alcohol Expectancy Questionnaire & the Alcohol Dependence Scale revealed, as expected, that young males were the heaviest consumers, but also that heavier-drinking females perceived fewer negatives & more positives than did their male counterparts. This finding is explained by: the peer-centered perceived utility of drinking at this age, a diminished personal harm rationalization, & gender-based acculturation factors. 2 Tables, 1 Figure, 34 References. Adapted from the source document.

Wilson, R. Jean (Road Safety & Motor Vehicle Regulation Directorate, 344 Slater St Ottawa Ontario K1A 0N5), **Convicted Impaired Drivers and High-Risk Drivers: How Similar Are They?,** UM *Journal of Studies on Alcohol*, 1992, 53, 4, July, 335-344.

¶ D. M. Donovan's 1980 study ("Drinking Behavior, Personality Factors and High-Risk Driving," PhD dissertation, U of Washington, Seattle) on similarities between convicted impaired drivers (DWIs) & high-risk drivers (high in accidents or violations) is partially replicated using data on 238 DWI drivers, 287 high-risk drivers, & 374 adult drivers randomly selected from the Ontario driver's license file & interview data on driving behavior, drinking behavior, personality, values, lifestyle, & social-environmental influences obtained from 41% of the sample. Multivariate analysis shows that the DWI group was the most deviant in personality & behavioral measures, & had more accidents & traffic violations. Both DWI & high-risk drivers had higher levels of sensation-seeking than did controls. High-risk & control groups did not differ on frequency of DWI or drinking behavior, but did differ in their perceptions of the impairing effects of alcohol. Age was inversely associated with higher (negative) scores on the driving measures; age may, in fact, have confounded some of Donovan's results. Multivariate discriminant analysis correctly classified only 52% of the sample overall, indicating high intragroup heterogeneity. Although some of the results support Donovan's conclusion that DWI & high-risk groups represent subtypes within the same high-risk population, the intergroup similarities are qualified. 3 Tables, 31 References. Andersson, Lars (Stockholm Gerontology Research Center, S-11382 Sweden), **Loneliness and Perceived Responsibility and Control in Elderly Community Residents**, *Journal of Social Behavior and Personality*, 1992, 7, 3, 431-443.

¶ An examination of the impact of perceived responsibility for control over loneliness on the mental & physical health of a representative sample of 267 elderly community residents in Stockholm, Sweden. Data obtained via interviews & questionnaires are drawn on to relate these loneliness indicators to self-esteem, depression, health & health care utilization, psychosomatic symptoms, social loss, & social class. Results indicate that responsibility for loneliness is unrelated to psychological well-being, but that the ability to control feelings of loneliness is related to experiences of loneliness & depression (when controlling for anxiety). 2 Tables, 30 References. Baars, Jan & Thomése, Fleur (Vrije U, NL-1081 HV Amsterdam Netherlands), **Woongemeenschappen van ouderen: Tussen zelfstandigheid en kolonisering** (Communal Living of Elderly People: Between Independence and Colonization), *Tijdschrift voor Sociale Wetenschappen*, 1992, 37, 4, Oct-Dec, 357-379. (DUT)

¶ In the 1980s, many Dutch senior citizens began to live in communal settlements, though these differed substantially from the youth communes of earlier decades. Contemporary elderly communal groups are politically & socially mixed, & their main goal is to help members develop & retain social relationships. From the government's standpoint, however, the attractiveness of the communes lies in their ability to reduce professional care expenses. More attention should be given to the commune's social function of filling the cultural void for active seniors, who are retiring earlier than ever & have longer life expectancy. The communes represent a trend of the broader process of modernized primary relationships, leading to individualized social networks. Additionally, they challenge the traditional perspective on care for the elderly. 50 References. Adapted from the source document. Bryant, Sharon & Rakowski, William (Center Gerontology & Health Care Research Brown U, Providence RI 02912), **Predictors of Mortality among Elderly African-Americans**, *Research on Aging*, 1992, 14, 1, Mar, 50-67.

¶ In light of barriers that impede access to formal support services for older African Americans, informal social networks may be their only source of support. Considered here are 3 measures of informal social networks: contacts with family members, contacts with friends, & social involvement outside the home. Data from the 1984-1988 Longitudinal Surveys of Aging (final N = 473 respondents ages 70+) reveal that bivariate associations with lower mortality occurred for all social network indices. When controlling for sociodemographic factors, physical health, & self-rated health in logistic regression, church attendance retained significance. Men were at higher risk when social network was limited. It is concluded that the church & family play vital supportive roles in the lives of elderly African Americans; possible changes as the elderly population continues to grow & intact family units decline are hypothesized. 7 Tables, 26 References. Cremin, Mary Christine (Dept Family Practice Michigan State U, East Lansing 48824), **Feeling Old versus Being Old: Views of Troubled Aging**, *Social Science and Medicine*, 1992, 34, 12, June, 1305-1315.

¶ Intergenerational views on aging were assessed through interviews with 5 older (ages 69-86) people at a midwestern outpatient clinic, & at least one adult child of each, & evaluations of the Ss by clinic staff. Analysis revealed multiple differences in how the Ss & their children constructed the experience of aging. Ss associated "feeling old" with specific, temporary problems, but did not refer to themselves as "being old." Their children, however, referred to their parents as "being old," indicating that because of their parents' medical problems, typically memory loss or confusion, they were losing them as parents. These two frames of references meant that different views of the Ss' problems were presented to clinic staff, who in turn had their own frame of reference. These three frames compounded their difficulties in evaluating the patient & finding acceptable solutions for both the patient & the family. Case histories illustrate the need for clinical staff to recognize different perspectives of the older person's medical problems. 28 References. Adapted from the source document. Cuba, Lee (Wellesley Coll, MA 02181), **Aging Places: Perspectives on Change in a Cape Cod Community**, *Journal of Applied Gerontology*, 1992, 11, 1, Mar, 64-83.

¶ Survey data are used to examine variations in how 3 groups of residents–nonmigrants, younger migrants, & older migrants (N = 22, 66, & 55, respectively)–view changes occurring in a community located in Barnstable County (Cape Cod), Mass. Although all 3 groups evaluate community change in negative terms, older migrants were more likely to express concern solely over changes in the physical environment of the community, whereas nonmigrants & younger migrants are more likely to voice opposition to a wider range of changes, including those affecting the social environment of the community. The distinguishing characteris-

tics of older migrants make them susceptible to scapegoating by nonmigrants & younger migrants, suggesting that the traditional local distinction between native Cape Codders & newcomers is being superseded by one between younger & older migrants. Implications of this trend are discussed. 7 Tables, 25 References. Adapted from the source document.

Fairchild, Thomas J., Higgins, David P. & Folts, W. Edward (Center Studies Aging U North Texas, Denton 76203-3826), **An Offer They Could Not Refuse: Housing for the Elderly,** *Journal of Housing for the Elderly,* 1991, 9, 1-2, 157-165.

¶ Over the past decade, real estate developers, hotel chains, & other proprietary companies have increasingly targeted the market for retirement housing, which had long been dominated by nonprofit organizations. The activities of these for-profit companies in the 1980s are reviewed, & reasons identified why new players entered this market niche, the types of housing they have built, & the related services they offer. In addition, the for-profit sector's future is discussed--as they try to overcome the mistakes made in the early & mid-1980s by failing to listen to health care planners. Having overbuilt a product that few seniors want or need, the market is in the process of rapid consolidation; but whether real estate & hotel developers finally understand the need for a continuum of services & care remains to be seen. 27 References. Harlow, Karen S. (Indiana U, Indianapolis 46202), **Research and the Politics of Decision Making: Planning Services for Elders,** *Journal of Applied Gerontology,* 1992, 11, 1, Mar, 22-37.

¶ Identification of appropriate measures for determining levels of impairment & disability among the aging has emerged as a major challenge. Pressures are increasing on state & area agencies to identify levels of impairment of activities of daily living as a trigger for eligibility for services & as a component of intrastate funding formulas. Here, the use of different descriptors from the Supplement on Aging to the 1984 National Health Interview Survey as a basis for projecting future demand/need for services is discussed. Each scenario presents a different political/decision-making challenge for the aging network & for individual planners. Planners are encouraged to provide multiple models for decision making to assist in making service delivery decisions. 2 Tables, 4 Figures, 19 References. Adapted from the source document.

Higgins, David P. & Folts, W. Edward (Graduate School Management U Dallas, Irving TX 75061), **Principles and Cash Flow Expectations of Reverse Mortgages,** *Journal of Applied Gerontology,* 1992, 11, 2, June, 187-199.

¶ Discussed is the potential of reverse mortgages (RMs) for enhancing the living standard & independence of the well elderly in the US. RMs' importance as an incremental source of disposable income is likely to increase as demographic & political trends place increasing stress on public programs. The four primary forms of RMs & the amount of cash flow they will produce are explored, & their financial characteristics summarized. Hypothetical examples demonstrate general expectations for the level of cash inflows that RMs can generate for elderly people who own homes with modest market values; these amounts are discussed in relation to the importance of incremental income to economically vulnerable homeowners. 5 Tables, 1 Figure, 16 References. Jennison, Karen M. (Dept Sociology U Northern Colorado, Greeley 80639), **The Impact of Stressful Life Events and Social Support on Drinking among Older Adults: A General Population Survey,** *International Journal of Aging and Human Development*, 1992, 35, 2, 99-123.

How stressful life events influence alcohol use among persons age 60+ explored using data from the 1978, 1980, & 1984 General Social Surys (subsample N = 1,418 respondents). Findings indicate that increased drinking may be a reaction to emotionally difficult life circumstances; alcohol represents a strategy for coping with stressful loss. Providing additional support for this hypothesis, it is also found that social es–spouse, family, friends, & church–help to buffer the effects of traumatic loss, thereby reducing the likelihood of excessive drinking in reponse to life crisis. However, the elderly are susceptible to the comounding effects of prolonged exposure to emotionally depleting life hanges, which can exceed the mitigating effects of personal & social upport resources. 3 Tables, 6 References. Adapted from the source document.

Keigher, Sharon M. (U Michigan, Ann Arbor 48109), **A Preliminary Study of Elderly Emergency Service Clients in Chicago and Their Housing-Related Problems,** *Journal of Applied Gerontology*, 1992, 11, 1, Mar, 4-21.

¶ Case records on a random sample of 125 elderly clients assisted by the Chicago (Ill) Dept of Human Services Emergency Services program, 1984-1987, are used to analyze the crises that lead to emergency services, the extent of clients' housing-related problems, & the needs that cluster around shelter placement & other housing-related problems. An extraordinarily broad range of problems & service needs are identified. Findings reveal the prevalence of housing problems for the elderly & the relationship between basic needs, patterns of services offered, & certain emergencies, including homelessness. Implications for improving client services are considered, & the importance of ongoing rather than emergency assistance with the elderly is emphasized. Very old persons without kin who experience crises are at great risk & pose growing dilemmas for urban public agencies. 1 Table, 25 References. Adapted from the source document.

Lurie, Elinore E. (21 21st Ave, San Francisco CA 94121-2103), **Using Sociological Perspectives in Applied Gerontology Research,** *Sociological Practice Review*, 1992, 3, 4, Oct, 212-219.

¶ It is suggested that sociological solutions developed to address issues surrounding the establishment & maintenance of working relationships in studies of organizations & communities can be profitably used in applied gerontological research. This is demonstrated via an analysis of the results of the Comparison Group Study (CGS), established by CHOICE (an innovative health & social services agency for the frail elderly) to compare the cost-effeciveness of its integrated model of service delivery with that of services delivered to a community sample. Recruitment for the CGS was facilitated by marketing the study to agency players & by the use of personal networks. Strategies for maintaining research partnerships are discussed. It is concluded that size, complexity, & hierarchy in partner agencies partially determine success in establishing & sustaining working relationships; participation in the social worlds of research partners is also important. 23 References. Miljković, Dubravka, Životna dob i opća kultura (Age and General Culture), *Thélème*, 1991, 37, 1, 49-56. (SCR)

¶ To determine the effects of education, environment, & genetic factors on the general culture level, questionnaire data were obtained from 313 Croatians. Results were correlated with 26 variables, eg, intelligence, personality, education, & socioeconomic status (SES). Equal scores at age 10 changed in favor of men by age 20, presumably due to the discrimination against women in dominant socialization patterns. In general, older respondents (Rs) scored higher than younger Rs. The biggest factor varied according to: SES at age 10; personality at age 20; & lifestyle at age 40. 4 Tables, 1 Graph, 12 References. Adapted from the source document.

Mor-Barak, Michál E., Scharlach, Andrew E., Birba, Lourdes & Sokolov, Jacque (School Social Work U Southern California, Los Angeles 90089-0411), **Employment, Social Networks, and Health in the Retirement Years,** *International Journal of Aging and Human Development*, 1992, 35, 2, 145-159.

¶ Data from comprehensive assessment questionnaires completed by 175 participants of a corporate-sponsored geriatric clinic are used to examine the impact of employment on the health of retirees, focusing on the hypothesis that social roles affect health through their impact on social networks. Results indicate that employment in the retirement years is directly related to larger social networks, & thereby indirectly related to better perceived health. Of three social network elements–family, friends, & confidant relationships–employment was significantly related only to friendship. Implications for interventions are discussed. 5 Tables, 62 References. Adapted from the source document.

Murphy, John W. & Longino, Charles F., Jr. (Dept Sociology U Miami, Coral Gables FL 33124-2080), **What Is the Justification for a Qualitative Approach to Ageing Studies,** *Ageing and Society*, 1992, 12, 2, June, 143-156.

¶ A discussion of theoretical & philosophical differences between qualitative & quantitative approaches in aging research. Key to the theoretical shift attendant to qualitative research is the idea that every aspect of social life is embedded in symbolism. Socially relevant research in aging requires sensitivity to how persons interpret their lives, instead of a simple focus on empirical indicators. 46 References. Adapted from the source document.

Mutchler, Jan E. (Dept Sociology State U New York Buffalo, Amherst 14260), **Living Arrangements and Household Transitions among the Unmarried in Later Life,** *Social Science Quarterly*, 1992, 73, 3, Sept, 565-580.

¶ Data from the US Census's 1984 panel of the Survey of Income & Program Participation are used to examine living arrangements & transitions within the household population of 1,692 nonmarried individuals age 55+. A household choice model of living arrangements is tested at the cross-sectional & longitudinal levels of analysis to contrast the correlates of living arrangements in later life to the predictors of change in living arrangements. Results indicate that only economic resources are important in the transition to living alone, while only kinship resources are significant in the transition to not living alone. 3 Tables, 37 References. Adapted from the source document.

Nahemow, Lucille (School Family Studies U Connecticut, Storrs 06269-2058), **Teaching Adulthood and Aging through Research with Older People,** *Gerontology & Geriatrics Education*, 1991, 12, 2, 79-91.

¶ Described is an instructional technique introduced into a required coure on adulthood & aging, in which undergraduate students working in groups of 8 interviewed at least 4 older people & presented the findings in class. It is concluded that the procedure enhanced students' interest & developed their commitment to aging research. It also permitted the instructor to teach the limitations of gerontological knowledge & to integrate research methods into the class in a way that both held students' interest & met some of their personal goals. 13 References. Pellman, Julie (140 Cadman Plaza West Apt 21J, Brooklyn NY 11201), **Widowhood in Elderly Women: Exploring Its Relationship to Community Integration, Hassles, Stress, Social Support, and Social Support Seeking,** *International Journal of Aging and Human Development*, 1992, 35, 4, 253-264.

¶ Interview data from a sample of 80 widows & 80 nonwidows ages 60+ in Kansas City, Mo, are drawn on to explore the degree to which widows were integrated in their community, the daily hassles & stress they may have experienced, & their social network & support-seeking behavior. Results indicate that widowhood in & of itself does not appear to be a predictor either of community integration or the lack of it or the experience of stress & hassles. Those who experience hassles are not the same persons as those who experience stress. Age & education, along with community integration, are better predictors of the variables studied than is widowhood. 2 Tables, 21 References. Adapted from the source document.

Powers, Bethel Ann (School Nursing U Rochester, NY 14642), **The Roles Staff Play in the Social Networks of Elderly Institutionalized People,** *Social Science and Medicine*, 1992, 34, 12, June, 1335-1343.

¶ In an anthropological social network analysis, interview data from 69 residents of a county-operated long-term care facility revealed different patterns of resident-staff interaction. These are described in relation to four types of personal networks: institution-centered, small cluster, kin-centered, & balanced. Their meaning is interpreted in terms of the tensions between residents' common needs for attachment & autonomy & their limited means to achieve satisfaction. 1 Table, 33 References. Adapted from the source document.

Reid, Barbara V. (Dept Anthropology U California, Berkeley 94720), **"It's Like You're Down on a Bed of Affliction": Aging and Diabetes among Black Americans,** *Social Science and Medicine*, 1992, 34, 12, June, 1317-1323.

¶ Interview data obtained from 32 black patients at a diabetes clinic in San Francisco, Calif, show how chronological age is related to the management of diabetes: (1) older patients must cope with multiple disorders, a factor that influences how they approach diabetes treatment; & (2) the three sectors of the health care system (professional, folk, & popular) are emphasized differently according to age. Older diabetics rely more on professional care than do those in other age categories. Also addressed are the effects of multiple facets of aging (chronological age, self-perceived age, & cultural meanings of age) on diabetics' self-care. Implications for diabetes treatment & for compliance issues are discussed. Adapted from the source document.

Rosenthal, Carolyn J., Sulman, Joanne & Marshall, Victor W. (Centre Studies Aging U Toronto, Ontario M5S 2G8), **Problems Experienced by Families of Long-Stay Patients,** *Canadian Journal on Aging/La Revue Canadienne du Vieillissement*, 1992, 11, 2, summer, 169-183.

¶ Examined are problems that families experience when an elderly relative is a long-stay patient in an acute care hospital awaiting placement in a long-term care facility. Interview data were collected 1987-1989 from 84 primary caregivers–the familiy member or other person currently most involved with the patient–of patients in a large Toronto, Ontario, hospital. The types of problems described by family caregivers were categorized as personal, familial, & directly related to the patient's situation in the hospital. Spouses were more likely to report financial problems & the feeling that the staff did not listen to them. Children & other relatives were more likely to describe problems related to the wider family & to report conflict between competing role responsibilities. Many problems mentioned were similar to those experienced by caregivers to community-dwelling impaired elderly. 1 Table, 21 References. Modified AA

Roy, Ann W., Ford, Amasa B. & Folmar, Steven J. (School Medicine Case Western Reserve U, Cleveland OH 44106), **The Elderly and Risk Factors for Institutionalization: Evidence from the Cleveland General Accounting Office (GAO) Study 1975-1984,** *The Journal of Applied Social Sciences*, 1990, 14, 2, spring-summer, 177-195.

¶ In-home interviews conducted 1975-1984 with a random sample of 1,598 Cleveland, Ohio, residents ages 65+ are drawn on to explore predictors of institutionalization. A logistic regression tests the hypothesis that living alone, single status, & availability of a long-term caregiver predict institutional placement, controlling for age, sex, race, income, education, mental & physical health, & disability. Results reveal that elderly living alone are twice as likely to enter a nursing home as those living with others, confirming the importance of living arrangements in the lives of the elderly. 2 Tables, 16 References. Adapted from the source document.

Savishinsky, Joel S. (Dept Anthropology Ithaca Coll, NY 14850), **Intimacy, Domesticity and Pet Therapy with the Elderly: Expectation and Experience among Nursing Home Volunteers,** *Social Science and Medicine*, 1992, 34, 12, June, 1325-1334.

¶ Pet therapy programs in 3 NY nursing homes were examined through observations of volunteers at the homes & in meetings, mail survey of 45 volunteers, & interviews with 52 nursing home residents. Pet volunteers experienced a range of unexpected emotional reactions to the program, interpersonal relationships were pleasant with some residents & burdensome with others, & volunteers had to deal with death. How volunteers felt about their role depended on: their reasons for joining the program, gender, age, prior working experience, family background, & image of nursing homes & residents in general. Some volunteers quit the program after a short term; those who stayed had to accept the limitations of their

work, but most believed in the value of their work & experienced substantial rewards. Program recommendations & implications for altruism & voluntarism in US culture are discussed. Adapted from the source document.

Segall, Mary & Wykle, May (Frances Payne Bolton School Nursing Case Western Reserve U, Cleveland OH 44106), **The Black Family's Experience with Dementia,** *The Journal of Applied Social Sciences,* 1988-1989, 13, 1, fall-winter, 170-191.

¶ In-depth interviews were conducted with 59 black primary caregivers to demented family members in Cleveland, Ohio, to examine the black family's experience with dementia, specifically: the problems & stresses associated with caregiving, the coping strategies used by caregivers, & the help caregivers need to care for their demented relative. A major finding was that black caregivers use religious faith to cope with the stresses of caregiving. Caregivers cited the need for affordable respite services, counseling to help resolve major family conflicts, & information about Alzheimer's disease & available community resources. 3 Tables, 21 References. Seltzer, Mildred M. (Dept Sociology & Anthropology Miami U, Oxford OH 45056), **Continuity and Change Revisited,** *International Journal of Aging and Human Development,* 1992, 35, 1, 67-82.

¶ In a conclusion to this special journal issue (see related abstracts in SA 41:2) addressing the development of gerontology, key points are synthesized & discussed. Focus is on five major areas in which gerontological continuity & change are evident: (1) transformation of basic themes over time; (2) gerontology's identity crisis; (3) the social ideology of gerontology; (4) evolution & refinment of gerontological ideas & methods; & (5) temporal frameworks. Questions are raised about unsolved issues & the need to examine the roles of individuals in shaping the field of gerontology is suggested. 42 References. Adapted from the source document.

Seltzer, Mildred M. & Hickey, Tom (Dept Sociology & Anthropology Miami U, Oxford OH 45056), **Generations of Gerontology: Aging, Continuity, and Change,** *International Journal of Aging and Human Development,* 1992, 35, 1, 1-5.

¶ In an introduction to this special journal issue (see related abstracts in this section of 41:2) addressing the development of gerontology, gerontology is defined as a social system through which generations of gerontologists flow. As people move through this system, gerontology evidences both continuity & change in themes, theories, & methods. The broad sociocultural context within which gerontology exists reinforces, influences, & shapes the persistence of some aspects of gerontology while changing others. The emphases of subsequent articles are also considered. 6 References. Adapted from the source document.

Serow, William J. & Haas, William H., III (Center Study Population Florida State U, Tallahassee 32816), **Measuring the Economic Impact of Retirement Migration: The Case of Western North Carolina,** *Journal of Applied Gerontology,* 1992, 11, 2, June, 200-215.

¶ Data on expenditures & assets were collected in a logbook from a convenience sample of 630 older persons in 1989 who had recently moved into the western NC counties surrounding Asheville. Respondents (Rs) recorded their daily expenditures in & out of their county of residence for 1 week, along with data on major purchases, nonrecurrent expenditures, & health care expenditures/use. These data are summarized, & the private & public consequences of such spending are discussed. The extent to which retirement migration in this context truly represents a net economic gain to the host community is debated. 21 References. Adapted from the source document.

93Z8927

Spence, Susie A. (School Social Work U Alabama, Tuscaloosa 35487-0314), **Social Support for the Black Elderly: Is There a Link between Informal and Formal Assistance?,** UM *Journal of Sociology and Social Welfare,* 1991, 18, 3, Sept, 149-158.

¶ Interview data collected in 1986 from a purposive sample of 100 elderly blacks in a northwestern Fla county are drawn on to explore their sources of informal & formal social support. Analysis indicates that all respondents received informal assistance & that white overall formal assistance was low, though several Rs received both types of support. These findings are discussed in relation to the supplement model of elderly social support; implications for social service providers are summarized. 1 Table, 32 References. Adapted from the source document.

Thomae, Hans (Langemarckstr 87, D-5300 Bonn 3 Federal Republic Germany), **Contributions of Longitudinal Research to a Cognitive Theory of Adjustment to Aging,** *European Journal of Personality,* 1992, 6, 2, June, 157-175.

¶ Data from the Berkeley (Calif) longitudinal research project (eg, see Jones, Harold E., "Consistency and Change in Early Maturity," *Vita Humana,* 1958, 1, 43-51) has been valuable because of its global design; the data have multiple uses in different theoretical contexts. The Bonn (West Germany) Longitudinal Study on Aging ((BOLSA) Thomae, Hans (Ed), *Patterns of Aging. Findings from the Bonn Longitudinal Study of Aging,* Basel: Karger, 1976), begun in 1952, modeled itself after the Berkeley study with the objective of assessing individuals on physical & cognitive developments over time. In 1983, 35 of the earliest BOLSA birth cohort (1890-1905) were still living. Analysis of this cohort's data is relevant for a cognitive theory of aging, which emphasizes the influence of received & processed information in human personality development & behavior. Cluster analyses with BOLSA data support the theory's postulates that: (1) the perceived rather than the objective situation directs behavioral change & concepts of past, present, & future; (2) perceptions of situations are related to individual concerns; & (3) adjustment to aging is achieved when a balance between cognitions (perceived states) & motivations (desires) is achieved. 1 Table, 1 Figure, 85 References. Adapted from the source document.

Van der Veen, Willem Jan & Van Poppel, Frans (Netherlands Interdisciplinary Demographic Instit, Postbus 11650 Lange Houtstr 19 NL-2502 AR's-Gravenhage Netherlands), **Institutional Care for the Elderly in the 19th Century: Old People in the Hague and Their Institutions,** *Ageing and Society,* 1992, 12, 2, June, 185-212.

¶ Data from population registries & other available documents are used to describe residents of three ecclesiastical homes for the poor elderly in the Hague (Netherlands) in the nineteenth century. Most of the elderly who resided in these homes had received poor relief before their admission. The main reason for their decision to request admission to a home was that they were no longer able to run a household independently. Most of the residents were well past age 60 upon entering the home, women generally being a few years older than men; no significant gender differences were evident in duration of residence. The female age at death was a few years higher than for males. The health of the residents appeared to be worse than that of the total elderly population of The Hague, resulting in a higher death rate. 12 Tables, 1 Figure, 15 References. Adapted from the source document.

93Z8931

von Mering, Otto (U Florida, Gainesville 32611), **Societies in Transi-**

tion: The Impact of Longevity on Generations, *Educational Gerontology*, 1992, 18, 2, Mar, 123-134.

¶ Longevity is rapidly increasing; people's lives are extended much longer than in earlier historical periods. Old chronological age markers, eg, age 65+, are out of step with the new longevity. A "fourth age" is defined as a period of special opportunities for productive occupational changes (part-time, contract work), caregiving, & self-expression between the sexes. The presence of the fourth age can affect the lives of all the other generations; this group's problems become the problems of all–housing, pensions, health care, etc. The numerical preponderance of women in the fourth age & their changing worldview about who they are & their abilities can have a special impact on the graying of the society. Overall, the fourth age people are beginning to see empowerment as a necessity for survival & young people to view them as survivors, rather than as victims of the hazards of living. 30 References. Adapted from the source document.

93Z8932

Zedlewski, Sheila Rafferty & McBride, Timothy D. (Urban Instit, 2100 M St NW Washington DC 20037), **The Changing Profile of the Elderly: Effects on Future Long-Term Care Needs and Financing**, *The Milbank Quarterly*, 1992, 70, 2, 247-275.

¶ Microsimulation modeling techniques are applied to data from the Current Population Survey & historical aggregate statistics to analyze the changing economic & demographic profile of the US elderly, 1990-2030. It is concluded that the future demand for long-term care services is likely to be greater than currently predicted. Increases in the number of elderly age 85+, who have health limitations, or who live alone are likely to outpace the general increase in the elderly population. There will be a very large group of elderly at risk, but their economic status will be better than that of today's elderly. Though the % of elderly who can afford insurance premiums for broad long-term care coverage will increase, most older Americans will not be able to afford insurance. Although policies that reduce the cost & encourage the purchase of long-term care insurance could help to expand coverage, a large long-term care financing gap is likely to remain for the future elderly population. 6 Tables, 2 Figures, 28 References. Adapted from the source document.

93Z8933

----, **The Age Discrimination in Employment Act (ADEA)**, *Research on Aging*, 1991, 13, 4, Dec, 413-484.

¶ Following an **Introduction** by Rhonda V. Montgomery, the impact of the Age Discrimination in Employment Act (ADEA) is examined by Barbara L. Bessey (American Instite for Research, Palo Alto, California) & Srijati M. Ananda, in **Age Discrimination in Employment: An Interdisciplinary Review of the ADEA**. Since its passage in 1967 the scope of ADEA has broadened beyond protection for the older worker in the workplace to protection of pension benefits, elimination of the maximum age cap, & reduction of expenditures for social security. Limitations of the law still exist, however, which warrant serious consideration, including the unavailability of a true class-action suit procedure & lack of standards for adverse impact & statistical analyses in age discrimination cases. In **Social Science and the ADEA**, John W. Riley, Jr., & Matilda White Riley find the historical account of age discrimination in the workplace scholarly & informative, but believe that the judicial process needs to go beyond questions of intent & proof of discrimination to optimize opportunities for older workers & treat older workers as a resource, not a burden. In **Putting ADEA Into Historical Context**, W. Andrew Achenbaum (U of Michigan, Ann Arbor) explores the hybrid nature of the ADEA legislation & its origin, & places the historical context of the act within the prevailing political culture of the 1960s. In **Regulating Retirement through the Age Discrimination in Employment Act**, Jill S. Quadagno (Florida State U, Gainesville) & Melissa Hardy suggest that the ADEA has made private retirement programs more cumbersome & less flexible, & may push employers to lose, through early retirement, those older workers they wish to keep. In **Age Discrimination Issues**, Edgar F. Borgatta (U of Washington, Seattle) points out that the ADEA does not cover a number of issues related to age discrimination, eg, discrimination based on correlates of age, discrimination at younger ages, & the relationship between age, work standards, & compensation. 132 References. 93Z8934

Adler, William M., Nothing to Lose, IM *Southern Exposure*, 1990, 18, 4, winter, 22-27.

¶ Described is the life of Billy Joe Chambers, a young black high school dropout from rural Lee County, Ark, who rose from poverty to enormous wealth as the head of a large drug gang in Detroit, Mich; he was eventually caught & jailed in 1988. It is argued that, given the choice of drudgery in the city or stifling farm life, it is to be expected that ambitious young blacks would take the only road available to them to achieve wealth, power, & respect. 4 Photographs. I. Dunny

93Z8935

Agnew, Robert & White, Helene Raskin (Emory U, Atlanta GA 30322), **An Empirical Test of General Strain Theory**, *Criminology*, 1992, 30, 4, Nov, 475-499.

¶ Data from the initial 1979 wave of the Rutgers Health & Human Development Project, a longitudinal interview study of 1,380 adolescents in NJ, are drawn on to test Robert Agnew's general strain theory (GST) of crime & delinquency ("Foundation for a General Strain Theory of Crime and Delinquency," *Criminology*, 1992, 30, 47-87). GST argues that strain occurs when others: (1) prevent or threaten to prevent one from achieving positively valued goals, (2) remove or threaten to remove positively valued stimuli that one possesses, or (3) present or threaten to present one with noxious or negatively valued stimuli. The impact of such strain on delinquency is said to be conditioned by several variables, eg, association with delinquent peers & self-efficacy. Data provide qualified support for the theory: strain measures have a relatively substantial effect on delinquency & drug use. Further, the effect of these strain measures is conditioned by delinquent peers & self-efficacy, as predicted by GST. 4 Tables, 1 Appendix, 45 References. Adapted from the source document.

Bachman, Ronet, Paternoster, Raymond & Ward, Sally (Bureau Justice Statistics US Dept Justice, 10th St & Constitution Ave NW Washington DC 20530-0001), **The Rationality of Sexual Offending: Testing a Deterrence/Rational Choice Conception of Sexual Assault**, *Law and Society Review*, 1992, 26, 2, 343-372.

¶ A sample of 94 male (M) undergraduates at a state university in New England responded to a combination of 5 hypothetical scenarios describing a sexual assault by a M & survey questions designed to investigate the effect of the context of the offense, formal sanctions, informal sanctions, & moral beliefs on self-reported projections to commit sexual assault. Respondents (Rs) estimated the certainty of formal & informal punishment for the scenario M, the extent to which they believed the M's actions were morally wrong, & the likelihood that they would do what the M did under the same circumstances. It was found that projections to commit sexual assault were affected by 2 circumstances of the incident–the likelihood that the M would be formally sanctioned (dismissed from the university or arrested) & the respondent's moral beliefs. The fear of formal sanctions, however, had no effect when Rs were inhibited by their moral evaluation of the incident. The implications of these findings for deterrence research are discussed. 3 Tables, 2 Appendixes, 70 References. Adapted from the source document.

Bates, Eric (c/o*Southern Exposure*, PO Box 531 Durham NC 27702-9998), **War and Peace**, IM *Southern Exposure*, 1990, 18, 4, winter, 10-13.

¶ A state-by-state survey of crime reports, conducted by the Instit of Southern Studies (Durham, NC), shows that the crime rate is lower in 28 states than 10 years ago. However, Federal Bureau of Investigation reports reveal that crime has risen to 22% in smaller towns in the South. It is argued that local spending for police, sheriffs, & prisons has been increased in the war on drugs at the expense of education & job training

hat might deter drug use & property crime. Drug users are being turned away from treatment centers & put into overcrowded prisons. Policy-makers are now suggesting that emphasis be placed on strengthening communities & providing recreation & employment. 2 Tables, 1 Photograph. I. Dunny

Cromwell, Paul F., Olson, James N., Avary, D'Aunn W. & Marks, Alan (Dept Sociology U Miami, Coral Gables FL 33124), **How Drugs Affect Decisions by Burglars,** IM *International Journal of Offender Therapy and Comparative Criminology,* 1991, 35, 4, winter, 310-321.

¶ Thirty drug-using burglars participated in reconstruction of past burglaries & were interviewed extensively over a period of 16 months. Data are used to analyze whether Ss' decision-making processes were rational & to what extent drug & alcohol use affected those decision. Findings reveal that Ss' drug use & criminal activity were inextricably interrelated. Heroin addicts were found to be more rational than previously believed & capable of controlling their drug use to a significant extent. Drug use was found to facilitate the commission of crimes for some burglars. Public policy implications are discussed. 1 Figure, 1 Chart, 23 References. Adapted from the source document.

93Z8940

Donovan, Robin (Instit Southern Studies, Durham NC 27701), **Crack Sheriffs,** IM *Southern Exposure,* 1990, 18, 4, winter, 14-15.

¶ Statistics show that 50+ southern US sheriffs & deputies have been federally indicted in drug charges over the past decade. The pattern of indictments follows the major drug routes in the South where most drugs enter the country. It is posited that, rather than inherent dishonesty, the power of the office of sheriff is the primary cause of the corruption. I. Dunny

93Z8941

Field, Simon, The Effect of Temperature on Crime, *British Journal of Criminology,* 1992, 32, 3, summer, 340-351.

¶ An analysis of annual, quarterly, & monthly data for recorded crime in England & Wales yielded strong evidence that temperature has a positive effect, independent of seasonal variation, on most types of property & violent crime. No relationship between crime & rainfall or hours of sunshine emerged. It is suggested that in England & Wales higher temperatures cause people to spend more time outside the home. Time spent outside the home, in line with routine activity explanations for crime, has been shown to increase the risk of criminal victimization for most types of crime. It is conclued that temperature is a significant factor in explaining quarter-to-quarter & month-to-month variations in recorded crime. 7 Tables, 2 Appendixes, 24 References. Adapted from the source document.

Johnson, Eric A. (Central Michigan U, Mount Pleasant 48859), **Cities Don't Cause Crime: Urban-Rural Differences in Late Nineteenth- and Early Twentieth-Century German Criminality,** *Social Science History,* 1992, 16, 1, spring, 129-176.

¶ The impacts of urbanization, population growth, hardship, & ethnicity on criminal behavior are investigated using mapped statistical data for Imperial Germany in the late 1800s & early 1900s. At the turn of the century, there was no clear geographical pattern for crime. By the early 1900s, the western frontier had relatively high crime rates as the northeastern rates declined. A structural hypothesis for the crime rates was discounted, since urbanization, population growth, & urban living per se did not correlate with crime: ie, German cities, eg, Berlin, did not have higher crime rates at the time than smaller areas. The exceptionally high crime rates in northeastern Prussia were correlated with death rates & the size of particular ethnic populations. These cities were characterized by a relatively great amount of human hardship, political repression, & social stigmatization for ethnic minorities, eg, Poles & Lithuanians. Thus, it was not the cultural group that was responsible for the crime rate, but the interaction of particular groups with particular native residents that caused hardship & influenced the crime rate. It is observed that crime could be reduced by eliminating such hardship. 11 Tables, 2 Figures, 90 References. M. Pflum

Matsueda, Ross L., Gartner, Rosemary, Piliavin, Irving & Polakowski, Michael (Dept Sociology U Wisconsin, Madison 53706), **The Prestige of Criminal and Conventional Occupations: A Subcultural Model of Criminal Activity,** IM *American Sociological Review,* 1992, 57, 6, Dec, 752-770.

¶ Longitudinal interview data obtained from 2 populations of adults with severe labor market disadvantages–1,120 unemployed drug addicts & 1,757 previously incarcerated offenders–in 7 major US metropolitan areas are used to investigate their relative prestige ratings of criminal vs conventional occupations. Behavioral hypotheses, derived from theories of criminal subcultures, concerning the relationship between occupational prestige & income from legal & illegal sources are also evaluated. Respondents (Rs) rank conventional occupations uniformly higher in prestige than criminal occupations. Moreover, Rs' illegal activities are related to their ratings of the prestige of criminal occupations, but not to their ratings of the prestige of conventional occupations. Implications for theories of criminal subcultures are discussed. 5 Tables, 67 References. Adapted from the source document.

Menard, Scott (School Criminal Justice State U New York, Albany 12222), **Demographic and Theoretical Variables in the Age-Period-Cohort Analysis of Illegal Behavior,** UM *Journal of Research in Crime and Delinquency*, 1992, 29, 2, May, 178-199.

¶ Previous research investigating age, period, & cohort effects on illegal behavior have either been atheoretical, or have attempted to test Richard A. Easterlin hypothesis (*Birth and Fortune: The Impact of Numbers on Personal Welfare*, Chicago: U of Chicago Press, 1987) that larger cohorts will have higher rates of such behavior. Here, variables suggested by a model that integrates elements of strain, control, & learning theory are added to the analysis, drawing on data from the longitudinal National Youth Survey of a probability sample of youth (N not provided) aged 11-17 in 1976, supplemented by Census & other statistical data. Most of the period effects found in previous analyses remain in the models with the addition of the theoretical variables, but age effects are largely replaced by delinquent bonding, a variable suggested by learning theory. Variables from control theory have inconsistent effects, & appear to play a different role in individual level & aggregate analyses of illegal behavior. Future directions for research are suggested. 7 Tables, 53 References. Adapted from the source document.

Ochrym, Ronald George (36 Huntington Parkway, Clifton Park NY 12019), **Street Crime, Tourism and Casinos: An Empirical Comparison,** UM *Journal of Gambling Studies*, 1990, 6, 2, summer, 127-138.

¶ It is argued that casino gaming is a catalyst for tourism, & one of the social consequences of tourism is increased crime. Here, data from the Federal Bureau of Investigation Uniform Crime Reports are used to compare mean crime rates of three tourist areas (including Atlantic City, NJ, which offers gambling) & two urban centers in NJ; types of crime that have changed since the advent of gaming in Atlantic City are identified. Results reveal that tourist destinations in NJ have mean crime rates significantly different (higher) from urban areas. Implications for policymakers are considered. 4 Tables, 16 References. Österberg, Eva (Lund U, S-22100 Sweden), **Criminality, Social Control, and the Early Modern State: Evidence and Interpretations in Scandinavian Historiography,** *Social Science History*, 1992, 16, 1, spring, 67-98.

¶ A model of criminality & social control in Sweden from the Middle Ages to the present is offered that distinguishes four phases: (1) the Middle Ages & most of the sixteenth century–the courts dealt mostly with crimes against the person (violence, defamation, slander, etc); (2) the latter half of the sixteenth century until the mid-eighteenth century–the courts continued to function as an arena where people solved personal conflicts, but also served the interests of the early modern state; (3) the latter half of the eighteenth century & the first half of the nineteenth century–as a consequence of socioeconomic polarization in the agrarian society, crime increased at the same time the middle classes took an interest in using the courts to control the lower classes; & (4) the latter part of the nineteenth century & the first half of the twentieth century–the courts were more concerned with confirming economic settlements & ruling on economic matters, than with a lower rate of serious crime. In this interpretation, the long-term tendencies in criminality are related to the concept of a civilizing process in the early modern period, but also to changes in the system of formal, semiformal, & informal control in society. 3 Tables, 56 References. Pain, Rachel (Dept Geography U Edinburgh, EH8 9XP Scotland), **Space, Sexual Violence and Social Control: Integrating Geographical and Feminist Analyses of Women's Fear of Crime,** *Progress in Human Geography*, 1991, 15, 4, Dec, 415-431.

¶ An analysis of the relationship among gender, fear of crime, & social geography. Noting that all women do not share the same level or type of fear, broad trends are discussed that suggest that women's & men's fears are significantly different. Explored are the spatial patterns of women's perceived risks of sexual violence & harassment, the actual risks to which they are exposed, & women's behavioral responses–especially as these relate to women's equal participation in society. In addition, feminist perspectives on women's use of space are reviewed to advance a more complex theoretical basis for explaining & analyzing the geography of women's fear & its structural implications. New areas for research & better methodologies are highlighted. 78 References. M. Maguire

Poveda, Tony G. (Dept Sociology State U New York Coll, Plattsburgh 12901), **White-Collar Crime and the Justice Department: The Institutionalization of a Concept,** UM *Crime, Law and Social Change*, 1992, 17, 3, May, 235-252.

¶ Analyzed is the sudden, unexpected incorporation of white-collar crime as a top investigative priority of the US Justice Dept during the 1970s. This pursuit is especially problematic for instrumentalist & structuralist variants of conflict theory, which generally view the origins of law in terms of the interests of a ruling or capitalist class. This apparent contradiction is examined in the context of the "discovery" of white-collar crime by the Justice Dept. In the process of operationalizing white-collar crime, the Justice Dept transformed Edwin H. Sutherland's traditional definition so that targeted offenders are not limited to the economic & political elite, but instead are drawn from all social classes. This definitional modification has far-reaching implications for assessing the nature of the Justice Dept's response to the problem of elite crime & provides insight into the ongoing theoretical debate on the origins of law. Shah, Rabindra & Pease, Ken (c/o Pease–U Manchester, M60 1QD England), **Crime, Race and Reporting to the Police,** *Howard Journal of Criminal Justice*, 1992, 31, 3, Aug, 192-199.

¶ To determine the influence of perpetrator race on the propensity of victims of violence to report crimes to the police, data from the British Crime Surveys of 1982, 1984, & 1988 (total N = 1,603) are analyzed. Overall, the proportion of offenses reported by whites was higher than by nonwhites, but race interacted in a complex way with other features of the offense in determining whether the offense was reported. Loglinear analysis yielded a significant relationship between reporting to the police & the degree of injury, & offenses by nonwhites without injury were reported significantly more often than the same offenses by whites. Nonwhites were more likely to use weapons than whites. Since the number of offenses by nonwhites was still small in the years analyzed, a better understanding of the relationship between race & crime reporting is expected when data from the 1992 British Crime Survey become available. 6 Tables, 5 References. Adapted from the source document.

Sheedy, Patrick D. (Dept Theology Coll Saint Catherine, Saint Paul MN 55105), **The Failure of Our Current View of Crime,** *Social Thought*, 1991, 17, 4, 43-52.

¶ It is argued that, as a society, we uncritically embrace a view of crime & punishment that is unworkable & flawed. By isolating & identifying the offender as the villain, the offender is alienated from society, & the conditions that contribute to crime remain unaddressed. It is suggested that the model of addiction more adequately illuminates the phenomenon of crime, & encourages a response to crime that is both individual & communal, ie, the formation of communities of honesty & compassion based on the twelve-step program of Alcoholics Anonymous. These communities would enable identification of personal & communal biases/sins regarding crime & punishment. 27 References. Adapted from the source document.

93Z8955

Tarkowski, Jacek, Old and New Patterns of Corruption in Poland and the USSR, UM *Telos*, 1989, 80, summer, 51-62.

¶ Classic, structurally determined corruption practices in Poland & the former USSR are compared with the current situation following the political reforms of the late 1980s. Violating distribution rules by self-interested activity, state socialist corruption (extortion, bribes), & legalized corruption (power elite privileges) is motivated by economics of scarcity. Systematic reforms have eliminated some corruption in vertical exchange in Poland, eg, open plundering of public property, but it is harder to combat the legal corruptions. Bureaucracy & private business are in a parasitic & symbiotic relationship, providing mutual benefits & cooperation. J. Sadler

Hossni, Mostafa (Kuwait U, 13060 Safat), **Transliterated title not available** (The Professional Tasks of Social Workers and Their Effectiveness), *Journal of the Gulf and Arabian Peninsula Studies,* 1990, 16, 61, Jan, 123-166. (ARA)

¶ Drawing on a survey of 700 social workers employed at all levels in the 5 educational districts of Kuwait, an attempt is made to develop a hypothetical frame to analyze social work practice in the scholastic field, based on the belief that social work can bolster the crucial role that schools play in society & help schools achieve their educational goals. The actual specialties of social workers are then examined for correspondence to the hypothetical frame. Results relate to the applicability of social workers' professional skills to the professional tasks of the scholastic field, the amount of effort required for different tasks, & the level of effectiveness of social workers' effort in different tasks. 51 juvenile delinquency

93Z8962

Albrecht, Günter & Howe, Carl-Werner (Fakultät Soziologie U Bielfeld, D-4800 1 Federal Republic Germany), **Soziale Schicht und Delinquenz. Verwischte Spuren oder falsche Fährte?** (Social Class and Delinquency. Hidden Traces or False Tracks?), *Kölner Zeitschrift für Soziologie und Sozialpsychologie,* 1992, 44, 4, Dec, 697-730. (GER)

¶ To determine whether there is a significant correlation between socioeconomic status & juvenile delinquency, interview data were obtained in 1986/87 from German adolescents (N = 1,480) in Bielefeld & Münster. Most etiological approaches imply such a connection, while labeling approaches deny it. The variability of results in the literature may be due to different data sources, socioeconomic conceptualizations, & type of offenses. Results show that different conceptualizations of one's own status were a more important factor among the adolescents than was that of their parents' status. Adolescent status was found to be confused with age, complicating gender- & offense-specific analysis. Traditional social structure explanations of delinquency were incompatible with these findings, possibly due to the increasing irrelevance of class membership or the lack of other possible outcomes when antisocial behavior is analyzed in terms of stress theory. 2 Tables, 7 Figures, 102 References. Brown, Waln K., Jenkins, Richard L. & Rhodes, Warren A. (William Gladden Foundation, 133-8 Oak St Tallahassee FL 32301), **Delinquent Peer Culture and Adult Criminality: A Longitudinal Study,** *Journal of Offender Rehabilitation,* 1992, 17, 3-4, 161-170.

¶ The influence of delinquent peer friends in promoting delinquency, & effects on adult criminality, are examined based on self-report survey data obtained in a long-term follow-up of 500 juveniles adjudicated as delinquents into adult life in Dauphin & Erie counties in Pa. Analysis reveals that Ss' self-reports of whether delinquent or criminal acts were committed before first contact with the Juvenile Probation Dept bore no relation to criminal conviction in adult life. However, self-reports of involvement in delinquent or criminal acts with friends, & the frequency with which friends were involved in such acts, were strongly related to adult criminal conviction. Reform of the delinquent with delinquent friends involves his/her making a change of friends. 13 References. Adapted from the source document.

Brown, Waln K., Miller, Timothy P., Jenkins, Richard L. & Rhodes, Warren A. (William Gladden Foundation, PO Box 7222 York PA 17404), **The Human Costs of "Giving the Kid Another Chance",** *International Journal of Offender Therapy and Comparative Criminology,* 1991, 35, 4, winter, 296-302.

¶ A report on a 10-to-25-year follow-up of 500 randomly selected cases of juveniles adjudicated delinquent in the juvenile court of Dauphin County, Pa. Analysis of data from juvenile probation department files reveals that of 243 juveniles adjudicated delinquent in juvenile court on their first referral to juvenile justice, 20% went on to adult prison after the age of 18. Of 233 juveniles not taken to juvenile court on their first referral to juvenile justice, 43% were imprisoned in adult life after age 18. Early referral to the juvenile court of juveniles who commit delinquent acts appears to greatly reduce the likelihood that these individuals will go on to prison in adult life. 4 Tables, 8 References. Hagan, John & McCarthy, Bill (U Toronto, Ontario M5S 1A1), **Streetlife and Delinquency,** UM *The British Journal of Sociology*, 1992, 43, 4, Dec, 533-561.

¶ Because the correlation between class & delinquency assumed in sociological theories often proves elusive when scholars try to test these theories, it is suggested that class & delinquency be reconceptualized. Traditionally, children's class has been defined as that of their parents, via self-report. Survey data collected in Toronto, Ontario, 1987/88 (N = 563 school & 386 street adolescents), however, reinsert street youth into the equation. It is argued that these youth intimately experience class conditions that are responsible for serious delinquency & that street life itself is an important intervening variable, mediating indirect effects of control & strain, including parental class origins. Findings encourage the use of street-based samples in research on class-based aspects of delinquency. 8 Tables, 1 Figure. Adapted from the source document. Krohn, Marvin D., Stern, Susan B., Thornberry, Terence P. & Jang, Sung Joon (Dept Sociology State U New York, Albany 12222), **The Measurement of Family Process Variables: The Effect of Adolescent and Parent Perceptions of Family Life on Delinquent Behavior,** *Journal of Quantitative Criminology*, 1992, 8, 3, Sept, 287-315.

¶ Both adolescent & parental perceptions of how family members interact with & feel about one another are examined to determine their relationship to official & self-reported delinquent behavior. The analysis is based on interviews conducted with 947 seventh & eighth graders in Rochester, NY, & their primary caretakers, as compared to data drawn from police files & arrest records. Consistent with prior research, adolescent perceptions of family processes were weakly related to those of their parents. Both parental & adolescent family process measures made independent & significant contributions to the explanation of self-reported & official delinquent behavior. Parental measures contributed more to the explanation of official data than did adolescent measures when compared to the results for self-reported delinquency. Methodological & substantive reasons for these findings are discussed. 5 Tables, 2 Appendixes, 52 References. Adapted from the source document. Lajoie, Jean & LeBlanc, Marc (CSSMM, 1001 blvd Maisonneuve Montreal Quebec H2L 4R5), **Débat autour des mesures pour jeunes délinquants** (A Debate over Measures for Young Delinquents), *Criminologie*, 1990, 23, 2, autumn, 107-123. (FRE)

¶ A discussion between a researcher & a practitioner on the results of an evaluative study of the effectiveness of reforms concerning young delinquents implemented in Montreal, Quebec, in 1981. The study concluded that the legislative, administrative, & clinical reforms had insignificant impact, & provided suggestions on improving decision-making processes. The practitioner censors the researchers' assumptions regarding the direct connection between decision-making procedures & levels of recurrent criminal recidivism. The researcher then responds to the comments, reviews the current situation, & restates the importance of recidivism as a criterion of the system's effectiveness. 19 References. I. McCarthy, Bill & Hagan, John (Dept Sociology U Victoria, British Columbia V8W 3P5), **Mean Streets: The Theoretical Significance of Situational Delinquency among Homeless Youths,** UM *American Journal of Sociology*, 1992, 98, 3, Nov, 597-627.

¶ Self-report data obtained in 1987 from 390 youths in Toronto, Ontario on the street & in school are used to test an integration of strain & control theories that incorporates background & situational factors. After background & street exposure variables are controlled, & after school & street samples are combined, there is consistent evidence of the effects of adverse situational conditions: hunger causes theft of food, problems of hunger & shelter lead to serious theft, & problems of unemployment & shelter produce prostitution. These findings enhance theoretical understanding of street life & crime. 7 Tables, 62 References. Adapted from the source document. Pakiz, Bilge, Reinherz, Helen Z. & Frost, Abbie K. (c/o Reinherz-School Social Work Simmons Coll, Boston MA 02116), **Antisocial Behavior in Adolescence: A Community Study,** *Journal of Early Adolescence*, 1992, 12, 3, Aug, 300-313.

¶ Semistructured interview data from a sample of 404 white adolescents (mean age 14.5 years) from working-class families in the northeastern US reveal striking similarities for both genders in levels & correlates of antisocial behavior. Aggressive conduct was most strongly associated with delinquent behavior. Both genders reported interpersonal difficulties with intimate relationships & family, & different, but related, internalizing behaviors were noted for both males (Ms) & females (Fs): antisocial Ms had low self-esteem & Fs had more depressive symptoms. Additionally, Ms perceived their families as lacking cohesion & Fs were more affected by parental marital disruption. Only antisocial Fs indicated low levels of involvement in school-related activities; maternal reports also noted Fs' nonproductivity. Implications of accurate identification of correlates of antisocial behavior are discussed. 2 Tables, 41 References. Adapted from the source document. Segre, Sandro, La delinquenza giovanile in Francia (Juvenile Delinquency in France), *Sociologia del Diritto,* 1992, 19, 2, 51-80. (ITA)
¶ A sharp increase in juvenile delinquency in France is attributed to inadequate social & economic integration aimed at immigrants & lower-class youth. Poorly conceived job, housing, & education policies are the main sources of their nonintegration. Reformulated policies are not likely, considering the lack of popular support or the various groups' lack of representation. Contrasted with the success of the Scandinavian model of public policy intervention in reducing the relative hardships of socially underprivileged youth, the social disorganization of the French model lies in prejudicial legal standards targeting Algerian & Moroccan youth, & insufficient bureaucratic structures for social security & assistance. For these young people, economic discrimination, along with a much higher rate of unemployment compared with native French youth, increases the likelihood of deviancy. The density of population in neighborhoods of immigrants & lower-class French, & the inflexible academic system that does not recognize foreign diplomas, also contribute to a greater level of unemployment & poverty. 89 References. Williams, Larry E., Clinton, Lawrence, Winfree, L. Thomas & Clark, Robert E. (Dept Sociology Midwestern State U, Wichita Falls TX 76308-2099), **Family Ties, Parental Discipline, and Delinquency: A Study of Youthful Misbehavior by Parochial High School Students,** *Sociological Spectrum,* 1992, 12, 4, Oct-Dec, 381-401.
¶ Questionnaire data from a random sample of 74 students at a Catholic high school in a medium-sized southwestern US city are used to investigate the links among family ties, parental physical discipline, & self-reported acts of misbehavior. Analysis indicates that among the family ties variables, family activities were a more consistent predictor of adolescent misbehavior than youths' evaluations of their parents. Parental discipline was positively related to delinquency: the greater its use, the greater the delinquency. Although no causal significance is assigned to these findings, they do suggest that: (1) what the parents of parochial students do is more important than how they are seen by their children; & (2) some punishments, either in response to or as a preventive force against delinquency, may have the opposite effect. 4 Tables, 63 References. Hartmann, David J., Sullivan, William P. & Wolk, James L. (Dept Sociology/Anthropology/Social Work Southwest Missouri State U, Springfield 65804), **A State-Wide Assessment: Marital Stability and Client Outcomes,** *Drug and Alcohol Dependence,* 1991, 29, 1, Dec, 27-38.
¶ To evaluate a statewide alcohol & drug treatment program in Mo, a 1-year follow-up was conducted of 242 participants to explore the nature & patterns of posttreatment functioning. Findings support the expected result that a change in marital status is related to posttreatment relapse. Further analysis suggests that transitional periods between marriage & divorce are especially important in understanding the pattern of relapse after treatment. Multivariate analysis indicates that the marital status effect is important both directly & in interaction with program completion. Thus, attention to transitional states & interpersonal functioning should be incorporated into client follow-up. 9 Tables, 21 References. Adapted from the source document. Maluccio, Anthony N. (School Social Work U Connecticut, West Hartford 06117), **Research Perspectives on Social Support Systems for Families and Children,** *The Journal of Applied Social Sciences,* 1989, 13, 2, spring-summer, 269-292.
¶ Based on a literature review concerning the role of social support intervention in maintaining families & in promoting the growth & development of children & youth at risk, it is contended that, while there is growing knowledge about social supports & networks & their significance for social work, there are also problems, eg, the discrepancy between available knowledge & the ability or readiness to use it, the tendency to romanticize social networks & support systems, & the need for further research. It is recommended that practitioners regard the family environment as the focus of attention, shift from an illness model to a growth/health orientation; assess how the family environment is functioning on behalf of family members, & use life experiences more deliberately. 1 Chart, 46 References. Meyer-Fehr, Peter C. & Suter, Christian (Abteilung Psychosoziale Medizin Universitätsspital, Culmannstr 8 CH-8091 Zurich Switzerland), **Auswirkungen der Organisierung zwischenmenschlicher Hilfe auf informelle Hilfe** (Effects of the Organization of Interpersonal Help on Informal Help), *Schweizerische Zeitschrift für Soziologie/Revue Suisse de sociologie,* 1992, 18, 2, 413-437. (GER)
¶ In an investigation of the effects on Swiss senior citizens (age 65+) of the establishment of an agency for organized neighborhood help in their district, the central question is whether organized help serves to activate or deactivate, supplement or replace informal spontaneous help. Longitudinal data from 398 residents of this district & another area show that the elderly people from the action area felt they received less support from their secondary social network (friends, relations, neighbors) than they did 3 years earlier, before the start of the intervention, & they themselves gave less help; however, they received more informal help from

people not in their household (mainly family members & relations). Although their partial replacement of informal help by organized help entails problems of its own, it has a positive effect; the deactivation of informal help seems to be beneficial for the health of elderly people who feel under strain because of obligations to reciprocate. 4 Tables, 33 References. Neighbors, Harold W., Bashshur, Rashid, Price, Richard, Selig, Susan, Donabedian, Avedis & Shannon, Gary (School Public Health U Michigan, Ann Arbor 48109), **Ethnic Minority Mental Health Service Delivery: A Review of the Literature**, *Research in Community and Mental Health*, 1992, 7, 55-71.

¶ With increasing access to mental health services for ethnic minorities & other disenfranchised groups a fundamental goal in mental health service delivery, the uniqueness of these groups vs white middle-class clientele becomes an issue. To approach this issue, literature estimating favorable treatment outcomes, service utilization rates, & treatment duration for minority groups was reviewed. Research directly evaluating treatment outcomes is sparse, but no study shows lower treatment success rates among the economically disadvantaged. Underutilization of services, however, is a problem for minorities. Due to their overrepresentation in the lower socioeconomic classes, minorities more often obtain help from the public care sector, but the literature lacks the epidemiological focus that would make comparison to the majority reliable. Low socioeconomic status among minorities is also an indicator of treatment dropout, but cultural compatibility with service providers could also be a variable. Increasing awareness of & knowledge about minority cultural values are recommended for nonminority practitioners. An alternative approach to minority mental illness is suggested in which individual clinical intervention is used in conjunction with community & organizational intervention, & in which those working on intervention projects & those working on minority problems collaborate. 81 References. Abt, Vicki (Pennsylvania State U, Abington 19001), **Review Essay: *Breaking Free from the Victim Trap: Reclaiming Your Personal Power***, UM *Journal of Gambling Studies*, 1990, 6, 4, winter, 397-400.

¶ A review essay on a book by Diane Zimberoff, *Breaking Free from the Victim Trap: Reclaiming Your Personal Power* (Wenatchee, Wash: Wellness Press, 1989 [see listing in IRPS No. 67]). Zimberoff's philosophy is refuted, contending that the book offers a hodgepodge of theoretical assumptions devoid of scientific samples in its discussion of theories behind the codependency movement. Its simplistic, programmatic advice implies we are all either alcoholics, drug abusers, problem gamblers, sex & love addicts, workaholics, or at least enablers of the primary addict in a dysfunctional family. The message that we should not spend our lives heeding or pleasing others is undermined by the numbing similarity of self-help books & programmed responses to the pains of individual lives. 8 References. Caputi, Jane (U New Mexico, Albuquerque 87131), **Men's Violence against Women: An International Overview**, *Current World Leaders*, 1991, 34, 6, Dec, 847-878.

¶ Secondary data are summarized in an overview of the types of violence perpetrated against women worldwide, analyzing them from a feminist perspective. It is argued that violence ranging from harassment through rape & murder are forms of patriarchal terrorism, actions that not only express but maintain male dominance. Issues covered include: rape; incest; battery; sexual slavery, including prostitution, sexual mutilation, & forced marriages; femicide, including dowry murder, denial of food, medicine, & other means of support; denial of contraception & abortion; & sexual murder. Pornography & gorenography (sexually violent & objectifying depictions of women in mainstream media) are considered for their contributions to a cultural climate endorsing such violence. 109 References. DeBruyn, Lemyra M., Lujan, Carol Chiago & May, Philip A. (Indian Health Service Office Mental Health Programs, Albuquerque NM 87102), **A Comparative Study of Abused and Neglected American Indian Children in the Southwest**, *Social Science and Medicine*, 1992, 35, 3, Aug, 305-315.

¶ Data obtained 1985-1987 from patient records & interviews with service providers at a southwestern US Indian health service hospital are drawn on to compare samples of target & control American Indian children (N = 117) in 53 families for child abuse/neglect & family alcohol abuse. Analysis indicates that alcohol abuse is present in virtually all families that abuse/neglect children. However, alcohol abuse exists exclusive of the association with child abuse/neglect. It is concluded that alcohol abuse is a necessary, but not sufficient, condition for child abuse/neglect. 4 Tables, 61 References. Adapted from the source document.

Johnson, Ida M. (Dept Criminal Justice U Alabama, Tuscaloosa 35486), **Economic, Situational, and Psychological Correlates of the Decision-Making Process of Battered Women**, *Families in Society*, 1992, 73, 3, Mar, 168-176.

¶ Drawing on the tenets of exchange theory, interview data were collected from 426 battered women at a spouse-abuse shelter in central Fla to explore the correlates of their decisions to return home to the abuser after termination from the shelter. Results indicate that battered women are likely to return home when (1) the annual family income is high, (2) they are unemployed, (3) they have been victims of severe abuse, & (4) they have negative perceptions of themselves. It is concluded that a battered woman's decision-making process varies with her perceived level of rewards & costs. 4 Tables, 35 References. Adapted from the source document.

Laflamme-Cusson, Suzanne, La Déclaration de la victime au tribunal: évaluation de l'expérience du palais de justice de Montréal (The Declaration of the Victim in Court: Evaluation of an Experiment in Montreal Law Courts), *Criminologie*, 1990, 23, 2, autumn, 73-88. (FRE)

¶ The "declaration of the victim," an experimental program initiated in Montreal, Quebec, in 1987, invited 8,280 crime victims 1987-1989 to relate to the court the physical, psychological, social, & economic consequences that followed their victimization. Presented are results of an evaluative study of the program based on questionnaire data from 662 participant victims regarding: (1) declaration content, (2) effects of declaration on victims' court experiences, (3) victim's attitudes toward the declaration, & (4) professionals' opinions about the declaration. It is concluded that the victim's declaration played a reasonable role in the judiciary process, & can serve to increase victims' rights. 4 Figures, 1 Appendix. Adapted from the source document.

93Z9001

Malek, Dubravka, Nasilje roditelja nad djecom (Parental Violence against Children), *Thélème*, 1991, 37, 1, 57-68. (SCR)

¶ A literature review is presented showing that violence occurs within the context of family in Yugoslavia more than in any other social group. Parental violence against children is particularly distressing. Despite the many theories trying to understand the causes of such behavior, no one has yet succeeded in fully explaining this complex phenomenon. It now seems that parental violence is the product of highly complex interactions among individual, group, & social factors varying in proportion from one individual to another. These conclusions should help determine the approach used to prevent violence & to discourage offenders. Measures to prevent family violence necessitate coordination & participation of experts in many different fields. 16 References. Adapted from the source document.

Parent, Georges-André (217 rue Commune Ouest bureau 210, Montreal Quebec H2Y 3W8), **Les Médias: sources de victimisation** (The Media: A Source of Victimization), *Criminologie*, 1990, 23, 2, autumn, 47-71. (FRE)

¶ Reflections are offered on the interaction between crime victims & the media in Quebec, argued to be a form of victimization itself. It is observed that victimizers are by law less accessible than victims to the media. The most vulnerable victims, ie, the lower classes, have higher rates of media "victimization," especially in spectacular crimes like rape & aggravated assault. The depiction of victims in the media is stereotypical, creating perceptions of innocent & non-innocent victims. Media-created stereotypical potential victims serve in police prevention campaigns, leading to further victimization & promotion of fear of crime. Suggestions for appropriate treatment of victims in the media are presented. 43 References. Adapted from the source document.

Shields, Nancy M. & Hanneke, Christine R. (Dept Sociology U Missouri, Saint Louis 63121), **Comparing the Psychological Impact of Battering, Marital Rape and Stranger Rape**, *Clinical Sociology Review*, 1992, 10, 151-169.

¶ Women who have experienced battering or marital rape (N = 48 & 44, respectively) as a form of battering are compared with stranger rape vic-

tims (SRVs) in 2 studies (N = 20 & 66, respectively) in terms of their psychological functioning after victimization, as measured by the Derogatis Brief Symptom Inventory (BSI). The BSI measures somatization, obsessive-compulsive disorders, interpersonal sensitivity, depression, anxiety, hostility, phobic anxiety, paranoid ideation, & psychoticism. The sexual functioning of victims is also compared. Overall, the marital rape victims (MRVs) scored higher on the BSI than battering victims (BVs) or SRVs. MRVs scored significantly higher than SRVs on paranoid ideation & psychoticism & significantly higher than BVs on most dimensions. The scores of BVs were similar to those of SRVs. MRVs & BVs showed levels of sexual activity similar to SRVs, but significantly lower levels of sexual enjoyment. 3 Tables, 22 References. Adapted from the source document.

Glass, John E. (Dept Sociology & Social Work U North Texas, Denton 76203-3826), **An Alternative Understanding of the Cognitive, Emotional, and Behavioral Characteristics of Individuals Raised in Alcoholic Homes: A Clinical Theory of the Individual,** *Clinical Sociology Review,* 1992, 10, 107-117.

¶ Historically, clinical sociology has assessed problematic, individual behavior as reflective of immediate social circumstance & situation, & has primarily targeted situational factors contributing to individual distress as areas of intervention. Here, however, problematic, individual behavior is viewed as having social origins, although strategies for intervention are targeted at the intrapersonal level. The logic behind this argument is traced, & the approach is demonstrated in reference to individuals raised in alcoholic homes. 21 References. Adapted from the source document.

Hoffmann, Frances L. & Mastrianni, Xavier (Dept Sociology U Missouri, Saint Louis 63121), **Psychiatric Leave Policies: Myth and Reality,** *Journal of College Student Psychotherapy,* 1991, 6, 2, 3-20. **Comments,** 21-35.

¶ A survey was conducted of 54 colleges to determine availability of psychiatric leaves of absence for students, required or recommended time-away policy, & requirements for reentry. Results show a variety of policies for reentry, reflecting frequently unstated & unexamined assumptions about the relationships between mental illnes & the academic environment. A review of the research confirms that interrupted academic work for psychiatric reasons does not preclude continued & successful academic engagement; & that stipulated length of time away from school, & typical reentry requirements were not predictive of successful reintegration. Further, because the campus offers a structured environment & a network of social supports, it is argued that, for many students, remaining in school & using student mental health services is more beneficial than taking a psychiatric leave. It is concluded that this evidence supports flexible student psychiatric leave policies that accommodate the reintegration of students into campus life as quickly as possible. In **Psychiatric Leave Policies: Myth and Reality–A Commentary Thereon,** Robert L. Arnstein comments on his own research, cited by Hoffmann & Mastrianni, clarifying that his main study, on readmission policies at Yale U (New Haven, Conn), was conducted while policies were changing, & follow-up studies were not done. While agreeing that psychiatric leave rarely precludes a successful return to college, he argues for a semester-long leave of absence, & a screening interview prior to readmission. In **Reflections on Policy: Commentary on Psychiatric Leave Policies: Myth and Reality,** Myron B. Liptzin (U of North Carolina, Chapel Hill) faults Hoffman & Mastrianni for using an outdated study he coauthored in the 1960s, & cites instead more recent data (1989-1991) from the U of North Carolina. A six-month leave of absence, screening interviews, & brief therapy through student mental health services, followed by referral to an outside therapist or agency, is recommended prior to reentry. 14 References. Ringma, Charles & Brown, Christopher (Dept Social Work U Queensland, Saint Lucia 4067 Australia), **Hermeneutics and the Social Sciences: An Evaluation of the Function of Hermeneutics in a Consumer Disability Study,** UM *Journal of Sociology and Social Welfare*, 1991, 18, 3, Sept, 57-73.

¶ A hermeneutic procedure was used to develop & interpret a questionnaire for 24 disabled consumers & 18 parents of such consumers regarding their perspectives on the accessibility & quality of human services they utilize. Results indicate that consumers find it difficult to articulate their critique of existing services. The value of a hermeneutic methodology in the social sciences is demonstrated, particularly in terms of refining qualitative survey methods designed to explicate the perspectives of those experiencing relative powerlessness in using human services. Also, an attempt is made to establish the complementarity of the hermeneutics of suspicion & those of affirmation. 34 References. Adapted from the source document. Staub-Bernasconi, Silvia (School Social Work, Bederstr 115 CH-8002 Zurich Switzerland), **Social Action, Empowerment and Social Work–An Integrative Theoretical Framework for Social Work and Social Work with Groups,** *Social Work with Groups*, 1991, 14, 3-4, 35-51.

¶ A problem-centered theoretical framework for social work, social groupwork, & social action that is based on a general systems theory & challenges the dominating Parsonian functionalist perspective is described. The model's primary focus is on the inner, symbolic barriers to effective social action that can be eliminated by a sound theoretical base. Components of the systemic view include a multilevel diagnosis of social problems as a means of relating private problems to public political issues, conceptualization of specific problem dimensions for social work theory, & the development of problem-centered action lines. Questions for future research in social work education & practice are identified. It is suggested that the use of the proposed framework by a transnational organization of clients & stronger networks for social work & social work education would facilitate global empowerment. 27 References. 93Z9017

Zorbaugh, Harvey, Sociology in the Clinic, *Clinical Sociology Review*, 1992, 10, 16-20.
Introduction, 15.

¶ In an **Introduction**, Jan Fritz (California State U, San Bernardino) introduces Zorbaugh's discussion of the roots of clinical sociology, which originally appeared in 1939 in the *Journal of Educational Sociology*. Up until twenty-five years ago sociology was regarded as the work of philosophers & reformers. This perception began to change after WWII with the work of the Chicago school of sociology & their emphasis on sociology as science & the need to study the collective behavior of human beings & the social aspects of individual behavior. This developing interest led sociologists to seek access to clinical situations in which to test their concepts. However, such access was resisted by other professionals studying human behavior–psychiatrists, social workers, & psychologists–who wished to protect their professional & intellectual turf. As a result, sociologists began to discuss the prospect of sociological clinics; from these discussions came the birth of clinical sociology. D. Generoli (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Arluke, Arnold (Dept Sociology & Anthropology Northeastern U, Boston MA 02115), **The Transformation and Fate of Formal Knowledge: The Case of Sensory Integration,** *Current Research on Occupations and Professions,* 1991, 6, 179-199.

¶ The application & use of a single body of formal knowledge, ie, sensory integration, & the implications of its use for the professional power of occupational therapy are examined, drawing on the work of occupational therapist Jean Ayres, who developed sensory integration theory & technique in the mid-1960s, & on 45 interviews with occupational & physical therapists, & other professionals, as well as with parents of learning disabled children. While numerous occupational groups now authorize the use of sensory integration, formal knowledge about it has been compromised as each occupation interprets & applies it. Types of knowledge found to result from its use (orthodox, counterpointal, borrowed, revelatory, rationalized, & pragmatic knowledge) are discussed. It is suggested that the development of sensory integration has helped to prevent occupational therapy's knowledge base from becoming too technically routine, since it requires substantial training, clinical experience, & professional judgment. However, if professional power is construed as a monopoly of knowledge & technique by a single group, sensory integration has not facilitated the progress of occupational therapy. 52 References. Baker, Phyllis L. (Dept Sociology & Anthropology U Northern Iowa, Cedar Falls 50614-0513), **Bored and Busy: Sociology of Knowledge of Clerical Workers,** UM *Sociological Perspectives,* 1992, 35, 3, fall, 489-503.

¶ The production of inequality within the sociocultural world of clerical workers (CWs) is explored from a sociology of knowledge approach, using a model of a semiotic square to analyze the experiences of bored & busy work reported during interviews by 30 CWs employed in law firms, a multinational corporation, & a bank; supplementary data were obtained via participant observation. CWs' perceptions & activities were revealed to be both subordinating & empowering: subordination is maintained through bored/busy work, & empowering strategies through not-bored/not-busy work. It is concluded that the social reproduction of inequality is a multifaceted phenomenon. 1 Figure, 26 References. Adapted from the source document.

Baldamus, Wilhelm, Understanding Habermas's Methods of Reasoning, *History of the Human Sciences,* 1992, 5, 2, May, 97-115.
Introduction, 95-96, **Comment,** 117-120, **Bibliography,** 121-122.

¶ In **Wilhelm ("Gi") Baldamus (1908-91): An Appreciation,** sociologist Wilhelm Baldamus is memorialized as a thinker who investigated the claims & methodological procedures often hidden in the texts & canonical formulas of sociology. It is suggested that his work predictably raised questions about the domain of the human sciences, as evidenced in his last work, a critical exploration of Jürgen Habermas, which is presented here. This introduction is followed by a brief history of Baldamus's life & work by former student David Perman (U of Birmingham, England) & then the title article, which explores Habermas's *Theorie des Kommunikativen Handelns* ([Theory of Communicative Action] see IRPS No. 41/88c00922 & 88c00923) from an interest in the foundations of sociological theory, employing a content analysis as a means of considering his reinterpretations of a large number of renowned figures to whom he assigned positive & negative evaluations. While acknowledging the unprecedented scope of Habermas's intellectual interests, the omission of the work of several major sociologists (eg, Karl Mannheim, Norbert Elias, & Paul Lazarsfeld) is noted. Also examined is the method by which Habermas's conceptual schemes were constructed, as well as Habermas's triadic diagrams, as covert spatiotemporal expressions. In **Discoveries, Trends and Complexity: Remarks on Baldamus and the Sociological Moment,** Peter Lassman (U of Birmingham, England) explores the quest that underlies Baldamus's later work, ie, an attempt to come to terms with his own political & intellectual experiences. Baldamus is characterized as one of the last representatives of the German tradition of sociological historicism, shaped by an intellectual style derived from G. W. F. Hegel & Karl Marx. A **Baldamus Bibliography,** compiled by David Perman & Robin Williams, provides a listing of 46 works published 1934-1992. 3 Tables, 7 Figures, 40 References. S. Millett

Bohler, Danielle (U Paris III, F-752310 Cedex 05 France), **Le Mythe sous le récit** (The Myth beneath the Narrative), *L'Homme,* 1992, 32, 2-4(122-124), Apr-Dec, 391-395. (FRE)

¶ A review of two books by: Laurence Harf-Lancner & Dominique Boutet (Eds), *Pour une mythologie du Moyen Age* ([Toward a Mythology of the Middle Ages] Paris: Ecole Normale Supérieure, 1988); & Nicole Belmont, *Paroles païennes. Mythes et folklore. Dès frères Grimm à P. Saintyves* ([Pagan Words. Myths and Folklore. From the Grimm Brothers to P. Saintyves] Paris: Imago, 1986 [see listing in IRPS No. 67]). Although the theme of mythological study in the Middle Ages is not unfamiliar, the edited work details transpositions of earlier myths, as well as the creation or production of new myth. While the book is a positive contribution to the epistemology of myth, a definition of terms used in presenting the theory would improve it. Belmont's book provides a history of ethnological thought, urging a past & present reevaluation of concepts & words. Particular focus is on the double origin & nature of historic & mythical folklore. 1 Reference. J. Sadler

Brunkhorst, Hauke, The Tenacity of Utopia: The Role of Intellectuals in Cultural Shifts within the Federal Republic of Germany, UM *New German Critique,* 1992, 55, winter, 127-138.
Translated by Jamie Owen Daniel.

¶ The constant conflict between utopian & conservative intellectuals began in Germany as a campaign against French rationalism, forming the ideology of a counter-Enlightenment. The German academic class became an elitist caste of modern mandarins. By the 1950s, cultural counterdependencies among academics emerged in conjunction with a more open attitude toward the West & the stabilization of a democratically constituted state. During the 1960s, utopianism came to the forefront of intellectual debates as represented by Theodor W. Adorno. In the 1970s, the conservatism represented by Arnold Gehlen achieved superiority. It is advised that in the current context, egalitarian intellectualism may be able to outwait the conservative occupation of aestheticism & culture. 8 References. G. Castañeda

Carroll, David (U California, Irvine 92717), **Literary Fascism or the Aestheticizing of Politics: The Case of Robert Brasillach,** UM *New Literary History,* 1992, 23, 3, summer, 691-726.

¶ An analysis of literary fascism exemplified in the writing of French author Robert Brasillach. Literary fascism is the utopian, intellectual form of fascism, whose project is the organic unification of a people. It has

emotional power & intellectual attraction for those needing a revolutionary alternative to excesses of capitalism, democracy, & liberal republican values. Brasillach's literary fascism produced nationalist-linguistic-based critiques of the work of Mallarmé & Céline. Brasillach justifies anti-Semitism, equating the Jewish presence in France with a foreign threat. His acceptance of the Nazi aestheticizing of politics evolved from prewar rejection to embracing a truly French model of fascism during the Occupation. The aesthetic experience of politics is an end in itself, enjoyed for the intense totalitarian feeling of oneness with the state. J. Sadler (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Eberle, Thomas Samuel (Soziologisches Seminar Hochschule Saint Gallen, CH-9000 Switzerland), **A New Paradigm for the Sociology of Knowledge: "The Social Construction of Reality" after 25 Years,** *Schweizerische Zeitschrift für Soziologie/Revue Suisse de sociologie,* 1992, 18, 2, 493-502.

¶ In a reassessment of Peter L. Berger's & Thomas Luckmann's *The Social Construction of Reality: A Treatise in the Sociology of Knowledge* (see SA 15:3/67C4755), it is argued that the book was possibly never understood by most readers. Discussed here are the book's primary thesis–that reality is socially constructed–& its main logic-grasping society as an objective & subjective reality. It is suggested that the positive reception of the book was shaped by the specific *Zeitgeist* of the 1960s, both in Europe & the US; its shortcomings are indicated, eg, the conceptualization of subjective constructivism. The valuable legacy of the book is also discussed, however, particularly its contribution to the advancement of phenomenological concepts & the institutionalization of the sociology of knowledge. 29 References. Galinier, Jacques (Centre national recherche scientifique, F-75700 Paris France), **Freud, l'igname et la parole d'os** (Freud, the Yam and the Bone-Word), *L'Homme,* 1992, 32, 2-4(122-124), Apr-Dec, 385-390. (FRE)

¶ A review essay on a book by Bernard Juillerat, *Oedipe chasseur. Une Mythologie du sujet en Nouvelle Guinée* ([Oedipus the Hunter. A Mythology of the Subject in New Guinea] Paris: PUF, 1991 [see listing in IRPS No. 67]), which features a psychoanalytic-anthropological perspective. In a preface, André Green notes how the structuralism of the structure-code-message triad is reinterpreted to produce an unconscious-secret-real triad. Juillerat proceeds with the ethnological exegesis of the native, then passes from the unconscious to the myth & back, via the code of secrecy. He elaborates the hierarchy of meanings that yields a semantic coherence inherent in Yafar culture. It is suggested that Yafar mythology can emerge as a psychoanalytic ontology, linking the subjective-repressed dimension with the objective-conscious, collective, socializing subject dimension. Juillerat's New Guinean reformulation of the Oedipus myth is based on one, perhaps idiosyncratic, informant, & lacks native-langauge phrases in its descriptions. J. Sadler (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9027

Huyssen, Andreas, After the Wall: The Future of German Intellectuals, UM *New German Critique,* 1991, 52, winter, 109-143.

¶ The failure of German intellectuals to provide guidance in the unification of East & West Germany is examined, focusing on domestic politics, issues of German culture, & the debate on the war in the Persian Gulf. The inability of leftist & liberal intellectuals to admit their errors & political delusions is discussed, as is the lack of dialogue between East & West German thinkers. Attention is also given to the stormy reception of Christa Wolf's *Was bleibt* ([What Remains] Frankfurt/Main: Luchterhand, 1990), which details her experiences of being surveilled by the East German *Stasi* in the late 1970s. The book touched off a national debate about the role of intellectuals in society & incurred the wrath of many West German critics. W. Howard (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Lindén, Per-Anders (Sociologiska instit Stockholm U, S-10691 Sweden), **"Som man ropar, får man svar." En kommentar til Axel van den Bergs artikel: "Logiken i Bourdieus praktik. En avvikande uppfattning"** ("As the Question So the Answer." A Commentary on Axel van den Berg's Article: "Logiken i Bourdieus praktik. En avvikande uppfattning"), *Sociologisk Forskning,* 1992, 29, 2, 72-79. (SWE)

Reply, 80-84.

¶ A critique of Axel van den Berg's article (see SA 40:5/92Z1928) on Pierre Bourdieu's work. It is argued that van den Berg has misinterpreted crucial portions of Bourdieu's text & theory, particularly the character of the objectivism/subjectivism dilemma, & the meanings & implications of the concept of "habitus." Particular issue is taken with van den Berg's attempt to bolster his contention that Bourdieu is a "guru" or "emperor without any clothes." In **Behöver vi kejsarens begagnade plagg? Ett swar till Lindén** (Do We Need the Emperor's Used Rags? An Answer to Lindén), van den Berg (McGill U, Montreal, Quebec) challenges the contention that he did not understand Bourdieu's discussion of objectivism/subjectivism as epistemological rather than ontological. It is argued that Bourdieu unmistakably used ontological terminology in dealing with these issues; nonetheless, the distinction is dismissed as irrelevant. Lindén is criticized for failing to address the contradictions of the concept of "habitus," & for neglecting criticisms of Bourdieu's distinction between theory & practice. 5 References. Lynch, Michael (Boston U, MA 02215), **Going Full Circle in the Sociology of Knowledge: Comment on Lynch and Fuhrman,** UM *Science, Technology, and Human Values,* 1992, 17, 2, spring, 228-233.

Response, 234-236.

¶ The circularity of thinking in William Lynch's & Ellsworth Fuhrman's "Recovering and Expanding the Normative: Mark and the New Sociology of Scientific Knowledge" (see SA 39:4/91X9966) is outlined. It is argued that Lynch & Fuhrman would place the sociology of scientific knowledge (SSK) in a politicized frame, the limitations of which originally motivated the creation of SSK. Also described is their aim to develop an administrative management program as a new application of Western Marxism. It is concluded that a normative SSK is premature & repressive since it ignores the failure of social science to agree on even the basic policies of theory & method. In **Ethnomethodology as Technocratic Ideology: Policing Epistemic Boundaries,** Lynch (Cornell U, Ithaca, NY) & Fuhrman accuse Michael Lynch of wanting a complete set of technical tools before setting up norms for SSK, arguing that the failure of the social sciences to reach agreement does not invalidate attempts at establishing norms. It is also pointed out that he is avoiding the fact that science itself becomes a social problem while in the process of trying to solve social problems. 12 References. I. Dunny (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Thayer-Bacon, Barbara J. (Bowling Green State U, OH 43403), **A Feminine Reconceptualization of Critical Thinking Theory,** UM *Journal of Thought,* 1992, 27, 1-2, spring-summer, 4-17.

¶ A presentation of the historical view of critical thinking, & its episte-

mological paradigm of knowledge as correspondence between mind & form, as destructive & deceiving. A shift away from the traditional model to a conception of knowing as a process of human relationship is recommended. In a relational epistemology, an attempt is made to integrate personal & expert knowledge, stress interrelationships, & argue that knowledge & all methods of obtaining it are human constructions. It is presented that current critical thinking theories begin to consider what the knower contributes to the known, but only in a negative way. The feminist theory work of Carol Gilligan & Clinchy Belenky is used to support the idea that a new paradigm is needed, one that embraces the self & one's contribution to knowing, & allows for feelings as well as thoughts. Such a description of critical thinking is labeled constructive thinking. AA

Wertheimer, M., Hilgard, E. R., Spilka, Bernard, Tyler, Leona E., Norman, R. D., Loftus, Elizabeth F., Brewer, Marilynn B., Ellis, H. C., Wollersheim, Janet P. & Kendler, H. H. (Dept Psychology U Colorado, Boulder 80309-0345), **A Tale of Two Regions: The Rocky Mountain and the U.S. Western (Part I),** *Zeitschrift für Psychologie mit Zeitschrift für angewandte Psychologie,* 1991, 199, 1, 107-119.

¶ The history of psychology in the western & Rocky Mountain regions of the US, 1930-1989, is discussed by five former presidents, each, of the Western Psychological Assoc & the Rocky Mountain Psychological Assoc. It is noted that the more populous Western region has had more psychologists & psychological activity than the Rocky Mountain region over the last sixty years. From the 1930s on, psychologists in the Western region enjoyed an identity that was national rather than regional, while those in the Rocky Mountain region did not emerge from their regional isolation until 1950. It is concluded that the evolution of psychology in both regions reflects the evolution of psychology in the US & the development of Western psychology in general. Adapted from the source document.

93Z9034

Wolin, Richard, Introduction to Herbert Marcuse and Martin Heidegger: An Exchange of Letters, UM *New German Critique,* 1991, 53, spring-summer, 19-27.

¶ Herbert Marcuse's intellectual indebtedness to Martin Heidegger is examined, focusing on two essential aspects of Marcuse's appreciation of the German existentialist. First, Marcuse drew on Heidegger's hermeneutical point of departure, which stresses the importance of human being, or *Dasein,* in the world. Secondly, Marcuse appreciated Heidegger's category of historicity, which includes the idea that existence itself is historical. Marcuse's early efforts to merge Marxism & existentialism are discussed in relation to the same project undertaken by Jean-Paul Sartre. Marcuse's 1947/48 exchange of letters with Heidegger, in which Marcuse's struggles to understand how Heidegger could put his philosophy in the service of national socialism, is also examined. W. Howard

93Z9035

Beilharz, Peter, Reviews, *Thesis Eleven,* 1992, 32, 154-158.

¶ A review article on books by: Clare O'Farrell, *Foucault–Historian or Philosopher?* (MacMillan, 1989); James W. Bernauer, *Michel Foucault's Force of Flight: Toward an Ethics for Thought* (Humanities Press, 1990); Paul Rabinow, *French Modern: Norms and Forms of the Social Environment* (MIT Press, 1989); & Jonathon Crary, *Techniques of the Observer: On Vision and Modernity in the Nineteenth Century* (MIT Press, 1990 [see listings in IRPS No. 67]). These four volumes offer modest defenses of the intellectual project of Michel Foucault. O'Farrell's & Bernauer's books situate Foucault within French & continental intellectual culture. Bernauer goes to impressive lengths to show the originality & intellectual depth of Foucault's work. Rabinow's book presents a series of narratives about welfare, technocracy, & social engineering in the milieu of French modernism to contextualize the project not only of Foucault but also of Emile Durkheim. Crary uses Foucault's notion of panopticon & his emphasis on vision to examine the image of the optic in modern culture. W. Howard

93Z9036

Bondi, Liz (U Edinburgh, EH8 9YL Scotland), **Fragments for Geography?,** *Antipode,* 1992, 24, 1, Jan, 73-78.

¶ A review essay on a book by J. Flax, *Thinking Fragments. Psychoanalysis, Feminism and Postmodernism in the Contemporary West* (Berkeley & Los Angeles: U of California Press, 1990 [see listing in IRPS No. 67]). Flax perceives her text as juxtaposing & constructing conversations between psychoanalysis, feminist theories, & postmodern philosophies, writing as therapist, philosopher, feminist, & political theorist. Even accepting the description of psychoanalysis, feminist theories, & postmodern philosophies as transitional modes of thinking, they are not comparable modes of intervention. However, Flax raises issues of potential importance for radical geography, particularly in relation to current debates about postmodernism. First, her object relations perspective provides a basis for enriching interpretations of postmodern culture. Second, Lacanian psychoanalysis provides a means by which the discourse of postmodernism can be explored in more far-reaching ways than geographers have yet attempted. 9 References. S. Millett

93Z9037

Collins, Randall (Dept Sociology U California, Riverside 92521-0419), **The Rise and Fall of Modernism in Politics and Religion,** *Acta Sociologica,* 1992, 35, 3, 171-186.

¶ In the early eighteenth century, modernism in ideology arose as both religion & politics became arrayed along a binary dimension of traditionalists/conservatives against progressives/liberals. It is argued here that analytically, however, the structural bases of conflict are triangular: in politics, moving among the poles of centralization, mass participation, & a decentralized balance of powers; & in religion, among church hierarchy, sect enthusiasm, & spiritual elites. Rebellion against authority & tradition can take place from any pole toward any other. During the Reformation & the religious wars, neither Protestantism nor Catholicism could be arrayed along the modernist dimension of liberals & conservatives; in many respects, the social organization of the Catholic church made it more antitraditional than Protestantism. The struggle for secularization & religious tolerance crystalized in the liberal/conservative polarization of the Enlightenment & the French revolution. This binary dimension has broken down again in the late twentieth century, giving rise to the self-doubts manifested in postmodernist ideology. 5 Figures, 12 References. Adapted from the source document.

93Z9038

Fields, A. Belden & Narr, Wolf-Dieter (U Illinois, Urbana 61801), **Human Rights as a Holistic Concept,** UM *Human Rights Quarterly,* 1992, 14, 1, Feb, 1-20.

¶ An argument for a reconceptualization of "human rights," examining the great eighteenth-century French & American texts in which generalized rights declarations contrasted with selective recognition of rights in the real world. It is contended that rights are social practices that must be understood in their historical & situational contexts, & that the subject of human rights is always the individual human being, but that the human being is a political/social animal. Thus the argument is made for a holism that recognizes the social richness of the individual subject. While abstract or idealist foundations (eg, natural law or rights) for human rights are insufficient because they ignore human beings as historical/social beings, so is the completely relativistic position, which totally gives up on the individual as the struggler for, & bearer of, human rights. Some problems posed for human rights by modern constitutional government & the new world order are explicated. AA

93Z9039

Gould, James (Dept Philosophy U South Florida, Tampa 33620), **The Free Person,** UM *Journal of Thought,* 1992, 27, 1-2, spring-summer, 91-103.

¶ Three theories of freedom are examined: (1) negative, ie, freedom from constraint or coercion; (2) enabling means, ie, freedom via economic, political, & social conditions; & (3) acquired, ie, the freedom achieved

through living by an ideal befitting human nature. Four grounds are provided for believing (3) is a significant freedom, & objections to this belief are refuted. Finally, this theory is examined in light of Isaiah Berlin's famous two-part, negative & positive, theory (see *Two Concepts of Liberty*, Oxford: Clarendon, 1958). Halleröd, Björn (Sociologiska instit Umeå U, S-90187 Sweden), **Friedrich August von Hayek–frihetens apostel?** (Friedrich August von Hayek–Apostle for Freedom?), *Sociologisk Forskning*, 1992, 29, 3, 12-34. (SWE)

¶ Friedrich August von Hayek (1899-1992) supported a classical liberal philosophy & a free market (see, eg, *Law, Legislation and Liberty, Vol. I, Rules and Order*, London: Routledge & Keagan Paul, 1973). The underlying assumption in his theorizing was that people do not have sufficient mental resources to grasp the complexities of reality, & therefore, cannot make rational plans. Thus, institutions in a free society evolve from human action & spontaneous order, not human design. To secure progress & prosperity, freedom for the individual & avoidance of coercion need to be guaranteed. Hayek's theory is criticized for its reliance on a common value system in which traditional & the legal system are based; he has little discussion of class conflict & motivations based on differences in economic & political power. Also, it is argued that, because his theory lacks normative judgment, every society that exists as a product of spontaneous order, whether a Western democracy or Nazism, is good. 17 References. Kandrack, Mary-Anne (Dept Sociology & Anthropology Carleton U, Ottawa Ontario K1S 5B6), **Studying Psychotherapeutic Knowledge: Notes toward a Working Definition of Ideology**, *Alternate Routes*, 1992, 9, 90-93.

¶ Explored are the limitations & possibilities of feminist theory as a transformative politics & emancipatory psychotherapeutic intervention. An attempt is made to reformulate the concept of ideology in relation to contemporary discourse on mental illness, analyzing the discursive practices & forms of knowledge that characterize psychotherapeutic rationality, & exploring how they reproduce & transform relations of domination & subordination. The function of ideology in both mystifying & reifying social reality is discussed, along with its contributions to the production & dissemination of knowledge, drawing largely on the poststructuralist theories of Michel Foucault. Ways that ideology can serve as an analytical tool in a critical examination of knowledges within feminist therapy are outlined. 16 References. K. Hyatt (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

McKown, Delos B. (Dept Philosophy U Auburn, AL 36849), **Humanism, Disbelief, and Bibliolatry**, *The Humanist*, 1990, 50, 3, May-June, 7-9,36.

¶ Although compatible with humanism in the sense of the humane, literary humanism, & religious humanism, secular humanism is not identical with these or their product. Secular humanism denies "the sacred" as an objective property of any entity & claims that this notion is a phenomenon of social psychology. Secular humanists are agnostic or atheistic; their philosophy is not a religion, but a system of disbelief in all religions. Although liberal Jews & Christians religiously may be significantly humanistic in all but agnosticism or atheism, today's religious literalists or biblical inerrantists are antihumanistic, in that they require intellectual stultification to maintain their position. Our times are witnessing a conflict between the stultified forces of religious irrationalism & the forces of secular humanism that champion free intellectual development. 93Z9043

Murphy, Peter (University Coll Ballarat, Victoria 3350 Australia), **Is the Philosophy of Rights Enough?**, *Thesis Eleven*, 1992, 32, 13-36.

¶ An exploration of both criticisms & defenses of the modern conception of freedom. Critiques come from conservatives, classicists, & pluralists, all of whom agree on the tendency of modern freedom to become nihilistic or empty. The view of French political philosopher Luc Ferry (eg, *Political Philosophy, Vol. I: Rights–The New Quarrel between the Ancients and the Modern*, U of Chicago Press, 1990) that critiques of the modernist conception of freedom, eg, that of Leo Strauss (reference not provided), are necessarily conservative in character–is rejected. Here it is argued that, in fact, Strauss's critique is inspired by a classical notion of freedom, the freedom of the city, & the true conservative, by contrast with the classicist, prefers order over freedom. It is further argued that neither the conservative nor the classicist can offer a sufficient nor plausible alternative to the modernist notion of freedom or rights. Whatever the pitfalls of the modern idea of individual freedom or individual rights, it cannot be done away with, without debilitating consequences. The pluralist accepts this, but also accepts the demand (particularly from the classicist) for a more substantive conception of freedom. The aim of the pluralist is to solve the antinomies of classicism & modernism; how this is possible is demonstrated here. Richards, Graham (Psychology Dept Polytechnic East London, E15 4LZ England), **The Absence of Psychology in the Eighteenth Century: A Linguistic Perspective**, *Studies in History and Philosophy of Science*, 1992, 23, 2, June, 195-211.

¶ It is argued that the emergence of psychology as a natural scientific discipline prior to the mid-nineteenth century was prevented by psychological language implicit in early modern linguistic thought. New psychological language is generated by figuratively applying language used for referring to the external world in a reflexive fashion to denote psychological phenomena. Five concepts of language–Lockean, German Rationalist, Romantic, Reidian, & that of the British literati–are examined, & each is shown to have had no possibility of producing innovation in psychological language within a disciplinary context. It is concluded that a self-reflexive scientific psychology eventually emerged in spite of, not because of, any recognition of the process by which new psychological concepts are generated. W. Howard (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Sacchi, Stefan (Soziologisches Instit U Zürich, CH-8001 Switzerland), **Postmaterialismus in der Schweiz von 1972 bis 1990** (Post-Materialism in Switzerland from 1972 to 1990), *Schweizerische Zeitschrift für Soziologie/Revue Suisse de sociologie*, 1992, 18, 1, 87-117. (GER)

¶ Value change plays a crucial role in the explanation of a wide range of social alterations. Ronald Inglehart's Postmaterialism Index (see *The Silent Revolution: Changing Values and Political Styles among Western Publics*, Princeton: Princeton U Press, 1977) has been widely used to measure value orientations & their changes. The respective theory of the silent revolution, however, has often been criticized as being simplistic & economistic. Jürgen Habermas's thesis of the colonization of the life world offers an alternative theory of value changes. According to this approach, changing values may be interpreted as life world reactions on its colonization by two detached & expanding subsystems, ie, the economy & the state. Description of value changes in Switzerland & comparison of the competing explanations are based on data for several national random samples covering 1972-1990 as well as on a recent survey of two Swiss German birth cohorts–one born 1949-1951 & the other 1959-1961. Cohort effects account in part for the observed value changes, thus lending some support to Inglehart's theory. The strong shift toward postmaterialism within the cohort born around [illegible] & observed changes on the level of the singular items, however, lend greater support to the colonization thesis. 6 Tables, 2 Figures, 37 References. Strohmayer, Ulf & Hannah, Matthew (Dept Geography Pennsylvania State U, University Park 16802), **Domesticating Postmodernism**, *Antipode*, 1992, 24, 1, Jan, 29-55.

¶ Postmodernism is generally understood as a fundamental questioning of the possibility of any kind of critical social theory that is both resolutely critical & still productive as theory. It is suggested that certain aspects of postmodernism remain a serious threat to traditional standards of disciplinary legitimacy whether or not their context is relabeled "late modernism" & regardless of when it emerged. The most potentially destructive problems brought to light by Ludwig Wittgenstein, Martin Heidegger, Michel Foucault, & Jacques Derrida are discussed. These writers have clarified & put to rest the Enlightenment myth of emancipatory reason by illustrating the groundlessness of "truth" &, therefore, "right." It is contended that, by not acknowledging the challenge posed by this

situation or by not taking it seriously, social scientists have been able to domesticate postmodernism. 35 References. Adapted from the source document.

Van Elteren, Mel (Tilburg U, NL-5000 LE Netherlands), **Karl Korsch and Lewinian Social Psychology: Failure of a Project,** *History of the Human Sciences,* 1992, 5, 2, May, 33-61.

¶ In the latter 1930s, psychologist Kurt Lewin & Marxist philosopher Karl Korsch worked together on methodological questions concerning the interrelations between psychology, sociology, & history. Here, it is examined why their close contact & intellectual cooperation did not lead to a programmatic statement concerning a truly social psychology. Both thinkers had broad intellectual & societal interests, were interdisciplinary in orientation, & tried to integrate various levels of analysis of social reality; yet the results of their cooperation were disappointing & had little impact. Had it been otherwise, the recent view that social psychology should be considered as history, not science, might have developed much earlier. It is concluded that if Korsch's own thoughts about sociology & social psychology had gained a foothold within Lewinian social psychology, this school might have paid more attention to the interrelations between psychology & sociology & to the historicity of human behavior than was, & still is today, the case. In Lewin's work no adequate conceptualization can be found for a social psychology at the nexus of sociology, psychology, & societal history, which might perhaps better be called "societal psychology." 77 References. Al-Rasheed, Madawi (Nuffield Coll, Oxford OX1 1NF England), **Political Migration and Downward Socio-Economic Mobility: The Iraqi Community in London,** *New Community,* 1992, 18, 4, July, 537-549.

¶ The history of Iraqi settlement in London, England, is chronicled, showing how successive political events in Iraq have led to the formation of a migrant community over the past forty years. As political migrants who have left home under various pressures, the Iraqi experience of migration is in many ways different from the classical economic migration. The relationship between political migration & the trend toward downward socioeconomic mobility among a subsection of the migrant community is discussed, drawing on data obtained 1990/91 via interviews & questionnaires from a sample of 150 Iraqis in London. Focus is on the internal constraints & obstacles imposed by the host society that maintain the decline in the community's standard of living. 22 References. Adapted from the source document. Ellison, Christopher G. (U Texas, Austin 78712), **Toward a New Sociology of the South,** *National Journal of Sociology,* 1992, 6, 1, summer, 91-100.

¶ A review essay on a book edited by Joseph S. Himes, *The South Moves into Its Future: Studies in the Analysis and Prediction of Social Change* (Tuscaloosa: U of Alabama Press, 1991 [see listing in IRPS No. 67 & abstract in IRPS No. 61/92c01521]. The book presents 11 papers from the 1986 program committee of the Southern Sociological Society that reflect the views of southern sociologists on recent changes in the South. Although the idea behind the long-awaited volume is promising, it is contended that many of the contributions lack sound, theoretically informed analysis. While the book includes two interesting chapters on race & ethnicity, it is argued that several major issues are neglected, including: race & ethnic attitudes; the social, political, & cultural distinctiveness of southern blacks; the emergence of a genuine two-party system; & southern violence. Despite these gaps, the collection is worth reading & will hopefully stimulate new directions in the sociological study of the South, as well as broader interest in contemporary regional differences. 17 References. Germain, Annick, Montréal survivra-t-elle au déclin de sa grande bourgeoisie anglo-protestante? (Will Montreal Survive the Decline of Its Large Anglo-Protestant Bourgeoisie?), *Recherches Sociographiques,* 1992, 33, 1, Jan-Apr, 103-110. (FRE)

¶ In a review of two recent publications on the changing economic importance of Montreal, Quebec, Margaret W. Westley's *Grandeur et déclin: l'élite anglo-protestante de Montréal, 1900-1950* ([Grandeur and Decline: The Anglo-Protestant Elite of Montreal, 1900-1950] Montreal: Libre expression, 1990) is criticized for the association it makes between the dispersion of the Anglo-Protestant aristocracy & the commercial & financial decline of Montreal. It is suggested Montreal's decline is better explained in terms of economic geography &, as thought by Marc V. Levine (*The Reconquest of Montreal. Language Policy and Social Change in a Bilingual City* (Philadelphia: Temple U Press, 1990), in terms of sociolinguistic transformations. Levine's analysis of political & linguistic debates in Montreal is clear & sensitive, though it is also perhaps too optimistic, since the demetropolitanization & decline of Montreal seem to persist. 6 References. Goldenberg, Sheldon & Haines, Valerie A. (Dept Sociology U Calgary, Alberta T2N 1N4), **Social Networks and Institutional Completeness: From Territory to Ties,** *Canadian Journal of Sociology/Cahiers canadiens de sociologie,* 1992, 17, 3, summer, 301-312.

¶ Drawing on previous sociological research, the role of institutional completeness (IC) in the study of ethnic communities in Canadian sociology is examined. A shift from an ecological to a network conception of community is documented, & it is shown that the current framing of the concept of IC rests on an ecological foundation. It is argued that linking the study of IC with the study of social networks not only sensitizes researchers to the possibility that institutionally complete communities can assume other network configurations, but provides them with the concepts & techniques with which to investigate it. By tapping the number & the nature of ties that connect co-ethnics, the network approach can avoid the limitations of the enumerative approach to the measurement of IC & bring reserach into line with recent developments in community & urban sociology. 47 References. Trouillot, Michel-Rolph (Dept Anthropology Johns Hopkins U, Baltimore MD 21218), **The Caribbean Region: An Open Frontier in Anthropological Theory,** UM *Annual Review of Anthropology,* 1992, 21, 19-42.

¶ The encounter between studies of the Caribbean region & theoretical developments in sociocultural anthropology is examined through an extensive literature review, with a strong emphasis on the last twenty years. It is argued that the encounter is characterized by the difficulties inherent in adapting Caribbean reality to anthropology's initial project of studying simple societies. Carribean societies have long been complex, if not modern. Such characteristics have prevented the use of gatekeeping concepts so convenient to cultural anthropology in other regions. This absence of theoretical simplifiers encourages Caribbean anthropologists to engage in some very lively & stimulating debates. Does anthropology have any use for the "plural society" concept when ideogeneity is so blatant? How does anthropology treat native voices when such voices are so dissimilar? How does it tie studies of gender & social organization to issues of social class? Recently, cultural anthropologists working on the Caribbean have used multidisciplinary viewpoints & multiple units of analysis to question some of the traditional limits of their discipline & to contribute to an anthropological theory more tuned to the realities of the modern world. 206 References. Gundelach, Peter (Instit Political Science U Aarhus, DK-8000 C Denmark [Tel: 86-13-01-11; FAX: 86-13-98-39]), **Recent Value Changes in Western Europe,** *Futures*, 1992, 24, 4, May, 301-319.

¶ Data from the 1973-1988 Eurobarometer surveys (N = 200,000+ respondents [Rs]) & unpublished results of a European questionnaire survey administered in 1980 & 1991 (Ns not provided) are used to describe value changes in Western Europe in relation to social institutional changes. Such institutional changes include a decrease in size & increase in fragility of families, & a larger & more heterogeneous labor market, particularly because of the increase in the number of married women having paid jobs. Globalization has resulted in a double trend of heterogenization & localism. Ways that these changes have influenced the values of the population are described, highlighting the increase in individualization & a more fragmented value system, which means, eg, that there are no clear political cleavages. The value changes can be summarized in three processes from: industrial to green; authoritarian to libertarian; & church-oriented to personal religious values. These trends suggest the advent of a society with a diversity of lifestyles & many competing value structures. 1 Table, 2 Figures. Adapted from the source document. Krasteva, Anna (Instit Philosophical Sciences, 6 P Evitimii BG-1000 Sofia Bulgaria), **'Ode to Totalitarianism', or, Does the Information Society Have a Chance in Bulgaria?,** *Futures*, 1992, 24, 2, Mar, 130-137.

¶ In developed countries, informatization has proceeded on the basis of economic rationality, with the states playing a secondary role to many autonomous business agents. In Bulgaria, however, the informatization process was organized following the logic of the hierarchical pyramid model of the totalitarian state. Informatization could not grow because its social innovation component was missing. Informatization in post-communist Bulgaria will probably have a reduced priority; its logic has overtones of communist ideology & is unrealistic for Bulgaria's state of economic development. However, informatization could have a future in Bulgaria if the state accelarates its development by building up a pluralistic democracy with educated young people & by moving to a market economy with available risk capital. Rasmussen, Bente & Håpnes, Tove (Instit Sociology U Trondheim, N-7055 Dragvoll Norway), **Excluding Women from the Technologies of the Future? A Case Study of the Culture of Computer Science,** *Futures*, 1991, 23, 10, Dec, 1107-1119.

¶ A case study of computer science (CS) education at the Norwegian Instit of Technology demonstrates how the culture & ideas of a small male (M) minority of students--computer hackers--come to dominate CS in the eyes of female (F) students. This minority culture is reinforced by the values & interests of the most powerful (M) groups in computer science, ie, M professors & their disciples, the dedicated M students. In this way, a M-dominated & machine-fixated culture works to marginalize Fs. 4 Figures. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Sardar, Ziauddin & Davies, Merryl Wyn (c/o *Futures*–Butterworth-Heinemann Ltd, Jordan Hill Oxford OX2 8DP England), **The Future of Eastern Europe: Lessons from the Third World,** *Futures*, 1992, 24, 2, Mar, 150-157.

¶ East European states are presently in positions similar to Third World countries granted their independence in the late 1940s & early 1950s. Three main parallels are discussed: both groups have to live with colonial legacies; both gained independence within an economic order that discriminates against nonindustrialized countries; & both are marginalized from the centers of political, economic, & technological power. The one major difference is that East European countries have legitimate roots in the dominant Western culture. However, the exclusion of the East European states from decision making in the World Bank & International Monetary Fund will cause them to be mere satellites of industrialized nations, trapped in debt, supplying cheap labor to Western Europe. Since it is doubtful that the East Europeans will be integrated into the European Community, their best option is to join other Third World states in pressing for genuine structural changes in the global economic system. Lehman, Anthony F., Slaughter, Jean G. & Myers, C. Patrick (Dept Psychiatry U Maryland, Baltimore 21201), **Quality of Life Experiences of the Chronically Mentally Ill: Gender and Stages of Life Effects,** *Evaluation and Program Planning*, 1992, 15, 1, 7-12.

¶ Data obtained via structured interviews are used to examine gender & decade of life effects on the quality-of-life (QOL) experiences of 3 samples of chronically mentally ill ((CMI) N = 99, 92, & 278, respectively). Results indicate that gender & decade of life bear more on objective QOL experiences than on life satisfaction. However, the data suggest a difference in midlife psychological adjustment between CMI men & women. These results demonstrate the potential importance of considering gender & life cycle effects on the assessment of QOL among the CMI. 2 Tables, 1 Figure, 22 References. Lind, Niels C. (Instit Risk Research U Waterloo, Ontario N2L 2G1), **Some Thoughts on the Human Development Index,** *Social Indicators Research*, 1992, 27, 1, Aug, 89-101.

¶ The Human Development Index (HDI) of a nation, proposed by the UN Development Programme (Human Development Report, 1990, Oxford U Press), is the average of its score, relative to all other nations, on three basic indicators: gross domestic product per person, life expectancy, & literacy. The HDI & its components are examined critically with respect to accuracy, sensitivity, & discriminant power. Differential implications for evaluating a particular project or regulation are derived, suggesting some ways to improve the HDI. It is concluded that the HDI is potentially a powerful instrument for world social development & bears examination for validity & consistency with public objectives. 1 Table, 8 References. Sučić, Seka (Andragoški Centar, 41000 Zagreb Vojnoviceva Croatia), **Empirijski prilog odredenju kvalitete života** (An Empirical Contribution to the Definition of the Quality of Life), *Thélème*, 1991, 37, 1, 35-47. (SCR)

¶ To help define the term "quality of life," questionnaire data were obtained from 143 Croatians in 1989. Most respondents (Rs) related quality of life to the material aspects of life, feelings of gratification, social aspects of life, socioeconomic conditions, & personality traits. Additional information was sought about the most important component of quality of life & about the quality of their own lives. Correlation of responses with Rs' gender, age, education, & material level shows that quality of life always depends on the living conditions at the time of the survey. Moreover, the material aspects are not an indicator but rather a prerequisite for quality of life. 6 Graphs, 13 References. Adapted from the source document. Weiner, Jonathan P., Powe, Neil R., Steinwachs, Donald M. & Dent, Greg (School Hygiene & Public Health Johns Hopkins U, Baltimore MD 21205), **Applying Insurance Claims Data to Assess Quality of Care: A Compilation of Potential Indicators,** *Quality Review Bulletin (QRB)*, 1990, 16, 12, Dec, 424-438.
Comment, 422-423.

¶ The use of insurance claims databases as the basis for performance-based quality of care (QOC) evaluation systems in health services is examined. Though designed for payment of bills & monitoring of expenses, the clinical information contained in claims data provide a low-cost & unobtrusive alternative to primary data, & can be developed into valid & reliable indicators of QOC. Data accuracy & methods used to develop indicators from claims databases are discussed, & forty potential indicators & examples presented. In **The Issue Is Not the Usability of Claims Data but the Quality of the Indicators,** J. William Thomas (U of Michigan, Ann Arbor) agrees that the claims data approach can be useful in the data collection & indicator development processes, but points out drawbacks: (1) unavailability of critical data; (2) no assessment of the reliability & validity of the potential indicators presented; & (3) the fact that indicators are not direct measures of QOC. 2 Tables, 105 References. Bryan, Dick (U Sydney, New South Wales 2006 Australia), **International Accumulation and the Contradictions of National Monetary Policy**, IN *Science and Society*, 1992, 56, 3, fall, 324-352.

¶ The role of nation states in securing the money system has become ambiguous with the international mobility of money & the integration of national capital markets. The effect is that national monetary policy comes to reflect the contradictions between different sections of capital, which are themselves integrated into international accumulaton in different ways. As such, there can be no assumption (as in conventional analysis) that national monetary policy is inherently nationalistic in its objectives. Hence the shifting emphasis in monetary policy between the rates of exchange, interest, & inflation should be interpreted as changing relations between different sections of capital in international accumulation. Increasingly, national monetary policy is drawing on policies that secure wage reductions, so as to secure the monetary system without dividing capital. 33 References. De Kort, Marcel & Korf, Dirk J. (Dept Social History & Science Art Erasmus U Rotterdam, NL-3000 DR Netherlands), **The Development of Drug Trade and Drug Control in the Netherlands: A Historical Perspective**, IN *Crime, Law and Social Change*, 1992, 17, 2, Mar, 123-144.

¶ Though the drug trade is considered relatively new in the Netherlands, it is shown that, from the early twentieth century, the Dutch pharmaceutical industries were already extensively involved in the production of both opiates & cocaine, & continued exporting large quantities of these drugs even after the 1919 Opium Act prohibited them. Until the 1960s, arrests were uncommon, & largely directed toward minority groups like Chinese opium smokers & black marijuana users. Since then, drug control efforts have increased exponentially, first targeting cannabis, heroin, & finally cocaine. It is concluded that, in spite of drastic changes in both drug trade & drug control during the course of the century, certain ideologies, constructs, & strategies have remained remarkably stable. 3 Figures. Hewa, Soma (Dept Behavioral Sciences Mount Royal Coll, Calgary Alberta T1A 3Y6), **The AIDS Crisis and Human Rights in Canada**, IN *International Review of Modern Sociology*, 1992, 22, 1, spring, 43-53.

¶ The limitation of constitutionally entrenched rights & freedoms in protecting fundamental human rights among marginalized groups in Canadian society is examined. While the Canadian Charter of Rights & Freedoms maintains that every individual is equal under the law, there have been clear violations of the fundamental human rights of AIDS (acquired immune deficiency syndrome) patients in various parts of the country. In all of the incidents, the actions taken by the authorities, according to medical & legal experts, were not required to protect public health. Major aspects of the Charter & its relevance to the AIDS crisis are examined, & it is concluded that the distribution of wealth & power among various groups determines their ability to defend fundamental rights & freedoms. Individuals who have the resources can make use of formal law to protect liberty & justice, while these are unaffordable luxuries for those who lack such resources. The Charter has had very little impact on the societal treatment of the gay community, drug users, & immigrants who are not in a position to defend their rights & freedoms. 16 References. Leck, Joanne D. & Saunders, David M. (Ecole hautes études commerciales U Montréal, Quebec H3T 1V6), **Hiring Women: The Effects of Canada's *Employment Equity Act***, *Canadian Public Policy/Analyse de Politiques*, 1992, 18, 2, June, 203-220.

¶ In Canada, organizations subject to federal jurisdiction have been required since 1986 to adopt Employment Equity Programs (EEPs) designed to increase the presence of four traditionally underrepresented groups: women, aboriginal peoples, disabled persons, & visible minorities. Here, the effect of EEPs on the hiring of women is examined, drawing on data obtained during telephone interviews with personnel department heads or chief executive officers/presidents of 294 organizations representing transportation, banking, communication, & other industries. Results suggest that organizations which adopt EEPs that are more formalized, more comprehensive, & better supported are more likely to hire a more representative number of women. The effects of EEPs, however, differ across occupational groups & among women with & without dual status. 8 Tables, 1 Appendix, 29 References. Adapted from the source document.

Leeuw, Frans L. (Dept Policy Evaluation Netherlands Court Audit, PO Box 20015 NL-2500 EA The Hague), **Policy Theories, Knowledge Utilization, and Evaluation,** *Knowledge and Policy*, 1991, 4, 3, fall, 73-91.

¶ Identifying policy assumptions & reconstructing policy theories from them are first steps in evaluating the foundation & potential for success of public policy. Once the assumptions are compared with the latest evidence from field research, the policy can be appraised for its utilization of available scientific research. The reconstruction & evaluation of policy theory is illustrated by a case study of Dutch policy on juvenile delinquency. The theory underlying the government's diagnosis of & proposals for reducing juvenile crime through increasing young people's social integration is reconstructed. While the official policy reflected state-of-the-art research at the time, the government should be criticized for not using the more precise & informative evidence currently available. The positive reactions to their critique point to the benefits of a contextualized evaluative approach to policy theory. 1 Figure, 2 Appendixes, 45 References. J. Sadler

Loveland, Ian (Queen Mary & Westfield Coll U London, E1 4NS England), **Square Pegs, Round Holes: The 'Right' to Council Housing in the Post-War Era,** *Journal of Law and Society*, 1992, 19, 3, autumn, 339-364.

¶ The success of council housing (public housing for rent) in GB in the postwar era is explored. The sale of these houses, which became popular in the 1980s, exemplifies the trend toward consumerization of goverment by which government bureaucracies are exposed to market forces. The Thatcher administration's housing policy enjoyed success in terms of increasing the absolute number of houses & the accessibility of the owner-occupied market to more consumers, but the policies also limited citizens' freedom of political choice rather than enhancing economic liberty. Government policy failed to recognize that council tenants deserved rights in the management of their homes. This failure is discussed as stemming from constitutional & organizational factors that fostered the delegitimization of council housing. 1 Table. Adapted from the source document.

Makowsky, Cheryl R. & Whitehead, Paul C. (c/o Whitehead–Dept Sociology U Western Ontario, London N6A 5C2), **Advertising and Alcohol Sales: A Legal Impact Study,** *Journal of Studies on Alcohol*, 1991, 52, 6, Nov, 555-567.

¶ In an examination of whether the lifting of a 58-year ban on advertising of alcoholic beverages in Oct 1983 increased levels of sales in Saskatchewan, data on monthly sales were tracked from 1981-1987. Box-Jenkins time-series techniques were used to estimate the statistical relationship between the policy change & the volume of sales of beer, wine, & distilled spirits. Results showed no impact on wine & total alcohol sales from the introduction of alcohol advertising. The single distribution theory, which states that increases in availability lead to increases in consumption, was disproved. It is concluded that advertising should have a low priority with respect to legislative changes aimed at reducing alcohol-related damage. 4 Tables, 4 Figures, 54 References. Seddon, Terri (Monash U, Clayton Victoria 3168 Australia), **Social Justice in Hard Times: From 'Equality of Opportunity' to 'Fairness and Efficiency',** *Discourse*, 1990, 11, 1, Oct, 21-42.

¶ Drawing on historical records, including newspapers, parliamentary debates, & teacher union conference proceedings, it is examined how education in New South Wales, Australia, in the 1930s depression shifted from a practice organized by the prinicple of "equality of opportunity" to one informed by the principle of "fairness & efficiency." It is argued that the shifting form of social justice in education is an expression of a shift to the Right informed by a framework that views society as a market & individuals as equal, rational parties to exchange. This market form of social justice rests on an assumed common interest in individual wealth & prosperity, & the promise of a fair share of that wealth for all. This premise marginalizes the fact of inequitable production, distribution, & control of wealth, & its social implications. The economic discourse legitimizes self-interest over social interest, defining the market, rather than state or society, as the proper regulator of social obligations. The similarities between social justice during the hard times of the 1930s & 1990s are discussed. It is argued that, in hard times, there is a tendency for constraints on the state to be resolved by prioritizing the economic, & managing contraction through privatization & targeted welfare, legitimated by a reconstructed rhetoric of social justice which ensures that fairness & justice are judged within a framework of efficient management rather than absolute inequality. However, the logic of "fairness & efficiency" was vulnerable in the 1930s because the frames of debate were constantly challenged by the issue & experience of absolute inequality. People became outraged & politicized by the absolute injustice of exceptional practices deemed necessary by exceptional times. The consensus of the Right was contested & fractured to give a broad egalitarian reform movement pressing for the democratization of education & a re-

turn to principles of equality of opportunity. While this case study of the 1930s provides no solutions in the 1990s, it affirms the significance of political struggles around frames of debate, as wll as policy & practice. 41 References. Simmons, Alan B. & Keohane, Kieran (York U, North York Ontario M3J 1P3), **Canadian Immigration Policy: State Strategies and the Quest for Legitimacy,** IN *La Revue Canadienne de Sociologie et d'Anthropologie/The Canadian Review of Sociology and Anthropology*, 1992, 29, 4, Nov, 421-452.

¶ Although the state may appear to be a hegemonic, self-interested leader in directing immigration policy in Canada, challenges from various interest groups influence outcomes. Aiming to perpetuate national economic security, pursue a rational-bureaucratic agenda, & attain legitimacy, the state anticipates criticism of immigration policy from interest groups, tries to undermine oppositional strategies, & mediates major social conflicts. Here, policy formulations, 1986-1990, concerning laws restricting refugee inflows are examined, identifying the main influential actors & tracing power flows in communications resulting in policy decisions. After a review of the literature, interviews with actors from various ethnic groups, humanitarian organizations, the provinces, labor, & capital, & participant observation in immigration policy consultative meetings, it is found that seemingly high immigration targets are a concession to pressure from interest groups. 4 Charts, 27 References. Svallfors, Stefan (Sociologiska instit Umeå U, S-90187 Sweden), **Uppskattad reform? *Social position*, egenintresse och allmänintresse i stödet för skattereformen 1991** (Appreciated Reform? Social Position, Self-Interest, and Public Interest in the Support of the 1991 Tax Reform), *Sociologisk Forskning*, 1992, 29, 2, 13-29. (SWE)

¶ Labor statistics are drawn on to explore the attitudes of 2,726 workers toward the 1991 Swedish tax reform. Analysis indicates that the factors of gender, income, & white- vs blue-collar occupation have an impact on attitudes toward the reform: men, white-collar, & high-income employees are most supportive. The effect of self- vs public-interest concerns in explaining these findings is evaluated. Though self-interest plays an important role in income & occupational group attitudes, it has very little effect on gender-based differences; several alternative explanations are suggested. 4 Tables, 31 References. Tougas, Francine & Beaton, Ann M. (School Psychology U Ottawa, Ontario K1N 6N5), **Women's Views on Affirmative Action: A New Look at Preferential Treatment,** *Social Justice Research*, 1992, 5, 3, Sept, 239-248.

¶ Results of prior research conducted with French-Canadian students, professionals, & managers (eg, see Tougas, F., Beaton, A. M., & Veilleux, F., "Why Women Approve of Affirmative Action: The Study of a Predictive Model," *International Journal of Psychology*, 1991, 26, 761-776) are used to develop a profile of women who endorse affirmative action, showing that women who approve of affirmative action identify with a nontraditional image of women & experience discontent when perceiving discrimination on the basis of sex. The impact of the implementing procedure is also examined. While findings from studies conducted 1983/84 reveal that women who fit this profile readily endorsed equal opportunity policies, they did not advocate policies that advocate preferential treatment. More recent studies, however, reveal a dramatic change in the pattern of responses: women who were dissatisfied with their collective situation & identified with a nontraditional image of their group predominantly approved of preferential treatment. Factors that triggered this change in attitudes are investigated, & it is discussed whether the merit principle & preferential treatment policies are truly incompatible. 1 Table, 43 References. Van de Vall, Mark (Dept Sociology Erasmus U, NL-3000 DR Rotterdam Netherlands), **Sociological Practice in Modern Policymaking: Supply and Demand,** *Sociological Practice Review*, 1992, 3, 4, Oct, 272-276.

¶ Supply & demand issues in sociological practice are considered from the perspectives of diagnosing policy problems & improving policy programs. In the face of changing policy problems, sociological practitioners assume three professional roles: diagnostician, policy advisor, & process consultant. Sociological practice operates as a control mechanism of policy input, throughout, & output in improving a policy program. 2 Tables, 14 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Wennemo, Irene (Dept Sociology Stockholm U, S-10691 Sweden), **The Development of Family Policy: A Comparison of Family Benefits and Tax Reductions for Families in 18 OECD Countries,** *Acta Sociologica*, 1992, 35, 3, 201-217.

¶ In the post-WWII era, governments in industrialized nations introduced universal family support to attain two policy objectives: raising fertility & increasing family economic well-being. Support has typically been in the form of different types of family tax reductions or cash benefits. Here, predictors of growth of family benefit levels in these systems are explored via an analysis of statistical data for 18 OECD (Organization for Economic Cooperation & Development) countries, 1930-1985. Results indicate that benefit levels are influenced by national political trends: Left party strength has a significant impact on the level of cash benefits, but a weak negative one on tax reductions, the latter type of benefit being more advantageous for earners of high incomes. Religious party strength also has a rather strong influence on family support. In contrast, measures linked to modernization & industrialization do not have a strong effect on the extension of family support, & neither measures of economic development nor fertility demonstrate any consistent impact on benefit levels. 4 Tables, 2 Figures, 52 References. Wikeley, Nick (Faculty Law U Birmingham, B15 2TT England), **The Asbestos Regulations 1931: A Licence to Kill?,** *Journal of Law and Society*, 1992, 19, 3, autumn, 365-378.

¶ Original source & archival material is drawn on to discuss the Asbestos Industry Regulations 1931, issued by the Home Office (HO) in GB, as the first legislative attempt to regulate the hazards posed by asbestos in the workplace. It is shown how the content of the regulations was determined by the findings of E. R. A. Merewether's & C. W. Price's *Report on the Effects of Asbestos Dust on the Lungs and Dust Suppression in the Asbestos Industry* (no publication information provided) & the HO's subsequent negotiations with the asbestos industry. The HO only consulted with the Trade Union Congress (TUC) at a late stage, & the unions were only able to secure improvements to the regulations at the margins. Reasons for the ultimate failure of the regulations are discussed, & it is concluded that effective regulation of occupational health & safety depends on the control of information about industrial hazards. ——, **Review Essay,** IM *Contemporary Sociology,* 1992, 21, 6, Nov, 785-788.

¶ A review essay on a book by Christopher Jencks, *Rethinking Social Policy: Race, Poverty, and the Underclass* (Cambridge: Harvard U Press, 1992 [see listing in IRPS No. 67]). In **The Continuing American Dilemma: Race, Poverty, and Social Policy,** Sheldon Danziger (U of Michigan, Ann Arbor) points out that Jencks considers important social science best sellers by Thomas Sowell, Charles Murray, James Q. Wilson & Richard Herrnstein, & William J. Wilson to demonstrate how social science often relies on untestable hypotheses & ideology when it confronts issues like race, class, & the underclass. Offering monolithic causes in lieu of nuanced understandings of the complex factors involved, social scientists tend to dichotomize the world. Jencks, on the other hand, advocates open-mindedness in confronting difficult policy issues–& his work is a testimony to the effectiveness of his approach. However, the work lacks an integrative conclusion that would advance the complex incremental reforms that Jencks champions. In **A Skeptic on Poverty,** Lawrence M. Mead (New York U, NY) challenges Jencks's claim that the facts about poverty are politically neutral & that only the solutions have political implications. Mead advances the idea that where a problem comes from is often just as important as how it is solved–because both of these constructs are ideologically defined. M. Crary, Daniel R. (California State U, Fullerton 92634), **Review Essay: International Negotiation: A Study in Disarray,** *International Journal of Intercultural Relations,* 1992, 16, 2, spring, 237-243.

¶ A review essay on books by: Victor A. Kremenyuk (Ed), *International Negotiation: Analysis, Approaches, Issues* (San Francisco: Jossey-Bass Publishers, 1991) & Raymond Cohen, *Negotiating across Cultures* (Washington, DC: US Instit of Peace Press, 1991 [see listings in IRPS No. 67]). Kremenyuk offers a series of theoretical analyses of international negotiation, & Cohen provides illuminating case studies examining intercultural negotiation in practice. In neither work, however, do issues of culture & communication receive adequate attention. Indicative of the field's larger structural problems, little intellectual work is done in Kremenyuk's book, either to integrate the variety of approaches that scholars rely on in practice, or to systematically understand communication or culture. If Cohen's book initially suggests more promise because it mentions these issues in its title, the reader soon discovers that it is equally problematic. Primarily, it is misnamed, because Cohen is only interested in proving that an analysis of East-West negotiation supports Edward T. Hall's overly-simplistic analysis (no reference provided) of how high- & low-context cultures communicate. Communication scholars are challenged to do better than these intellectually impoverished books. M. Maguire (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Deshen, Shlomo (Tel-Aviv U, Ramat-Aviv IL-69978 Israel), **Applied Anthropology in International Conflict Resolution: The Case of the Israeli Debate on Middle Eastern Settlement Proposals,** IM *Human Organization,* 1992, 51, 2, summer, 180-184.

¶ It is argued that Jewish & Arab protagonists in conflict are motivated inter alia by religionationalistic sentiments. The nature of pertinent sentiments of Israelis is elucidated, contending that religiously observant Israelis are at the crux of contemporary political "hawkishness," for reasons that are related primarily to shifting internal sociopolitical relationships between the strata of observant & secular Israelis, & only secondarily for reasons inherent in religious beliefs. The particular importance of the observant is analyzed in its context. The position of "dovish" Israelis suffers from an inbuilt weakness, which is linked to the symbolic discourse through which their position is posed. That discourse entails the usage of a set of universalistic concepts & beliefs while glossing over traditional Jewish concepts. Recommendations in terms of practice are offered, & a parallel discussion of Arab religious views is urged. 13 References. AA (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Elster, Jon (U Chicago, IL 60637), **Argumenter og forhandlinger. Om strategisk bruk av kommunikativ atferd** (Arguing and Bargaining. On Strategic Use of Communication Behavior), *Tidsskrift for samfunnsforskning,* 1992, 33, 2, 115-132. (NOR)

¶ Drawing on Thomas C. Schelling's ideas on strategic & communicative behavior (*The Strategy of Conflict,* Cambridge, Mass: Harvard U Press, 1960), empirical illustrations from collective wage bargaining, processes of "local justice," & debates in constituent assemblies, a theory for the strategic use of communicative behavior is proposed. In this theory, strategic moves, eg, the use of disinterested or impartial arguments & the use of warnings, are favored over the self-interested use of arguments & the use of threats. Different motivations of participants in collective decision making need to be considered: interest, passion, & reason. The degree of publicity of debates & subsequent voting may also be manipulated. The theory calls for discussing proposals in a two-step procedure, first in closed session & then in plenum, followed by a public vote. 19 References. Adapted from the source document. Golich, Vicki L. (Dept Political Science Pennsylvania State U, University Park 16802), **A Multilateral Negotiations Challenge: International Management of the Communications Commons,** *The Journal of Applied Behavioral Science,* 1991, 27, 2, June, 228-250.

¶ As the twenty-first century approaches, the community of nations faces many new global commons issues, eg, information access & availability, & common property resources. Described here is an approach to addressing this challenge that stems from current efforts to create an international legal regime for the global communications commons. The context for international collaboration involving a communications commons regime is described, by identifying: the stakeholders; the characteristerics of a global commons & a communications commons; the prevailing political, economic, & legal principles that influence behavior in both the international system & the communications commons; & typical barriers to collaboration. The evolving governance structure of the global communications commons is analyzed, & suggestions are offered for creating effective legal regimes to manage similar challenges in international relations. 1 Table, 1 Appendix, 73 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Lewicki, Roy J., Weiss, Stephen E. & Lewin, David (Coll Business Ohio State U, Columbus 43210), **Models of Conflict, Negotiation and Third Party Intervention: A Review and Synthesis,** *Journal of Organizational Behavior,* 1992, 13, 3, May, 209-252.

¶ A comprehensive review of 44 major models of organizational conflict, loosely clustered into three groups, is presented: conflict & its management, negotiation & bargaining, & third-party conflict intervention (mediation, arbitration, & other forms). Within each grouping: (1) the dominant paradigm in the field is identified; (2) additional models are described, categorized by their major thrust as either descriptive or normative in nature; (3) key assumptions that appear to have driven model development are specified; & (4) implications for future model development & research direction are discussed. It is concluded that: some paradigms have dominated each field, but the rationale for their dominance is not clear; model creation has received far more attention than model testing; models have been either descriptive or normative, but seldom have served both objectives; & the assumptions underlying many of these models deserve closer scrutiny & more active challenges. Implications are drawn for the future of model development & testing in the organizational conflict field. 4 Tables, 235 References. AA (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

McKersie, Robert & Walton, Richard E. (Sloan School Management Massachusetts Instit Technology, Cambridge 02139), **A Retrospective on the *Behavioral Theory of Labor Negotiations***, *Journal of Organizational Behavior*, 1992, 13, 3, May, 277-285.

Comments, 289-301.

¶ A review essay on a book by Robert B. McKersie & Richard E. Walton, *Behavioral Theory of Labor Negotiations* (New York: McGraw-Hill, 1965 [see listings in IRPS No. 67]). Walton's & McKersie's analysis of collective bargaining is now relevant as a broader theory of social conflict, applicable to any negotiation between social entities. A framework for an accurate & relevant understanding of the complexity of negotiations, the book has been well-received by different disciplines, including economics, game theory, & management, which have contributed greatly to the negotiation field. Although distributive & integrative bargaining were well-developed, attitudinal structuring & intraorganizational bargaining processes have remained important. In **Walton and McKersie's *Behavioral Theory of Labor Negotiations*: An Industrial Relations Perspective**, Thomas Kochan (Massachusetts Instit of Technology, Cambridge) notes the book's place in the field's academic development, its role in introducing conceptual breakthroughs, & the implementation phase of the theory. The book's strength lies in making connections between social science research in negotiation & case studies. The book gained legitimacy through cognitive conceptualizations of elements of industrial relations & collective bargaining research. Dean G. Pruitt (State U of NY, Buffalo) in **Social Psychological Perspectives on the Behavioral Model** suggests that the book drew attention to negotiator tactics, & the different bargaining tactics used in distributive & integrative decision-making processes. Its elaboration of win-win, mutually beneficial outcomes, & the concept of intraorganizational bargaining, are also relevant to social psychologists. 75 References. J. Sadler (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Shirom, Arie, Peterson, Richard B. & Tracy, Lane N. (Dept Labour Studies Tel-Aviv U, Ramat-Aviv IL-69978 Israel), **Problem Solving in Labour Negotiations: A Comparative Study of the United States, Israel and New Zealand**, *The International Journal of Human Resource Management*, 1992, 3, 1, May, 59-69.

¶ A theoretical model of the collective bargaining process (see Peterson, Richard B., & Tracy, Lane N., "A Behavioural Model of Problem-Solving in Labour Negotiations," *British Journal of Industrial Relations*, 1976, 14, 159-173) that hypothesizes bivariate relationships between certain bargaining behaviors & successful problem solving was tested by Peterson & Tracy through questionnaire data from 65 chief negotiators in the US (see SA 25:5/77I8932). Here, the model is tested for cross-country commonality by including bargaining samples from Israel & New Zealand (N = 35 & 41 chief negotiators, respectively). It was found that the correlations of a subset of the bargaining behaviors included in the model with the criterion were not significantly different for the 3 countries. This finding lends support to the cross-country generality of the original model. Contrary to the hypothesis, the model did not explain a larger share of the variance of successful problem solving in the US relative to Israel. 2 Tables, 26 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9118

Smooha, Sammy & Hanf, Theodor (Dept Sociology U Haifa, Mount Carmel IL-31905 Israel), **The Diverse Modes of Conflict-Regulation in Deeply Divided Societies**, *International Journal of Comparative Sociology*, 1992, 33, 1-2, Jan-Apr, 26-47.

¶ Four conflict-management strategies used to address deep ethnic conflicts in the West Bank & Gaza Strip, Israel proper, Lebanon, & South Africa are discussed: partition, which applies exclusively to societies in which groups are geographically separated & their nationalisms are incompatible; ethnic democracy, a kind of democracy in which the dominance of one ethnic group is institutionalized; consociational democracy, of which the underlying assumption is that deep ethnic divisions cannot be eliminated &, therefore, should be taken as givens; & liberal democracy, in which the rights of the individual take precedence over ethnic affiliations. It is concluded that historically divided societies differ in terms of which conflict-management strategy should be applied, & that the strategy chosen will depend on the society's history & specific patterns of intercommunal relations. 16 References. McMurtry, John (U Guelph, Ontario N1G 2W1), **The Crisis of Marxism: Is There a Marxian Explanation?**, *Praxis International*, 1992, 12, 3, Oct, 302-321.

It is contended that claims that "Marxism is dead" with the collapse of East European regimes fail to make two distinctions: (1) Karl Marx's historical materialist method of sociohistorical analysis & the inferred communist project belong to different orders of analysis; & (2) the principles from the inferred communist project did not apply to the East European regimes. Also discussed is the fact that unlimited economic growth in these societies is impossible due to degradation of the environment. It is argued that an eco-Marxism is needed to deal with such concerns, since a self-interest market-oriented system merely focuses on managing overall material reproduction. 16 References. G. Castañeda (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9120

Szczupaczynski, Jerzy (Warsaw U, PL-00-325 Poland), **Polish Marxism at a Crossroads**, *Rethinking Marxism*, 1991, 4, 4, winter, 127-136.

¶ A rethinking of the history of state socialism is offered via an analysis of the development of Polish Marxism over the last forty years & a discussion of the challenges that face a revitalized Polish Marxism today. Topics discussed include: the political environment that shaped Polish Marxism following WWII, programs for developing Polish Marxism, & the Solidarity movement of the early 1980s. A look at Polish Marxism after the fall of the Communist party during the late 1980s demonstrates a need for more dynamic thinking on the part of leftists, as well a need to rethink privatization & the government-sponsored economic stabilization program. W. Howard (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9121

Weisskopf, Thomas E. (U Michigan, Ann Arbor 48109), **Marxian Crisis Theory and the Contradictions of Late Twentieth-Century Capitalism**, *Rethinking Marxism*, 1991, 4, 4, winter, 70-93.

¶ It is argued that Marxian crisis theories do not account for the kinds of crises faced by the global market capitalism of the late twentieth century. That Marxian theories have adequately accounted for the periodic economic downturns that characterized Western societies until the mid-1980s does not excuse such theories for ignoring macroeconomic indicators that do not portend the kinds of economic crises normally predicted by Marxism. Here, the irrelevance of Marxist crisis theory to the current world situation is established, & it is maintained that the current crisis of capitalism is best conceived in terms of the destruction of natural & social environments, & in terms of sectors of national economies rather than macroeconomic indices. The writings of Karl Polanyi & David Ricardo are drawn on in analyzing the crisis capitalism. 32 References. W. Howard (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9122

Holt, Ladd & Margonis, Frank (Educational Studies Dept U Utah, Salt Lake City 84112), **Critical Theory of a Conservative Stamp**, UM *Educational Theory*, 1992, 42, 2, spring, 231-250.

¶ Robert Young's *A Critical Theory of Education: Habermas and Our Children's Culture* (New York Teachers Coll Press, 1990) applies Jurgen Habermas's theory to the current education crisis, classroom interaction & pedagogy, school administration, & research methods. Young's conservative approach is challenged after first agreeing with him in three areas: student culture, student decision making, & research method. Three additional directions for critical theorists are suggested: a study of Habermas's theory of communicative action, a critique of his work that draws on critical theory research in education, & an attempt to understand educational practice from the perspective of some of Habermas's central concepts. L. Dorn (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9123

Michael, John, Review Essay: Vanguard and Critique, UM *Telos*, 1990, 83, spring, 189-204.

¶ A review essay on a book by Russell A. Berman, *Modern Culture and Critical Theory: Art, Politics, and the Legacy of the Frankfurt School* (Madison: U of Wisconsin Press, 1989 [see listing in IRPS No. 67]). This collection of essays contraposes critical theory to postmodernist modes of thinking. Using ideas developed by Max Horkheimer & Theodor W. Adorno, Berman seeks to counteract the influence of Michel Foucault & Jean-François Lyotard, & to critically assess popular culture & current politics. Berman's book engages a range of issues, including the grounds or groundlessness of critical judgment, the relation of critical subjectivity to normative institutions, the availability of autonomy, & the nature of the power/knowledge relationship. Berman is criticized for using an uncritical reading of critical theory to attack postmodern thought, & for misrepresenting the various critical traditions. W. Howard (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9124

***Telos* Staff** (431 East 12th St, New York NY 10009), **Does Critical Theory Have a Future? The Elizabethtown *Telos* Conference (February 23-25, 1990)**, UM *Telos*, 1989-1990, 82, winter, 111-130.

¶ Reported are the proceedings of a 1990 conference on the future of critical theory, held at Elizabethtown Coll in Pa. Topics included: the historical foundations of critical theory within the context of two main phases in the evolution of the Frankfurt school; the Karl Popper-Theodor W. Adorno debate & how it precipitated the linguistic turn in critical theory; the US caricature of Adorno; the relations between critical theory & politics in light of recent events in Western & Eastern Europe; & the extent to which critical theory is incompatible with current notions of democratic theory. It is concluded that valuable work in critical theory remains to be done in the domains of phenomenology, pragmatism, positivism, history of science, & epistemology. W. Howard (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Bischur, Daniel & Gabriel, Manfred, Milieu und Altstadt. Eine Fallstudie anhand des Salzburger Papagenoplatzes (Environment and the Old Quarter of the City. A Case Study of Papageno Square in Salzburg), *Österreichische Zeitschrift für Soziologie,* 1992, 17, 3, 78-81. (GER)
¶ Papageno Square is an interesting area in the Old Quarter of Salzburg, Austria, which underwent considerable redevelopment during the reconstruction after WWII. Currently it houses a wide spectrum of business activities characteristic of the service economy, eg, hairdressing & nail salons, medical offices, boutiques, & a travel agency. Attempting to identify the distinct microenvironment of the square in terms of space, culture, possibilities for utilization, & subjective perceptions of the people who live & work in the area, interview data (N not given) were obtained from residents, businesspeople, restaurant customers, city planners, & tourists. Implications for other studies of urban microenvironments are reviewed. M. Meeks

93Z9127
Christianson, Eric Howard & Arcury, Thomas A. (Dept History U Kentucky, Lexington 40506), **Regional Diversity in Environmental Attitudes, Knowledge, and Policy: The Kentucky River Authority,** UM *Human Organization,* 1992, 51, 2, summer, 99-108.
¶ Efforts by political leaders to find in the Kentucky River Authority (KRA) a solution to problems of the availability, quantity, & quality of the waters of the Kentucky River Drainage Basin (KRDB) for human use are described. Data collected via a telephone survey of 624 residents of 14 central & eastern KRDB counties are used to examine regional differences in environmental attitudes, environmental knowledge, & opinions about environmental policy. While differences were expected in environmental outlook between residents of the eastern Appalachian region & the central Bluegrass region of the KRDB, few differences, & much common ground in attitude, knowledge, & opinions about policy, were found. The implications of these commonalities for the development of environmental policy include the need by policymakers to go beyond stereotypes & assess the knowledge & opinions of the public. 6 Tables, 1 Figure, 54 References. Adapted from the source document.

93Z9128
Collins, John (Disaster Research Unit U Manitoba, Winnipeg R3T 2N2), **The Potential for Right to Know Legislation in Canada,** *International Journal of Mass Emergencies and Disasters,* 1992, 10, 2, Aug, 349-364.
¶ The desire of some Canadians to know more about the operation & subsequent pollution produced by industry has led to demands, most visibly by the Right to Know (RTK) campaign, for the provision of public information about the content of many hazardous substances. Here, the theoretical foundations of the RTK movement are examined, along with implementation processes undertaken in the US & Europe. The US model, which is linked to the emergence of environmental public action groups & a corresponding decrease in government regulation, is criticized as being overly dependent on litigation as a punitive measure against corporate polluters. In contrast, the European model fails to directly empower communities with specific information & is weak on implementation strategies. Differences between the organization of the Canadian & US public & private sectors that make US legislation inappropriate in Canada are discussed. 31 References. Adapted from the source document.

Harris, Craig K. & Vanderpool, Christopher K. (Dept Sociology Michigan State U, East Lansing 48824-1111), **Society and Fishery Resources,** *Society and Natural Resources,* 1992, 5, 2, Apr-June, 111-113.
¶ Introducing a special issue on fishery resources (for abstracts of related articles, see this section of SA 41:2), the tremendous growth in social science research in this area over the past two decades is highlighted. Anthropologists, sociologists, & economists have long focused on where fisherfolk live, how they define work & leisure, & how they structure organizations & traditions within their communities. However, social concerns about the "tragedy of the commons" & legal concerns about the UN Law of the Sea & the US Fishery Conservation & Management Act (1976) have rendered this area ripe for more thorough & expansive scholarly inquiry. Explored here are both basic socioeconomic structures & processes & the abstract management schemes developed with these basic elements in mind. 4 References. M. Maguire

Kemp, Alice Abel & Jenkins, Pamela (Dept Sociology U New Orleans, LA 70148), **Gender and Technological Hazards: Women at Risk in Hospital Settings,** *Industrial Crisis Quarterly,* 1992, 6, 2, 137-152.
¶ Four major areas in hospitals that pose technological & social hazards to health care workers are identified: physical hazards & accidents, chemical or toxicological hazards, infectious diseases, & social hazards–including stress & sexual harassment. The structural barriers that mitigate workers' perceptions of these risks & limit their ability to define their workplace as dangerous are discussed, focusing on the occupational hierarchy, including sex & race segregation, & the differential vulnerability related to it. A call is made to replace the narrow research focus on the biological & technological nature of workplace hazards, with a consideration of the worker as a central & necessary actor in achieving a safe environment. 1 Table, 74 References. Adapted from the source document.

Paden, Roger (George Mason U, Fairfax VA 22030-4444), **Nature and Morality,** *Environmental Ethics,* 1992, 14, 3, fall, 239-251.

¶ Two opposite philosophical approaches–biocentric & anthropocentric–to an environmental ethics classify natural entities differently: as distinct from the moral status of humans (anthropocentric) or as a natural part of the moral community that includes humans (biocentric). In the anthropocentric ethic, humans have a unique, terminal, moral status, while moral obligations to natural entities are only meaningful as far as nature is useful to humans. The radical biocentric ethic, in which natural entities are essentially anthropomorphized, unconvincingly & implausibly argues to extend moral principles ruling human interaction to nature, implying it has interests & purpose. An alternative to this radical view is suggested, arguing that nature transcends moral significance. This position requires a better understanding of natural entities & their interaction with moral experiences. Nature, as a necessary condition for the moral human community, should be the object of preservationist policies. Adapted from the source document. Plotke, David (Dept Political Science Yale U, New Haven CT 06520), **The Springs of Collective Action,** UM *Contemporary Sociology,* 1992, 21, 6, Nov, 771-773.

¶ A review essay on a book by John Walton, *Western Times and Water Wars: State, Culture, and Rebellion in California* (Berkeley: U of California Press, 1992 [see listing in IRPS No. 67]). Deemed provocative & rewarding, Walton's book is situated among other works on collective action & social movements in the US. Focusing on political action & social struggle in the Owens Valley, outside Los Angeles, Calif, from the mid-nineteenth century to the present, Walton's narrative is organized around the changing nature of state strucures & how these structures impinged on events in the Owens Valley. Rather than telling the story of provincial rebellion crushed by modern political-economic forces, Walton demonstrates how local forces organized themselves in order to sustain effective political resistance to metropolitan initiatives over time. Although Walton fails both to underscore the key points that he believes confirm his argument & to emphasize causality in the relationship between collective action & the state, his fascinating story deserves high praise. M. Maguire (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9137

Ruback, R. Barry & Pandey, Janak (Georgia State U, Atlanta 30303), **Very Hot and Really Crowded: Quasi-Experimental Investigations of Indian "Tempos",** UM *Environment and Behavior,* 1992, 24, 4, July, 527-554.

¶ The impact of temperature & crowding on attitudes & behavior was examined in 2 quasi-experimental studies in Uttar Pradesh. In study 1, 250 passengers in 3-wheeled autorickshaws were interviewed under 1 of 3 levels of crowding & at 1 of 3 temperature ranges; Feb-May 1991. Analyses revealed a main effect for crowding on most dependent measures, a main effect for temperature on a few measures, & interactions of these variables on measures of crowding & general affect. In study 2, 80 passengers riding under crowded or noncrowded conditions were told of the sensory/emotional effects of either crowding or heat, or they were not told anything. Results indicate that crowding produced negative effects & that telling people about the effects of heat gave participants the feeling of greater perceived control vs telling them about the effects of crowding. 2 Tables, 25 References. Ungar, Sheldon (Dept Social Science U Toronto, Scarborough Ontario M1C 1A4), **The Rise and (Relative) Decline of Global Warming as a Social Problem,** UM *The Sociological Quarterly,* 1992, 33, 4, winter, 483-501.

¶ Recent work on the public arenas approach to social problems is extended in an examination of changes in audience receptiveness to claims-making activities. Content analysis of articles, books, & TV news on global warming appearing since 1987 in both the US & Canada indicate that scientists' claims about global warming failed to attract much public attention until the extraordinary heat & drought of the summer of 1988 created a social scare. It is thus suggested that environmental claims are most likely to be honored–& accelerate demands in the political arena–when they piggyback on dramatic real-world events. The dynamics of this social problem over time reveal that both demand attenuation & issue redirection processes have diminished global warming's standing as a "celebrity" social problem. Social scares hold potential importance for prospective social problems that revolve around new technologies. 72 References. Adapted from the source document. Vandermeer, John (U Michigan, Ann Arbor 48109), **Environmental Problems Arising from National Revolutions in the Third World: The**

Case of Nicaragua, *Social Text,* 1991, 28, 39-45.

¶ It is contended that Nicaragua's environmental problems are a consequence of imperialism. The historical legacy of underdevelopment & exploitation not only directly caused a range of environmental problems, but also left political, economic, & social structures that make solving those problems difficult. The environmental situation in Nicaragua is further complicated by the contradiction between that country's need for immediate economic development & the need to preserve the environment for the future; however, Nicaragua's environmental programs compare favorably to those in nearby countries for the entire period of the Sandinista regime. It is concluded that conservation & environmentalism in the developed world are greatly influenced by class interests. W. Howard

Walton, John (U California, Davis 95616), **Thirst for Power,** UM *Contemporary Sociology,* 1992, 21, 6, Nov, 769-770.

¶ A review essay on a book by Norris Hundley, Jr., *The Great Thirst: Californians and Water, 1770s-1990s* (U of California Press, 1992 [see listing in IRPS No. 67]). Hundley's compelling synthesis of the wealth of material written about Calif water use from the Spanish colonial period to the present will appeal both to students of public policy & to professionals in the field. Four general themes are developed: the physical infrastructure reflects human values, government plays a key role in water policy, public policy is closely allied with private interests, & the political climate serves to mediate between private interests & public policies. Hundley draws on these themes to explain, eg, why water policies shifted at the end of the nineteenth century. His historical analysis, moreover, is accompanied by a revealing set of policy recommendations. It is suggested that new thinking about this subject should begin on the foundation Hundley has defined. M. Maguire

Wolf, Rainer (Philosophenweg 6, D-2900 Oldenburg Federal Republic Germany), **Sozialer Wandel und Umweltschutz Ein Typologisierungsversuch** (Social Change and Environmental Protection), *Soziale Welt,* 1992, 43, 3, 351-376. (GER)

¶ Germany, like other nations, faces numerous, constantly changing environmental problems, brought on by the mode of production. The political & legal aspects of environmental regulation will change accordingly. Various types of problems are cited, related to: the old industrial society, sanitation, modernization, accidents characteristic of a risk-oriented society, high-risk products, postindustrial social mobility, catastrophes in slow motion, & the dangers of global risks. Economic change leads to new political & legal issues within an ecological context. Traditionally, Germany preferred regulation as the means to ensure environmental quality; now, however, informal & corporative strategies are emerging. On one hand, the government does nothing to dampen mass consumption; on the other, there is a call from some political quarters for the development of an ecological welfare state. 2 Tables, 82 References. M. Meeks

Yang, Byoung-E. & Brown, Terry J. (Graduate School Environmental Studies Seoul National U, Kwanak-gu 151 Republic Korea), **A Cross-Cultural Comparison of Preferences for Landscape Styles and Landscape Elements,** UM *Environment and Behavior,* 1992, 24, 4, July, 471-507.

¶ Data obtained using a photo-questionnaire administered to 3 samples (total N = 660)–citizens, Korean college students, & Western tourists–in Seoul, South Korea, are used to explore the direct relationship between landscape style & preference, as well as to compare preferences between Western & non-Western groups. The characteristics of preferences for 3 landscape styles–Korean, Japanese, & Western–& 3 landscape elements–water, vegetation, & rock–are analyzed. Results indicate that regardless of cultural differences, both Japanese landscape style & the landscape element water were most preferred by Koreans & Western tourists. For the Koreans, Western landscape style was more preferred than their own landscape style, & Korean landscape style was more preferred by Western tourists. It is concluded that both landscape style & landscape elements influence landscape preference, regardless of cultural differences, & there are both differences & similarities in preferences between Korean & Western groups. 4 Tables, 6 Figures, 45 References. Yearley, Steven (Dept Sociology U Ulster Jordanstown, BT37 0QB Northern Ireland), **Skills, Deals and Impartiality: The Sale of Environmental Consultancy Skills and Public Perceptions of Scientific Neutrality,** *Social Studies of Science,* 1992, 22, 3, Aug, 435-453.

¶ In an effort to attract funding, nature conservation & environmental groups often sell their skills in the form of consultancy services to firms, developers, & local authorities. In an examination of the impartiality of this strategy, scientists in environmental organizations in the UK were observed & interviewed during a 2-year period. Also, material from a recent public inquiry is examined, with attention to how the issue of neutrality is treated by authorities, the customers to whom they sell services, & legal authorities. It is concluded that when environmental groups attempt to market scientific skills in situations of dispute or in adversarial contexts, weaknesses appear in the demonstrable impartiality of their scientific testimony. Ali, Lynne (Australian Overseas Disaster Response Organisation, Level 1 491 Elizabeth St Surry Hills New South Wales 2010), **Symbolic Planning and Disaster Preparedness in Developing Countries: The Presbyterian Church in Vanuatu,** *International Journal of Mass Emergencies and Disasters,* 1992, 10, 2, Aug, 293-314.

¶ A discussion of the development of disaster plans among the South West Pacific Island countries, based on a case study of the Presbyterian church of Vanuatu's Disaster Guideline, which was written without direct external input. An examination of the history of Vanuatu & the Presbyterian church of Vanuatu points to the cultural significance of symbols. It is argued that rather than promoting self-reliance, disaster planning has fostered a dependency relationship between donors & recipients in the Pacific Islands. The tendency to impose First World disaster planning strategies without significant regard for indigenous cultures has led to counterdisaster products, eg, disaster plans, being regarded more

as symbols than as practical tools. It is argued that in order for disaster planning to become more than just symbolic, donors & their disaster managers must be prepared to adapt their programs to local conditions, involve the indigenous people in all steps of disaster planning, & commit themselves to long-term programs. 49 References. Aronoff, Marilyn & Gunter, Valerie (Dept Sociology Michigan State U, East Lansing 44824), **Defining Disaster: Local Constructions for Recovery in the Aftermath of Chemical Contamination,** UM *Social Problems*, 1992, 39, 4, Nov, 345-365.

¶ Local social constructions of agency are explored in an ethnographic content analysis of 200 stories published in the *Gratiot County Herald* (Mich) weekly newspaper 1973-1982 related to a toxic crisis in which local problems were linked to statewide chemical contamination of the human food chain. These data were supplemented by interviews (N not specified) with local residents & local & state officials. In contrast to widely reported community disempowerment following technological disasters, the newspaper accounts of local activity in Gratiot County reflect a resilient response in which area interests worked to resolve contamination problems without destroying the social fabric of local life. County leaders defined local capacity in activities that defended local interests, displayed efficacy in dealings with outsiders, & shaped a unified countywide response to the crisis. A constructivist analysis clarifies local officials' assessments of the benefits of working within the system for redress. This response is interpreted within the critical framework of structuration theory in order to examine the costs of this strategy in replicating the county's vulnerable position in the larger political-economic framework. 3 Tables, 66 References. Bjärås, Gunilla (Dept Social Medicine Karolinska Instit, S-17283 Sundbyberg Sweden), **Can a Community Development Model Be Used for Health Programmes in an Industrialized Country?,** *The International Journal of Health Planning and Management*, 1991, 6, 3, July-Sept, 209-219.

¶ In this case study on introducing accident prevention programs into the community, the long-term maintenance of a 1984-1989 community-level intervention program for accident prevention in the muncipality of Sollentuna, Stockholm County, Sweden, is evaluated. The five stages in establishing the Sollentuna program are described: community diagnosis, initiation, implementation, maintenance, & reassessment. In the implementation stage, several obstacles arose that limited community development, eg, mobility, estrangement, & disinterest in local activities among community residents. At the maintenance stage, no one at the community level accepted the serious responsibility for the program once the government planner left, & no internal maintenance ensued. This experience & others in Sweden show that applying the community development model for accident prevention to municipal areas is too optimistic; professional & academic involvement are necessary. 4 Figures, 27 References. Blocker, T. Jean & Sherkat, Darren E. (Dept Sociology U Tulsa, OK 74104), **In the Eyes of the Beholder: Technological and Naturalistic Interpretations of a Disaster,** *Industrial Crisis Quarterly*, 1992, 6, 2, 153-166.

¶ In the literature on calamities, it is frequently assumed that blame assignation occurs in technological but not natural disaster sitautions. Here, analysis of responses to a major urban flood reported in a survey of a 19% random sample of flood victims (N = 28) reveals that 65% assigned responsibility for the disaster to human agents & technological failures. Those who attributed economic & psychological losses to human agency believed that natural disasters are controllable & that it is the government's responsibility to control nature through the use of technology & regulation. It is concluded that if natural disasters are increasingly being interpreted in technological terms, collective responses are likely to call for technological means to assess & minimize risks. 2 Tables, 32 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9155

Britton, Neil R. (Disaster Research Unit U Manitoba, Winnipeg R3T 2N2), **Uncommon Hazards and Orthodox Emergency Management: Toward a Reconciliation,** *International Journal of Mass Emergencies and Disasters*, 1992, 10, 2, Aug, 329-348.

¶ Effective emergency management requires a close fit between state of risk & state of hazard management. Recognizing that the major burden for developed societies has shifted from risks associated with natural processes to those arising from technological development & application, disaster-relevant organizational networks have adopted a Comprehensive Emergency Management (CEM) all-hazards approach. However, technological hazards present major problems that pose different & more difficult predicaments than do natural hazards. While CEM is a good strategy in principle, the practices needed to protect society from a diversity of disaster-producing agents are more difficult to achieve because of misperceptions about common features of hazard types & differential progress between social components. Cultural lag can explain why predicaments like these occur, & the concept of disaster subculture may provide a solution. 42 References. De Waal, Alex & Duffield, Mark, Can Africa Conquer Famine? The Political Sources of Disaster, IM *Dissent*, 1992, 39, 3(168), summer, 390-396.

¶ African famines are generally thought to result from either drought or war. In fact, drought alone does not completely account for famine, because rural peoples have developed strategies to deal with inadequate rainfall; but combined with governmental policies of land expropriation & restricted movement, droughts have played a significant role in Africa's famines. Civil war has become an important cause of recent African famines, because when UN-recognized governments wage counterinsurgency compaigns against rural rebels, they destabilize fragile rural economies. The possibility of yet another kind of famine-capitalist-inspired-is also suggested. M. Maguire

93Z9159

Donald, Ian & Canter, David (Dept Psychology U Surrey, Guildford GU2 5XH England), Intentionality and Fatality during the King's Cross Underground Fire, IM *European Journal of Social Psychology*, 1992, 22, 3, May-June, 203-218.

¶ A retrospective analysis of the behaviors of people who died in the King's Cross underground station fire in London, England (Nov 1987), which claimed 31 lives, was undertaken to further the understanding of people's behavior under threat, right until the moment of death. Previous research on human behavior in fires reveals that behavior can best be understood & predicted by reference to the place of occurrence, the role a person occupies in that place, the goal- & place-related activities in which the person is engaged prior to the emergency, & the way in which a place is used under normal circumstances. Data comprised of statements made by the victims' friends & relatives & by witnesses to the fire indicate no evidence that people behaved in an internally irrational or uncontrolled manner. Furthermore, there is no evidence of panic in the form of destructive or nonadaptive disorganized behavior. The findings suggest, in general, that people involved in disasters continue a sequence of actions (following scripts) even if the actions are not necessarily the most appropriate. The actions of King's Cross victims lend strong support to the power of personal rule systems in shaping behavior. 1 Figure, 25 References. S. Millett

Gephart, Robert P., Jr. (Faculty Business U Alberta, Edmonton T6G 2R6), Sensemaking, Communicative Distortion and the Logic of Public Inquiry Legitimation, *Industrial Crisis Quarterly*, 1992, 6, 2, 115-135.

¶ In an exploration of the public inquiry (PI) as a ceremonial legitimator of state responses to technological disaster, discussed are: (1) the implications of welfare state theory for understanding the PI; (2) the communicative validity claims & counterclaims made by PI participants; (3) how sensemaking practices are used to interpret & transform these claims into institutionally sensible accounts; & (4) how the PI legitimates state & corporate responses to technological disaster. These issues are illuminated in a case study of a PI into a fatal pipeline accident. Analysis of key segments of testimony demonstrates that the PI transformed local logics of safety used by members into the top-down logics of safety regulators. This distortion preserved the viability of disaster control through state regulation & thereby legitimated state actions & control procedures. Practical implications of these findings are discussed. 28 References. Adapted from the source document.

Gilroy, John Martin (Trinity Coll, Hartford CT 06106), Public Policy and Environmental Risk: Political Theory, Human Agency, and the Imprisoned Rider, *Environmental Ethics*, 1992, 14, 3, fall, 217-237.

¶ In a game theory analysis incorporating a normative theory of the individual, it is suggested that public policy decisions concerning environmental risk are made without adequately responding to fundamental strategic & ethical issues. The principle guiding most policy making-economic rationality-assesses the risk (all risks are equal, but asymmetric), then estimates the benefits & costs in terms of economic preferences & outcomes, in imitation of the allocations of a competitive market. The empowered human agent takes second place to the supposed rational & aggregated preference of the person as an element in the welfare system. This exploitative practice transforms the unknowing individual into an imprisoned rider, deprived of the unconditional right to self-agency. Strategic & moral dimensions essential to policy formulation are reflected in prioritizing first the human agency of the individual & then the person's utility value. 1 Figure. Adapted from the source document.

Halseth, Greg & Rosenberg, Mark W. (Dept Geography Queen's U, Kingston Ontario K7L 3N6), Locating Emergency Medical Services in Small Town and Rural Settings, *Socio-Economic Planning Sciences*, 1991, 25, 4, 295-304.

¶ Due to limited budgets & lack of planning infrastructures, emergency medical services planners in small towns & rural areas lack comprehensive data & sophisticated technology & are faced with three issues typically not encountered in more urban settings: (1) high response times & lack of choice in responding units; (2) problems of coverage & mix of services; & (3) time-distance & location-allocation problems. It is suggested that limited resource planning methodologies-ie, time-distance comparisons, location-allocation modeling, & demand node analyses-can lead to more effective service delivery. Examples from the Kingston Regional Ambulance Service in Ontario are presented. 4 Tables, 5 Figures, 16 References. D. Generoli

Hamid, Gamal Mahmoud (Urban Planning Program U California, Los Angeles 90024), Livelihood Patterns of Displaced Households in Greater Khartoum, *Disasters*, 1992, 16, 3, Sept, 230-239.

¶ Data obtained in 1990 via a pilot survey of 50 impoverished households & a handful of community leaders & relief workers in Greater Khartoum, Sudan, reveal that household members who have been displaced from their homelands by famine & civil war gain a livelihood by utilizing a wide variety of subsistence activities & sources. These include moonlighting, income diversification & pooling, exchange relations, scavenging, relief supplies from aid agencies, & remittances from relatives working in other areas. Results challenge the popular view of the displaced as dependent & parasitic on the wider urban community. Several public policies are identified that have a detrimental effect on the livelihood of the displaced. 1 Figure, 16 References. Adapted from the source document.

Hirose, Hirotada (Dept Psychology Tokyo Woman's Christian U, Suginami-ku 167 Japan), Defining Disaster Relief: Disaster Victims and Disaster Relief Administration in the Case of Mt. Unzen's Eruption, *International Journal of Mass Emergencies and Disasters*, 1992, 10, 2, Aug, 281-292.

¶ Disaster relief administration & the status of the disaster victims of the Mt. Unzen eruption in Japan, Nov 1990 to June 1991, are examined through questionnaires completed by evacuees in Aug 1991 & Feb 1992 (N = 166 & 244, respectively). Evacuees tended to rate national government disaster relief efforts as unsatisfactory or very unsatisfactory & gave somewhat more favorable ratings to local government efforts. Temporary access & lifting of restrictions to evacuated areas by evacuees were favored. Material assistance was deemed important, but even more significant was the adoption of farsighted policies to help evacuees adapt to their new disaster-caused situation. 7 Tables, 1 Figure, 5 References. Adapted from the source document.

93Z9166

Jingshen, Lu, Gangjian, Du & Gang, Song (Instit Public Administration People's U China, Beijing), The Experience, Lesson and Reform of China's Disaster Management, *International Journal of Mass Emergencies and Disasters*, 1992, 10, 2, Aug, 315-327.

¶ Forced to cope with natural disasters ranging from floods to droughts to technological hazards at a cost exceeding $1 billion the past forty years. The People's Republic of China has developed a general frame-

work of disaster management that attempts to coordinate social-economic development & disaster prevention & reduction. To that end China has developed: (1) mass disaster education & training for government officials; (2) resource utilization emphasizing environmental-protection & disaster minimization; (3) programs & strategies for disaster deterrence; & (4) comprehensive emergency relief plans. Even so, China's expenditures on disaster prevention & management are far less than spent by developed countries. 11 References. Adapted from the source document.

Kraus, Nancy, Malmfors, Torbjörn & Slovic, Paul (Decision Research, 1201 Oak St Eugene OR 97401), **Intuitive Toxicology: Expert and Lay Judgments of Chemical Risks,** *Risk Analysis*, 1992, 12, 2, June, 215-232.

¶ Drawing on questionnaire data collected from 170 toxicology experts & from 262 households in an Ore metropolitan area, the cognitive models, assumptions, & inference methods that comprise laypeople's intuitive toxicological theories, vs those of scientific toxicology & risk assessment, are compared. The findings reveal significant differences between toxicologists & laypeople, as well as between toxicologists working in industry, academia, & government. Toxicologists are sharply divided in their opinions about the ability to predict a chemical's effect on human health on the basis of animal studies. Results illuminate the problems of risk communication & identify misconceptions that experts should clarify for the public. They also suggest that controversies over chemical risks may be fueled as much by limitations of the science of risk assessment & disagreements among experts as by public misconceptions. 10 Tables, 38 References. Mitchell, James K. (Dept Geography Rutgers U, New Brunswick NJ 08903), **Half a Century of Natural Disasters in the Pacific Basin: Historical Perspectives on the Future,** *International Journal of Mass Emergencies and Disasters*, 1992, 10, 2, Aug, 269-279.

¶ The natural riskiness of the Pacific Basin, recent changes in patterns of disasters, & trends in society & environment that may affect the potential for future disasters are discussed through examination of disasters that occured 1946-1991. The frequency of disasters varied widely during the period, with fewer disasters occurring in the 1960s & the most occurring in the late 1940s; deaths were heaviest in the 1970s. Earthquakes, tropical cyclones, & floods were the most frequent types of disasters. Loss of life appears to be declining in recent decades throughout much of the region, except in Latin America & Southeast Asia, where it appears to be increasing. Environmental & social changes in the Basin, eg, the development of hazardous technologies & facilities, are likely to produce new types of disaster potential that may modify historical patterns of disaster. 1 Table, 19 References. Otway, Harry & von Winterfeldt, Detlof (Health & Safety Division Los Alamos National Laboratory, NM 87544), **Expert Judgment in Risk Analysis and Management: Process, Context, and Pitfalls,** *Risk Analysis*, 1992, 12, 1, Mar, 83-93.

¶ Hazardous industrial activities must be carefully regulated & managed, a process that requires formal expert judgment & wisdom in areas of science & technology where traditional "good science" is, in practice, unable to supply unambiguous "facts." Expert judgment has always played a significant role in analysis; however, recent trends are to make it formal, explicit, & documented so it can be identified & reviewed by others. Four categories of expert judgment are proposed, & three case studies are presented that illustrate pitfalls commonly encountered in its use. It is concluded that there will be an expanding policy role for formal expert judgment, & that the openness, transparency, & documentation that it requires have implications for enhanced public involvement in scientific & technical affairs. 1 Table, 4 Figures, 21 References. Adapted from the source document.

Rogers, George O. (Hazard Reduction & Recovery Center Texas A&M U, College Station 77843), **Aspects of Risk Communication in Two Cultures,** *International Journal of Mass Emergencies and Disasters*, 1992, 10, 3, Nov, 437-464.

¶ A study of risk communication across cultures traces the impact of the US government's decision to build a high-temperature incinerator on Johnston Atoll (in the Pacific Ocean) to dispose of chemical weapons stockpiles in the US & Germany. The communication about risk between the US Army & the native Polynesian cultures in the Pacific is examined, & record of the proceedings written to comply with the National Environmental Policy Act of 1969 that led to the shipment of the European stockpile of unitary chemical weapons to Johnston Atoll in 1990 is analyzed. It is demonstrated that: the US army & the native cultures failed to adequately communicate about the risks associated with the movement of destructive weapons, the parties failed even to establish risk communication dialogue, & that they never established a common framework for effective risk communication. All of these factors contributed to increased distrust & undermined the credibility of all parties. 4 Tables, 3 Figures, 26 References. Adapted from the source document.

Saylor, Conway F., Swenson, Cynthia Cupit & Powell, Paige (Dept Psychology The Citadel, Charleston SC 29409), **Hurricane Hugo Blows Down the Broccoli: Preschoolers' Post-Disaster Play and Adjustment,** *Child Psychiatry & Human Development*, 1992, 22, 3, spring, 139-149.

¶ Questionnaire data collected from parents 6 weeks after Hurricane Hugo struck SC in Sept 1989 (as well as follow-up questionnaires 1 year later) are used to examine parents' observations of their 278 preschoolers' play & verbalizations in the year following the hurricane. Commonly reported activities included reenactment & discussion of the event in multiple mediums, personification of "Hugo," & expression of fears related to storms. Precocious concern for others, insight, & vocabulary were also noted. In these intact, relatively high functioning families, parents seemed able to facilitate their youngsters' adjustment without outside intervention. 12 References. Adapted from the source document.

Vaught, Charles & Wiehagen, William J., Escape from a Mine Fire: Emergent Perspective and Work Group Behavior, *The Journal of Applied Behavioral Science*, 1991, 27, 4, Dec, 452-474.

¶ To analyze miner responses to a 1988 coal mine fire from a symbolic interaction perspective, qualitative interviews were conducted with 21 miners caught in the blaze. Data show that workplace culture (eg, the buddy system) conditioned participant responses to the emergency & facilitated efficient & effective escape. The orientation shift away from routine work behavior into the short-term perspective associated with an emergency is problematic. Theoretical implications for organizational behavior & practical implications for mine safety are discussed. 3 Figures, 60 References. Adapted from the source document. Wang, Juju C. S. (Graduate Instit Sociology & Anthropology National Tsing Hua U, 30043 Taiwan), **Cultural Gap and Public Involvement: The Case of Lan-Yu Radwaste Storage Site, Taiwan,** *International Journal of Mass Emergencies and Disasters*, 1992, 10, 3, Nov, 465-476.

¶ Establishment of the Lan-Yu Radwaste Storage Site (LYRSS) in Lan-Yu, Taiwan, has become a much debated issue due to the conflict between traditional culture & modern civilization. Because the LYRSS was established through an inflexible & top-down decision-making process that evinced little consideration for indigenous cultural values or rituals, it has brought about social entropy in Lan-Yu; ie, rather than public acceptance, the Yami, who reside on Lan-Yu, have developed cultural resistance in the form of a social movement. Four issues are addressed: public involvement as it relates to limiting & promoting factors associated with Yami culture; the cultural gap between the etic & emic perspectives; the underlying determinants of the anti-LYRSS movement; & aspects of public involvement in Lan-Yu. 2 Figures, 17 References. Crush, Jonathan (Dept Geography Queen's U, Kingston K7L 3N6), **The Discourse of Progressive Human Geography,** *Progress in Human Geography*, 1991, 15, 4, Dec, 395-414.

¶ Because the poetics of geographical writing–textual formats, rhetorical devices, modes of persuasion–have largely escaped historical examination, an approach to progressive human geography that contextualizes & historicizes geographers' textual conventions without undermining their scholarship or findings is proposed. Recent work by geographers on South Africa serves as an example because the divided & oppressed social context renders the textual conventions most transparent. Similarities noted in the shared modes of persuasion include arguments constructed in dyadic terms, reliance on scholarly authority, & privileging of theory over empiricism. Also considered are the relation between the work & lives of several South African geographers & the narratives of landscape manifested in the discourse of struggle. 209 References. M. Maguire (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Isralowitz, Richard E. & Palgi, Michal (Hubert H. Humphrey Instit Social Ecology Ben-Gurion U Negev, IL-84105 Beersheva Israel), **Work Attitudes and Behaviors of Kibbutz Parents with Familial and Communal Child Sleeping Arrangements,** *Journal of Social Psychology*, 1992, 132, 1, Feb, 121-123.

¶ Scale data are used to compare work attitudes & work-related behaviors among 162 kibbutzim members where the children slept with the family & 225 members where the children slept in communal arrangements. ANOVAs showed no relationship between sleeping arrangement type & parental work attitudes. However, differences were found with respect to work behaviors: men & women with family sleeping arrangements reported more tardiness & absence at work & less ability to meet work responsibilities than did parents with communal sleeping arrangements. Even with these adverse effects on work, family sleeping arrangements are becoming more common in Israel because they are believed to strengthen family ties. 13 References. M. McDowell, Linda (Faculty Social Sciences Open U, Milton Keynes MK7 6AA Buckinghamshire England), **Multiple Voices: Speaking from Inside and Outside 'the Project',** *Antipode*, 1992, 24, 1, Jan, 56-72.

¶ The nature of contemporary geographical theory is addressed in response to Susan Christopherson's "On Being Outside 'the Project'" (*Antipode*, 1989, 21, 83-89) in which she suggested that feminist work & feminists still remain outside the geographical project. Here, links between critical feminist theory & postmodern theory are examined, especially the new ethnography that has influenced recent geographical writing. It is also argued that, despite their mutual interests in deconstruction & the decentering of the grand narratives of Western enlightenment thought, feminist & postmodern theory diverge in their political implications. Some feminists remain committed to a political project & to a notion of progressive social change. In this project, feminists may find alliances with the old radicals of geography more fruitful than with the new postmodernists. 46 References. Rüstemli, Ahmet (Dept Psychology Middle East Technical U, Ankara TR-06531 Turkey), **Crowding Effects of Density and Interpersonal Distance,** *Journal of Social Psychology*, 1992, 132, 1, Feb, 51-58.

¶ A report on two studies investigating the effects of spatial & social variables on perceived crowding among Turkish teenagers. In study 1, 60 male & 60 female Ss were presented with diagrams that simulated social situations in which (1) distance between the S & other persons, (2) number, or density, of Ss, (3) sex, & (4) friendship were systematically varied. Analysis of questionnaire responses indicates a significant crowding effect for interpersonal distance but not for density. In study 2, the responses of 120 Turkish college students showed that the lack of effect for density on crowding was stable. Friendship & sex of others had significant main & interaction effects. 1 Table, 11 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Aidoo, Ama Ata, The African Woman Today, UM *Dissent*, 1992, 39, 3(168), summer, 319-325.

¶ The plight of the modern African women is discussed. She is the daughter of a long & hearty line of female monarchs as well as of women intimately associated with the more recent struggles for African independence. Nonetheless, she is a victim of the International Monetary Fund's "structural adjustment program" & the perpetual drought, & she is baffled by the aquired immune deficiency syndrome epidemic, which appears to her to have neither cause nor cure. Her basic problems stem from three interrelated factors: indigenous African societal patterns, the conquest of her continent by Europe, & the apparent lack of direction among political, intellectual, professional, & commercial elites in her own society. The African women's continuing struggle for independence, the effects of high-powered tokenism, & the unsettled debate over feminism are assessed. 1 Photograph. M. Maguire

Craig, Gary (Social Policy Research Unit U York, Heslington YO1 5DD England), **Anti-Poverty Action and Research in the U.K.,** *Social Policy and Administration*, 1992, 26, 2, June, 129-143.

¶ Using (un)official definitions of poverty, the number of UK residents in poverty has been steadily rising in the last fifteen years, & poverty has become concentrated among the unemployed, the single-parent families, & the disabled, rather than in the elderly. Government manipulation of official data & claims that the poor have been increasing their living standards impacted three recent policy changes: the 1988 social security changes, the replacement of domestic rates by the poll tax, & new disability benefits. However, government claims have been challenged by nongovernment researchers, labor movements, poor advocacy organizations, national voluntary organizations, & churches. For these actors, an appropriate agenda for 1990s action & research on poverty should include development of independent research & data sources, international exchange on poverty campaigns, broader & more creative means of working on poverty, better communication of research findings to the public, & empowerment of poor organizations. 45 References. Galbraith, John Kenneth (Harvard U, Cambridge MA 02138), **The Functional Underclass,** *Proceedings of the American Philosophical Society*, 1992, 136, 3, Sept, 411-415.

¶ Reflections on the underclass emphasize its integral function in the larger economy, & draw a distinction between the enjoyable work of the favored classes & the often unpleasant work of the underclass. It is asserted that, in modern economic society, the underclass poor are needed to do the work that the more fortunate would find repulsive to do. As more citizens become educated in an effort to escape manual labor & monotonous jobs, the need for the resupply of people willing to work at less agreeable jobs will intensify. The division between the work of the fortunate & the underclass has the potential of igniting large-scale social discord, including eruptions of urban violence. Social policy should address the needs of the underclass through effective education, drug rehabilitation, welfare services, housing, & adequate law enforcement. W. Howard

93Z9186

Guttmann, David & Cohen, Ben-Zion (School Social Work U Haifa, Mount Carmel IL-31999 Israel), **Teaching about Poverty in Israeli Schools of Social Work,** *International Social Work*, 1992, 35, 1, Jan, 49-63.

¶ Based on 1990 survey data from 133 students in 5 undergraduate social work programs in Israel, & from 166 (control) students in unrelated programs, students' perceptions of & attitudes toward poverty are explored, focusing on how differences in gender, group membership, & life experiences shape such perceptions. Findings reveal a surprising lack of difference between social work & other students; nor do gender or socioeconomic status generate significant differences. It is concluded that social work education in Israel has failed to produce the distinctive set of attitudes & values with regard to the poor on which the profession has traditionally built its contribution to social progress. The apparent lack of a sense of urgency about the growing problem of poverty in Israel among social work students is attributed in large part to a socialistic welfare-state image of the society that has outlasted the reality. 4 Tables, 17 References. Klak, Thomas (Geography Dept Ohio State U, Columbus 43210), **Excluding the Poor from Low Income Housing Programs: The Roles of State Agencies and USAID in Jamaica,** *Antipode*, 1992, 24, 2, Apr, 87-112.

¶ The policies of state agencies & international development agencies in Jamaica are analyzed within the context of the country's continuing crisis of housing supply & affordability. Most of Jamaica's low-income & informal workforce are unable to obtain state housing assistance; instead, the poor are forced to house themselves by doubling up, renting, self-construction, & squatting. Thus, ironically, status as a low-income & informal worker is more an obstacle than an advantage to those seeking public housing, which ostensibly is distributed on the basis of need. As such, the objective of the analysis is to illuminate why the income-housing policy in Jamaica, which draws on the social & monetary resources of several large agencies, has failed to solve the crisis, which will only worsen as informal sector wages are driven yet lower by the "logic" of peripheral capitalism in the Caribbean & Latin America. 1 Table, 1 Figure, 81 References. M. Maguire

93Z9189

Lyons, Karen (Dept Sociology Polytechnic East London, Dagenham RM8 2AS England), **An NGO's Response to Poverty and Powerlessness on a British Housing Estate: Implications for Social Work Education,** *International Social Work*, 1992, 35, 2, Apr, 243-253.

¶ An exploration of the role of a small voluntary (nongovernmental) organization in promoting participation of service users, particularly women & children, living in a public housing development in a mixed residential & industrial area in southeastern England, based on observations, interviews (N not specified), & written information acquired 1987-1990. Following a description of the origins of the agency, its development into a program responding to a variety of needs at individual, family, group, & community levels is discussed. Results suggest that social work students need a sound introduction to the manifestations & causes of material poverty & to the lack of power experienced by individuals using social service agencies. Consideration of human rights should be extended to users' rights relative to the powers & resources of professionals & to welfare rights with regard to an understanding of the national income support system. Other recommendations for future social work education & training include a renewed emphasis on the concept of community in terms of social work theory & methods & on the importance of research & evaluation skills. 14 References. Williams, Brett (American U, Washington DC 20016), **Poverty among African Americans in the Urban United States,** *Human Organization,* 1992, 51, 2, summer, 164-174.
¶ Ways that anthropologists have described & explained poverty among urban African Americans are traced, identifying recommendations for eliminating poverty & considering their limited influence on public policy. The debate whether the single-parent family is pathological or adaptive is discussed, questioning why ethnographic research among the poor has subsided in recent years, to be replaced by journalistic accounts & quantitative studies, both yielding overwhelmingly pathological portraits of an alleged black underclass, which bolster conservative, punitive antipoverty programs. Applied anthropologists are urged to challenge insidious ideologies holding that heterosexual, patriarchal, nuclear families are the only ones possible, studies that homogenize & silence the black poor, & mythic histories holding that segregation constituted an urban golden age. Examples of current work are analyzed, & it is emphasized that anthropologists should take the issue of representation seriously, in order to produce more truly feminist, interdisciplinary work, & to enter more forcefully into policy debates & political action. 193 References. English, Abigail (National Center Youth Law, 114 Sansome St Ste 900 San Francisco CA 94104), **Runaway and Street Youth at Risk for HIV Infection: Legal and Ethical Issues in Access to Care,** *Journal of Adolescent Health,* 1991, 12, 7, Nov, 504-510.

¶ The physical, social, & psychological vulnerability of runaway & street youth place these youth at risk for human immunodeficiency virus (HIV) infection. Here, issues of access to health care & related services for this population are considered, with attention to legal & ethical concerns of consent & confidentiality. Appropriate pretest & posttest counseling & follow-up for youth at risk of infection are essential. Access to comprehensive treatment is currently limited by lack of adequate financing, despite a patchwork of numerous public funding sources providing some coverage for treatment of HIV & acquired immunodeficiency syndrome. Research studies & clinical trials are critical elements in the planning & delivery of HIV-related services to adolescents, but require consideration of special ethical & legal concerns. 44 References. Kruks, Gabe (Gay & Lesbian Community Center, 1213 North Highland Ave Los Angeles CA 90038), **Gay and Lesbian Homeless/Street Youth: Special Issues and Concerns,** *Journal of Adolescent Health,* 1991, 12, 7, Nov, 515-518.

¶ Analysis of intake & case data on homeless & runaway youth collected through a consortium of agencies, suggests that gay & bisexual male (M) youth appear to be at increased risk for both homelessness & suicide. Gay M street youth may have been forced out of their homes because of their sexual orientation, & are more likely to engage in survival sex (prostitution) than their nongay M counterparts. In one sample of 53 gay-identified street youths, 53% had attempted suicide, compared with 32% of a cohort of street youths that included both gay & nongay youths. Prejudice, discrimination, & homophobia are still rampant in society today; these factors contribute to a multiplicity of problems that face the young person who is gay. 2 Tables, 8 References. Lee, Barrett A., Lewis, David W. & Jones, Susan Hinze (Dept Sociology Pennsylvania State U, University Park 16802), **Are the Homeless to Blame? A Test of Two Theories,** UM *The Sociological Quarterly,* 1992, 33, 4, winter, 535-552.

¶ Hypotheses derived from dominant ideology & public arenas theories regarding the incidence & antecedents of public beliefs about the causes of homelessness are tested, drawing on data from a 1988 national telephone survey (N = 1,084 US adults). Results indicate that: (1) homelessness is more often attributed to structural than to individualistic factors; (2) personal statuses like gender, political orientation, & party affiliation significantly influence such causal beliefs; but (3) the single strongest determinant is the perceived presence of--& by implication, exposure to--homeless people in one's own community. Causal beliefs in turn affect policy attitudes: those who consider homelessness a structural problem are more likely to favor government action than are those believing in individualistic causes. In general, results provide somewhat greater support for the public arenas perspective. 3 Tables, 1 Figure, 65 References. Adapted from the source document. Lusk, Mark W. (Dept Sociology & Social Work Utah State U, Logan 84322), **Street Children of Rio de Janeiro,** *International Social Work,* 1992, 35, 3, July, 293-305.

¶ Interview data collected from 103 street children in Rio de Janeiro, Brazil, allows exploration of the urban factors that contribute to the displacement of the children. Most of the children maintained family contact, although high rates of child abuse, illegal activity, & drug abuse were found. Economic necessity was cited as the main reason for being on the street. Social policies that might solve the various needs of this group are also considered, from overly simplistic reliance on the correctional juvenile justice to a more comprehensive strategy that supplies a range of needed services (ie, income maintenance & public housing for families & rehabilitation & alternative schooling for children). 1 Table, 41 References. McCarthy, Bill & Hagan, John (Dept Sociology U Victoria, British Columbia V8W 3P5), **Surviving on the Street: The Experiences of Homeless Youth,** *Journal of Adolescent Research,* 1992, 7, 4, Oct, 412-430.

¶ Questionnaire data are drawn on to describe the living conditions of 390 adolescents who had left home & were living on the streets in Toronto, Ontario, in 1987. The majority of respondents (Rs) had spent a considerable amount of time without adequate shelter, food, or income; many were involved in illegal activities & had been incarcerated or suicidal. Multiple regression analyses revealed that the most consistent predictors of hunger, criminal activity, & incarceration were conditions of street life itself: the lack of secure shelter & the length of time on the street. Overall, the living conditions of these Rs closely parallel those of homeless adults, suggesting that it may be inappropriate to label the former runaways & to consistently separate adults & adolescents into distinct homeless populations. 4 Tables, 44 References. Morse, Gary A., Calsyn, Robert J. & Burger, Gary K. (c/o Calsyn--U Missouri, Saint Louis 63121), **A Comparison of Taxonomic Systems for Classifying Homeless Men,** *The International Journal of Social Psychiatry,* 1991, 37, 2, summer, 90-98.

¶ A comparison of the relative merits of two taxonomic systems for classifying homeless men: based on their past history of psychiatric disability, & based on their current psychiatric impairment. Tested with a sample of 165 men at a homeless shelter in St. Louis, Mo, both classification systems displayed significant discriminating power using a set of predictor variables that included demographic variables, childhood happiness, current life satisfaction, social support, stressful life events, & history of homelessness. The % of correct classifications using the system based on current impairment was superior to that based on past history 2 Tables, 23 References. Adapted from the source document. O'Malley, Karina (Saint Norbert Coll, De Pere WI 54115), **Commentary: Anatomy of a Social Issue: Homelessness,** *Wisconsin Sociologist,* 1992, 29, 1, winter, 23-36.

Rejoinder, 36-38.

¶ In a report addressed to the US Senate Subcommittee on Government Information & Regulation, & to the US House Subcommittee on Census & Population, it is argued that the 1990 US Census underrepresented the number of homeless people in Wisc. The Census Bureau (CB) is criticized for using unprofessional standards of research methodology, unethical behavior, immoral use of government statistics to justify a decrease in government assistance, & practices that disenfranchised homeless persons. A plea is made for social scientists to disassociate themselves from the CB. In **Rejoinder: "Or at Least to Do No Harm": The Ethics of Activism,** Bruce Wiegand (U of Wisconsin, Whitewater) agrees with O'Malley that CB methodology is suspect, but disagrees with her contention that the CB's underreporting of homeless persons was politically motivated & argues that social scientists should not abandon the CB in its attempt to count the homeless. 1 Appendix. Pennbridge, Julia, MacKenzie, Richard G. & Swofford, Avon (Division Adolescent Medicine Children's Hospital of Los Angeles, PO Box 54700 CA 90054-0700), **Risk Profile of Homeless Pregnant Adolescents and Youth,** *Journal of Adolescent Health,* 1991, 12, 7, Nov, 534-538.

¶ Data obtained via lifestyle interviews are used to compare the service needs of 55 pregnant homeless youths & 85 pregnant youths who live with their families, seen in a primary health care clinic in Los Angeles, Calif. The homeless pregnant youths were younger, primarily white, & from outside Los Angeles County. They were more likely to be diagnosed as depressed, to have previously attempted suicide, to have histories of sexual & physical abuse, & to be diagnosed as drug abusing. Review of pregnancy outcomes showed the difficulty of serving homeless pregnant youth & the lack of services for them. Based on these results, the clinic instituted new monitoring procedures & established a team case management approach to serving homeless pregnant teens & youth. 13 References. Sahlin, Ingrid G. (Sociologiska Instit Lund U, S-22100 Sweden), **Att definiera hemlöshet** (Defining Homelessness), *Sociologisk Forskning,* 1992, 29, 2, 51-71. (SWE)

¶ Definitions, classifications, & operationalizations of "homelessness" & "homeless" in Swedish government reports, local studies, & social research are explored, identifying two types of definitions that are related to different policy traditions. Definitions of the homeless as asocial, either in the sense of lacking social bonds, or in the sense of deviancy & social maladjustment, correspond to the old policy of assistance, control, & correction of paupers & vagrants, surviving in today's shelters & treatment programs for homeless individuals. Research close to this tradition typically investigates people in shelters, with a special interest in their drug or alcohol problems & mental health, commonly concluding that homelessness is caused by the behavior & qualities of the individuals & would best be remedied by treatment & training. It is argued that this definition is not suited for studies of the scope & development of housing problems. The other kind of definition is connected to housing policy & often used when analyzing census data & records of public housing agencies: specifically, "homelessness" is defined as absence of satisfactory housing with regard to space, standards, safety, & rights in the housing situation. The delimitations used are relative to historical changes in norms, general housing conditions, & housing policy. Whether a situation is designed as "homelessness" is, however, also related to the category of people concerned & the estimated legitimacy in their claims. Crucial aspects are age, health, income, the size of the household, its reasons to settle or stay in a special area, & its right to reside in the country. Furthermore, house-related defintions of "homeless" tend to exclude people who are considered incapable of living by themselves, or being responsible for their own lack of dwelling; in practice, shelter populations are often described in such terms. These two kinds of definitions, then, seemingly apply to mutually exclusive groups. However, the first type generally shapes the public image of the homeless. Conflation in the definitional level leads to the paradox that the homeless have no legitimate housing needs. 2 Figures, 36 References. Modified AA

Smart, Dawn H. (City Seattle Human Services Strategy Planning Office, 618 Second Ave #1350 WA 98104), **Homeless Youth in Seattle: Planning and Policy-Making at the Local Government Level,** *Journal of Adolescent Health,* 1991, 12, 7, Nov, 519-527.

¶ As many as 2,000 youths are homeless in Seattle, Wash, in a year's time. The service system is overburdened & poorly coordinated. Here, presented are data assessing the problem, gathered via a literature review, monitoring, & interviews (N not specified) with service providers, law enforcement agencies, & funding sources. Inadequacies of the service system, & issues affecting its ability to address the needs of homeless youths & their families, are discussed. Policies proposed to shape the city's response are described, & progress made in the last two years is evaluated. 4 Figures, 14 References. Adapted from the source document.

Welte, John W. & Barnes, Grace M. (Research Instit Alcoholism New York State Division Alcoholism & Alcohol Abuse, 1021 Main St Buffalo 14203), **Drinking among Homeless and Marginally Housed Adults in New York State,** *Journal of Studies on Alcohol,* 1992, 53, 4, July, 303-315.

¶ Drinking as a cause of homelessness was investigated through telephone interviews with 412 homeless & marginally housed adults & 5,952 domiciled adults in NY. The homeless group was largely male, ages 18-34, & contained higher proportions of blacks & Hispanics than the domiciled group. Descriptive analysis shows that abstention from alcohol was much greater in the homeless population (40%) than in the domiciled group (26%), but so was heavy drinking (20+ drinks a day); & a high % of homeless also reported social alcohol-related problems. Heavy drinking was more prevalent among homeless males than females, & among blacks than whites & Hispanics; heavy drinkers in the homeless population also tended to be older than in the domiciled sample. Covariate structural analysis reveals that drinking is not induced by homelessness, but is probably a preexisting problem contributing to homelessness. 8 Tables, 1 Figure, 33 References. Yates, Gary L., Pennbridge, Julia, Swofford, Avon & MacKenzie, Richard G. (Division Adolescent Medicine Children's Hospital of Los Angeles, PO Box 54700 CA 90054-0700), **The Los Angeles System of Care for Runaway/Homeless Youth,** *Journal of Adolescent Health,* 1991, 12, 7, Nov, 555-560.

¶ A description of the program model developed by the Division of Adolescent Medicine, Children's Hospital in Los Angeles (Calif), in working with runaway & homeless young people. Model components include: (1) networking & consolidation, (2) outreach, (3) short-term crisis shelter, (4) comprehensive medical & psychosocial care, & (5) long-term shelter & case management. The approach has been collaborative: a substantial portion of the work has been subcontracted to other youth agencies in the community in order to build & strengthen the network of existing services. In the process, progress has been made in developing a comprehensive system of care for homeless street youth throughout Los Angeles County: eg, representatives from 40 private & public agencies now meet regularly at Children's Hospital to discuss ways to improve services. Further, systematized data collection has helped agencies understand how they can work together & has prompted additional funding for needed services. 1 Table, 4 References. Ziesemer, Carol & Marcoux, Louise (School Social Work U Wisconsin, Madison 53706), **Academic and Emotional Needs of Homeless Students,** *Social Work in Education,* 1992, 14, 2, Apr, 77-85.

¶ An investigation of the characteristics of homeless elementary school-age students in Madison, Wisc, to provide direction for school programming for this population. Data were obtained from school records on 168 students residing at the Salvation Army, YWCA, & shelter motels, during the 1987/88 school year, & from teachers, who completed the Achenbach Teacher Report Form, yielding data on the adaptive functioning, academic performance, & emotional adjustment of a subgroup of 101 students, still enrolled in 1988/89. Findings indicate a diversity of needs. Teachers perceived that about 33% of the children were functioning within the normal range both academically & behaviorally, with the remainder exhibiting some degree of difficulty. It is concluded that, as school districts respond to the needs of homeless students, they cannot presume a child's needs based solely on his or her homelessness. 1 Table, 1 Figure, 16 References. Awad, George A. & Saunders, Elisabeth B., Male Adolescent Sexual Assaulters: Clinical Observations, *Journal of Interpersonal Violence*, 1991, 6, 4, Dec, 446-460.

¶ Clinical assessments of 49 male adolescent sexual offenders referred to the Toronto (Ontario) Family Court Clinic 1980-1988 who had sexually assaulted females their age or older showed that the majority were recidivists, had a history of antisocial behavior predating & coinciding with their sexual offenses, & came from a disturbed family background. Of the offenders, 33% had a history of physical abuse in childhood; however, a history of sexual abuse could be confirmed in only 2 cases. The assaulters were less likely to be socially isolated than a comparison group of child molesters & more likely to socialize with older peers than a comparison group of delinquents. There was known sexual pathology in about 25% of the parents. Alcohol & drugs were not found to play a prominent role in the sexual assaults. Sexually deviant impulses & antisocial traits were found to be motivating factors for the majority of the assaults. 2 Tables, 16 References. Adapted from the source document. Binder, Renée L. & McNiel, Dale E. (401 Parnassus Ave, San Francisco CA 94143), **The Relationship of Gender to Violent Behavior in Acutely Disturbed Psychiatric Patients,** *The Journal of Clinical Psychiatry*, 1990, 51, 3, Mar, 110-114.

¶ Gender differences in violent behavior before & during the early phase of hospitalization on a locked psychiatric unit are explored in an extensive review of the records of 253 patients. Analysis indicates that before hospitalization, males (M) engaged in significantly more physical attacks & fear-inducing behavior than did females (Fs). During short-term psychiatric hospitalization, although Ms continued to engage in more fear-inducing behavior, Fs engaged in proportionately more physical attacks. The same pattern of relationships between gender & violence was found after stratifying by demographic & diagnostic variables that were distributed differently among Ms & Fs. Case examples are offered, & possible explanations & implications of the findings discussed. 2 Tables, 29 References. Adapted from the source document. Dutton, Donald G. & Hemphill, Kenneth J. (Dept Psychology U British Columbia, Vancouver V6T 1Z4), **Patterns of Socially Desirable Responding among Perpetrators and Victims of Wife Assault,** *Violence and Victims*, 1992, 7, 1, spring, 29-39.

¶ Using scale & inventory instruments, 50 wife assaulters attending a treatment group & 75 women who had just exited an abusive relationship were asked to report on the extent of physical violence & emotional abuse in their relationship. Measures of socially desirable responding (SDR) were administered to both groups. Wife assaulters' self-reports of physical abuse correlated negatively with one SDR measure (the Balanced Inventory of Desirable Responding) but not another (the Marlowe-Crowne Social Desirability Scale); emotional abuse correlated negatively with both measures. Although physical abuse was primarily related to impression management, psychological abuse was affected by both impression management & self-deception aspects of SDR. Wife assaulters' reports of their own anger also correlated negatively with SDR. Both self-deception & impression management appear to contribute to underreporting of anger. Finally, abuse victims' reports of both physical & emotional abuse were unrelated to SDR. 4 Tables, 25 References. Adapted from the source document. Earls, Felton (Harvard School Public Health, 677 Huntington Ave Boston MA 02115), **Not Fear, nor Quarantine, but Science: Preparation for a Decade of Research to Advance Knowledge about Causes and Control of Violence in Youths,** *Journal of Adolescent Health*, 1991, 12, 8, Dec, 619-629.

¶ Research in criminology, psychology, & education has been able to delineate the subgroups most vulnerable to violent crime by age, gender, & race: eg, victimization by homicide is highest for young black males. It is possible that public health objectives can provide some control of violent crime: eg, in the last century, public health practice controlled tuberculosis among large population groups even without understanding its true cause. Public health objectives should not be based simply on the behavioral characteristics of the violent subgroup, but should focus on social context, the quality of the physical environment (housing & public schools), access to weapons, & opportunities for employment. To feed these objectives, a longitudinal study, the Program on Human Development & Criminal Behavior, is described, which will attempt to predict individuals prone to chronic & violent criminal behavior from biological, family, socioeconomic, & environmental factors. 4 Tables, 5 Figures. Edleson, Jeffrey L., Eisikovits, Zvi C. & Peled, Einat (School Social Work U Minnesota, Minneapolis 55455), **A Model for Analysing Societal Responses to Woman Battering: Israel as a Case in Point,** *International Social Work*, 1992, 35, 1, Jan, 19-33.

¶ A conceptual framework for systematic policy analysis in relation to woman battering is developed & applied to the case of Israel. The model, which consists of three dimensions--descriptive-operational, analytic-interpretive, & chronological--is used to analyze the current allocation, provision, delivery, & financing of interventions with abused Israeli women & their families. Results suggest broadening allocation to include other social units (eg, entire families), rather than remaining narrowly focused on individuals. Greater accessibility to services is also needed, & coordinated efforts to enhance the cumulative power of the service network should be considered. It is concluded that the ultimate value of the model should be judged by its capacity to facilitate a comprehensive understanding of complex societal responses, & consequently to enhance the effectiveness of public policy decision making. 1 Figure, 34 References. Hillbrand, Marc, Foster, Hilliard G., Jr. & Hirt, Michael (Dept Psychology Whiting Forensic Instit, PO Box 70 Middletown CT

06457), **Alcohol Abuse, Violence, and Neurological Impairment,** *Journal of Interpersonal Violence,* 1991, 6, 4, Dec, 411-422.

¶ The relationship between the frequency & severity of violence & 3 parameters of alcohol abuse (acuteness, chronicity, & age of onset) is examined retrospectively in a sample of 85 forensic psychiatric patients, using data derived from archived diagnostic records, state & federal criminal records, & questionnaires. Ss were further compared with respect to electroencephalographic characteristics. Acuteness & chronicity of alcohol abuse were found to be related to severity but not to frequency of violence. Acute alcohol abusers appeared to suffer from more severe central nervous system impairment than did nonabusers. Age of onset of alcohol abuse was found to have little impact on the variables examined. Results are discussed in the framework of empirically derived typologies of psychopathology. 3 Tables, 43 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Kruttschnitt, Candace & Dornfeld, Maude (Dept Sociology U Minnesota, Minneapolis 55455), **Will They Tell? Assessing Preadolescents' Reports of Family Violence,** UM *Journal of Research in Crime and Delinquency,* 1992, 29, 2, May, 136-147.

¶ An investigation of the quality & accuracy of youth reports on intrafamilial victimizations. The Conflict Tactics Scale was administered to 50 women seeking help at a shelter for domestic abuse & their children ages 11-12 & to a community sample of 50 nonclincal mothers & their children. These data were then used to examine the concurrent validity & reliability of youth reports of victimization & observation of spousal violence. Results suggest that the accuracy of children's reports of victimization are influenced both by the salience of the event & by contextual differences in their environments. By contrast, observational reports of spousal violence are influenced by the recall period. The methodological implications of using children as respondents are discussed, & appropriate directions for future research considered. 4 Tables, 18 References. Adapted from the source document. 93Z9225

Larouche, Ginette & Gagné, Louise (c/o Gagné–3725 rue St-Denis, Montreal Quebec H2X 3L9), **Où en est la situation de la violence envers les femmes dans le milieu familial, dix ans après les colloques sur la violence?** (Violence against Women within the Family Ten Years after the Conferences on Violence), *Criminologie,* 1990, 23, 2, autumn, 23-45. (FRE)

¶ After briefly describing the nature of spousal violence, statistical data are presented on its prevalence in Montreal, Quebec, based on official surveys conducted ten years after a series of conferences assessing & seeking to alleviate the problem. Discussed are risk factors associated with the aggressor's behavior, eg, allegiance to masculine stereotypes & substance abuse. Violence-tolerant behaviors among victims are identified, eg, stereotype of female incapacity, personal characteristics, & pathological behaviors. It is argued that attitudes toward spousal violence can & must be changed through campaigns, nonsexist education, & sensitization of medical, social, & mental intervenors. 4 Tables. Pate, Antony M. & Hamilton, Edwin E. (Police Foundation, 1001 22nd St NW #200 Washington DC 20037), **Formal and Informal Deterrents to Domestic Violence: The Dade County Spouse Assault Experiment,** UM *American Sociological Review,* 1992, 57, 5, Oct, 691-697.

¶ A test of the proposition in deterrence theory that informal sanctions mediate the effects of formal sanctions. The relative effectiveness of different police responses to incidents of spouse abuse is evaluated, using data from a randomized field experiment in Dade County, Fla. Focus is on whether the deterrent effect of arrest interacts with the informal sanctions implied by employment status & marital status. Results indicate that formal arrest has no effect on subsequent assault. However, this overall lack of effect masks two offsetting effects: arrest has a statistically significant deterrent effect among employed suspects, but leads to a significant increase in subsequent assaults among unemployed suspects. Other results include: a statistically significant interaction effect between arrest & employment status; no significant effects associated with marital status alone; & a significant interaction effect between arrest & a composite measure of "commitment" based on both employment & marital status. 1 Table, 1 Figure, 34 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Pope, Harrison G., Jr. & Katz, David L. (McLean Hospital, Belmont MA 02178), **Homicide and Near-Homicide by Anabolic Steroid Users,** *The Journal of Clinical Psychiatry,* 1990, 51, 1, Jan, 28-31.

¶ Case reports are presented of three men, all with benign premorbid psychiatric histories, no evidence of antisocial personality disorder, & no history of violence, who impulsively committed violent crimes–including murder–while taking anabolic steroids. Data obtained during structured psychiatric interviews suggested that steroids played a necessary, if not primary, role in the etiology of the violent behavior. Although the Ss conceivably might have exaggerated their reports of the effects of steroids in the hopes of improving their legal positions, information from external sources consistently corroborated their accounts in each case. It is concluded that steroid-induced violence may pose a little-recognized public health problem. 10 References. Adapted from the source document. 93Z9229

Sakai, Caroline E., Group Intervention Strategies with Domestic Abusers, *Families in Society,* 1991, 72, 9, Nov, 536-542.

¶ A sequential approach to treatment of domestic abuse is advocated beginning with commitment to nonviolence, anger management, transformation in attitudes about power & control, & proceeding to marital & family therapy when appropriate. Effective methods to assist the abuser to take responsibility for his behavior include presenting the destructive cycles generated by power & control tactics as interlocking wheels (expanded from Pence, E., & Paymar, M., *Power and Control: Tactics of Men who Batter,* Duluth: Minnesota Program Development, Inc, 1986); telling stories to which the abuser can relate, with follow-up group discussion & recall of childhood feelings; & teaching the skill of listening

to anger without reacting angrily. Finally, a positive model based on mutual love & respect, outlined by R. B. Stuart (*Helping Couples Change*, New York, Guilford Press, 1980), is recommended. 2 Figures, 24 References. Adapted from the source document.

Serin, Ralph C. (Correctional Services of Canada Joyceville Institution, Box 880 Kingston Ontario K7L 4X9), **Psychopathy and Violence in Criminals**, *Journal of Interpersonal Violence*, 1991, 6, 4, Dec, 423-431.

¶ Data obtained via interviews & self-report psychological questionnaires are used to investigate the relationship between criminal psychopathy & violent behavior in a sample of 87 male inmates incarcerated at Joyceville Institution, Kingston, Ontario. Groups were defined according to psychopathy ratings (Hare's Psychopathy Checklist) & violence. Psychopaths scored higher than nonpsychopaths on measures of impulsiveness & aggressiveness, & were more likely than other inmates to: behave aggressively; have committed more serious past offenses; have used weapons, threats, & instrumental agression; & have suffered physical abuse as a child. When presented with hypothetical situations that involved a frustrating outcome, psychopaths reported that they would be more angry than nonpsychopaths, & attributed greater hostile intent to others. Violent psychopaths were seen as qualitatively different than violent nonpsychopaths in their use of violence, yet they did not differ in terms of the seriousness of their index offense. 1 Table, 23 References. Adapted from the source document.

93Z9231

Sherman, Lawrence W. & Smith, Douglas A. (Instit Criminal Justice & Criminology U Maryland, College Park 20742), **Crime, Punishment, and Stake in Conformity: Legal and Informal Control of Domestic Violence**, UM *American Sociological Review*, 1992, 57, 5, Oct, 680-690.

¶ After reviewing deterrence & labeling theories, it is concluded that they offer inconsistent predictions about the relative impact of legal & informal controls on the subsequent criminal activities of arrested persons. Tested here is whether the effect of arrest on recidivism is conditional on key individual characteristics, indicating a "stake in conformity." Experimental data obtained from a police department in Milwaukee, Wisc, involved in 1,200 cases of misdemeanor domestic violence suggest that, contrary to deterrence theories, arrest had no overall crime reduction effect in either the official or victim interview measures of repeat domestic violence. Consistent with labeling theories, arrest increased recidivism among those with a low stake in conformity, ie, the unemployed & the unmarried. Neither race nor a record of prior offenses conditioned the effect of arrest on subsequent domestic violence. Results are consistent with those of similar experiments in other US cities. 2 Tables, 58 References. Adapted from the source document.

Smith, Michael D. (Dept Sociology York U, Downsview Ontario M3J 1P3), **Male Peer Support of Wife Abuse: An Exploratory Study**, *Journal of Interpersonal Violence*, 1991, 6, 4, Dec, 512-519.

¶ An examination of whether abusive husbands' male (M) peers provide ideological support for violence against wives, using quantitative & qualitative data obtained in a survey of Toronto (Ontario) women (N = 604). Results indicate that the M friends of abusive husbands were more likely to approve of violence against wives than were the M friends of nonabusive husbands & that such approval tends to reflect an ideology supportive of patriarchy in the familial sphere. 2 Tables, 12 References. Adapted from the source document.

Tontodonato, Pamela & Crew, B. Keith (Kent State U, OH 44242), **Dating Violence, Social Learning Theory, and Gender: A Multivariate Analysis**, *Violence and Victims*, 1992, 7, 1, spring, 3-14.

¶ An examination of constructs hypothesized to be predictive of the use of dating violence, exploring possible gender differences in the underlying causal structure of such violence. Logit analysis of questionnaire data obtained from 847 male (M) & female (F) undergraduates indicates that parent-child violence, drug use, & knowledge of use of dating violence by others predict the use of courtship violence by Fs. Belief that violence between intimates is justifiable, drug use, & parental divorce are related to perpetration of dating aggression by Ms. Explanations for these results & the importance of a multivariate approach to the problem are discussed. 4 Tables, 38 References. Harmon, Christopher C. (Dept Strategy Naval War Coll, Newport RI 02841), **Propaganda at Pistol Point: The Use and Abuse of Education by Leftist Terrorists**, *Political Communication*, 1992, 9, 1, Jan-Mar, 15-30.

¶ It is argued that characterizations of terrorists as "mindless" are inappropriate. Evidence is presented to demonstrate that: many leftists extremists are deadly serious about their ideas; most group leaders of the last three decades have been at least college-educated; & many have professional backgrounds as teachers, college professors, writers, lawyers, & doctors. This sociopolitical reality suggests two questions for reflection: (1) What have been the effects of education on leftist terrorists? & (2) How have terrorists used their schooling & their credentials to advance their enterprises? Prévost, Ann Marie, Race and War Crimes: The 1945 War Crimes Trial of General Tomoyuki Yamashita, UM *Human Rights Quarterly,* 1992, 14, 3, Aug, 303-338.

¶ An examination of the war crimes trial of Japanese General Tomoyuki Yamashita, commander of Japanese forces in the Philippines during WWII. The charge of command responsibility allowed the US military tribunal to convict Yamashita without demonstration of culpability on his part, theorizing that, by virtue of his position as commander, he was responsible for all acts committed by any of his troops. Following background data on the sociopolitical setting (ie, fear of the "Yellow Peril") during WWII, the trial process is explored, including designation of the case to the Supreme Court of the Philippines &, ultimately, to the US Supreme Court. It is contended that, as a result of condoning the command responsibility theory, & because of the influence of racial prejudice, the US hanged Yamashita, who in fact had done everything he could to prevent war atrocities. Also discussed is the trial of Admiral Soemu Toyoda, Japan's highest-ranking naval officer, who was charged with the identical war crimes, & whose testimony at Yamashita's trial revealed that Yamashita was not in command of the force that committed the atrocities for which he was hanged. Bernstein, Susan David (U Wisconsin, Madison 53706), **Confessing Feminist Theory: What's "I" Got to Do with It?**, *Hypatia*, 1992, 7, 2, spring, 120-147.

¶ Self-representation through the confessional mode has become important in feminist epistemologies, broadening & contextualizing the location & production of knowledge. In some versions of confessional feminism, the use of *I* is reflective, being the product of a simple notion of experience that weaves a personal truth into academic discourse. Compared to reflective intrusions of the first person, reflexive confessing is primarily a questioning mode that imposes self-vigilance on the process of self-positioning. 33 References. Butler, Amy C. (State U New York Buffalo, Amherst 14260), **The Changing Economic Consequences of Teenage Childbearing**, UM *The Social Service Review*, 1992, 66, 1, Mar, 1-31.

¶ Recent shifts in economic & social conditions have put young women who begin their childbearing as teenagers in an increasingly precarious economic position. Here, data from the Panel Study of Income Dynamics on a sample of 922 black & 1,240 white non-Hispanic women are used to examine how the effect of teenage childbearing on women's economic well-being changed during 1968-1987. A review of the literature on the consequences of teenage childbearing & changing economic conditions provides a framework in which to interpret the results. Findings demonstrate that white & black women who had their first child as teenagers & ages 15-17, respectively, were increasingly worse off economically over the period examined. Differences between the two groups are identified, & implications for future research suggested. 2 Tables, 8 Figures. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Charlesworth, Hilary (School Law U Melbourne, Parkville Victoria 3052 Australia), **A Law of One's Own? Feminist Perspectives on Equality and the Law**, *Meanjin*, 1992, 51, 1, autumn, 67-76.

¶ Debunking the myth that law is inherently objective, rational, & apolitical, a rich feminist legal scholarship has redirected & redefined previous critiques by legal realists, Marxists, & the critical legal studies movement. Three categories of feminist responses to the question of how the law should address sexual inequality are critiqued: position of the liberal feminists–equality as sameness–posits no systematic legal inequities but demands formal equality before the law; equality as difference essentializes the difference between men & women & asks for a women's voice in the legal process; & equality as nondomination rejects the notion that women must measure up to the male norm & suggests that only by problematizing the law's constructed sense of natural will the systematic subordination of women be ceased. A plan incorporating aspects of these three categories of responses is offered. M. Maguire (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9243

Cook, Elizabeth Adell & Wilcox, Clyde (George Mason U, Fairfax VA 22030), **A Rose by Any Other Name: Measuring Support for Organized Feminism Using ANES Feeling Thermometers**, *Women & Politics*, 1992, 12, 1, 35-51.

¶ An investigation of the effect of question wording to response patterns regarding support for feminist collective action, as found in the American National Election Studies (ANES). Between 1972 & 1984, the ANES survey included a feeling thermometer that measured affect toward the "women's liberation movement." In 1988 the survey substituted a new item that asked respondents to rate "feminists," & in 1990, the questionnaire changed the wording to "the women's movement." Here, data from the 1985 Pilot Study are used to compare responses to these latter 2 items for both men & women. It is concluded that the 1990 measure is a "harder" measure, eliciting more negative responses. The correlates of the new measure differ from the original feeling thermometer; however, when the feeling thermometer is incorporated into a multi-item measure of feminist consciousness, the pattern of correlations is very similar, suggesting that a limited type of longitudinal analysis may still be possible. 7 Tables, 1 Appendix, 9 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9244

Corrigan, Annette (Griffith U, Nathan Queensland 4111 Australia), **Fashion, Beauty and Feminism**, *Meanjin*, 1992, 51, 1, autumn, 107-122.

¶ The politics of appearance was placed on the agenda of the women's liberation movement when feminists first protested against the Miss America pageant in 1968. More than two decades later, feminists continue to challenge the assumptions about sexuality that are implicit in patriarchal definitions of beauty & femininity. Reviewing early work by Germaine Greer (*The Female Eunuch*, London: Paladin, 1970) & Janet Radcliffe Richards (*The Sceptical Feminist*, Harmondsworth: Pengiun Books, 1982) & the English & North American self-help literature that surfaced in the mid-1980s on fashion, beauty, & body image provides a context for assessing the questions raised about fashion & beauty practices by contemporary feminists. Future research will focus on the tasks of joining practical feminist concerns with theory, remaining vigilant about the social & economic costs of beauty & femininity, offering alternatives for women, & incorporating recent developments in feminist & social theory about power & resistance. M. Maguire (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Dauphinais, Pat Dewey, Barkan, Steven E. & Cohn, Steven F. (c/o Barkan–Dept Sociology U Maine, Orono 04469), **Predictors of Rank-and-File Feminist Activism: Evidence from the 1983 General Social Survey,** UM *Social Problems*, 1992, 39, 4, Nov, 332-344.

¶ Data drawn from the 1983 General Social Survey on a nationally representative sample (N = 1,599) are used to identify predictors of rank-&-file feminist activism by women in the US. Under a wide range of controls, activists are distinguished from nonactivists by certain attitudinal variables & by their higher levels of education, non-South residence, & greater labor force experience. Various microstructural factors suggested by recent work on social movements are not associated with activism among women who are highly concerned about women's rights, but do partially explain what little activism exists among women who are less concerned. These results suggest an inverse relationship between the importance people place on movement goals & the importance of microstructural factors for recruitment. 3 Tables, 39 References. Felski, Rita (Murdoch U, Western Australia 6150), **Whose Postmodernism?,** *Thesis Eleven*, 1992, 32, 129-140.

¶ A review article on a book edited by Linda Nicholson, *Feminism/Postmodernism* (New York: Routledge, 1989 [see listing in IRPS No. 67]). This collection of essays by US philosophers & social scientists examines the relationship between postmodernism & feminism. The volume attempts to determine the extent to which the postmodern critique of reason, history, & the subject is in conflict, or accord, with the feminist tradition. In one essay, Nancy Fraser & Linda Nicholson criticize postmodernists for elaborating antifoundational metaphilosophical perspectives, while covering up their own reliance on the very intellectual traditions they seek to undermine. Others explore the history of feminism, liberatory politics, & the politics of difference & sexual identity. The book is praised as a valuable contribution to feminist thought, but criticized for glossing over the sociohistorical & theoretical dimensions of postmodernism. 10 References. W. Howard (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Ferree, Myra Marx (Dept Sociology U Connecticut, Storrs 06269-2068), **Aufstieg und Untergang der "Mutti-politik": Feminismus und deutsche Vereinigung** (The Rise and Fall of "Mommy-Politics": Feminism and German Reunification), *DISKURS*, 1992, 1, 60-65. (GER)

¶ The peaceful revolutions in autumn 1989 in Eastern Europe ushered in an era of change that was most rapid in the former East Germany. Women were the sector of society most heavily impacted. While a few gained the opportunity to participate in endeavors previously closed to them, many women suddenly became unemployed. However, they should not be seen as passive subjects of change; to a greater degree than in other communist regimes, East German women participated in the political movements leading to peaceful revolution. An historical sketch is given of the women's movement in East Germany, focusing on its initial formation, patterns of social networks, & effective mobilization. Also discussed is the loss of generous maternity benefits after the reunification of Germany. 31 References. M. Meeks (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Giffin, Karen Mary, Nosso corpo nos pertence: a dialética do biológico e do social (We Control Our Bodies: The Biological and Social Dialectic), *Cadernos de Saúde Pública*, 1991, 7, 2, Apr-June, 190-200. (POR)

¶ An intercultural literature review is drawn on to examine biological & social factors in women's social condition. After the initial emergence of the feminist perspective, emphasis shifted from biologically based explanations to the social construction of women's identity. However, even when women's identification with the body & nature was considered, along with their secondary status as universal, biological determinism was still rejected. In redefining the object of study, the ideological role of male-dominated science advanced its own view of women as if it were objective fact. This growing awareness of ideological influences in science is leading scholars away from the biological/social dichotomy on the conceptual level. Nevertheless, on the basic biological & reproductive levels, these differences persist. The analysis of reproduction requires that the sexes be described as biosocial entities in relation to one another within specific historic contexts. In modern societies women are subject to a dual reproductive contradiction. 19 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Glenn, Evelyn Nakano (Dept Ethnic Studies U California, Berkeley 94720), **From Servitude to Service Work: Historical Continuities in the Racial Division of Paid Reproductive Labor,** UM *Signs*, 1992, 18, 1, autumn, 1-43.

¶ Comparative historical analysis of women's reproductive labor–African Americans in the South, Mexican Americans in the Southwest, & Japanese Americans in the West–reveals that labor in the US is simultaneously defined by race & gender. While the division of labor also varies by region & over time, the contention that race & gender form an interlocking system of stratification demonstrates why white, middle-class women have almost exclusively been delegated the "managerial" role vis-à-vis ethnic women during the twentieth century, whether the relationship is that of housewife & servant or that of white-collar supervisor & service worker in an institutional setting. Because all women do not share some monolithic, universal set of interests, implications for political action are assessed. 109 References. M. Maguire (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Haug, Frigga (U Hamburg, D-2000 13 Federal Republic Germany), **Feminist Writing: Working with Women's Experience,** *Feminist Review*, 1992, 42, autumn, 16-32.

¶ Drawing on novels from the 1980s by Marge Piercy, Barbara Wilson, & Sarah Schulman, explored is the process of how knowledge, as the precondition of the capacity for action, is made possible, & why contemporary feminist writing takes up this task in an exemplary way. On a theoretical level, the context that finds expression in the novel is determined, & then individual experiences translated into theoretical theses are presented. Finally, other insights that become possible through literature are identified. It is argued that Piercy's works (see, eg, *Braided Lives*, London: Pan, 1983) suggests that in a society in which women do not belong to the ruling culture, their cultural alliance with all others who equally do not belong to it is imperative. From this perspective, part of the necessary knowledge about women & their place in society could be gained from feminist literature. 7 References. S. Millett (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

93Z9256

Jacobs, Susie (Staffordshire Polytechnic, Stoke-on-Trent ST4 2DE England), **Land Resettlement and Gender in Zimbabwe: Some Findings,** IM *Journal of Modern African Studies,* 1991, 29, 3, Sept, 521-528.

¶ Based on contacts with 650-700 women through club meetings, unstructured interviews, & other observations, & on survey data for another 206 randomly selected married & single heads of households in 8 villages, the relationship between gender & class in a land settlement program in Zimbabwe is examined. The findings reveal that class differences existed not only among men, but among married women & widows/divorcees, & that the measures of class were related to education, religion, harvests of main cash crops, expenditure, & debt. Although a large & disproportionate number of widows were impoverished, a sizable minority were not. It is suggested that class divisions may mean that the effects of resettlement vary for all groups, including the married women most encapsulated in households. While some conditions of life for women worsened in terms of lack of provision of adequate services & the increase in women's absolute burdens of work, their access to more land, to a greater proportion of crops, & to higher incomes for themselves & their household, as well as improvements in the gender division of labor, reflect positive gender implications of the process. S. Millett

93Z9257

Kaplan, Andrew, The Same and the Different: Pluralism and the Theory of Women's Studies, IM *Educational Theory,* 1992, 42, 3, summer, 299-313.

¶ Important issues in US education, eg, gender, race, & class, need to be delineated & a dialogue between viewpoints established. A reorganized Women's Studies (WS) program has the capacity to break down artificial barriers between academic areas & establish this dialogue. Such a program would operate as a "theme" that connects all subjects in the curriculum, looking at ways in which gender has been constructed in intellectual tradition. Adopting a philosophical pluralism approach in reorganizing WS along these lines is important to ensure an awareness of systematic differences, a respect for alternative or opposite viewpoints, semantics relating to a range of differences, & a logical context in which to discuss change. Pluralism also offers the perspective of inclusiveness, which contrasts the perspective of political feminism that focuses on the problems of women's past exclusion from centers of power. A reorganized WS should lead to a discourse for all human beings, not just women. M. Pflum

Kruks, Sonia (Dept Politics Oberlin Coll, OH 44074), **Gender and Subjectivity: Simone de Beauvoir and Contemporary Feminism,** IM *Signs,* 1992, 18, 1, autumn, 89-110.

¶ It is argued that Simone de Beauvoir's work is far more philosophically independent of Jean-Paul Sartre's thought than is generally recognized, & that Beauvoir still remains a valuable resource for contemporary feminism by offering us an account of subjectivity as gendered & as "in situation" that avoids many of the problems presented by either biologically essentialist or postmodern accounts of the female self. 58 References. AA

93Z9260

Mahoney, Maureen A. & Yngvesson, Barbara (School Social Science Hampshire Coll, Amherst MA 01002), **The Construction of Subjectivity and the Paradox of Resistance: Reintegrating Feminist Anthropology and Psychology,** IM *Signs,* 1992, 18, 1, autumn, 44-73.

¶ To account for how the motivation to resist is constructed psychologically, a theory of the subject who attends both to dominant cultural discourses & to the relational contexts in which meanings are produced is developed. Drawing on D. W. Winnicott's model (*Playing and Reality,* New York: Tavistock, 1982), which goes beyond the debilitating dichotomy of determined vs determining subjectivity, it is argued that cultural meanings represent a negotiated process of discovery & creation. If meanings, like power, are relational, then even an infant must be understood as an active participant in the formation of its own subjectivity, & all actors must be understood as agents who can both produce & resist their own domination. Object-relations theory augmented with cross-cultural examples demonstrates not only how desire is socially constructed, but also why historically situated female subjects have been able to transform their desires & resist dominant, disempowering cultural discourses. 50 References. Meier, Uta (Instit Soziologie U Munich, D-8000 22 Federal Republic Germany), **Bilanz der Frauenforschung** (The Balance of Women's Studies), *Soziologische Revue,* 1992, 15, 4, Oct, 341-345. (GER)

¶ A review essay on a book by Sigrid Metz-Göckel & Elke Nyssen, *Frauen leben Widersprüche. Zwischenbilanz der Frauenforschung* ((Women Living Contradictions: Interim Results of Women's Studies) Weinheim & Basel: Beltz Verlag, 1990 [see listing in IRPS No. 67]). The authors incorporate everyday personal experiences into an analysis of gender relationships in Germany. Topics span the entire life course of women, addressing issues related to childhood, family, school, professional training, job selection, & life-course planning. Other topics discussed include the impact of technology, the choice of becoming a mother, & balancing responsibilities between work & family life. Reunification offers excellent opportunities for women's studies by comparing the historical paths taken by women in the two Germanys. M. Meeks

93Z9262

Mellor, Mary (Dept Applied Social Science Newcastle upon Tyne Polytechnic, NE1 8ST England), **Eco-Feminism and Eco-Socialism: Dilemmas of Essentialism and Materialism,** *Capitalism, Nature, Socialism,* 1992, 3, 2(10), June, 43-62.

¶ The construction of an ecosocialist/-feminist revolutionary theory & practice is unattainable unless theoreticians can eschew economic analysis & embrace women & nature, not as economic objects, but as subjects in their own right. The relationship between the universals of biological sex & nature as essential features of human existence & the historical materialism of class analysis is identified as a central problem in the debate between ecofeminism & ecosocialism. The arguments of a variety of commentators on the debate are discussed, & it is contended that the integration of ecofeminism with ecosocialism cannot be realized by incorporating women into a male-dominated productivist socialism. Rather, Marxian socialism must be reformulated to acknowledge the reality of women's lives & the way in which the capitalist/male sphere of production is materially contingent on nature & women. A feminist green socialism is advocated. W. Howard

93Z9263

Miller, Jaclyn (School Social Work Virginia Commonwealth U, Richmond 23284-2027), **Child Welfare and the Role of Women: A**

Feminist Perspective, UM *American Journal of Orthopsychiatry,* 1991, 61, 4, Oct, 592-598.

¶ Although the major stakeholders in the child welfare system are women & children, their rights & needs are not equally satisfied by the same service systems. A feminist reanalysis of basic policy aims, & of caretaking roles & functions, is achieved through a review of child welfare literature that emphasizes the often ignored link between women & children in the public welfare system. Recognition of this link will lead to a more satisfactory child welfare system. 34 References. Adapted from the source document.

Okin, Susan Moller (Stanford U, CA 94305), **Women, Equality, and Citizenship,** UM *Queen's Quarterly,* 1992, 99, 1, spring, 56-71.

¶ Both the classical ideal of citizenship & the liberal conception that eventually replaced it excluded women. However, both can be modified–& in the process improved–so as to include women. The classical ideal benefits because, though citizens can no longer be free from all preoccupation with daily life, the redistribution of labor between the sexes (& between slave & free) means that they are no longer in a position of treating other persons as things. This should enhance their capacity to treat each other as equals. Including women benefits the liberal conception of citizenship by exposing the fact that the liberal individual's much-vaunted rights of privacy were until recently enjoyed by patriarchal heads of households. Purvis, June (School Social & Historical Studies U Portsmouth, PO1 3AS England), **Using Primary Sources when Researching Women's History from a Feminist Perspective,** *Women's History Review,* 1992, 1, 2, June, 273-306.

¶ In a discussion of methodological problems in researching women's history from a feminist perspective, three main categories of primary sources are identified–official texts, published commentary & reporting, & personal texts. Both descriptive & perspective analysis are used to examine each source. The strengths & weaknesses of each category for both forms of analysis are explored in relation to illustrative examples from Victorian & Edwardian England. Adapted from the source document.

Roof, Judith (U Delaware, Newark 19716), **The Ideology of Fair Use: Xeroxing and Reproductive Rights,** *Hypatia,* 1992, 7, 2, spring, 63-73.

¶ The metaphorical similarities between abortion statutes & copyright law reveals reproductive laws' stake in property ideologies. "Fair use" provisions in copyright law are analogous to abortion rights, delimiting the extent to which a nonowner (one who copies, a mother) can exert control over material "belonging" to another. The similarity suggests abortion fury can be understood as a manifestation of property rights. 6 References. Adapted from the source document.

Segura, Denise A. & Pesquera, Beatriz M. (Dept Sociology U California, Santa Barbara 93106), **Beyond Indifference and Antipathy: The Chicana Movement and Chicana Feminist Discourse,** UM *Aztlan,* 1988-1990, 19, 2, fall, 69-92.

¶ The form & content of feminist discourse are explored through mail questionnaire data from 101 Chicanas in higher education. Over 50% affirmed the existence of a Chicana movement distinct from both the contemporary US women's movement & the Chicano movement. Also, 84. 2% identified themselves as "Chicana feminists." The meaning of this self-identity is explored, as is its distinction from white US feminists. A typology of Chicana feminism is devised consisting of 3 broad categories: liberal, insurgent, & cultural nationalist feminism. It is argued that the respondents' (Rs') perceptions of the Chicana movement & Chicana feminism are best understood within the context of the historical tensions between Chicano cultural nationalism & US feminism of the late 1960s & 1970s. Rs express strong commitments to redress the historical condition of Mexican women, but differ with respect to the centrality of gender oppression, the critique of Chicano culture, & the preferred form of political struggle. Shreenan, Paul (Dept Sociology & Anthropology Carleton U, Ottawa Ontario K1S 5B6), **On the Devaluation of Women's Labour: Hegemonic and Local Ideological Practices,** *Alternate Routes,* 1992, 9, 44-63.

¶ Research on fishing communities of the Atlantic region of Canada has generally undervalued or ignored women's contributions to the family economy. It is argued that domestic forms of labor have been undervalued because they are not public, & that women's contributions through wage labor are systematically ignored because hegemonic ideological practices–capitalism, liberalism, & patriarchy–legitimate female subordination in the fishing industry & local cultures. Examining how those hegemonic practices are reproduced, it is concluded that if women make their work more "visible," their subordination will cease. 10 References. G. Castañeda

Travers, Ann (U Oregon, Eugene 97403), **Radical Democracy's Feminist Potential,** *Praxis International,* 1992, 12, 3, Oct, 269-283.

¶ A feminist critique of two models of radical democracy by John Keane (*Democracy and Civil Society,* London: Verso, 1988) & Ernesto Laclau & Chantal Mouffe (*Hegemony and Socialist Strategy: Towards a Radical Democratic Politics,* London: Verso, 1985). It is argued that in this modern/postmodern world, the potential for a radical reinterpretion of liberal-democratic theory exists, but feminist analysis must be fused into that theory. Principles outlined for such a reconstruction include: (1) the public sphere should not be thought of or built around terms of universals, & individual rights should be defined in terms of particularity, not neutrality; (2) particularity should be at the center of public debate, & diversity of the individual & the public realm must be accepted; (3) no issues or forms of expression may be excluded from the public sphere, & (4) universality & impartiality should be recognized as part of old power configurations & not pursued as goals themselves. 43 References. Wieringa, Saskia (Women & Development Programme Instit Social Studies, NL-2509 LS The Hague Netherlands), **Ibu or the Beast: Gender Interests in Two Indonesian Women's Organizations,** *Feminist Review,* 1992, 41, summer, 98-113.

¶ A critique of the conceptual framework for the analysis of women's organizations proposed by Maxine Molyneux ("Mobilization without Emancipation? Women's Interests, State and Revolution in Nicaragua," in Slater, D., *New Social Movements and the State in Latin America,* Amsterdam: CEDLA, 1985). Her suggestion to differentiate between women's strategic & practical gender interests in assessing the success of women's organizations is refuted by analysis of two Indonesian women's organizations–Gerwani (Gerakan Wanita Indonesia) & PKK (Pembinaan Kesejahteraan Keluarga)–based on interviews with organization participants (N not specified). Both groups are mass organizations involved in a similar range of activities based on the immediate perceived needs of women. Yet the political perspective from which they work informs their activities to such an extent that the effect of their interventions is critically different. Gerwani was a socialist-oriented organization that fought for a social transformation in which women would be active & vocal members. They were banned after a coup in 1965, after which many thousands of their members were killed. PKK is an instrument of the right-wing military dictatorship that was installed after the coup & works to reinforce women's subordination by upholding male leadership in the household & military rule in the country. Although both organizations centered a large part of their activities around what Molyneux calls women's practical gender interests, Gerwani's work had strategic consequences–emancipating women–while PKK has strengthened women's subordination. It is concluded that Molyneux's distinction between women's practical & strategic gender interests is not useful to assess the performance of these two women's organizations. 3 Photographs, 22 References. Wilson, Elizabeth (Dept Psychology U Sydney, New South Wales 2006 Australia), **Is "Science" Feminism's Dark Continent?,** *Meanjin,* 1992, 51, 1, autumn, 77-88.

¶ To date, feminist critiques of the sciences have been concerned primarily with emphasizing the similarities across the sciences. Here, it is argued that in order to engage with & challenge scientific authority effectively, feminist theories now need to examine & exploit the differences between & within the sciences. In particular, feminist theories need to avoid narratives of a singular, monolithic, unified science. Such a stereotype ignores the historical constitution of the sciences & usually ignores or displaces textuality as a site for the creation of scientific authority. Feminist critiques that rely on this stereotype are less effective than they could be, tending to be reformist or reactionary rather than deconstructive. Rather, critical/deconstructive textual analyses are suggested as the most fruitful site for feminist interventions. Psychology occupies an ambivalent position with respect to the boundary between the sciences & the humanities; for this reason it is potentially highly productive in the deconstruction of the disciplinary boundaries of the sciences. Special regard is given to the ways these ideas may be articulated within a feminist analysis of scientific psychology. Modified AA

Woodroffe, Caroline (Division Public Health Instit Child Health, 30 Guildford St London WC1N 1EH England), **Medical Abortion and the Availability of RU486–Are Women's Rights Being Ignored in Developing Countries?,** *Health Policy and Planning,* 1992, 7, 1, Mar, 77-81.

¶ Unsafe induced abortion is the leading cause of death in women ages 15-39 in Latin America & a major cause of maternal mortality throughout the developing world. A medical alternative to early surgical abortion has been developed–RU486–which could contribute to a reduction in mortality, but which is so far available only in France (1988) & GB (1991). Here, the method is described, noting advantages & disadvantages for use in developing countries. The reason for the reluctance of the drug's manufacturer (Roussel Uclaf) to apply for product licenses in other countries is not primarily legal, since 75% of the women of the world live in countries where abortion is allowed; nor is it medical, the method having been tested in clinical trials in 20 countries & used by 70,000 women in France. Rather, the company faces threats from religious & antiabortion groups, particularly in the US. Such groups have succeeded in lobbying the US government to withdraw funds from overseas abortion aid even in countries where abortion is legal, effectively denying women in developing countries the choice available to women in the US. The role of the World Health Organization is crucial in providing access to medical abortion to women in the developing world. 22 References. Adapted from the source document.

——, **Symposium on Susan Bordo's "Feminist Skepticism and the 'Maleness' of Philosophy ",** *Hypatia,* 1992, 7, 3, summer, 155-196. **Reply,** 197-207.

¶ In **Why Care about Gender?,** Ann Garry (California State U, Los Angeles) introduces a symposium on gender that responds to Susan Bordo's "Feminist Skepticism and the 'Maleness' of Philosophy" (in Harvey, Elizabeth, & Okruhlik, Kathleen (Eds), *Women and Reason,* Ann Arbor: U of Michigan Press, 1992) by historically locating the motivations of feminist philosophers who concern themselves with the "maleness" of philosophy & the "problems of difference" in feminist theory. In **Response to Bordo's "Feminist Skepticism and the 'Maleness' of Philosophy,"** Judith Butler (Johns Hopkins U, Baltimore, Md) challenges Bordo's ideas about the theoretics of heterogeneity by suggesting that the political efficacy of feminism does not, in fact, depend on arguing from the perspective of women, & that heterogeneity of the category "women" serves to move feminist scholars toward more self-critical, democratizing, abstract thinking. In **Reflections on "Feminist Skepticism, the 'Maleness' of Philosophy" and Postmodernism,** Maureen Milligan (U of Texas Medical Branch, Galveston) analyzes the concerns of both Bordo & Jean Grimshaw (*Philosophy and Feminist Thinking,* Minneapolis: U of Minnesota Press, 1986)–to whose ideas Bordo's work is itself a response–clarifies the concepts about which the scholars agree & disagree, & suggests why the resulting debate among postmodernists has significant implications for feminist epistemology & politics. In **Gender and Other Categories,** Linda Fisher (U of Windsor, Ontario N9B 3P4) discusses the issues raised in Bordo's analysis of heterogeneity & generality that she finds persuasive & the weakness she finds in Bordo's concluding remarks. In **Applying the Concept of Gender: Unsettled Questions,** Jane S. Upin (Wright Coll, Chicago, Ill) supports & extends Bordo's claim that the exclusion of female voices from philosophical discourse is both politically & epistemologically significant & discusses the difficulties inherent in employing gender as an analytical category. In **Philosophy and Feminism: The Case of Susan Bordo,** Susan E. Bernick (Furman U, Greenville, SC) calls attention to ambiguities that result from labeling philosophy as male & commends Bordo for never losing sight of women's lived experiences in her work. In **"Maleness" Revisited,** Susan Bordo (Le Moyne Coll, Syracuse, NY) explores how the recent Clarence Thomas/Anita Hill hearings demonstrate the implications of her analysis, clarifies faulty interpretations about how to use gender as an analytical category, & reiterates why feminists should continue to problematize the maleness of philosophy. 50 References. Atkinson, Jane Monnig (Dept Sociology/Anthropology Lewis & Clark Coll, Portland OR 97219), **Shamanisms Today,** in *Annual Review of Anthropology,* 1992, 21, 307-330.

¶ Recent multidisciplinary work on shamanism, in psychological & in religious studies, has been comparative; it has been preoccupied with the psychological/physiological state of the shamans (ie, altered states of consciousness) & with the therapeutic value of shamanic healing. This quest for a rational basis for shamanic practices contrasts contemporary ethnographic research in anthropology, which focuses on single cultural traditions & connects shamanism to wider social processes. The detachment of shamanism from discourses & practices operating in historically situated & cultural mediated contexts can be alleviated by incorporating the results of the ethnographic literature which illustrate that shamanism is a target of organized religion & contains highly gendered assumptions, & that the meaning of shamanic texts is relevant. 258 References. Bondi, Liz (Dept Geography U Edinburgh, EH8 9XP Scotland), **Gender and Dichotomy,** *Progress in Human Geography,* 1992, 16, 1, Mar, 98-104.

¶ In the 1990s, a major trend in feminist geography is to extricate embedded patriarchal concepts of gender. Once familiar gender inequalities in academia have been exposed, the feminist geographer further empowers herself by deconstructing the home/work & public/private dichotomies, & exploring their new meanings within the urban environment. The feminist strategy equality/difference is yet another gendered notion. Because such dichotomy-destabilizing analyses critically trap the theorist, postmodernist thought is proposed as an alternative. However, without a proper foundation in a degendered knowledge theory, feminist geography is limited to reevaluating multiple patriarchal meanings inherent in conceptual dichotomies. 67 References. J. Sadler (Copyright 1993, Sociological Abstracts, Inc., all rights reserved:)

93Z9282

Bondi, Liz (Dept Geography U Edinburgh, EH8 9XP Scotland), **Gender Symbols and Urban Landscapes,** *Progress in Human Geography,* 1992, 16, 2, June, 157-170.

¶ An exploration of the gender imagery of urban landscapes, considering the interplay between sociological & symbolic aspects of gender. After examining how gender categories are inscribed within appraisals of architectural forms, pointing to the persistence of an essentialist, biological interpretation of gender difference, attention turns to feminist interpretations of the urban environment. It is sometimes argued that women live in an environment made by men that is hostile or insensitive to women's needs. This view is criticized for its oversimplified treatment of women as victims & men as agents, & for its failure to acknowledge that attempts to challenge the subordination of women emanate from within patriarchy. Feminist studies of urban change have also shown how the gender ideologies of particular periods are imprinted on & persist within urban landscapes. As gender divisions change, so urban forms become anachronistic obstacles to the men & women who inhabit them. Gentrification is interpreted as a solution to the problems created by suburban forms that expressed a nineteenth-century middle-class notion of separate spheres for men & women. Its association with postmodernism is explored, & it is argued that images of femininity & masculinity associated with gentrification should be viewed as a representation, rather than a transformation, of hierarchical gender relations. 82 References. Castendyk, Stephanie, A Psychoanalytic Account for Lesbianism, *Feminist Review,* 1992, 42, autumn, 67-81.

¶ Drawing on other studies that have attempted to assess lesbianism in analytical theory (see, eg, Hamer, Diane, "Significant Others: Lesbianism and Psychoanalytic Theory," *Feminist Review,* 1990, 34, 134-151), two possible ways of acquiring a lesbian object choice are explored. The main presuppositions are that: homosexuality is the result not of pre-Oedipal but of Oedipal conflict, as this is the phase in which sexual identity & orientation is formed; & the Oedipal conflict is the name for essentially two separate developments (ie, the acquisition of a sexual identity & the making of an object choice). It is argued that homosexuality is a possible & productive way of preserving the capacity for sexual lust against various threats that the child experiences during the Oedipal phase. These threats against her erotic capacity can either occur when the girl tries to establish her own sexual identity or afterwards, when she faces the task of making an adequate object choice. 7 References. S. Millett (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Chodorow, Nancy J. (U California, Berkeley 94720), **Heterosexuality as a Compromise Formation: Reflections on the Psychoanalytic Theory of Sexual Development,** *Psychoanalysis and Contemporary Thought,* 1992, 15, 3, 267-304.

¶ It is argued that the norm of heterosexuality has been adopted in psychoanalysis without a developmental account of "normal" heterosexuality. In some cases, it has been assumed that heterosexuality is innate, but biology cannot explain either cultural or private fantasies, or the child's focus on the mother. Any explanation for sexuality has to include the individual's life history & the cultural-linguistic location. Heterosexuality has also been addressed by Sigmund Freud & others as the same type of entity as homosexuality, perversion, or any sexual outcome, ie, a compromise formation, a symptom, a defense, etc; as such, it cannot be distinguished from these other entities, which is further complicated by the linkage between gender sexual development. Further, once perverse behaviors are removed from either homosexuality or heterosexuality, one is hard-pressed to distinguish passionate homoerotic true object love from passionate heteroerotic true object love. Given only these general & indistinct accounts of heterosexuality, it should be investigated for its own sake, which should lead to an understanding of sexuality in all forms. M. Pflum (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Comas-d'Argemir, Dolors (U Barcelona, E-08007 Spain), **Gender, Kinship and Identities: Paths in Greek Social Anthropology,** *Critique of Anthropology,* 1992, 12, 2, June, 209-213. **Translated by Karl J. Peshkal.**

¶ A review article on a book edited by Peter Loizos & Evthymios Papataxiarchis, *Contested Identities: Gender and Kinship in Modern*

Greece (Princeton, NJ: Princeton U Press, 1991 [see listing in IRPS No. 67]). The book describes the major emphases for promoting the study of gender in Greece, moving beyond analyses centered on the domestic environment to explore the idea that sexuality & kinship give rise to a discourse & a series of representations that provide the structure for domestic gender models. The extent to which these discourses appear in other areas of social life, & how they are structured, are examined. The book first investigates married couples & the domestic models of gender, & then introduces alternative contexts. While analysis of discourse on gender facilitates an understanding of perceptions about gender, it fails to achieve a critical interpretation of their social significance; such a focus is suggested for future analysis. 7 References. S. Millett

Connell, R. W. (Stevenson Coll U California, Santa Cruz 95064), **A Very Straight Gay: Masculinity, Homosexual Experience, and the Dynamics of Gender,** UM *American Sociological Review*, 1992, 57, 6, Dec, 735-751.

¶ A conceptual approach to changes in masculinity is formulated that emphasizes the dynamics of the gender order as a whole, with homosexual masculinity an important locus of these dynamics. Following a critique of conventional discourses of masculinity, a theorized life-history method for researching gender is presented & applied to life history from 8 members of an Australian gay community. Results indicate (1) initial engagement with hegemonic masculinity, (2) sexuality as the key site of difference, & (3) gradual closure based on relationships or on bodily experience that eroticizes similarity. Conventional masculinity is an aspect of the object of desire, yet is subverted by this object-choice; producing a contradictory masculinity. Though these men do not directly contest the gender order, the reification of "gayness" provides a social basis for sexual freedom, & the stabilization of a dissident sexuality opens possibilities for changes in the social structure of gender. 87 References. Di Febo, Giuliana, ***Sapere e pregiudizio*** (*Sapere e pregiudizio*), UM *La Critica Sociologica*, 1991-1992, 100-101, Jan-Mar, 110-112. (ITA)

¶ A review article on a book by Carmela Covato, *Sapere e pregiudizio* ([Knowledge and Prejudice] Rome: Archivio Guido Izzi, 1991 [see listing in IRPS No. 67]). A positive appraisal is offered of the book for its use of criticism & research published by feminist scholars over the past twenty years. Special praise is given for the individualization of the relationship between education & symbolic models analyzed from an anthropological perspective. M. Meeks

93Z9290

Dickerson-Putman, Jeanette (Indiana U-Purdue U, Indianapolis 46202), **Age and Gender Stratification in the Highlands of Papua New Guinea: Implications for Participation in Economic Development,** UM *Human Organization*, 1992, 51, 2, summer, 109-121.

¶ Drawing on data obtained via formal interviews with 6 females & 1 male in Ganaga, supplemented by interviews with a random sample of 126 informants, it is examined how the choices & opportunities of women in a contemporary Highland community in Papua New Guinea are shaped by pre-contact systems of both age & gender stratification. Of particular interest are the differing ways in which change & development can affect different age groups in a society characterized by age stratification. The salient features of the pre-contact culture of this community are summarized, & the nature & style of economic development introduced into the community described, noting how the economic participation of women is constrained by contemporary notions of age & gender stratification. This case study illustrates the complex task of integrating Third World women into the development process. 3 Tables, 111 References. Adapted from the source document.

Early, Barbara Pee (2212 Glasgow Rd, Alexandria VA 22307), **Viewing the Differential Responses of Boys and Girls in Treatment through a Feminist Lens,** *Child & Adolescent Social Work Journal*, 1992, 9, 3, June, 239-248.

¶ According to the feminist perspective, neither treatment programs nor the empirical literature adequately differentiate emotionally disturbed children's needs by gender. Feminist theory on this topic is applied to clinical observations of 7 girls & 28 boys (all special education students of latency age), who produced drawings in response to the reading of fairy tales, & completed a moral development instrument. In their drawings, the girls focused on the interaction of characters from the stories, while the boys focused on aggressive aspects. On the moral development instrument, the girls tended to use responsibility to explain their judgments, while the boys used rules. These results support feminist theory that boys & girls have distinctive thinking patterns. Treatment programs for young children should be modified to reflect this differential development. 17 References. Adapted from the source document.

Feingold, Alan (Dept Psychology Yale U, New Haven CT 06520), **Sex Differences in Variability in Intellectual Abilities: A New Look at an Old Controversy,** UM *Review of Educational Research*, 1992, 62, 1, spring, 61-84.

Comment, 85-88.

¶ A review of the literature indicates that research on gender differences in intellectual capacity has focused on male (M)-female (F) differences in average test performance. In an examination of gender differences in variability on several national, standardized tests, Ms were consistently more variable than Fs in quantitative reasoning, spatial visualization, spelling, intelligence quotient levels, & general knowledge. In **Variability: A Pernicious Hypothesis,** Nel Noddings (Stanford U, Calif) discusses the historical context of the variability hypothesis & questions its validity. If such research is to continue, it is suggested that the range of measures used be less restricted by research dominated by masculine thinking. 5 Tables, 1 Figure, 88 References. Adapted from the source document.

93Z9293

Findlay, Eileen J. (U Wisconsin, Madison 53706), **Gender, Generation, and Honor in Colonial Mexican History,** *Radical History Review*, 1992, 53, spring, 81-89.

¶ A review essay on three books by: Silvia Arrom, *The Women of Mexico City*, Patricia Seed, *To Love, Honor, and Obey in Colonial Mexico: Conflicts of Marriage Choice, 1574-1821*, & Ramón Gutiérrez, *When Jesus Came, the Corn Mothers Went Away: Marriage, Sexuality, and Power in New Mexico, 1500-1846* (Stanford: Stanford U Press, 1985, 1988, & 1990, respectively [see listings in IRPS No. 67]). While Arrom highlights gender's role in shaping reform policies in late eighteenth-century Mexico, a systematic material analysis of gendered power relations is lacking. Seed explores generational conflicts mediated by church & the Spanish state in Mexico City (1574-1821), based on testimony from ecclesiastical & secular court documents. Emphasizing the role of the honor code in familial power relations, & the state's normative patriarchy, Seed mistakenly suggests that the shift toward a consensus favoring children & parental authority results from an undermined patriarchal legitimacy, rather than as a response to increased challenges to it. Gutierrez provides a social, religious, & political history of the northern area of colonial Mexico (today NM), focusing on aspects of conquest. While Gutierrez highlights the social (rather than economic) impact of religion, his analysis of the hegemonic Spanish honor system neglects the importance of social change. 9 References. J. Sadler

Frank, Arthur W. (U Calgary, Alberta T2N 1N4), **Medieval Bodies and Feminist History**, *Theory, Culture & Society*, 1992, 9, 4, Nov, 161-168.

¶ A review essay on books by: Carolyn Walker Bynum, *Fragmentation and Redemption: Essays on Gender and the Human Body in Medieval Religion* (New York: Zone Books, 1991) & Marie-Christine Pouchelle, *The Body and Surgery in the Middle Ages* (Morris, Rosemary [Tr], New Brunswick: Rutgers U Press, 1990 [see listings in IRPS No. 67]). Bynum's book contains previously unpublished essays on gender & the human body in medieval religion, focusing on medieval women's asceticism. The book offers critiques of Victor Turner's concept of liminality & of Max Weber's inadequate treatment of gender. Bynum is praised for his assessment of how medieval women experienced their bodies, & for unpacking the stereotype of body/soul in medieval religion. Pouchelle's book offers a lucidly constructed meditation on a single medieval text, the *Chirurgie* of Henri de Mondeville, surgeon to Philip the Fair. Pouchelle reads Mondeville's text from a reflexively hermeneutic & psychoanalytic perspective to underscore the significance of the power of mental images over the body. 9 References. W. Howard

Friedman, Michelle, **The Social Construction of Gender: Historically Changing Meanings of (White) Femininity and Masculinity**, *Critical Arts*, 1990, 5, 2, 67-111.

¶ Advertisements from a South African newspaper, the *Natal Mercury*, 1910-1980, provide a basis for clarifying the difference between sex & gender & for arguing that gender is socially constructed over time rather than being a fixed category. Definitions of masculinity & femininity are shown to vary within & among the 3 historical periods considered (1910-1930, 1930-1960, & 1960-1980), even though nearly all of the illustrations were created by men. These advertisements are balanced against the socioeconomic reality during which they were produced to explore how material needs influence both social attitudes & individual lives. Finally, it is suggested that gender relations must be studied within the larger South African social environment, including capitalism & racism, to demonstrate the mechanjsms & effects of power relations. 3 Tables, 32 Illustrations, 36 References. Gabriel, A[illegible] (Dept Anthropology U Rochester, NY 14627), **Living w[illegible] Thinking after Freud: Greek Drama, Gender, and C[illegible]**, *Cultural Anthropology*, 1992, 7, 3, Aug, 346-373.

¶ Sigmund Freud'[illegible] of Greek drama is used to explore what Euripides's *Medea* reveal[illegible] the denials & concealments of the central character, *Medea*, [illegible] about the Corinthian women's relations to their social order. It is suggested that, whether or not one seriously considers if Sophocles's *Oedipus Rex* reveals a universal or near universal "complex, " one can accept that Freud has used it to provide provocative ideas in thinking about puzzles in parent-child relations. It is contended that, in *Medea*, Euripides uncovers an intricate relationship between gender & universalistic & particularistic principles, & evinces women's familiarity & involvement with both. Furthermore, Euripides reveals less obvious aspects of the cultural creation of gender, namely its dynamic & transformative nature, & demonstrates that gender can serve as a mask to disguise other issues. *Medea* also presents the paradox that women may deny, comply with, consent to, or resign themselves to their subordinate position, yet they may be cognizant of it & may resist it. The arguments are presented by exploring interpretations offered by other commentators on *Medea*. 48 References. S. Millett

Goldberg, Christine (Instit Soziologie, A-1010 Vienna Austria), **Männer bei der Hausarbeit–Frauen im Beruf. Eine empirische Analyse über die Einstellungen zur Berufstätigkeit der Frau und ihre Auswirkungen auf die Beteiligung in der Hausarbeit** (Men at Housework–Women in Professions. An Empirical Analysis of Women's Attitudes toward Careers and the Effects of the Household Division of Labor), *Österreichische Zeitschrift für Soziologie*, 1992, 17, 3, 15-34. (GER)

¶ To determine patterns in household division of labor (DofL) among Austrian married couples, interview data were obtained from 616 married adults ages 16-69. The analysis focuses on the effect of wives' (Ws) outside employment on household DofL. Results suggest that Ws face more conflicts between work at the job & at home; however, husbands (Hs) are increasingly becoming aware of how these conflicts affect Ws. Hs' attitudes toward sharing household tasks vary according to their basic conception of the family & the amount of esteem they hold for their Ws' work. In contrast, the attitude of Ws with Hs of high career status is primarily one of role conformity in running the household. W's attitudes toward family & their own jobs are not so important in household DofL. 4 Tables, 2 Graphs, 58 References. Adapted from the source document.

Greed, Clara H. (Faculty Built Environment Bristol Polytechnic, Frenchay BS16 1QY England), **The Reproduction of Gender Relations over Space: A Model Applied to the Case of Chartered Surveyors**, *Antipode*, 1992, 24, 1, Jan, 16-28.

¶ A conceptual framework is developed to consider how the gender of British surveyors' influences attitudes toward land use & development, & how this gender difference is reproduced on the built environment through the development process. It is argued that surveyors do not exist in a vacuum separate from society or from other professional groups concerned with the built environment. The likely impact of the processes & value systems on the end product, the built environment, is discussed in the context of the surveyor's role in the property development process. 2 Figures, 25 References. Hardie, Elizabeth A. & McMurray, Nancy [illegible] Psychology U Melbourne, Parkville Victoria 3052 Austr[illegible], [illegible]-Stereotyping, Sex Role Ideology, and Menstrual Attitudes: A Social Identity Approach**, *Sex Roles*, 1992, 27, 1-2, July, 17-37.

¶ The effects of self-stereotyping (SS) & sex-role ideology (SRI) on Australian women's menstrual attitudes are investigated. In study 1, 350 undergraduate women at a Queensland college showed significant menstrual attitude differences when grouped according to traditional, moderate, or feminist SRI. In study 2, the SRI effect was replicated in a more ethnically diverse sample of 183 undergraduate women at a large university in Melbourne. Women's own attitudes were separated from their stereotyped beliefs about most women & further analyses were conducted within the framework of social identity theory to explore the role of SS. The difference between women's own menstrual attitudes & their ratings as most women's attitudes varied as a function of degree of SS & perceived prototype; further research is needed to clarify the SS bias. 5 Tables, 26 References. Jackson, Linda A. & Ervin, Kelly S. (Dept Psychology Michigan State U, East Lansing 48824), **Height Stereotypes of Women and Men: The Liabilities of Shortness for Both Sexes**, *Journal of Social Psychology*, 1992, 132, 4, Aug, 433-445.

¶ Height stereotypes of females (Fs) & males (Ms) in the US were examined using 2 methods of stereotype assessment: the trait ratings method & the % estimates method. Ss (N = 237) rated F or M targets who were tall, of average height, or short on 7 evaluative dimensions: social attractiveness, professional status, personal adjustment, athletic orienta-

on, masculinity, feminity, & physical attractiveness. Findings indicated at height stereotypes of Ms encompassed 6 of these dimensions & suggested that shortness is more of a liability than tallness is an asset. Height stereotypes of Fs encompassed only 2 dimensions & again suggested the liabilities of shortness. Stronger stereotypes were obtained with the trait ratings method than with the % estimates method, although no differences in the content of the stereotypes were observed. Implications for future research on height effects on person perception & for the interchangeability of different methods of stereotype assessment are discussed. 2 Tables, 53 References. Adapted from the source document.

Jones, Tricia S. & Remland, Martin S. (Temple U, Philadelphia PA 19122), **Sources of Variability in Perceptions of and Responses to Sexual Harassment,** *Sex Roles,* 1992, 27, 3-4, Aug, 121-142.

Drawing on social exchange theory, sexual harassment interactions are described in terms of perceived or actual inequities in incurred costs or rewards between targets & perpetrators. The effects of severity of harassment, target response, target gender, & rater gender on perceptions of harassment were then examined experimentally using 94 male & 116 female undergraduates (90% white) from 2 eastern US universities. Results indicated that all independent variables affected perceptions of & responses to sexual harassment situations. 31 References. Adapted from the source document.

Karmasin, Sophie (Konsumentenverhaltens Gesundheitsmarkt, A-1090 Vienna Austria), **Das Androgyniekonzept als soziale und personale Durchsetzungsstrategie** (The Concept of Androgyny as a Social and Personal Perseverance Strategy), *Österreichische Zeitschrift fur Soziologie,* 1992, 17, 3, 3-14. (GER)

¶ To determine which type of gender role would function best in terms of women's level of satisfaction with life & career, interview data were obtained from 402 female (F) nurses in 18 Austrian public & private hospitals. Analysis shows that the concept of androgeny led to the highest levels of satisfaction & efficiency. This conclusion is remarkable because the hospital is a special social field with a strict hierarchical structure encouraging traditional F behavior. Implications for dismantling long-standing gender roles in the contemporary sociocultural system are discussed. 4 Tables, 33 References. Adapted from the source document.

Lamott, Franziska (Biedersteinerstr 8, D-8000 Munich 40 Federal Republic Germany), **Weibliche Emanzipation als Symptom und Delikt. Die Frauenfrage im kriminologischen Diskurs der Jahrhundertwende** (Female Emancipation as Symptom and Offense. Women as Subject of Criminological Discourse at the Turn of the Century), *Zeitschrift für Sexualforschung,* 1992, 5, 1, Mar, 25-40. (GER)

¶ A historical analysis of texts in criminology, psychoanalysis, & sexual pathology demonstrates how the male practitioners in these disciplines reacted to changing relations between the sexes at the turn of the twentieth century. It is argued that women were labeled "criminal" or "pathological" as a way of defending against the threat posed by the dissolution of gender differences previously taken for granted, & the law was used to keep women in their place. However, different texts display not only a fear, but a fascination, with the new forms of womanhood that were emerging; this ambivalence was expressed in men's fantasies about femininity. 50 References. Langellier, Kristin M. (Dept Speech Communication U Maine, Orono 04469), **Contemporary Quiltmaking in Maine: Re-Fashioning Femininity,** *Uncoverings,* 1990, 11, 29-55.

¶ For contemporary quilters in Me, quiltmaking constitutes an empowering feminine identity, both personal & social, within the multiple constraints of their lives. In an examination of the changing meanings of quiltmaking as a feminine practice, survey data on quilters' demographics, histories, & practices were collected from the Pine Tree Quilters Guild (N = 900), a statewide organization. It was found that quiltmaking intersects with all aspects of women's lives & other social institutions in which they are engaged, especially the family, domestic & paid labor, the media, & the marketplace. It is argued that contemporary quiltmaking in Me embraces but significantly refashions traditional meanings for femininity. Thus, what appear as merely personal reasons for quiltmaking, simultaneously reflect the social organization of women & their lives as they undergo transformation in the late twentieth century. L. Dorn

Levant, Ronald F. (1093 Beacon St Suite 3C, Brookline MA 02146), **Toward the Reconstruction of Masculinity,** *Journal of Family Psychology,* 1992, 5, 3-4, Mar-June, 379-402.

¶ The traditional male role socialization process produces men adept at the skills of provision & protection, but lacking the abilities to understand their own emotions & be empathic with others. Drawing on a review of the literature on the "crisis" of masculinity, a reconstruction is proposed that fosters a positive image of masculinity & rejects an outmoded model of aggressive, dominant manhood. It is contended that this reconstruction must respond nondefensively to the feminist critique of patriarchy, & empathically to men. The new model includes a man's: willingness to set aside his own needs for the sake of his family; ability to withstand hardship to protect others; & means to express love by doing things for others. It is suggested that this reconstruction of masculinity involves validation of the skills that men learn & of the ways that men have of showing care & concern, & opportunities to learn some of the skills that women learn as girls, eg, empathy, emotional self-awareness, & emotional expressivity. 73 References. Lichtblau, Klaus (U Kassel, D-3500 Federal Republic Germany), **Eros and Culture: Gender Theory in Simmel, Tönnies and Weber,** UM *Telos,* 1989-1990, 82, winter, 89-110.

Translated from German by Guenther Roth.

¶ The reception of the gender issue at the turn of the century within classical German sociology is discussed with respect to three main topics: (1) It is shown how Georg Simmel & Ferdinand Tönnies analyzed various objectifications of Western culture in gender terms. It is especially the merit of Simmel to ask whether a genuine "female culture" is possible at all vis-à-vis a a dominant "objective culture" that has been shaped by a "male principle." (2) Max Weber's views on the significance of the erotic sphere as a genuine subjective culture in a "disenchanted" world are analyzed, considering the erotic relation of the sexes as an example for the place of a strictly aesthetic & expressive lifestyle in the pluralistic model of cultural modernity. (3) Simmel's project of a "sociological aesthetics" is analyzed, & linked to the idealist theory of autonomous aesthetics. Simmel's inquiry into "sociality" & "coquetry" illustrates how the different experiences of modernity in the various spheres can be related in such a way that a purely formal unity is at least conceivable on the symbolic level. Lindemann, Gesa (Paul-Lincke-Ufer 3a, D-1000 Berlin 36 Federal Republic Germany), **Die leiblich-affektive Konstruktion des Geschlechts. Für eine Mikrosoziologie des Geschlechts unter der Haut** (The Bodily-Affective Construction of Gender. Toward a Microsociology of Under-the-Skin Gender), *Zeitschrift für Soziologie,* 1992, 21, 5, Oct, 330-346. (GER)

¶ A study is presented of the affective & corporal dimensions of gender construction, widely neglected by sociologists. Proceeding from Helmut Plessner's concept of eccentric positionality in "Die Einheit der Sinne" ([The Unity of Meaning] in *Gesammelte Schriften III* [Collected Writings III], Frankfurt: Suhrkamp, 1980), two key points are made: (1) individual body experience & affectivity are important ways of maintaining the permanency & stability of gender construction; & (2) there is nothing similar to "natural" body experience; rather, specific body experiences are themselves subject to social construction. Special emphasis is given to passive body experience & to bodily irritations experienced by transsexuals or their friends & partners during the process of gender change. 68 References. Magee, Brian, Mujeres. Los derechos y las equivocaciones (Women. Rights and Wrongs), *Sociológica,* 1990, 5, 14, Sept-Dec, 323-331. (SPA)

Translated by Miriam Alfie; Reply,333-337.

¶ (A reprint of an exchange originally appearing in *The Guardian Weekly*, 1989, 26 Nov & 3 Dec.) While acknowledging that women deserve civil & legal rights equal to those of men, feminist arguments supporting such rights are critiqued. The argument that all women are as capable as all men in, eg, strength is refuted, as is the argument that women historically have had fewer opportunities to participate in society & minimal recognition of their contributions. Class differences in liberty & self-determination for both men & women are pointed out. It is concluded that, in modern Western society, women have the same legal & civil rights as men. In **Las habilidades y los derechos de las mujeras. El derecho a la replica** (The Abilities and Rights of Women. The Right to a Reply), Janet Radcliffe Richards (U of London, England) responds to Magee, arguing that although laws & institutions have been transformed, recognizing the rights of women, residual tensions remain that pressure the sexes to maintain old, familiar patterns. Research has shown consistently that males & females continue to be treated differently from infancy onward. Magee's arguments are systematically critiqued. 1 Diagram. J. Taylor (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Napholz, Linda (School Nursing U Wisconsin, Milwaukee 53201), **Sex Role Typology as a Function of Age among Registered Nurses,** *Health Care for Women International*, 1992, 13, 3, July-Sept, 303-312.

¶ The relationship between sex-role orientation & age in women working in a traditional occupation–nursing–is explored, drawing on data obtained via the Personal Attributes Questionnaire from 98 registered nurses ages 30-59 in a midwest metropolitan county. Contrary to prediction, age has no significant effect on sex-role orientation. It is concluded that (1) no change in masculinity/femininity self-descriptions occur over time, (2) only some women change, & (3) changes may proceed in different directions in response to shifts in role responsibilities or other situational events. 2 Tables, 31 References. Norris, William P. (Sociology Dept Oberlin Coll, OH 44074-1095), **Liberal Attitudes and Homophobic Acts: The Paradoxes of Homosexual Experience in a Liberal Institution,** *Journal of Homosexuality*, 1991, 22, 3-4, 81-120.

¶ To investigate both victimization of & positive attitudes toward lesbians, gay men, & bisexuals at Oberlin Coll (Ohio), known as a liberal institution, questionnaire data were obtained from 277 students & employees in 1989. Varying degrees of exclusion, isolation, sexual harassment, denial of sexuality, & self-censorship emerged, pointing to two distinct populations. The paradox of extensive attitudinal support on the one hand & widespread victimization on the other was found to result from two competing values: a liberal ethos focused on equal rights & a validation of traditional gender roles. Results show that a high proportion of people were pulled between the two competing views. 8 Tables, 10 References. Adapted from the source document. Peterson, Ruth D. & Bailey, William C. (Ohio State U, Columbus 43210), **Rape and Dimensions of Gender Socioeconomic Inequality in U.S. Metropolitan Areas,** IM *Journal of Research in Crime and Delinquency*, 1992, 29, 2, May, 162-177.

¶ After reviewing & making adjustments for the limitations of previous studies, the role of gender socioeconomic inequality & other structural factors in the etiology of rape is explored, using data from the 1980 Census & Federal Bureau of Investigation's Uniform Crime Reports to examine the relationship between rape rates & various measures of general, racial, & gender socioeconomic inequality for 263 SMSAs. Results indicate that gender income inequality is a significant contributor to rape, but gender inequities in educational attainment & occupational status are not significant. Several other structural factors, including general income inequality, that are powerful predictors of rape are identified. 2 Tables, 34 References. Adapted from the source document. Rajecki, D. W., De Graaf-Kaser, Rebecca & Rasmussen, Jeffrey Lee (Dept Psychology Indiana U-Purdue U, Indianapolis 46205-2810), **New Impressions and More Discrimination: Effects of Individuation on Gender-Label Stereotypes,** *Sex Roles*, 1992, 27, 3-4, Aug, 171-185.

¶ The influence of individuating information regarding roles & physical features for stimulus persons labeled "woman" or "man" on experimental Ss' impressions (trait ascriptions) was tested with samples of male (M) & female (F) undergraduates (total N = 483, primarily white) at an urban public university. Analysis indicates that, to varying degrees, traditional masculine characteristics masculinized, & feminine characteristics feminized, both the F & M targets. However, the creation of such new impressions did not mean the absence of discrimination (favorability) where gender was concerned. Correlation analysis demonstrated that Ss weighed relative masculinity & femininity when judging the individuated targets in a competitive job setting: a feminine F was likely to be favored over a nonmasculine M, & vice versa. Findings highlight the need to treat impressions & discrimination separately in the individuation process. 1 Table, 1 Figure, 23 References. Adapted from the source document. Roth, Guenther (Columbia U, New York NY 10027), **Durkheim and the Principles of 1789: The Issue of Gender Equality,** IM *Telos*, 1989-1990, 82, winter, 71-88.

¶ Emile Durkheim's & Marrianne Weber's theories of evolution & gender are compared & examined in relation to the three principles of the French Revolution–liberty, equality, & fraternity. Though Durkheim upheld these principles, his theory of gender helped contain their universalist dynamic. A brief review of gender in the wake of the French Revolution is given, & Durkheim's ideas on marriage & divorce are presented. Durkheim's critique (*L'Annee sociologique*, 1910, 11, 363-369) of Weber's *Ehefrau und Mutter in der Rechtsent wicklung* ([Wife and Mother in Legal Development] Tübingen: J. C. B. Mohr, 1907) shows that he took issue with Weber's thesis that patriarchy is responsible for women's subservience. It is concluded that Durkheim's theory of evolution denied the possibility of gender equality in modern society, whereas Weber's developmental theory affirmed it. W. Howard (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Rowson, Everett K. (U Pennsylvania, Philadelphia 19104), **The Effeminates of Early Medina,** *Journal of the American Oriental Society*, 1991, 111, 4, Oct-Dec, 671-693.

¶ Evidence from the prophetic *hadith* & anecdotal literature support the existence of a form of publicly recognized & institutionalized effeminacy or transvestism among males (Ms) in pre-Islamic & early Islamic Arabian society. Unlike other Ms, these *mukhannathūn* were permitted to associate freely with women, on the assumption that they had no sexual interest in them, & often acted as marriage brokers or, less legitimately, as go-betweens. They also played an important role in the development of Arabic music in Umayyad Mecca &, especially, Medina, where they were numbered among the most celebrated singers & instrumentalists. Although they were subject to periodic persecution by the state, such measures were not based on any conclusions about their own sexual

tatus–they were not assumed to be homosexual, although a few were–but on their activities as musicians & go-betweens, which were seen as corrupting the morals of society & especially of women. A particularly severe repression under the caliph Sulaymān put an end to the *mukhannathūn's* prominence in music & society, although not to their existence. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Salminen, Simo & Glad, Timo (Dept Social Psychology Helsinki U Technology, SF-00100 Finland), **The Role of Gender in Helping Behavior**, *Journal of Social Psychology*, 1992, 132, 1, Feb, 131-133.

¶ Analysis of questionnaires completed by 40 volunteer counselors after responding to 269 calls to telephone crisis centers in 4 cities in Finland are used to examine the impact of gender on helping behavior. Findings reveal that calls received by female (F) volunteers were longer than those received by male (M) volunteers, irrespective of the caller's gender or the interaction between the volunteer & the caller. Chi-square testing showed that volunteers helped 66% of the M callers by "just listening," but helped more F than M callers by "empathetic understanding." Volunteers were more willing to keep in touch with F than with M callers. Cross-gender hypotheses on call length & helpfulness were not confirmed. 9 References. M. Serret, Estela (Dept Sociología U Autónoma Metropolitana, Azcapotzalco 02000 Mexico DF), **La subjetividad femenina en la cultura occidental moderna** (Feminine Subjectivity in Modern Western Culture), *Sociológica*, 1990, 5, 14, Sept-Dec, 155-169. (SPA)

¶ An attempt is made to show how feminine subjectivity & identity are constructed within contemporary Western culture, with focus on the conceptualizations of equality & sex & the role of the political order. It is argued that Western concepts of equality & technological progress (eg, birth control) have led to awareness of a double standard for women & thus to a challenge to traditional perceptions of women as subordinate to men. Implications for the symbolic construction of femininity are considered. 27 References. Adapted from the source document. (Copyright 1993, Sociological Abstracts, Inc., all rights reserved.)

Signorielli, Nancy & Lears, Margaret (U Delaware, Newark 19716), **Children, Television, and Conceptions about Chores: Attitudes and Behaviors**, *Sex Roles*, 1992, 27, 3-4, Aug, 157-170.

¶ Cultivation theory (eg, see Signorielli, N., & Morgan, M., *Cultivation Analysis: New Directions in Media Effects Research*, Newbury Park, Calif: Sage Publications, 1990) forms the theoretical basis for an investigation of the relationship between TV viewing & sex role attitudes/behaviors in relation to houshold chores in a sample of fourth- & fifth-grade children (N = 530) in the mid-Atlantic region. Analysis of questionnaire data yields statistically significant relationships between TV viewing & scores on an index of attitudes toward sex-stereotyped chores. Although viewing was not related to which chores the children actually performed, there were statistically significant relationships between attitudes, behaviors, & viewing. For both boys & girls, there were moderate to strong relationships that increased with TV viewing between attitudes about who should do certain chores, & about whether the children said they did chores typically associated with the other sex. 2 Tables, 33 References. Simonton, Dean Keith (Dept Psychology U California, Davis 95616-8686), **Gender and Genius in Japan: Feminine Eminence in Masculine Culture**, *Sex Roles*, 1992, 27, 3-4, Aug, 101-119.

¶ Data drawn from 3 biographical dictionaries on a sample of 2,453 Japanese creators & leaders active between 580 & 1959 are analyzed to test the hypothesis that the number of distinguished females (Fs) fluctuated over consecutive historical periods according to concomitant changes in the dominant male (M) culture. Specifically, generational time-series analysis of 69 consecutive 20-year periods is employed to evaluate changes in F literary & nonliterary eminence as a function of M literary activity, power & aggressive behavior, & ideology. Although the emergence of gender-biased belief systems was negatively associated with F distinction in all domains, literary success of both Ms & Fs was linked to similar contextual factors, especially a negative association with M aggressive activities. The group-level results are interpreted in terms of possible individual & interpersonal processes. 54 References. Adapted from the source document. 93Z9325

Thorp, John (Dept Philosophy U Western Ontario, London N6A 3K7), **The Social Construction of Homosexuality**, *Phoenix*, 1992, 46, 1, spring, 54-61.

¶ Arguments supporting the social construction of homosexuality often use transcultural comparisons as support, contending that since homosexuality is differently regarded & differently organized in various cultures, it is a social construct. The favored comparison is often with ancient Greek society, argued most notably by David Halperin in *One Hundred Years of Homosexuality: And Other Essays on Greek Love*, (New York/London: Routledge, 1990), which extends the work of Michel Foucault in his *History of Sexuality* (no publication information provided). Here, Halperin's various claims about the way that homosexuality was seen differently in ancient Greece than it is today are critically examined. Relying chiefly on a close reading of the famous speech of Aristophanes in Plato's *Symposium*, it is argued that: (1) Plato's language shows that homosexuals were thought of as a special category; (2) increasingly our own categorization is into three groups–gay, lesbian & straight–rather than into the old homo-heterosexual; & (3) while there certainly were passing initiatory-rite style homosexual practices, the whole burden of Aristophanes's speech is to speak of & recognize those cases where men's erotic longing for men is lifelong, rather than just a passing fancy of youth. It is concluded that the case cannot be made that Greek society was deeply different from our own in the way it constructed homosexuality, though this does not negate the argument that homosexuality is a social construct. Vrugt, Anneke (Faculteit Psychologie Vakgroep Sociale Psychologie, NL-1018 WB Amsterdam Netherlands), **Preferential Treatment of Women and Psychological Reactance Theory: An Experiment**, UM *European Journal of Social Psychology*, 1992, 22, 3, May-June, 303-307.

¶ The implementation of preferential treatment for members of a targeted class of people, exemplified by affirmative action programs for women, is explored. Specifically, questionnaire data from 187 male academic staff members at the U of Amsterdam, Netherlands, are utilized in a test of the hypothesis that a presentation of the preferential treatment of women, which threatens perceived freedom, would activate more psychological reactance in persons with high than low self-esteem. Findings indicate that the presentation of the preferential treatment of women as the only effective way of reducing the disadvantage of women resulted in a relatively negative attitude toward this measure & in low perceived legitimacy of the measure. The analysis reveals no main effects for self-

0038-0202/93 $1.50

esteem, nor other interactions between self-esteem & the experimental conditions. The reactance effects reveal that the simple imposition of preferential treatment may result in extensive noncompliance. Further, the results do not support the expectation that lecturers would manifest more resistance to the preferential treatment than professors. 8 References. S. Millett

Wetzel, Janice Wood (School Social Work Adelphi U, Garden City NY 11530), **Profiles on Women: A Global Perspective,** *Social Work in Health Care,* 1992, 16, 3, 13-27.

¶ A feminist human rights perspective on the universal social condition of women illuminates the negative effects of second-class status on females' (Fs') physical & mental health. Fs' collective personal experience is outlined, together with cross-cultural & class differences regarding coercive sex-role expectations. By addressing both the universal strengths of Fs & implications for male development, a case is made for changing sex-role expectations of both sexes. To that end, suggestions for modifying the universal profile of Fs are provided, highlighting populations at risk & policy insights of social development experts. Finally, a "global zeitgeist" is posited, based on an international study of successful health & mental health projects for Fs all over the world. 14 References. AA

Wheelan, Susan A. & Verdi, Anthony F. (Temple U, Philadelphia PA 19122), **Differences in Male and Female Patterns of Communication in Groups: A Methodological Artifact?,** *Sex Roles,* 1992, 27, 1-2, July, 1-15.

¶ Communication patterns in all-male (M), all-female (F), & mixed-sex groups are examined using audiotaped data of 27 white middle-class participants at a group relations conference in 1988. The groups met for longer periods of time than did those in previous studies that reported gender differences in task & maintenance communication patterns. Here, no significant differences in M & F communication patterns are identified, though the typical pattern reported in previous literature was present in the first hour of the groups. After one hour the groups exhibited no consistent communication patterns, & stereotypic sex differences disappeared. It is concluded that the findings of previous research are due to the limited time period used in the investigations. 4 Tables, 51 References. Adapted from the source document.

White, Merry (Dept Sociology Boston U, MA 02215), **Home Truths: Women and Social Change in Japan,** UM *Daedalus,* 1992, 121, 4, fall, 61-82.

¶ Current realities in Japanese women's lives are investigated from their own perspectives. The diversity observed by considering social class, historical generation, & changing legal & occupational conditions for women is illustrated by providing case examples. Emphasis is given to the changes provided women by new labor laws & the changes women themselves are demanding in workplace conditions. The relationship between women & men also is changing, with women constructing new patterns of companionship, marriage, & divorce. Demographic factors, eg, the falling birthrate & rising % of the elderly, also have a profound impact on women's lives. Diversity & change, two realities usually hidden from public acknowledgement in Japanese society, are forced into high relief by women's new agenda. Modified AA

Williams, Karen B. & Cyr, Ramona R. (Dept Psychology Illinois State U, Normal 61761), **Escalating Commitment to a Relationship: The Sexual Harassment Trap,** *Sex Roles,* 1992, 27, 1-2, July, 47-72.

¶ Divergent perceptions of sexual harassment held by 60 male (M) & 60 female (F) undergraduates at a private midwestern US university were explored in vignettes describing a perpetrator's gradual sexual advancements & a target's escalating commitment to their relationship. Results indicate that Ms & Fs interpreted the M perpetrator's actions differently, particularly when the F target made prior commitments to a friendly relationship. Specifically, Ms' ratings of sexual harassment decreased when the F target participated in increasingly informal, friendly interactions; Fs' ratings remained relatively constant despite the target's reactions. Attributions of & reactions to the harassment also were influenced. Interestingly, as the target's commitment increased, both Ms & Fs reported a lower likelihood that the target would seek help. 3 Tables, 2 Figures, 41 References. Adapted from the source document.

——, **Gendered Institutions,** UM *Contemporary Sociology,* 1992, 21, 5, Sept, 565-595.

¶ In **From Sex Roles to Gendered Institutions,** Joan Acker (U of Oregon, Eugene) introduces this review symposium on twenty books (see listings in IRPS No. 67). It is argued that gender needs to be understood not only as a social category, whereby it is distinguished from the physical category of sex, but also in terms of how gender differentiation in production & reproduction & women's disadvantages are produced. The works reviewed address how societal institutions reflect & are constituted by gendered processes (overt, symbolic, interactional, or internal) & a gendered division of labor. Topics considered include: women's participation in politics, in male-dominated professions & business organizations, & in patriarchal religious institutions; women's treatment under the law; women's culture; & women's contributions to history. Symposium contributors include: Jill Quadagno (Florida State U, Tallahasee), **Does Women's Participation Matter?;** Barbara Reskin (Ohio State U, Columbus), **Women in Science: Conflicting Views on Where and Why;** Patricia A. Roos (Rutgers U, New Brunswick, NJ), **Breaking Down Barriers: Women's Entry into the Professions;** Ronnie J. Steinberg (Temple U, Philadelphia, Pa), **Gender on the Agenda: Male Advantage in Organizations;** Adair T. Lummis (Hartford Seminary, Conn), **Women in Patriarchal Religious Institutions;** Lise Vogel (Rider Coll, Lawrenceville, NJ), **Shifting the Boundaries: Feminist Legal Scholarship;** Diane Barthel (State U of New York, Stony Brook), **They Also Ga[illegible] Women, Men, and Museums;** Steven M. Buechler (Mankato State U, [illegible]), **Women's History as a Growth Field;** & Louise A. Tilly (New [illegible]ool for Social Research, New York, NY), **Missing Connections: Gender and History.** 63 References. M. Pflum

subject index

Ability
ability tests, underlying structures; data analysis method; vocational test data; Israeli males; 93Z6765
Aboriginal Australians
adolescents, social change impacts/economic future, Australia/Nigeria/US; 3-book review essay; 93Z8387
mortality patterns, Australian Aborigines vs other indigenous groups; statistical data; 93Z8300
Abortion
abortion attitudes, evangelical vs mainline ministers; 1989 questionnaire data; ministers/congregation members, rural midwestern US; 93Z8135
abortion attitudes, path model methodology critiqued; comment/reply; 93Z8541
abortion attitudes, regional subcultures, US; 1988-1990 General Social Survey data; 93Z8583
abortion debate, Poland; 93Z8551
abortion funding policies, US, redistributive/morality influences; 1983-1989 published data; 93Z8566
abortion issues, Europe, 1920-1991; 93Z8548
abortion issues/ideologies; personal experience; abortion clinic counselor, New York City; 93Z8579
abortion legalization, USSR, 1920, German/Soviet physicians' discourse; 93Z8580
abortion, constitutionality issues; 1973-1975 court cases; Austria, Germany, Italy, France, US; 93Z8200
abortion, lower-class women, Rio de Janeiro, Brazil; interviews; slum neighborhoods; 93Z8563
abortion, prevalence/accessibility/doctors' attitudes, Canada; 1970-1991 official statistics/surveys; 93Z8553
fetal sex identification/selective abortion, genetic counselors' attitudes, US; questionnaire data; 93Z8545
induced abortion, developing countries, research problems; 93Z8544
maternal mortality, developing countries; literature review; 93Z8565
premarital pregnancy/its resolution, white adolescent females; attitudes/personality variables; National Longitudinal Survey of Youth; 93Z8571
RU486 (abortion drug) availability, developing countries; 93Z9276
Absenteeism
labor absence; workgroup norms/economic factors; 1988 survey data; Australia/Canada/New Zealand/US; 93Z7267
nonnormal absenteeism distributions, data transformation technique; empirical data; 93Z7332
psychiatric leaves of absence, college student, reentry policies; survey; article/comments; 93Z9012
Abuse
physical abuse/sexual victimization/marijuana-hashish use relationship, delinquent juveniles, structural model; interview data/urine samples; detainees, Tampa Bay, Florida; 93Z8997
Academic Achievement
academic performance, children; poverty; 1988 national survey data, test scores; 93Z9187
academic success, college students; lifestyle/social maturity; questionnaire data; undergraduates; Rutgers University (New Brunswick, New Jersey); 93Z8032
achievement ideology-academic achievement/underachievement relationship, African-American 5th-/6th-grade students, urban Ohio; scale data; 93Z8377
adolescent delinquents vs status offenders, neurocognitive/academic achievement differences; psychometric data; inner-city US; 93Z8974
adolescent educational aspirations, family/school influences; 1980 High School & Beyond data; black/white high-school seniors; 93Z8408
Chicano college student contradictions; dialogical research; southwestern university; 93Z7134
educational aspirations, 8th-grade students, Czechoslovakia; gender/mental ability/social background; questionnaire; 93Z8048
educational outcomes, teacher/student/other contributions; scale data; undergraduates, University of California, Los Angeles; 93Z8065
high school behavior/academic outcomes, Mexican-American immigrant students; 1986-1989 questionnaire/interview/test data; midwestern city; 93Z8004
Indian people's underrepresentation, college/university graduates, US/Canada; 93Z8041
inner-city school children, demographic/educational disparities; 1988 national data; 8th graders; 93Z7136
IQ scores/academic achievement, black adopted vs other adolescents, transracial families; records, interviews, test/other data; Minnesota; 93Z7047
parental aspirations-child academic achievement relationship, Xhosa children, polygynous vs monogamous families; questionnaire/academic record data; Transkei, South Africa; 93Z7991
personality, genetic influences; secondary data; twins, Minnesota; 93Z8339
school achievement, African American children of substance abusers; counseling intervention; school records, other data; New Orleans, Louisiana; 93Z8817
school success; family/parental structure/siblings; 1988 national longitudinal data; 93Z8469
social responsibility-academic achievement relationship, students; research review; 93Z8097
Turkish immigrant students, Belgium, poor academic performance causes; 1989-1991 questionnaire data; 93Z8396
youth educational perseverance, high vs low unemployment areas, discouraged worker thesis; survey data; England/Scotland; 93Z7283
Academic Aptitude
children, academic/social competence; family structure/resources; interview/other data; 93Z8506
children, educational examination results; examiner-examinee interaction; psychoeducational battery; 93Z7066
test score variability, gender differences; literature review; article/comment; 93Z9292
Academic Careers
career/personal support sources, university faculty; questionnaire survey; Midwest; 93Z7847
research on academics, Mexico; 7-book review essay; 93Z8101
Academic Degrees
nurses' attitudes toward suicide; age/clinical specialty/degree; questionnaire/anecdotal data; North Carolina; 93Z8585
Academic Departments
Dutch university philosophy departments, transition/research output; 93Z8093
program evaluation, clinical scientific vs academic approaches; 93Z6700
Academic Disciplines
African-American studies, future challenges; 93Z7121
equitable social order/steady growth, spontaneous mechanism's role, social science models' inadequacy; 93Z6915
humanities crisis, professionalism/cultural issues, US; 93Z7822
key sociobiology concepts' acceptance, animal behavior/cultural-biological anthropology/developmental psychology subdisciplines, US; 1984/85 questionnaire data; 93Z8337
theology-pedagogics relationship; 93Z8054
women's studies, philosophical pluralism approach; 93Z9257
Academic Freedom
scientists, research freedom/social responsibility; 93Z7850
Access
abortion, prevalence/accessibility/doctors' attitudes, Canada; 1970-1991 official statistics/surveys; 93Z8553
contraceptive use, married women, rural Bangladesh; family planning availability; questionnaire; 93Z8320
human immunodeficiency virus risk, runaway/street youth, access to care issues; 93Z9199
Accidents
community-level accident prevention programs; 1984-1989 case study; Sollentuna, Sweden; 93Z9153
immigrants, violent/accidental mortality, Canada; 1970-1972 empirical data; 93Z7153
nuclear incidents, accident/criminal/status quo violation designation; 93Z9170
Acculturation
adaptation/acculturation, Taiwanese immigrants, South Africa; 93Z7154
adjustment, Vietnamese refugee families, San Diego, California; social/psychological factors; panel data; 93Z7165
Asian Americans, acculturation-parenting style-internalized self-concept relationships; inventory/other data; 93Z7143
chronic otisis media, acculturation factors, Eskimos, Yukon-Kuskokwim Delta; secondary data; 93Z8747
cultural métissage, Latin America; illustrative example; 93Z7243
drinking attitudes, acculturation effects, Japanese/Japanese Americans; interviews; Japan/Hawaii/California; 93Z7223
drinking patterns, Anglos/blacks/Mexican Americans, San Antonio, Texas; acculturation; 1988 community survey; 93Z7132

immigrant social integration policy, Netherlands; 93Z7110
immigration experiences, Chinese/Filipinos/Japanese, US; secondary data; 93Z7123
international outmigration impacts, Sylhet village, Bangladesh; 1987/88 fieldwork; 93Z8295
migration to Orange County, California, family adjustment/coping; questionnaire/other data; 93Z8486
minority cultures/immigrant colonies, acceptance/reactions, Western Europe; 93Z7182
modernity/ethnicity interaction, immigrants, Denmark, nostalgic/aesthetic modes; 93Z7131
organizational cooperation, Polish-emigre/Polish-American groups; 1976-1989 archival/other data; Chicago, Illinois; 93Z9052
religious symbols' use, immigrant adaptation; participant observation; Moroccan Muslims/Turkish Christians, Brussels, Belgium; 93Z8128
Salvadoran refugee adaptation, Montreal, Quebec; 1988/89 interview data; 93Z7107
second-language students' educational needs/perceptions; questionnaire; Vietnamese 10th/11th graders; southern California; 93Z7933
Spanish creole identity/acculturation; colonial Mexico; 93Z7228
USSR immigrants, Israeli citizens' attitudes/absorption process; questionnaire; citizens, Negev; 93Z7106
Vietnamese refugees, resettlement processes/change, Philippine/Hong Kong refugee camps; fieldwork; 93Z8299

Accumulation
money, international accumulation/mobility, national monetary policy contradictions; 93Z9084

Accuracy
differentiation/accuracy ratings, well-defined performance dimensions's impact; survey data; university students; 93Z9083
judgment confidence accuracy; empirical literature review; 93Z9072
model fit assessment errors; illustrative examples; 93Z6759
sealed booklet survey method, sensitive issues, accuracy tested; youth, Australia; 93Z7568
stressful event reporting, children ages 3-7; videotape/interview data; medical clinic patients; 93Z7942

Achievement
Caucus of Black Sociologists, 1968-1976; 93Z6825
institutional problems/accomplishments/funding, US college/university presidents' assessments; survey data; 93Z7036

Achievement Tests
children, educational examination results; examiner-examinee interaction; psychoeducational battery; 93Z7066

Acquired Immune Deficiency Syndrome
acquired immune deficiency syndrome attitudes, adolescents, Cali, Colombia; workshop; pre-/posttest questionnaire data; 93Z8696
acquired immune deficiency syndrome attitudes, rural nurses; personal/professional factors; questionnaire; New York, Pennsylvania; 93Z7833
acquired immune deficiency syndrome attitudes/knowledge, college students, Cali, Colombia; training workshop; pre-/posttest questionnaire/scale data; 93Z8624
acquired immune deficiency syndrome crisis, ethical/public policy challenges; 93Z8680
acquired immune deficiency syndrome education, African-American communities, news media/community discourse impediments; illustrative example; black newsanchorman's death; 93Z8658
acquired immune deficiency syndrome education/training program, health professionals; multistate project; 93Z8701
acquired immune deficiency syndrome epidemic, Africa, causes/prevention efforts; 93Z8718
acquired immune deficiency syndrome infection rate, adolescents, New York City; statistics; 93Z8778
acquired immune deficiency syndrome information, state legislators; 1990 survey data; 93Z8622
acquired immune deficiency syndrome knowledge/attitudes, college students; education course; scale data; Chicago, Illinois; 93Z8744
acquired immune deficiency syndrome knowledge/behavior/attitudes, African-American women, questionnaire developed; pilot study; 93Z6709
acquired immune deficiency syndrome misinformation, prevention implications, US adults; 1988 survey data; 93Z8651
acquired immune deficiency syndrome mortality, inadequate government/community responses, sub-Saharan Africa; 93Z8625
acquired immune deficiency syndrome patients, human rights violations, Canada; 93Z9088
acquired immune deficiency syndrome prevention, public education campaigns, social marketing model, Ontario; 93Z8732
acquired immune deficiency syndrome research, first decade's findings/trends; 93Z8822
acquired immune deficiency syndrome risk reduction programs' effectiveness, gay/bisexual men; questionnaire data; Toronto, Ontario; 93Z8736
acquired immune deficiency syndrome risk reduction, affective/sexu behavior management; longitudinal interview data; Switzerland; 93Z8627
acquired immune deficiency syndrome risk, street children/youths, preventive health service needs; 93Z8617
acquired immune deficiency syndrome risk/attitudes/behavior, colle students vs sexually transmitted disease patients; scale data; Nort Carolina; 93Z8621
acquired immune deficiency syndrome stigma; knowledge/gender/sexual orientation; scale/test data; southeastern university; 93Z87
acquired immune deficiency syndrome sufferers, experimental treatment access; 93Z8713
acquired immune deficiency syndrome, Brazilian women, epidemiol ical characteristics; questionnaire data; Rio de Janeiro; 93Z8670
acquired immune deficiency syndrome, college students' response; be havioral science research review; 93Z8723
acquired immune deficiency syndrome, educational needs/preferenc parents/youth/school professionals; survey/interview data; Seattle Washington; 93Z8633
acquired immune deficiency syndrome, government policy, People's Republic of China; 93Z8608
acquired immune deficiency syndrome, health professional education program audit, evaluator's perspective; 93Z8700
acquired immune deficiency syndrome, health professional education program evaluation/audit; audit reports; 93Z8655
acquired immune deficiency syndrome, health professionals' training program, evaluation audit methodology; 93Z8721
acquired immune deficiency syndrome, heterosexual partners' discussions; survey data; undergraduates, US; 93Z8629
acquired immune deficiency syndrome, individual rights vs societal protection; medical literature review; 1983-1989; 93Z8686
acquired immune deficiency syndrome, infection via transfusion, prevention efforts, developed countries; 93Z8708
acquired immune deficiency syndrome, intravenous drug users, Europe; statistical data; 93Z8618
acquired immune deficiency syndrome, knowledge/attitudes, Master of Social Work field practicum students; education program; pre-/posttests; 93Z8694
acquired immune deficiency syndrome, local community responses, professionally sponsored organizations/grass-roots activists; 93Z7535
acquired immune deficiency syndrome, medical ethics, Third World; 93Z8643
acquired immune deficiency syndrome, prevention language/discours 93Z8684
acquired immune deficiency syndrome, research issues; trend report; 93Z8748
acquired immune deficiency syndrome, sexually risky behaviors, influ ential social lifestyle factors, homosexual men, Austria; 1990/91 in terview data; 93Z8416
acquired immune deficiency syndrome, youth education, US health educator challenges; 93Z7989
acquired immune deficiency syndrome-infected African-American women, low public visibility; 93Z8657
acquired immune deficiency syndrome-related drug misuse research, sampling bias; case study; amphetamine misuse; 93Z8850
acquired immune deficiency syndrome-related service provision/help-seeking research changes; literature review/research suggestions; 93Z8839
acquired immune deficiency syndrome/drug abuse, policy challenges/responses; historical perspective; 93Z8814
acquired immune deficiency syndrome/sexuality issues, pediatricians' educative role; questionnaire data; US; 93Z8374
adaptational/survival strategies, homeless youth, US/Brazil, acquired immune deficiency syndrome prevention implications; ethnographic studies; 93Z8683
adaptive coping styles-social support relationship, human immunodeficiency virus-infected homosexual men; survey data; 93Z8784
AIDS (acquired immune deficiency syndrome) Institute's evolution, New York City, 1983-present; 93Z8676
bereavement reactions/depression, homosexual male friends/lovers of acquired immune deficiency syndrome victims; psychometric data; New York City; 93Z8791
condom use-human immunodeficiency virus status relationship, Danish homosexual/bisexual men; questionnaire data; 93Z8443
contraceptive methods/human immunodeficiency virus prevention knowledge, female clinic clients; interviews; southeastern state; 93Z8574

drug abuse research, human immunodeficiency virus-related repriorizing; journal issue introduction; 93Z8730
drug use/human immunodeficiency virus risk-taking behavior, methadone maintenance clients, Australia; 1990 blood tests, other measures; 93Z8821
government responses, acquired immune deficiency syndrome epidemic, US/People's Republic of China; political/cultural norms' impact; 93Z8726
hepatitis B virus/human immunodeficiency virus, prevalence/risk factors, alcoholics, New York City; antibody tests, questionnaire data; 93Z8663
HIV (human immunodeficiency virus) transmission/AIDS (acquired immune deficiency syndrome) control program, Uganda, community participation; 93Z8722
homosexual males, behaviors/other characteristics, Peru/Argentina; questionnaire/inventory/scale data; Lima/Rosario; 93Z8417
human immunodeficiency syndrome-infected health care professionals, practice restrictions, ethical issues, US; Senate documents; 93Z8649
human immunodeficiency virus (HIV) screening, drug users, HIV seroconversion rate decline, San Francisco, California, 1985-1990; case study; 93Z8864
human immunodeficiency virus infection, homeless youth, San Francisco, California, prevention strategies; 93Z8653
human immunodeficiency virus infection, intravenous drug users, research; difficulties/approaches; 93Z8877
human immunodeficiency virus knowledge/attitudes/behavior, Finns, 1986-1990; questionnaire data; 93Z8734
human immunodeficiency virus pandemic's future course, time-dependent risk model, US; health statistics; 93Z8716
human immunodeficiency virus reduction strategies, injecting drug users, evaluation model proposed; 93Z8879
human immunodeficiency virus risk behavior/methadone maintenance therapy retention, antisocial personality disorder patients; interviews; 93Z8829
human immunodeficiency virus risk, runaway/street youth, access to care issues; 93Z9199
human immunodeficiency virus, female-specific symptoms; health statistics; 93Z8328
human immunodeficiency virus, immigrant screening techniques/methods; statistical/other data; 93Z8743
human immunodeficiency virus, knowledge/attitudes/behaviors, at-risk women; survey data; Florida; 93Z8706
human immunodeficiency virus-infected health care professionals, practice restrictions, ethical issues, US; 93Z8634
human immunodeficiency virus-related methadone maintenance program changes, Australia, research implications; 93Z8742
human immunodeficiency virus-related research, National Institute on Drug Abuse, US; 93Z8878
human immunodeficiency virus/acquired immune deficiency syndrome activism, women's involvement/intergroup conflict, Victoria, Australia; 93Z7542
human immunodeficiency virus/acquired immune deficiency syndrome risk, young people; 93Z8603
human immunodeficiency virus/acquired immune deficiency syndrome understanding/education, primary-age children, GB; observational/other data; children/parents/teachers; 93Z8642
human immunodeficiency virus/acquired immune deficiency syndrome; social workers' attitudes/knowledge/experiences; questionnaire data, social workers; East Coast city; 93Z8648
human immunodefiency virus/acquired immune deficiency syndrome knowledge/attitudes, Michigan adults; 1990 survey data; 93Z8645
information- vs skill-based acquired immune deficiency syndrome prevention intervention; questionnaire data; student teachers, Zimbabwe, 93Z8745
injecting drug users' human immunodefiency virus transmission dynamics, mathematical model development; 93Z6756
injecting drug users, health care workers' attitudes; questionnaire; alcohol research unit/acquired immune deficiency syndrome treatment facility; 93Z8874
inmates with acquired immune deficiency syndrome, community hospital, guards' adaptations; observation; 93Z8241
intravenous drug use patterns, Rotterdam, Netherlands/Bronx, New York; drug policies; observational/empirical data; 93Z8835
intravenous drug use-human immunodeficiency virus relationship; research review; 93Z8729
lesbian/gay adolescents, human immunodeficiency virus risk, health education needs; 93Z8632
media-based health interventions, mass communications research; 93Z7604
NAMES Project's AIDS (acquired immune deficiency syndrome) Memorial Quilt, social textuality; 93Z8661
psychiatric morbidity, human immunodeficiency virus-positive patients, Canada; interview data, medical histories; 93Z8755
public health sector institutionalization early urban communities, epidemic treatment models; 93Z8641
public policy, drug use/acquired immune deficiency syndrome prevention, Netherlands; statistics; 93Z8635
route transitions, self-administered drug users; empirical data; heroin users, London, England/New York City; 93Z8880
safe-sex discourse, eroticism maintenance; 93Z7050
sexual behavior, heterosexual college students, acquired immune deficiency syndrome context; 1982-1988 survey data; 93Z8616
sexual networking, historical regional differences, sub-Saharan Africa, acquired immune deficiency syndrome research implications; 93Z8415
sexual risk behavior, cultural rules/norms, human immunodeficiency virus positive/negative Baganda women, Kampala, Uganda; questionnaire; 93Z8690
sexually transmitted diseases, traditional healer vs biomedical treatment, sub-Saharan Africa; 1981-1985 participant observation/interview data; herbalists/diviners, Swaziland; 93Z8654
substance abuse/sexual behavior risk perceptions, social construction schema; 93Z8845
transition to drug injection, acquired immune deficiency syndrome/drug injection prevention program's effect; interview data; intranasal heroin users, New York City; 93Z8823

Action
green consumerism, collective action perspective; 93Z7477

Action Research
neighborhood movement, Toledo, Ohio, participatory action research; 93Z7555
poverty action/research/policy, UK; 93Z9184

Action Theory
ethnic minorities, positive action policies, Netherlands; interview data; general population, public sector managers; 93Z7091
Luhmann, Niklas, action vs social systems theories, "fruitfulness" heuristic concept; 93Z6943
pedagogical utopia, future projections, action theory conceptualization; 93Z7987
theory of action, Alfred Schütz, utility theory applied; article/comments; 93Z6885

Activism
acquired immune deficiency syndrome, local community responses, professionally sponsored organizations/grass-roots activists; 93Z7535
active citizenship participation, school governing boards; 93Z7986
alcohol use/attitudes, former activists, 1960s/1970s student movement, Finland; interviews; 93Z7707
antiwar protest/black activism, white working-class backlash, Buffalo, New York, 1960s; 93Z7608
child custody/support reform, claims making/rhetorical strategies, fathers' vs mothers' right groups; literature review, media accounts, other data; 93Z8186
civil rights activism, 1961 Freedom Rides, media/Kennedy administration reactions; 93Z7544
ethnic minorities, positive action policies, Netherlands; interview data; general population, public sector managers; 93Z7091
grass-roots peace activism, international change impacts, US/Western Europe; 93Z7541
industrial pollution, public right-to-know movement, Canada; 93Z9128
political activism, long-term political/sex-role/parent-child relationship impacts; 1971/1985 questionnaire data; intergenerational families, California; 93Z7528
rank-&-file feminist activism, women, US, predictive factors; 1983 General Social Survey; 93Z9246

Activities
Caucus of Black Sociologists, 1968-1976; 93Z6825

Actors
Chaplin, Charlie, German reception, 1920s/1930s; textual analysis; 93Z7964

Adjustment
adaptational/survival strategies, homeless youth, US/Brazil, acquired immune deficiency syndrome prevention implications; ethnographic studies; 93Z8683
adaptive functioning/academic performance/emotional adjustment, homeless elementary school-age children, Madison, Wisconsin; school records, teacher ratings; 93Z9213
adjustment, Vietnamese refugee families, San Diego, California; social/psychological factors; panel data; 93Z7165
adopted children, psychological/social adjustment; family structure; scale/checklist data; 93Z8343

aging adjustment, cognitive theory development; longitudinal research; Bonn, West Germany; 93Z8928
corporate career choice, left-wing Harvard (Cambridge, Massachusetts) law students, psychological accommodation strategies; interviews; 93Z7823
economic hardship, farm household adjustment, Iowa; 1984-1987 poll data; 93Z7892
ex-offender reintegration, US; employment; interviews/other data; released inmates, Texas; 93Z8235
mental health programs, European schools; evaluation data; Emotional Instructional Program, Spain; 93Z8772
migration to Orange County, California, family adjustment/coping; questionnaire/other data; 93Z8486
myocardial infarction, patients' psychosocial adaptation, emotion- vs problem-focused coping strategies; longitudinal scale data; Canberra, Australia; 93Z8733
preschoolers' play/verbalizations, post-Hurricane Hugo, South Carolina; 1989/90 questionnaire data; parents; 93Z9174
remarriage transition, divorced custodial mothers, adolescent adjustment; longitudinal interview/questionnaire/other data; white families; family systems perspective; 93Z8410
Salvadoran refugee adaptation, Montreal, Quebec; 1988/89 interview data; 93Z7107

Administrators

administrative discretion, Immigration and Naturalization Service; observation/interview data; airport/border port officials; 93Z7373
funding uncertainty, nonprofit organizations; interview data; administrators; 93Z7424
ombudsman office, Poland; Commissioner's annual report date; 93Z7440
work organization, administrative personnel, French Ministry of Education; 93Z7264

Admissions

student admissions, Danish universities; theoretical analysis; 93Z8044

Adolescents

acquired immune deficiency syndrome attitudes, adolescents, Cali, Colombia; workshop; pre-/posttest questionnaire data; 93Z8696
acquired immune deficiency syndrome infection rate, adolescents, New York City; statistics; 93Z8778
acquired immune deficiency syndrome risk, street children/youths, preventive health service needs; 93Z8617
adolescence, culture-bound syndrome perspective, late-20th-century US; 93Z8381
adolescent alcohol/drug use, risk evaluation; 93Z8370
adolescent delinquents vs status offenders, neurocognitive/academic achievement differences; psychometric data; inner-city US; 93Z8974
adolescent development, psychological stress, buffering factors; questionnaire/scale data; Lausanne, Switzerland; 93Z6999
adolescent drug abuse prevention, risk-focused community mobilization project, Washington; 93Z8857
adolescent drug use, relative risk factors; questionnaire data; 15-/16-year-olds; 93Z8881
adolescent drug use; family adaptability/cohesion; questionnaire/scale data; Indonesian/US families; 93Z8515
adolescent educational aspirations, family/school influences; 1980 High School & Beyond data; black/white high-school seniors; 93Z8408
adolescent family relations/suicide, racism impacts; secondary research/case examples; 93Z7098
adolescent problems, parental help-seeking behavior; questionnaire; Tel-Aviv, Israel; 93Z8522
adolescent risk, contributory contextual factors; 93Z8391
adolescent risk, general conceptual framework; 93Z8382
adolescent sexual attitudes/behavior, Federal Republic of Germany, 1970 vs 1990; interview data; 93Z8442
adolescent sexual behavior; alcohol/drug use; survey data; 16-19-year-olds, Massachusetts; 93Z8445
adolescent sexual standards/activity, class/racial differences; interviews; black/white teenage mothers, Chicago, Illinois; 93Z8375
adolescent sports participation, integrative/physiological effects, Iceland; 1989 survey; 93Z7647
adolescents at risk, etiology/typology; 93Z8383
adolescents at risk, US; conference summation; 93Z8397
adolescents, risk-taking behavior/gender-family perception relationship; scale data; high school students, Oklahoma; 93Z8398
adolescents, social change impacts/economic future, Australia/Nigeria/US; 3-book review essay; 93Z8387
antisocial behavior correlates, white working-class adolescents, northeastern US; interview data; 93Z8980
bicultural/biracial adolescents, developmental task conflict, treatment implications; clinical case studies; 93Z8378
birth control attitudes, female Hispanic teenagers; personal/family factors; 1984/85 questionnaire; New York; 93Z8552
childrearing support, black/white inner-city adolescent mothers; interviews; 93Z8401
children's time allocation, single- vs dual-parent families; maternal employment status; time-use data; California; 93Z8493
class-delinquency relationship, theoretical problems; 1987/88 survey data; street youth vs adolescents in school, Toronto, Ontario; 93Z8975
crowding perceptions, Turkish teenagers; spatial/social variables; questionnaire data; 93Z9182
drinking patterns, adolescent socialization, family's influence; 1985 questionnaire data; 93Z8865
drug use etiologies/consequences, junior-high school students, Los Angeles, California; longitudinal questionnaire data; 93Z8813
evaluation research, cooperation's value; case study; 93Z6719
family functioning, parent vs adolescent perceptions, clinical/nonclinical families, Brisbane, Australia; questionnaire/scale data; 93Z8516
family health promotion practices/beliefs, early adolescents' perceptions; scale data; 93Z8470
family opportunity structures-adolescents' educational/occupational aspirations relationship, ethnic differences, Australia; interview data; Anglo-Australian/English/Greek/Italian parents/children; 93Z7122
female adolescent talk, feminist poststructuralist analysis; informal interview transcript; 93Z7952
female sexual pleasure/empowerment, negotiated sexual relations with men; empirical data; women ages 16-21, London/Manchester, England; 93Z8421
first coitus seasonality, adolescents/young adults, US; questionnaire/survey data; 93Z8440
gambling activities, English adolescent males; qualitative data; 93Z8833
homeless youth, legal/human service barriers, social work advocacy implications; 93Z8373
human immunodeficiency virus infection, homeless youth, San Francisco, California, prevention strategies; 93Z8653
human sexuality/gender identity socialization process, infancy-late adolescence; research review; South Africa; 93Z8425
identity formation conflicts, biracial adolescents; 93Z8395
illegal behavior, age/period/cohort effects, adolescents; strain/control/learning theories' infusion; national longitudinal survey/Census/other data; 93Z8948
inner-city school children, demographic/educational disparities; 1988 national data; 8th graders; 93Z7136
IQ scores/academic achievement, black adopted vs other adolescents, transracial families; records, interviews, test/other data; Minnesota; 93Z7047
learning/instructor communication styles, student preferences; gender/grade level/college major; 1987 questionnaire data; adolescents, grades 8-12/college students; 93Z8007
lesbian/gay adolescents, human immunodeficiency virus risk, health education needs; 93Z8632
local identification/commitment, people ages 16-19, GB; questionnaire data; 93Z6990
love attitudes/beliefs, early/middle adolescents; 1991 questionnaire data; 93Z8392
male adolescent sexual offenders, Toronto, Ontario; clinical assessments; 93Z9214
official vs self-reported delinquent behavior; parental/adolescent family interaction perceptions; interviews; 7th/8th graders, Rochester, New York; 93Z8977
physique, diachronic trends, female university students; family variables, socioeconomic class; 1971-1986 measurements; Coventry, England; 93Z8340
political socialization, Israeli adolescents; television news shows; questionnaire data; parent-child pairs; 93Z7592
premarital adolescent sexual activity/contraceptive use, Santiago, Chile; 1988 survey data; 93Z8420
premarital pregnancy/its resolution, white adolescent females; attitudes/personality variables; National Longitudinal Survey of Youth; 93Z8571
premaritally pregnant urban adolescents, longitudinal research procedures; empirical data; Pacific Northwest; 93Z8379
prenatal health care program, black adolescent females' participation, southern US; sociodemographic factors; 1988 questionnaire data; 93Z8400
problem behaviors, virgin/sexually experienced/pregnant/parenting adolescents; 1980 national survey data; black/white males/females; 93Z8385

eligious family values, young adults; questionnaire; 93Z8406
emarriage transition, divorced custodial mothers, adolescent adjustment; longitudinal interview/questionnaire/other data; white families; family systems perspective; 93Z8410
unaway/homeless youth, services/care system, Los Angeles, California; 93Z9212
self-esteem/identity construction, teenagers; family cohesion/educative style; interviews; families; 93Z8536
service needs, pregnant homeless vs nonhomeless youths; interview data; clinic patients, Los Angeles, California; 93Z9207
slot ("fruit") machine gambling adolescents, UK; interview/questionnaire data; 93Z8832
smoking behavior/opinions, Japanese schoolchildren; Japan Adolescent Smoking Survey; 93Z8862
soccer participation continuance, male adolescents, Oslo, Norway; sport-specific factors; questionnaire; 93Z7644
statutory emancipation of minors; interviews; adolescents, California; 93Z8407
stress levels, German adolescents; work force entry, social aspirations; questionnaire data; students; 93Z8390
substance abuse, adolescents; family cohesion, other factors; empirical data; 93Z8409
teenage childbearing, economic consequences, black vs white women, 1968-1987; Panel Study of Income Dynamics; 93Z9240

Adopted Children
adopted children, impact of reunion with biological parents; questionnaire data; Ontario; 93Z7035
adopted children, psychological/social adjustment; family structure; scale/checklist data; 93Z8343
children's IQ/cognitive ability development; community factors; longitudinal Colorado Adoption Project; 93Z7001
IQ scores/academic achievement, black adopted vs other adolescents, transracial families; records, interviews, test/other data; Minnesota; 93Z7047

Adoption of Innovations
abortion attitudes, regional subcultures, US; 1988-1990 General Social Survey data; 93Z8583
clerical skill; office technologies; case studies/interviews; managers/clerks, England; 93Z7273
computer/animal behavior sciences, research trends' convergence; 93Z8274
contraception adoption, motivations/costs, Bohol province, Philippines; survey data; 93Z8573
division of labor, workforce skilling; technological change; interviews; firm respresentatives, Rochdale/Aberdeen, UK; 93Z7324
household capital-labor substitution, new technology adoption, Canada; 1923-1971 survey data; Ontario; 93Z7262
industrial innovation failure; management problems; case study; computer components firm, GB; 93Z7421
modern technology acceptance, Netherlands, 1850-1920, differing ideological perspectives; 93Z8278
new information technology, European Community member states' participation; survey data; company managers/employee representatives; 93Z7278
reproductive technologies, public opinion; interview data; Switzerland; 93Z8562
technological advancements, resulting economic cooperation, industrial organizations; 93Z8275
technological development research/management issues; 9-chapter overview; 93c01703
technological innovation, factory culture impact, Mexican firms; case studies; 93Z7213
technology adoption, maize-growing farmers, Swaziland; field survey; 93Z7899
technology uses, social shaping, functions/limitations; 93Z8276
technology-mediated communication, organizational process impacts; 6-chapter empirical analysis; 93c01701
workplace mechanism, computerized control systems' limitations, manufacturing industries; 93Z7363
workplace technology adoption, end-user training; 9-chapter empirical analysis; 93c01702

Adorno, Theodor Wiesengrund
acceptance speech, Theodor W. Adorno prize, 1989; 93Z6839
Adorno, Theodor W., critical theory, Jürgen Habermas's interpretation, US reception; 93Z6902
utopian vs conservative intellectuals, Germany; 93Z9023

Adult Children
adopted children, impact of reunion with biological parents; questionnaire data; Ontario; 93Z7035
aging, intergenerational views; interviews; older people/their adult children, midwestern outpatient clinic; 93Z8895
elderly parents who live near adult child, parent-child relationship; interviews; 93Z8513
elderly parents' helping networks, adult children's participation; interview data; upstate New York; 93Z8527
elderly parents-adult children interactions, cameo appearances/self-identity impacts; interviews; 93Z8473
psychological stress, adult caregivers to Alzheimer's disease-afflicted parents; interviews/other data; California; 93Z8894
reciprocity locus, parents-adult children relationships; social class; 1987/88 national survey data; 93Z8496
religion-cohabitation/marriage reciprocal relationship; 1962-1985 panel data; mothers/children, Detroit, Michigan; 93Z8171

Adult Development
adolescence, culture-bound syndrome perspective, late-20th-century US; 93Z8381
adult lifestyles, developmental prerequisites; longitudinal data; Finnish males age 8-26; 93Z7031
aging adjustment, cognitive theory development; longitudinal research; Bonn, West Germany; 93Z8928
identity formation conflicts, biracial adolescents; 93Z8395
individual development, personal-environmental influences' interaction; longitudinal interview data; 3rd-8th graders, Stockholm, Sweden; 93Z8355
individuation/intimacy processes, intergenerational transmission; survey data; middle-aged adults/college-age children; 93Z8481

Adult Education
continuing education, community role, metropolitan universities; 93Z8051

Adults
acquired immune deficiency syndrome misinformation, prevention implications, US adults; 1988 survey data; 93Z8651
adult children-parent coresidence consequences; literature review; 93Z8530
adult imprisonment, juveniles adjudicated delinquent; probation files; Dauphin County, Pennsylvania; 93Z8965
drinking habits, female adults, Helsinki, Finland; peer influence; questionnaire data; 93Z8837
employment-sense of control relationship; job/household circumstances; survey; adults, Illinois; 93Z7338
gender division of work; questionnaire data; Belgians ages 20-40; 93Z7270
hassles in adult life, survey/scale measures' validity; empirical data; museum visitors, Toronto, Ontario; 93Z8780
religious issues, adults' reasoning complexity, old vs young respondents; interview data; Canadian university/senior citizens center; 93Z8157

Advertising
alcohol advertising-sales level relationship; 1981-1987 monthly sales data; Saskatchewan; 93Z9096
body image distortions, young women; television advertising/programming; electronic rating data; university sorority members, southern US; 93Z7598
Channel One school news program, conservative coalition's business agenda, US; 93Z7977
cigarette point-of-sale advertising, ethnic neighborhoods; 1988 field data; San Diego County, California; 93Z8886
contraceptive use/supply source/costs, Honduras; Family Planning Association's marketing program; 1984-1987 national surveys; 93Z8554
gender-based power inequalities, organizations; network mechanisms; case study; advertising firm, New England; 93Z7378
spectator sports fans, sporting event relationship, media technology/advertising; 93Z7646
warning labels, alcoholic beverage containers, public awareness/behavioral-attitude change, US; 1989 national interview data; 93Z8667

Advisory Committees
police liaison committees' effectiveness, Northern Ireland; interview data; community representatives; 93Z8251

Advocacy
homeless youth, legal/human service barriers, social work advocacy implications; 93Z8373

Aesthetics
aesthetic politics, symbol/power/narrative, Benito Mussolini's fascist Italy; 93Z7184
Habermas, Jürgen, aesthetic rationality; 93Z6903
law-ethics/politics/aesthetics relationship; theoretical investigation; 93Z8188
reflexivity/modernity concepts, Ulrich Beck's vs Anthony Giddens's approaches; 93Z7063

values' representation in art, presentational codes; illustrative example; *The Marriage of Arnolfini*, Jan van Eyck; 93Z7971

Affiliation Need

social affiliation patterns, individual perceptions; secondary experimental data; 93Z6983

Affirmative Action

affirmative action debate, US, egalitarian vs individual value system's role; 93Z7118

affirmative action programs for women, male academic staff's reactance, University of Amsterdam, Netherlands; questionnaire data; 93Z9326

affirmative action, equal opportunity vs representation, US; 93Z7117

affirmative action, preferential treatment policies, French-Canadian women's endorsements; secondary research; 93Z9104

contemporary black artists, victimization/powerlessness, affirmative action's effect; 93Z7125

desegregation/affirmative action, US military; 93Z7353

income concentration, blacks vs whites, post-affirmative action legislation (1965); US Census data; 93Z7778

proposed affirmative action plans, Belgium, favorable deontological arguments refuted; 93Z7082

sexual/racial discrimination/affirmative action, universities; survey; employees, University of Kentucky, Lexington; 93Z7150

Africa

acquired immune deficiency syndrome epidemic, Africa, causes/prevention efforts; 93Z8718

African famines, drought/civil war causes; 93Z9158

African literature, colonial-postcolonial transition, thematic trends; 93Z7973

African managerial class, postcolonial role, Kenyan economics/politics; 93Z7788

agricultural development, Kenya; prices, imports/exports; 1964-1988 government statistical/survey data; 93Z7433

economic development problems/population movement, Mweka region, Zaire; 93Z6955

entrepreneurship, developing countries; ethnomethodological empirical data; Togo/Ghana; 93Z7419

legitimacy crisis, Africa, economic/political structures challenged; 93Z7766

long-distance trade systems, Africa/Europe, 900-1900; 93Z7509

marriage customs, multiple indicator approach, African societies; 1980/81 fertility survey; Ivory Coast; 93Z8511

modern African women, problems/struggle for independence; 93Z9183

African Cultural Groups

European identity, moral/spiritual forces' incorporation; 93Z7510

religious symbols' use, immigrant adaptation; participant observation; Moroccan Muslims/Turkish Christians, Brussels, Belgium; 93Z8128

Age Differences

age group equality; 93Z6910

age-gender bias, 1988 beri-beri outbreak, Gambia; case study; 93Z8611

age/sex norms/alcohol consumption, Japanese (Japan) vs Japanese Americans (Hawaii/California); interview survey; 93Z8849

community change, non-/younger/older migrants' perceptions; Cape Cod, Massachusetts; survey data; 93Z8896

cross-sex conversations, disagreement expression, gender differences; recorded discourse; male/female college graduates; 93Z7947

delayed childbearing, consequences for parenting; scale/other data; working mothers; 93Z8550

diabetes management-chronological age relationship, black patients, San Francisco, California; interviews; 93Z8918

economic participation, women, Papua New Guinea; age/gender stratification; interviews; Ganaga; 93Z9290

illegal behavior, age/period/cohort effects, adolescents; strain/control/learning theories' infusion; national longitudinal survey/Census/other data; 93Z8948

loneliness-social isolation relationship, Sweden; age/health status/labor force participation/gender; 1986 interview data; 93Z8790

nurses' attitudes toward suicide; age/clinical specialty/degree; questionnaire/anecdotal data; North Carolina; 93Z8585

parental child abuse, Yugoslavia; literature review; 93Z9001

psychological distress, inner-city elderly, San Francisco, California; interview data; [illegible]75

sex-role orientation, female nurses; age; questionnaire data; midwestern county; 93Z[illegible]10

student self-esteem/role strain/grades/anxiety, elementary-middle school transition; age relative to classmates; scale data; New York; 93Z8013

Age Groups

age group equality; 93Z6910

Ageism

Age Discrimination in Employment Act, US, scope/limitations; symposium; 93Z8933

Aggression

aggression, interethnic differences; experiments; Oriental/European Jews, Israel; 93Z7119

aggressiveness, contemporary Western society, cultural/sociological explanations; 93Z9223

Aging

aging adjustment, cognitive theory development; longitudinal research; Bonn, West Germany; 93Z8928

aging research, qualitative vs quantitative approaches; 93Z8913

aging, intergenerational views; interviews; older people/their adult children, midwestern outpatient clinic; 93Z8895

human life expectancy; environmental/sociodemographic factors; secondary data; long-lived populations; 93Z8314

impairment/disability, aging, measurement methods; 93Z8900

sociology of aging, theory generation; 93Z8901

Agrarian Societies

fertility/mortality, agricultural castes, West Bengal, India; maternal education; demographic/other data; 93Z8284

Agrarian Structures

kinship-based/agrarian-coercive societies, geopolitical/market dynamics, causes/effects; 93Z7493

Agribusiness

managerial networks, cooperative agribusiness, resource-dependence theory; 93Z7400

Agricultural Development

agrarian development, family sugar cane farms, colonial Taiwan, 1895-1945; government statistics; 93Z7473

agricultural development, Kenya; prices, imports/exports; 1964-1988 government statistical/survey data; 93Z7433

agriculture, petty production's survival, theoretical issues; 93Z6864

Agricultural Policy

agricultural businessmen's association, Mexico, demands/government response; 93Z7436

agricultural policy reform, structural adjustment/economic liberalization programs, sub-Saharan Africa; 1989/1991 fieldwork; Tanzania; 93Z7881

agricultural sector, People's Republic of China; economic reforms; statistical data; 93Z7891

agricultural trade, Australian vs Canadian diplomatic style; illustrative examples; 93Z7657

environmental protection vs economic growth, governments' contradictory commitments; case studies; Alberta/Manitoba; 93Z7457

environmental/resource-related agricultural policy, industrial/developing countries; illustrative experiences; 93Z9133

refugee settlement, planned agricultural self-sufficiency approach; 1990 field research; Zambia; 93Z7164

Agricultural Production

agricultural businessmen's association, Mexico, demands/government response; 93Z7436

agricultural development, Kenya; prices, imports/exports; 1964-1988 government statistical/survey data; 93Z7433

agricultural sector, People's Republic of China; economic reforms; statistical data; 93Z7891

peasant agriculture, Zimbabwe, class/gender interaction/differentiation; 1984 fieldwork; Murasi village; 93Z7797

population growth/well-being, nitrogen's significance; 93Z8329

world food order, global production/consumption relations; 93Z7454

Agricultural Research

agricultural science, societal/political legitimation process; case example; integrated pest management; 93Z8256

conventional vs alternative agriculture, land grant university faculty perceptions; survey data; Washington; 93Z7878

Agricultural Technology

chemical input reduction, farmers, New Jersey; labor problems; 1991 interviews; 93Z7898

conventional vs alternative agriculture, land grant university faculty perceptions; survey data; Washington; 93Z7878

Agricultural Workers

Caribbean migrant farm workers, Canadian agricultural employment program, 1966-present; 1987 questionnaire survey; Ontario; 93Z7884

Agriculture

food agroindustry, technological change, Argentina; 93Z7890

immigrant Indian agriculturalists' rise/fall, South Africa, 1860-1970; secondary data, government reports; 93Z7888

woodland traditions/social relationships, lower Illinois/lower Scioto/upper Duck river valleys; archeological findings; 93Z9064

Air Pollution

severely polluted neighborhoods, residents' socioeconomic status, Texas; 1980 Census/statistical data; 93Z9061

Air Transportation

Concorde airplane, jet engine design/development, sociology of organization perspective; secondary/archival/interview data; 93Z8273

mid-air collisions, influencing factors, probabilistic model; 93Z9157

organizational performance/change, causal model; case study; British Airways; 93Z7366

Alabama

ideological use of race, Birmingham, Alabama, industrial/postindustrial capitalist development phases; 93Z7160

Alaska

disaster contingency planning/prevention/response, 1989 *Exxon Valdez* oil spill's impact, Alaska; 93Z9156

gender status, Yupik culture, economic/political/domestic/religious spheres; 1966/67 fieldwork; Goodnews Bay, Alaska; 93Z7227

Inupiat social organization, Alaska, hunter-gatherer society models' explanatory deficiencies; 93Z7229

Koyukon Athabaskan (Alaska) language shift/death, contributing factors; 93Z7946

symbolic actions/indirect expressions, interpretation difficulties, Yupik (Inuit) society, central Alaska; 93Z7244

Tsimshian (British Columbia/Alaska) language preservation strategies; calendar texts analysis; 93Z7936

whale hunting, Inupiat Eskimos, Alaska; participant observation/ethnographic analysis; 93Z7250

Albania

abortion issues, Europe, 1920-1991; 93Z8548

Alberta

conservative church affiliation; article/reply; 93Z8107

old people/extended family concepts, African-/Anglo-American/-Canadian 4th-grade children; scale/interview data; Illinois/Alberta; 93Z8366

Alcohol Abuse

adolescent sexual behavior; alcohol/drug use; survey data; 16-19-year-olds, Massachusetts; 93Z8445

alcohol abuse problems/policies, Indian reservations, US; article/comments/response; 93Z8859

child abuse/neglect-family alcohol abuse relationship, American Indians; interview/patient record data; southwestern US health service; 93Z8996

collegiate alcohol abuse, 1979-1989 trends, New York; survey data; undergraduates; 93Z8868

drinking quantity/frequency, assessment methods; diary/survey/other data; Netherlands; 93Z8854

female alcohol abuse, 19th- vs 20th-century discourse; 93Z8812

mortality, social class differences, alcohol consumption's contribution, Sweden; 1980 census/1981-1986 mortality records; 93Z8856

violence, forensic psychiatric patients, alcohol abuse; archived diagnostic/other records, questionnaires; 93Z9221

Alcohol Use

adolescent alcohol/drug use, risk evaluation; 93Z8370

adolescent sexual behavior; alcohol/drug use; survey data; 16-19-year-olds, Massachusetts; 93Z8445

alcohol consumption, university students, biopsychosocial determinants; questionnaire data; 93Z8399

alcohol consumption-suicide/homicide rate relationship, Australia; 1966-1986 time series data; 93Z9226

alcohol consumption; control measures; literature review; 93Z8867

alcohol use, older adults; stressful life events; 1978-1984 General Social Survey data; 93Z8906

alcohol use/attitudes, former activists, 1960s/1970s student movement, Finland; interviews; 93Z7707

alcohol, pharmacological effects, nurses' knowledge; survey data; 93Z8682

alcohol-related deaths; occupational type; 1979-1981 California Occupational Mortality Study data; 93Z8815

college alcohol education programs, student attitudes/behavioral change; questionnaire; 93Z8816

decision-making processes, burglars; drug/alcohol use; interview data; 93Z8939

drinking attitudes, acculturation effects, Japanese/Japanese Americans; interviews; Japan/Hawaii/California; 93Z7223

drinking behavior, sex-role stereotypic perceptions; experimental data; undergraduates; 93Z8852

drug vs alcohol prohibition, policy reform issues; 93Z9093

drug/alcohol use, low-income youth/young adults, racial differences; interview data; urban Chester, Pennsylvania; 93Z8871

homelessness, drinking's role; interviews; homeless/marginally housed/domiciled adults, New York; 93Z9211

intoxication, positive expectancies/negative outcome balancing, male vs female alcohol users; questionnaire/scale data; college students, Australia; 93Z8887

licit/illicit drug use, young adults, Israeli kibbutzim; questionnaire; 93Z8843

mortality, social class differences, alcohol consumption's contribution, Sweden; 1980 census/1981-1986 mortality records; 93Z8856

religiosity-alcohol use relationship, US Protestants; religious stability/homogamy; 1972-1989 General Social Survey data; 93Z8116

student alcohol use/nonuse; self-concept; childhood/adolescense peer support; questionnaire; midwestern university; 93Z7030

substance use prevalence/patterns, Navajo high school youth; questionnaire/secondary data; 93Z8819

women's drinking, social control, Helsinki, Finland; survey/interview data; 93Z8840

Alcoholic Beverages

alcohol advertising-sales level relationship; 1981-1987 monthly sales data; Saskatchewan; 93Z9096

alcohol consumption rates, Organization for Economic Cooperation & Development countries; 93Z8876

alcohol policy, print media coverage, Finland; qualitative survey; 93Z8869

alcohol sale policy, public opinion, Finland; 1989/90 poll surveys; 93Z7563

drinking quantity/frequency, assessment methods; diary/survey/other data; Netherlands; 93Z8854

warning labels, alcoholic beverage containers, public awareness/behavioral-attitude change, US; 1989 national interview data; 93Z8667

Alcoholism

alcoholism treatment, patient matching techniques; secondary experimental data; 93Z8858

alcoholism, treatment programs/policies, ideological bases, US; 93Z8824

criminal recidivism-alcoholism relationship analyses, qualitative/quantitative data's utility; interview/other data; offenders, Finland; 93Z6746

hepatitis B virus/human immunodeficiency virus, prevalence/risk factors, alcoholics, New York City; antibody tests, questionnaire data; 93Z8663

parasuicide-alcohol dependency relationship, gender differences; 1968-1987 medical record data; treatment center, Edinburgh, Scotland; 93Z8870

problematic individual behavior, social origins, intervention strategies; illustrative application; individuals raised in alcoholic homes; 93Z9011

religious conversion, former alcoholics; interviews; 93Z8866

social skills, young adult child, parental alcoholism, family communication type; questionnaire data; psychology students; 93Z8844

teaching sociology, field visits to Alcoholics Anonymous meetings; 93Z6801

women's drinking, social control, Helsinki, Finland; survey/interview data; 93Z8840

Algeria

international order, foreign-policy change, potential Islamic challenges, Egypt/Iran/Algeria/Indonesia; 93Z7678

Alienation

democratic change/defiance, People's Republic of China, alienation in films; 93Z7013

immigrant social integration policy, Netherlands; 93Z7110

Alliance

European unification, British attitudes; 1990 questionnaire data; college students; 93Z6959

Alternative Approaches

addiction, perverse elements, psychoanalytic treatment alternative; 93Z8847

alternative *hakim* healing, Asian communities; 93Z7074

alternative medical treatments, Denmark; 93Z8678

conventional vs alternative agriculture, land grant university faculty perceptions; survey data; Washington; 93Z7878

intensive parole supervision, outcome success, Tennessee; 93Z8230

nonstandard work arrangements, Canada; 1989 General Social Survey; 93Z7297

popular justice, state vs alternative legal systems, India; 93Z8214

reality therapy, William Glassner's principles; illustrative example; youth wilderness camp, Texas; 93Z8969

recidivism, juvenile probationers; wilderness stress-challenge programs; 1987/88 quasi-experiment; Illinois; 93Z8967
social justice conflict, alternative framework; 93Z8196
television consumption estimation; response alternatives; questionnaire data; 93Z6688
traditional education, Europe, young adults' challenge; 93Z8040

Altruism
social work, community mediator role; 93Z8991

Alzheimer's Disease
black caregivers, demented family members, problems/stresses/coping strategies; interviews; Cleveland, Ohio; 93Z8923
psychological stress, adult caregivers to Alzheimer's disease-afflicted parents; interviews/other data; California; 93Z8894

Amazon
Amazon River travel, Peru-Brazil, 19th century, differential characterizations; 93Z7232
economic development project, town-/household-level effects, Brazil; fieldwork; Carajas project, Parauapebas; 93Z7464
food insecurity/indebtedness, rubber tapper households, Bolivian Amazon; 1981 survey data; 93Z7248

Ambiguity
code-switching, intention/meaning ambiguity, language use role, Papua New Guinea village; 93Z7961

Ambivalence
scientific evidence/expertise, environmental movement's dependence/distrust; case study data; 93Z9147

American Indian Reservations
alcohol abuse problems/policies, Indian reservations, US; article/comments/response; 93Z8859
substance use prevalence/patterns, Navajo high school youth; questionnaire/secondary data; 93Z8819

American Indians
American Indian art establishment/promotion, 1920s-1930s, class-based cultural notions; 93Z7969
Cherokee Appalachia, gender relations, 1755-1808, Western culture's impact; illustrative example; Chota village; 93Z9063
child abuse/neglect-family alcohol abuse relationship, American Indians; interview/patient record data; southwestern US health service; 93Z8996
cultural métissage, Latin America; illustrative example; 93Z7243
ethnic membership terminology, Mexico/Peruvian Andes; 93Z7246
federal War on Poverty (1960s-1970s), tribal-/family-/individual-level effects on Coast Salish tribes, Washington; 1986-1988 fieldwork, interviews; 93Z9190
Indian people's underrepresentation, college/university graduates, US/Canada; 93Z8041
Latin American Indians' history/identity/religion, Catholicism's influence; 93Z8169
native Amerindian languages, colonization process; 93Z7242
noninsulin dependent diabetes mellitus, Native American Indians, lived experiences; interviews; 93Z8699
Pueblo Indian societies' organization, internal frontier society explanation; 93Z6961
Samish dialect (Washington/British Columbia), language death process, survival factors; 93Z7940
substance use prevalence/patterns, Navajo high school youth; questionnaire/secondary data; 93Z8819
western films, American-Indian/Anglo perceptions; 93Z7144

Amsterdam, Netherlands
affirmative action programs for women, male academic staff's reactance, University of Amsterdam, Netherlands; questionnaire data; 93Z9326
study skills training evaluation, self-report vs note-taking task measurements; methodological experiment; students, University of Amsterdam, Netherlands; 93Z6736

Analysis
multilevel analysis, recent methodological developments, nontechnical review; 93Z6733

Anarchism
antianarchism campaign, US periodical literature's treatment, 1880-1903; content analysis; 93Z7589

Ancient Greek Philosophy
modern Greek legal system, ancient Roman/modern Western European tenets; 93Z8206

Andes
Andean culture, contemporary survival; book review essay; 93Z7548
Catholic brotherhoods, economic influences, Andean colonial society; 93Z7231
ethnic membership terminology, Mexico/Peruvian Andes; 93Z7246
southern Andean group identities/ethnicities, 17th-/18th-century Spanish colonial era; historically based anthropological case studies; 93Z7225

Andhra Pradesh, India
elderly, family care/support, contemporary India; survey; elderly, Andhra Pradesh; 93Z8909
sero-genetic variation, Reddi populations, Andhra Pradesh, India; blood/saliva samples; 93Z7210
voluntary organizations, finance/personnel problems, Andhra Pradesh India; income data rural development organizations; 93Z7427

Anger
affect, philosophical theories, objectual vs rationality views; 93Z6994
anger/impatience/irritability-acute coronary heart disease relationship, low-socioeconomic status middle-aged men; questionnaire/scale data; 93Z8692

Anglo Americans
intelligibility construction/contextual cues, amnesty education program; participant observation; 93Z8064
intergenerational support exchanges, Anglo-/European-/Latin-American women/mothers/grandmothers; questionnaire data; southeastern US metropolitan area; 93Z8502
western films, American-Indian/Anglo perceptions; 93Z7144

Angola
ethnic conflict, Iraq/Angola; international competition, military dependency; 93Z7130

Animal Human Relations
animal domestication processes, Americas; 93Z7180
animal research, biomedical ethics issues; 93Z8614
animal rights; book review essay; 93Z7521
bioethics/nature, animal experimentation controversy; personal experiences; practicing scientist; 93Z8257
computer/animal behavior sciences, research trends' convergence; 93Z8274
treatment of animals, moral concerns; introduction/article/comments/reply; 93Z7539

Animals
animal research, biomedical ethics issues; 93Z8614
animal rights movement, philosophical legitmacy, US; 93Z7557
computer/animal behavior sciences, research trends' convergence, 93Z8274
key sociobiology concepts' acceptance, animal behavior/cultural-biological anthropology/developmental psychology subdisciplines, US; 1984/85 questionnaire data; 93Z8337
treatment of animals, moral concerns; introduction/article/comments/reply; 93Z7539

Anomie
literary frames, Durkheimian anomie's impact; 93Z7069

Anorexia Nervosa
eating problems as coping strategy, African-American/Latina/white women; life history interviews; 93Z8883
psychiatry as social control mechanism, case study; anorexia nervosa; 93Z8831

Anthropologists
anthropology, Lewis H. Morgan's work/influences; 93Z6940
Powdermaker, Hortense, anthropological research/contributions to field; 93Z7251

Anthropology
African-American poverty, US, anthropological research critiqued; 93Z9198
anthropology of law, national/transnational context; 93Z8204
anthropology of law; 3-book review essay; 93Z8198
anthropology, Lewis H. Morgan's work/influences; 93Z6940
anthropology-colonial discourse relationship; case study; Sinhala cultural practices, Sri Lanka; 93Z7215
applied anthropology, praxis as central analytic motif; illustrative example; community-based health/research project, Ontario; 93Z8961
legal discourse, anthropological/linguistic analysis; 2-book review essay; 93Z8205
medical anthropology, Marxism's influence, Italy; 93Z8698
multicultural courses, US universities, anthropology departments' potential contribution; illustrative example; University of Alaska; 93Z8012
oral narratives as text, literary considerations; 93Z6734
Powdermaker, Hortense, anthropological research/contributions to field; 93Z7251
resistance, psychological construction; 93Z9260
tropical diseases research, rapid assessment procedures, anthropological methods; 93Z8685

Antipoverty Programs

frican-American poverty, US, anthropological research critiqued; 93Z9198
In *Educational War on Poverty. American and British Policy Making 1960-1980* by Harold Silver & Pamela Silver; review essay; 93Z8067
overty-education relationship, rural South Africa; secondary data; 93Z7993
ar on poverty, labor unions' role, racial conflicts; 93Z7547

iquity
conomic cycles-accumulation crises-hegemonic shifts relationship, 1700 BC-AD 1700; 93Z7499
volutionism, processual approach, cause/effect chains; illustrative example; Harappan (Indian)/Mesopotamian civilizations; 93Z7203
Greek drama/gender/concealments, Sigmund Freud's views; 93Z9297
omosexuality, social construction, ancient Greek vs contemporary society; 93Z9325
ong-distance trade systems, Africa/Europe, 900-1900; 93Z7509
military competition/state making/economic development, premodern northeast Asia, AD 800-1400; 93Z7496
modern vs ancient Mesopotamian world systems; illustrative example; Assyrian trading colony, 1900 BC; 93Z7483
